The College of Education, Health and Aviation sends an annual magazine to approximately 3,000 active members and communicate email news and announcements to alumni throughout the year. The Alumni Society Board provides professional support and an immediate network of professional contacts. The Alumni Association provides scholarships for students in the College of Education, Health and Aviation. The organization also sponsors a Homecoming reception and other welcome events for students and faculty gatherings.

General Education Requirements
All undergraduate degrees in the College of Education, Health and Aviation require a minimum of 40 semester hours in general education that include the following: English Composition, analytical and quantitative thought, United States history and government, natural science, social and behavioral studies, arts and humanities, diversity, international dimension and electives. All degrees are consistent with the current University General Education requirements and the Oklahoma State Board of Education standards.

Departmental Clubs and Honor Societies
College of Education, Health and Aviation Student Ambassadors
College of Education, Health and Aviation Graduate Student Association
College of Education, Health and Aviation Student Council
Educational Media and Technology Student Association
Educational Psychology Student Society
Elementary Educators of Tomorrow
Flying Aggies
Health Promotion Club
Kappa Delta Pi (education honor society)
Kappa Kappa Iota
Omicron Tau Theta
OSU National Science Teachers Association Student Chapter
Phi Epsilon Kappa (health, physical education, recreation management and recreational therapy honor society)
Physical Education Club
Pre-Physical Therapy Club
Rho Phi Lambda
Recreation Management Club
Recreational Therapy Majors Club
School Psychology Graduate Student Organization
Student Oklahoma Education Association

Education Outreach and International Studies
Education Outreach and International Studies work together to facilitate the delivery of EHA course work and academic programs. Consistent with the OSU mission and in conjunction with faculty and academic programs in the EHA, Education Outreach and International Studies provide support, services and programs to meet the professional needs of educators advancing the state of Oklahoma and the nation while promoting and facilitating engagement of the college and university with state, national and international communities.

The goals of Education Outreach and International Studies are to reflect the expertise and promote the accomplishments of the College of Education, Health and Aviation faculty and staff and to foster activities and learning that develop faculty and students for multiple futures. Specifically, these offices work to:

Education Outreach and International Studies
• facilitate campus-based degree credit which enables students to pursue their academic goals in ways that fit their schedule and personal situations;
• extend off-campus degree programs to individuals pursuing degrees and professional certifications through a variety of different methods;
• provide opportunities for international experiences linking campus faculty and students to a wide range of global locations through travel trips, student teaching and cohort programs;
• assist workforce development initiatives through non-credit educational opportunities for employed adults in educational and governmental environments;
• coordinate professional conferences for the educational community, including school professionals and administrators, educational associations and state organizations; and
• offer a wide array of community development and cultural enrichment opportunities.

Academic Areas
• Professional Education Unit (p. 1438)
• School of Community Health Sciences, Counseling and Counseling Psychology (p. 1374)
• School of Educational Foundations, Leadership and Aviation (p. 1383)
• School of Kinesiology, Applied Health and Recreation (p. 1422)
• School of Teaching, Learning and Educational Sciences (p. 1403)

Undergraduate Programs
• Aerospace Administration and Operations: Aerospace Logistics, BS (p. 1390)
• Aerospace Administration and Operations: Aerospace Security, BS (p. 1391)
• Aerospace Administration and Operations: Aviation Management, BS (p. 1393)
• Aerospace Administration and Operations: Professional Pilot, BS (p. 1395)
• Aerospace Administration and Operations: Technical Service Management, BS (p. 1397)
• Applied Exercise Science: Pre-Professional, BS (p. 1424)
• Applied Exercise Science: Strength and Conditioning, BS (p. 1426)
• Career and Technical Education: Certification, BS (p. 1408)
• Career and Technical Education: Non-Certification, BS (p. 1410)
• Elementary Education, BS (p. 1412)
• Health Education and Promotion: Exercise and Health, BS (p. 1376)
• Health Education and Promotion: Public Health, BS (p. 1378)
• Nursing, BSN (RN to BSN) (p. 1380)
• Physical Education: Teacher Education, BS (p. 1429)
• Recreation Management and Recreational Therapy: Recreation Management, BS (p. 1432)
• Recreation Management and Recreational Therapy: Recreational Therapy, BS (p. 1434)
• Secondary Education: English, BS (p. 1414)
• Secondary Education: Foreign Language, BS (p. 1416)
• Secondary Education: Social Studies, BS (p. 1418)
• Sports and Coaching Science, BS (p. 1436)

Minors
• Aerospace Administration and Operations: Aerospace Security (AAAS), Minor (p. 1392)
• Aerospace Administration and Operations: Aviation Management (AAAM), Minor (p. 1394)
• Aerospace Administration and Operations: Professional Pilot (AAPP), Minor (p. 1396)
• Coaching Science (COAS), Minor (p. 1428)
• Creativity Studies (CRST), Minor (p. 1398)
• Leadership (LDRS), Minor (p. 1399)
• Learning and Motivation (EPSY), Minor (p. 1401)
• Multi-Tiered Systems of Instructional Support (MTSI), Minor (p. 1420)
• Pre-Counseling (PCOU), Minor (p. 1381)
• Public Health (PH), Minor (p. 1382)
• Recreation Management and Recreational Therapy (RMRT), Minor (p. 1431)
• Special Education (SPED), Minor (p. 1421)
• Unmanned Aircraft Pilot (UAP), Minor (p. 1402)

