

COURSE DEVIATION GUIDELINES FOR UNDERGRADUATE AND GRADUATE COURSES

Course deviations are available for calendar deviations, time deviations, or hour/schedule type deviations.

Calendar Deviations

A department may request a calendar deviation for days/dates outside the regular sessions in the academic calendar; e.g., courses that meet for 12 weeks during a 16-week semester. These requests must be approved by the Department Head, the Associate Dean of Instruction and the Associate Vice President for Undergraduate Education (Attachment 1). Following approval, the Associate Vice President for Undergraduate Education will direct Course Management personnel to schedule the course.

A calendar deviation must be submitted each semester a course is offered outside the normal calendar.

Time Deviations

A department may also request a deviation for classes that do not meet during the official class meeting times as approved by the Instruction Council on March 8, 2005 (Attachment 2). A deviation is required if the department wishes to schedule a class that:

1. does not start at the standard time;
2. meets longer than the standard 50- or 75-minute class time (courses that meet during the approved evening times do not need to submit a deviation request); or
3. does not meet the standard days of week format (e.g., meets Monday and Thursday).

Departments must provide a very strong rationale for deviating from the official class meeting times. Course times that deviate from the normal schedule create conflicts in student schedules and drastically limit the availability of general university classrooms. They also impact final exam schedules.

Deviations from the standard start time are rarely granted, but requests for longer class meeting times may be approved if a departmental room is available or if the department schedules another course that meets in the same room on the opposite day (i.e., Monday and Wednesday or Friday, or Tuesday and Thursday).

The following are exceptions to the deviation requirement:

- Lab or discussion sections meeting in departmental rooms or labs may deviate from the regular course schedule, as long as they begin at an acceptable "start" time. *These times include starting at the half hour and ending 20 minutes after the hour using the set amount of instructional time required on the course.*
- Tulsa courses that meet for 3 hours, one day a week may do so without a deviation provided they begin at a regulation start time.

Credit Hour/Schedule Type Deviations

Courses approved at the catalog level with credit hour/schedule types of lecture, lab, and/or discussion (non-independent study courses) should be scheduled according to the following standards to provide schedule transparency to students before enrollment, ensure instructional minutes and other credit hour standards are met, to facilitate emergency response, and to allow actual classroom usage to be tracked:

1. On-campus, non-independent study courses with a traditional instructional method require meeting details (days, times and location).
2. Only courses approved as independent study at the catalog level may be offered with an independent study instructional method.

Departments may request a credit hour/schedule type deviation for non-independent study courses to vary from these standards, and must provide a syllabus or class plan with their request.