Graduate Programs
• Applied Exercise Science, MS (p. 1423)

School of Community Health Sciences, Counseling and Counseling Psychology

Dr. Julie M. Koch—School Head

The School of Community Health Sciences, Counseling and Counseling Psychology encompasses undergraduate and graduate academic programs in health education and promotion, mental health counseling, counseling psychology, school counseling and nursing. The School seeks to fulfill the traditional functions of teaching, research, outreach and public service that are consistent with the mission of Oklahoma State University. The mission is to foster the development, integration and application of knowledge, theory, skills and experiences to promote social, physical, psychological, educational and environmental health. Consistent with the goals of the University’s Professional Education Council’s Core Concepts and Goals Statement, faculty strives to demonstrate and perpetuate teaching based on theory and research-driven educational practices.

Course Prefixes

Courses that support counseling and counseling psychology are listed in the Catalog under the CPSY prefix. Courses in health education and promotion are listed under the HLTH prefix. Courses in nursing are listed under the NURS prefix.

Health

Bridget M. Miller, PhD—Joan Donelson Jacques Endowed Professor of Health Promotion and Program Coordinator

The health education and promotion program prepares students to provide preventive services in a community, corporate, or clinical setting. Students can choose between two program options: (1) Exercise and Health; or (2) Public Health. Students culminate their degree requirements with a semester-long internship during their final semester. Upon completion of their undergraduate degree, many students continue graduate study in academic fields like Public Health, Physical Therapy, Athletic Training, Exercise Science, or Medicine. This degree track also prepares students for credentialing opportunities such as the Certified Health Education Specialist (CHES) exam and certifications offered through the American College of Sports Medicine (ACSM).

BSN Nursing

Mary Malaska, DNP, RNC, CNE—Assistant Professor and Director

The RN to BSN program is an online baccalaureate degree program designed for individuals who have obtained Registered Nurse licensure and have successfully completed either an accredited associate’s degree or diploma program. The program is designed for working adult learners and focuses on health and wellness.

Counseling and Counseling Psychology

Hugh Crethar, PhD—Jennifer Jacques Flanery Endowed Professor of Community Counseling and Area Coordinator

The counseling and counseling psychology program areas offer graduate programs in mental health counseling and school counseling leading to the MS degree in counseling as well as a PhD degree in educational psychology, with an option in counseling psychology.

Programs/Areas of Emphasis Degrees

Degrees offered through the School of Community Health Sciences, Counseling and Counseling Psychology programs include Bachelor of Science (BS), Master of Science (MS), Education Specialist (EdS), Doctor of Education (EdD) and Doctor of Philosophy (PhD).

Counseling/Counseling Psychology

• Mental Health Counseling - MS
• School Counseling - MS
• Counseling Psychology - PhD

Community Health Sciences

• Health Education and Promotion - BS
• Nursing - BSN

Health and Human Performance

• Health Education and Promotion - BS, MS, PhD

Undergraduate Programs

• Health Education and Promotion: Exercise and Health, BS (p. 1376)
• Health Education and Promotion: Public Health, BS (p. 1378)
• Nursing, BSN (RN to BSN) (p. 1380)
• Pre-Counseling (PCOU), Minor (p. 1381)
• Public Health (PH), Minor (p. 1382)

Graduate Programs

The counseling and counseling psychology program areas offer graduate programs in mental health counseling and school counseling leading to the MS degree in counseling as well as a PhD degree in educational psychology with an option in counseling psychology.

Counseling Psychology

Carrie Winterowd, PhD—Clinical Associate Professor and Training Director

PhD Program

This program is accredited by the American Psychological Association and is based on the scientist-practitioner model of training. The program is designed to prepare students for counseling, consulting, teaching and research roles in various settings such as university counseling centers, academic departments, hospitals, public service settings such as prisons and Veterans Administration Medical Centers, business settings, mental health clinics and community settings. Students are required to follow a specified sequence of study in which academic coursework and practicum experiences are integrated. Students must also complete one year of full-time internship. Application materials for the counseling psychology program are due by December 1st for the following summer or fall enrollment.

Counseling MS

Tonya R. Hammer, PhD—Assistant Professor and Program Coordinator

Mental Health Counseling

This program is intended for individuals who wish to serve as professional counselors in a variety of human service and community
mental health agencies. Students may choose elective courses in selected areas of specification such as youth counseling, substance abuse counseling and mental health counseling. The program is designed to meet the academic requirement for licensure as a professional counselor in Oklahoma and the standards set by CACREP for national accreditation. Application materials for this program are due February 1st for the following summer or fall enrollment.

**School Counseling**

**MS Program**
This program prepares students to work as counselors in public schools, serving students, teachers and parents. The role of the school counselor is to coordinate the comprehensive school counseling program, focusing on the educational, career, personal and social development of students. Within this comprehensive school counseling program, school counselors provide counseling, consulting, coordinating and appraisal services. The school counseling program is designed to meet the certification requirements for the State of Oklahoma as well as requirements of the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Application materials for this program are due February 1st for the following summer or fall enrollment.

**Faculty**

Julie M. Koch, PhD—Associate Professor and Head
**Professors:** Alfred F. Carlozzi, EdD; Sue C. Jacobs, PhD; John S. C. Romans, PhD; Carrie Winterowd, PhD
**Associate Professors:** Hugh C. Crethar, PhD; Julie M. Croff, PhD; Tonya R. Hammer, PhD; Bridget M. Miller, PhD; Valerie McGaha, PhD
**Clinical Associate Professor:** Thomas R. Berry, PhD
**Assistant Professors:** Mary E.W. Malaska, PhD; Kelley E. Rhoads, PhD; Diane M. Stutey, PhD
**Clinical Instructor:** Alana K. Cluck, PhD

## Major Requirements

Minimum GPA of 2.75 with a minimum grade of “C” or “P” in each course

Select one of the following courses:

- HHP 2654: Applied Anatomy  
- or BIOL 3214: Human Anatomy
- HHP 3223: Motor Learning
- HHP 3663: Biomechanics
- HLTH 2213: Principles in Health Education and Promotion
- HLTH 2603: Total Wellness (S)
- HLTH 3613: Community Health
- HLTH 3643: Health Behavior Theory
- HLTH 3723: Principles of Epidemiology
- HLTH 3913: Alcohol and Drug Education
- HLTH 4533: Psychosocial Issues in Health Education/Promotion
- HLTH 4902: Pre-Internship Seminar
- HLTH 4973: Program Design in Health Education and Promotion
- HLTH 4990: Internship in Health Education and Promotion: Exercise and Health

Select one of the following:

- HHP 4773: Principles of Exercise Testing and Prescription
- HLTH 3113: Health Issues in Diverse Populations (D)
- HLTH 3603: Understanding HIV (DS)
- HLTH 4783: Health Issues in Gerontology
- NSCI 4133: Nutrition for Exercise and Sport

| Hours Subtotal | 51 |

## Other Requirements

- 40 hours of upper-division course work.
- Required for enrollment in HLTH 4990 Internship in Health Education and Promotion: Exercise and Health
  - Documentation of current first aid/CPR certification and
  - 2.75 GPA in Major Requirements, 2.75 GPA in College/Departmental Requirements, & 2.75 Overall GPA.
- Required for graduation:
  - 2.75 Overall GPA;
  - 2.75 GPA in College/Departmental Requirements; and
  - 2.75 GPA in Major Requirements.
- The student must earn minimum grades of “C” or “P” in the College/Departmental Requirements and Major Requirements.

Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.

- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.

- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.

- Degrees that follow this plan must be completed by the end of Summer 2024.

Other Requirements

- 40 hours of upper-division course work.
- Required for enrollment in HLTH 4880 Internship in Health Education and Promotion: Community Health
  a. Documentation of current first aid/CPR certification; and
  b. 2.75 GPA in Major Requirements, 2.75 GPA in College/Departmental Requirements, & 2.75 Overall GPA.
- Required for graduation:
  a. 2.75 Overall GPA;
  b. 2.75 GPA in College/Departmental Requirements; and
  c. 2.75 GPA in Major Requirements.
- The student must earn minimum grades of “C” or “P” in the College/Departmental Requirements and Major Requirements.

Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
• Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.

• Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.

• Degrees that follow this plan must be completed by the end of Summer 2024.

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student's declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

School of Educational Foundations, Leadership and Aviation

Susan Stansberry EdD—Associate Professor and School Head
Kathy Curry, EdD—Associate Professor and Associate School Head

The School of Educational Foundations, Leadership, and Aviation (SEFLA) offers degrees, options or certificates in the following areas: aviation and space; school administration; educational psychology; educational technology; school library media, online teaching; higher education; college student development; research, evaluation, measurement and statistics; and social foundations. These programs conduct scholarly inquiry and educate professionals in areas foundational to thought and practice in a wide variety of professional roles associated with business and educational and industry settings. Consistent with the goals of OSU’s Professional Education Council’s Core Concepts and Goals Statement, the faculty strives to demonstrate and perpetuate teaching that is based on theory and research-driven educational practices.

We provide specialized training at the undergraduate and graduate levels yet permit flexibility to enable students to meet individualized goals. General information about undergraduate degrees is offered under the "University Academic Regulations" section of the Catalog. General information about graduate degrees may be found in the "Master's Degree," "Certificates," "Doctor of Education," or "Doctor of Philosophy" areas of the "Graduate College" section of the Catalog.

Financial support is available for research assistantships and for qualified graduate students to assume teaching responsibilities under faculty supervision. Selections for assistantships are made in the spring semester for the following academic year. Interested individuals are encouraged to apply through the SEFLA website.

OSU NASA Education Projects. Susan Stansberry, Associate Professor of Educational Technology, and Steve Marks, emeriti Aviation and Space faculty, are investigators for the OSU NASA Education Program.

NASA STEM Pathway Activities Consortium for Education (NSPACE). OSU is the lead institution in activities supporting NASA’s goal to improve STEM instruction; increase youth and public engagement in STEM; enhance the STEM experience of undergraduate students; better serve historically underrepresented groups in STEM fields; and design education for a needed STEM workforce. The NSPACE project will leverage the skills and expertise of a group of innovative partners, including 13 institutions within the Texas A&M University System, Langston University, OSU’s Center for Foreign Nations, Northern Oklahoma College, the Oklahoma 4-H Foundation and the Technology for Learning Consortium. NSPACE supports STEM activities at the Johnson Space Center for K-12 students, educators, and community college and undergraduate students. Activities involve both online and onsite learning experiences at the center in Houston, as well as the STEM on Station program for students to learn about the International Space Station and human space exploration. Students benefit from the NASA Community College Aerospace Scholars program, an interactive online learning opportunity for students highlighted by a three-day experience at NASA, and Microgravity University, which gives educators and students the opportunity to visit the space center and conduct students’ experiments in a weightless environment.

Course Prefixes

Course prefixes in SEFLA include AVED (Aviation Education); EDLE (Educational Leadership - School Administration); EDTC (Educational Technology); EPSY (Educational Psychology); REMS (Research, Educational Measurements and Statistics); HESA (Higher Education and Student Affairs); and SCFD (Social Foundations).

Aviation and Space Program

Jon Loffi, EdD—Assistant Professor and Program Coordinator (Aviation and Space)

The Aviation and Space Program prepares students for careers in the aerospace industry. The BS in Aerospace Administration and Operations degree program offers five options: Professional Pilot, Aviation Management, Technical Services Management, Aerospace Security and Aerospace Logistics.

The Professional Pilot option prepares students for careers in flight operations in both the general aviation and the air carrier segments of the aviation industry. In addition to high quality aviation-related coursework, the student will attain FAA certifications for Private Pilot, Commercial Pilot-Instrument Rated for both single-engine and multi-engine aircraft and Certified Flight Instructor. The Professional Pilot option is compliant with Title 14 CFR of the Code of Federal Regulations Part 141 and accredited by Aviation Accreditation Board International (AABI).

The Aviation Management option prepares students for management positions in the aerospace industry. Employment opportunities include positions with fixed-base operators, air carriers, corporate flight departments, commuter and air taxi operations and a variety of career areas associated with airport operations, manufacturing, maintenance and government aviation and aerospace organizations. The Aviation Management option is accredited by Aviation Accreditation Board International (AABI).

The Technical Services Management option builds on an individual's technical experience in aircraft maintenance or avionics to prepare the students for management positions in all segments of the industry. Twenty-five hours of technical training may be credited toward this option if received from an accredited institution.

The Aerospace Security option prepares students for careers in homeland defense and aerospace security fields. Employment opportunities include governmental agencies and private industry that deal with aerospace security operations.

The Aerospace Logistics option prepares students to work in the aerospace logistics sector. Employment opportunities include positions with military and civilian maintenance, repair and overhaul (MRO) facilities worldwide as well as any aerospace organization involved in supply-chain management activities.

The Aviation and Space Program has an extensive industry-based management internship program established with aerospace industries, major and regional air carriers and a variety of other companies within the aerospace industry.

OSU is an educator member of the Aviation Accreditation Board International (AABI). The AVED Program is also an institutional member of University Aviation Association (UAA). AVED website (https://education.okstate.edu/aado)
Educational Leadership
Katherine Curry, PhD—Associate Professor and Program Coordinator (School Administration)

Educational leadership emphasizes School Administration. The PhD in Educational Leadership and Policy Studies is offered with options in Educational Administration and Higher Education; the Doctorate in Education (EdD) is offered in School Administration; and the Education Specialist (EdS) in Education has an option in School Administration. The Master of Science degree is offered with options in School Administration (a 36-hour program designed for those who aspire to the principalship). Students holding a related masters degree and teacher certification may add on principal certification through coursework and institutional recommendation. Admissions to the graduate programs in Educational Leadership are competitive and based on multiple factors. EPSY website (https://education.okstate.edu/epsy)

Educational Technology
Penny Thompson, PhD—Assistant Professor and Program Coordinator

The mission of Oklahoma State University’s Educational Technology program is to facilitate the growth of scholars and educational technology professionals through rigorous programs of study that provide exceptional hands-on, collaborative, and innovative learning, research and service experiences and are highly regarded at the international, national, state and university levels. The program website, edtech.okstate.edu (http://edtech.okstate.edu), offers greater detail. Programs/certifications include: MS in Educational Technology with options in Educational Technology and School Library Media, PhD in Education with an option in Educational Technology, Graduate Certificate in Online Teaching, and Certification in School Library Media. This program is also home to the Emerging Technologies and Creativity Research Lab (https://edtech.okstate.edu/techplayground). EDTC website (http://edtech.okstate.edu)

Educational Psychology
Mike Yough, PhD—Assistant Professor and Program Coordinator

Educational Psychology is concerned with all aspects of psychology pertaining to teaching and learning in educational settings. Educational psychologists are concerned with understanding how environments are structured to promote cognitive, personal and social development broadly as well as learning motivation. The role of Educational Psychology is to bring together theory and research from psychology and related disciplines in order to facilitate healthy human development and effective learning and teaching. Our Ph.D. program is designed to prepare graduates to teach in college or university settings, public education, and/or to do research in university, business, and government settings. The M.S. program is designed to help students develop the capabilities, knowledge, skills and competencies that prepare them as effective professionals or attractive Ph.D. program applicants. EPSY website (https://education.okstate.edu/epsy)

Research, Evaluation, Measurement and Statistics
Jam Khojasteh, PhD—Assistant Professor and Program Coordinator

The research, evaluation, measurement and statistics program offers the MS and PhD degrees as options under the MS in Educational Psychology and the PhD in Educational Psychology. The MS program prepares students to function as staff members in research and evaluation units in school districts, governmental agencies, and private corporations and foundations. Graduates of the doctoral program are prepared to serve as college or university professors, directors of research and evaluation for public schools and universities, researchers for funded projects, state department of education consultants, and professional employees for test publishers and local, state and federal government agencies. This program is also home to the Center for Educational Research and Evaluation (https://education.okstate.edu/cere). REMS website (https://education.okstate.edu/rem)

Higher Education and Student Affairs
Stephen P. Wanger, Ph.D.—Associate Professor and Program Coordinator

The Higher Education and Student Affairs (HESA) program features three distinct academic degrees. These include the Ph.D. in Educational Leadership and Policy Studies, with an option in Higher Education and the M.S. in Educational Leadership and Policy Studies with options in Higher Education and College Student Development. The PhD is a research-based degree prepares individuals for leadership as faculty, administrators, or policy analysts. In addition, two Master of Science degrees are offered. The MS options prepare individuals for leadership positions in all levels in higher education or leadership positions in Student Affairs. Admission to HESA graduate programs is competitive and based on multiple considerations. HESA website (https://education.okstate.edu/esa)

Social Foundations
Guoping Zhao, PhD—Professor and Program Coordinator

Social foundations of education is an interdisciplinary study of schooling and other forms of education. Ever since it began during the 1930s at Teachers College of Columbia University, social foundations has brought together scholars who situate education in historical, philosophical, economic and social contexts. Using the tools of the humanities and the social sciences, social foundations scholars ask perennial questions, such as: What is the purpose of schooling in a democracy? What knowledge and values should be taught and to whose benefit? How are issues of race, ethnicity, social class, gender and ability manifested in schools?

Drawing from history, philosophy, sociology, anthropology, international studies and other disciplines to teach their courses, faculty in the social foundations program area ask that educators reflect critically on the social and cultural dynamics in educational settings and how policy and practices might be improved. Students from other human service professions and other disciplines are invited to make similar use of the content of these courses for their professional practice. SCFD website (https://education.okstate.edu/scfd)

Programs/Options Degrees

Degrees offered through SEFLA programs include Bachelor of Science (BS), Master of Science (MS), Education Specialist (EdS), Doctor of Education (EdD) and Doctor of Philosophy (PhD).

Five programs are delivered fully online: MS Aviation and Space, MS Educational Technology, MS Educational Psychology (Educational Psychology option), MS Educational Leadership and Policy Studies (Higher Education option), and Graduate Certificate in Online Teaching.
Aviation and Space

- Aviation and Space – MS
- Aerospace Administration and Operations
  - Professional Pilot - BS
  - Aviation Management - BS
  - Aerospace Security - BS
  - Aerospace Logistics - BS
  - Technical Service Management - BS
- Applied Educational Studies/Aerospace and Space Education – EdD

Educational Leadership

- Educational Leadership Studies/School Administration – MS
- Education/Educational Administration - EdS
- School Administration - EdD
- Educational Leadership and Policy Studies/Educational Administration – PhD

Educational Technology

- Educational Technology
  - Educational Technology - MS
  - School Library Media - MS
- Online Teaching – Graduate Certificate
- Education/Educational Technology – PhD

Educational Psychology

- Educational Psychology – MS, PhD

Higher Education and Student Affairs

- Educational Leadership Studies
  - Higher Education – MS
  - College Student Development – MS
- Educational Leadership and Policy Studies/Higer Education – PhD

Research, Evaluation, Measurement and Statistics

- Educational Psychology/Research, Evaluation, Measurement and Statistics – MS
- Educational Psychology/Research, Evaluation, Measurement and Statistics – PhD

Social Foundations

- Social Foundations of Education - MA
- PhD in Education/Social Foundations – PhD

Undergraduate Programs

- Aerospace Administration and Operations: Aerospace Logistics, BS (p. 1390)
- Aerospace Administration and Operations: Aerospace Security, BS (p. 1391)
- Aerospace Administration and Operations: Aviation Management, BS (p. 1393)
- Aerospace Administration and Operations: Professional Pilot, BS (p. 1395)
- Aerospace Administration and Operations: Technical Service Management, BS (p. 1397)
- Aerospace Administration and Operations: Professional Pilot (AAPP), Minor (p. 1396)
- Leadership (LDRS), Minor (p. 1399)
- Learning and Motivation (EPSY), Minor (p. 1401)
- Unmanned Aircraft Pilot (UAP), Minor (p. 1402)

Graduate Programs

Aviation and Space (AVED)
Jon Loffi, EdD—Associate Professor and Program Coordinator

MS in Aviation and Space

The Master of Science in the Aviation and Space degree emphasizes aviation/aerospace management and leadership, legal and regulatory issues, aviation finance and economics, labor relations in aviation/aerospace, issues in the airline industry, and additional content regarding the aviation/aerospace industry and related government programs and missions. Students participating in this program come from a variety of academic and/or professional backgrounds including aviation, military, and government. The scope of this degree program is designed to prepare professional leaders for positions in the aviation/aerospace industry. To be considered for admission to the master’s program, students must be admitted to both the OSU graduate college and the AVED program. Applicants are required to provide a statement of personal goals and objectives, two letters of recommendation addressing the applicant’s abilities, interest, motivation, etc., and a copy of a current resume. All MS students must complete coursework from research, core requirements, program emphasis, and elective courses to total 33 hours. At least 21 hours must be completed at the graduate level (5000 or above) and no pass/fail courses may be used. Master’s students must also complete a Creative Component for committee approval.

EdD in Applied Educational Studies/Aerospace

The Doctor of Education (EdD) in Applied Educational Studies with the Aviation and Space Education emphasizes aviation leadership and executive development, administration of aviation institutions, aviation law, air carrier industry, international aviation issues, and applied aviation and space research. The Space portion emphasizes the development of air and space flight; the earth’s air, land and water systems; and the solar systems to include the sun, planets, and probes. Aviation and Space Program seeks doctoral candidates with strong intellects, proper educational preparation, breadth and depth of Aviation and Space experiences and the capacity for disciplined investigations. The Aviation and Space program provides advanced courses in the specific field of aviation and space for successful practice in the aerospace industry. Either the MAT or GRE test must be taken within five years prior to application to the program. All are required to submit a statement of personal goals and objectives, two letters of recommendation addressing the applicant’s experiences, abilities, interest, motivation, etc., and a current résumé/vita. Coursework must be completed from the professional core, program emphasis, field experiences and research in addition to 10 hours of Doctoral Dissertation, for a total of 60 hours of coursework beyond the Master’s degree. The EdD degree requires a dissertation that is research-based in the student’s field of specialization.
Basic principles are used to emphasize the practical application of research.

The mission of the Aviation and Space program has three essential components:

1. Cultivate exemplary undergraduate and graduate instruction through a professional atmosphere in which students learn, develop, promote integrity and contribute to the broader aerospace community.
2. Engage in applied aerospace research and scholarly initiatives that benefit industry, general aviation, government and the public.
3. Provide leadership, expertise, and professional development opportunities for aviation and aerospace professionals and the aerospace industry, and to promote a greater understanding of aerospace among the general public.

Additional information can be found at the FLYOSU.okstate.edu (http://flyosu.okstate.edu) website.

**Educational Leadership (School Administration) (EDLE)**

Katherine Curry, PhD—Assistant Professor and Program Coordinator (School Administration)

**MS in Educational Leadership/School Administration**

M.S. in Educational Leadership with a specialization in School Administration: To be considered for admission to the M.S. program in School Administration, applicants are expected to have an earned baccalaureate degree with at least a 3.00 GPA (on a 4.00 scale), a minimum two years of teaching experience, and career goals that match the program. Applicants must provide appropriate recommendations (3), the required essays, and a recent Miller Analogies Test (MAT) or Graduate Record Exam (GRE) score. Students currently enrolled in the program have an average MAT score of 57/410 or GRE scores of Verbal 149 (437) and Quantitative 145 (541). Applicants may be asked to complete an interview with program faculty. Applications for the M.S. in School Administration are accepted on a rolling basis; an applicant’s file will be reviewed when all materials have been received and notification of the admission decision will follow shortly thereafter.

**EdD in Educational Leadership with a Specialization in School Administration**

To be considered for admission to the Ed.D. program in School Administration, applicants must possess an earned master’s degree with a minimum 3.00 GPA (on a 4.00 scale) and career goals consistent with SA program goals. The online application must include a career objectives statement, a current vita or resume, a description of relevant work experience, samples of scholarly work, a critical issues essay, three letters of recommendation, and a recent MAT or GRE score. Students recently admitted to the Ed.D. program have an average MAT score of 422 or GRE scores of Verbal 157 (560) and Quantitative 150 (630). Review of applications for doctoral programs will begin after March 15, the deadline for receipt of all application materials. Notification of decisions will follow soon thereafter.

**PhD in Educational Leadership and Policy Studies/ Educational Administration**

Applicants for Ph.D. program in Educational Administration must provide a current academic vita/resume, a career objective essay, a critical issue essay, two examples of written work, three letters of recommendation and GRE (Graduate Record Exam) scores. The expected minimum scores are Verbal - 153, Quantitative - 149, and Writing - 4.5 for exams taken on or after Aug. 1, 2011. For exams taken prior to Aug. 1, 2011, expected minimum scores are Verbal - 500, Quantitative - 610, and Writing - 4.5. GRE scores must not be over five years old at the time of application review. Additionally, program faculty may request an interview with the applicant. The Ph.D. requires a one-year residency of at least nine hours for two semesters during coursework completion. Review of applications for doctoral programs will begin after March 15, the deadline for submission of all application materials; all materials must be received by the COE Graduate Studies office on or before the application deadline. Notification of decisions will follow soon thereafter.

**EdS in Education/Educational Administration**

The Educational Specialist degree in educational administration at Oklahoma State University - College of Education is a 36-credit-hour, post-Master’s program that provides advanced graduate work for school leadership and administration. The focus is to prepare individuals for higher levels of educational administrative responsibility, typically in specialized positions in building and central office administration. Specific courses applied to the doctoral program are determined in consultation with the academic adviser and the School Administration Program Coordinator.

**Application Deadline**

Applications may be submitted at any time. Admissions are made on a rolling basis; students should receive notification of admission status within 4-6 weeks after all application materials are received. Admission review is initiated when applicants have applied to the Graduate College and their completed admission folders have been sent to College of Education for faculty review.

**Minimum Background Requirements**

**Ed.S. Applicants must have:**

- A Master’s from a regionally accredited college or university with a 3.0 GPA.
- GRE or MAT scores - (A test score, no older than 5 years, from the Graduate Record Exam (GRE) or the Miller Analogies Test (MAT) is equally accepted.
- Approval of the admissions committee
- TOEFL or IELTS (if required to establish English proficiency)

**Documents Required to be Submitted for Admission Review**

- OSU Graduate application, including transcripts
- Typewritten goals statement (about 500 words) consistent with mission of school leadership
- Writing sample
- Current Resume (include a list of three references with contact information)
- Three letters of reference

**Interview**

The program faculty may request an interview with applicants as a requirement for admission.

**Educational Technology (EDTC)**

Penny Thompson, PhD—Associate Professor and Coordinator

The mission of Oklahoma State University’s Educational Technology program is to facilitate the growth of scholars and educational technology professionals through rigorous programs of study that provide exceptional hands-on, collaborative and innovative learning.
research and service experiences and are highly regarded at the international, national, state and university levels. The program website, edtech.okstate.edu (http://edtech.okstate.edu), offers greater detail.

**MS in Educational Technology - Options: Educational Technology and School Library Media**

The MS in Educational Technology is for students interested in furthering their knowledge, skills and opportunities in the area of educational technology and school library media. This degree will enhance their marketability and, in the case of the School Library Media option, provide credentials necessary for recommendation for this particular area of teacher certification. In addition to the core focus on educational technology, candidates pursuing School Library Media certification will also be immersed in the areas of information literacy, curriculum leadership and program administration, meeting ALA accreditation standards through CAEP. To be considered for admission to the master's program, applicants should have an earned baccalaureate degree with at least a 3.00 GPA (on a 4.00 scale), a professional goals statement and three letters of recommendation providing information related to past academic ability, potential for graduate study and writing ability. Applications will be reviewed upon receipt of all materials.

**Graduate Certificate in School Library Media Certification**

This certificate is for those who already hold a master's degree and initial teaching certificate and want to add-on School Library Media advanced certificate in the State of Oklahoma.

**Graduate Certificate in Online Teaching**

The Graduate Certificate in Online Teaching offers students the opportunity to add pedagogical and technological skills to their existing content knowledge within a model online learning environment and emerge prepared to design, develop, deliver and sustain online learning in an educational institution. This certificate is often used as a cognate area for PhD programs across campus. Applications are reviewed as received, but all cohorts begin in the fall semester. Applications must be submitted by July 1.

**PhD in Education/Educational Technology**

For those seeking a doctoral-level degree emphasizing educational technology, we offer the PhD in Education with an option in Educational Technology. The focus of the program is on the core areas of the field: design, development, utilization, production, and evaluation of instructional systems, human computer interaction and technology applications to support learning and teaching. The doctoral program emphasizes research using educational technology in applied settings. The PhD degree in Educational Technology option prepares future researchers for a variety of professional positions. Graduates are typically employed as university faculty, educational technologists in universities, community colleges, and schools or as training managers or instructional designer/developers in corporate settings. The PhD in Education degree requires a minimum of 69 credit hours beyond the master’s degree. Applicants must apply to the OSU Graduate College and include a recent score from the Graduate Record Exam or the Miller Analogies Test, a professional goals statement and three letters of recommendation providing information related to past academic ability, potential for graduate study and writing ability. Applications will be reviewed upon receipt of all materials.

The student association for this program is the Educational Media and Technology Student Association. The purpose of this group is to engage undergraduate and graduate students interested in this field in activities that will serve to enhance their academic experience through special speakers, service projects and social activities.

The Educational Technology faculty is committed to involving students in a variety of experiences that will enhance their professional careers. Students help facilitate the College's Emerging Technologies and Creativity Lab (http://edtech.okstate.edu/techplayground). Faculty work with students to present papers at national conferences and to submit manuscripts to professional journals. Students participate in Educational Technology courses, grant projects, and service and outreach to educational groups. Graduate assistantships in teaching and research are often available. Each student has the opportunity to engage in rich internship and practicum experiences designed with the individual learner's goals in mind.

**Educational Psychology (EPSY)**

Michael S. Yough, PhD—Assistant Professor and Coordinator

**MS in Educational Psychology**

A master’s degree in educational psychology is available as an option within the MS in educational psychology. Educational psychology emphasizes the application of psychological theory and research in the field of education. Every educational psychology master’s student takes basic courses in educational psychology and research. For more information, see the website http://education.okstate.edu/graduatestudies/ms. We have an option application for the MS degree in educational psychology.

**PhD in Educational Psychology**

The PhD in Educational Psychology includes areas of study in learning motivation cognition, instructional psychology, and human development. The programs prepare students for the role of teacher and researcher in educational and non-educational settings such as higher education, business, government, and communities.

The educational psychology PhD program is designed to provide students with maximum opportunity to individualize their programs according to their own interests, needs and professional goals. Applications for the PhD in Educational Psychology are due by February 1 for the following fall enrollment. For more information, see the website http://education.okstate.edu/graduatestudies/phd.

**Research, Evaluation, Measurement and Statistics (REMS)**

Jam Khojasteh, PhD—Assistant Professor and Program Coordinator

The research, evaluation, measurement and statistics program offers MS and PhD degrees. The MS program prepares students to function as staff members in research and evaluation units in school districts, governmental agencies, and private corporations and foundations. Graduates of the doctoral program are prepared to serve as college or university professors, directors of research and evaluation for public schools and universities, researchers for funded projects, state department of education consultants, and professional employees for test publishers and local, state and federal government agencies.

**MS in Educational Psychology/Research, Evaluation, Measurement and Statistics**

The MS degree requires a minimum of 36 credit hours. There are three options: either 36 hours of coursework plus a creative component; 32 hours of coursework plus a report (four thesis hours); or 30 hours
of coursework plus a thesis (six thesis hours). The student’s advisory committee may recommend additional coursework or thesis hours. Required courses include six hours in educational psychology and 24 hours in research and evaluation including a practicum. Students taking a non-thesis option must take additional courses from an approved list of electives. Masters students must take two qualifying examinations that cover the program core and the area of professional specialization.

**PhD in Educational Psychology/Research, Evaluation, Measurement and Statistics**

The PhD degree requires a university determined minimum of 60 hours beyond the master’s degree or a minimum of 90 semester hours beyond the bachelor’s degree. The typical doctoral student completes nine hours of common core coursework in educational psychology and 15 hours of common core coursework in integrated and extended inquiry; 18 hours of professional course hours (e.g., psychometric theory, applied multivariate research), a minimum of nine hours in a cognate area defined by the student and committee chair (e.g., mathematical statistics, institutional research, student development), and at least 15 dissertation hours. Students also select two applied experiences from a list of suggested experiences with the assistance and approval of the committee chair. PhD students must take two qualifying examinations that cover the program and core and the area of professional specialization.

**Admission Requirements**

For both the masters and PhD programs, admissions decisions are competitive and based on a combination of multiple criteria. Criteria for admission to the master’s program include an undergraduate GPA of at least 2.75; Miller Analogy Test (MAT) or Graduate Record Exam (GRE); 3 positive letters of reference (preferably from previous instructors or employers); and evidence of potential for professional development (e.g., proof of written work). For the doctoral program, admissions criteria include telephone or personal interview, GRE scores, undergraduate and master’s GPA, four positive letters of reference on SES forms, relevant experience, statement of career goals, and evidence of potential for professional development (e.g., proof of written work). Students considering admission to the doctoral program must have a master’s degree from an accredited institution. Doctoral applicants should have an undergraduate GPA of at least 2.50 and a graduate GPA of at least 3.50.

**Application Procedures**

Applicants must submit a Graduate Application for Admission form, the required number of positive letters of recommendation (three for master’s, four for doctoral), a signed Confidentiality of Reference form, official score report for required tests (GRE or MAT for master’s, GRE for doctoral), two official transcripts from each institution attended, Statement of Purpose and the Graduate College application fee. International applicants must include TOEFL scores and a signed Confirmation of Resources form. Completed applications are reviewed as they are received.

**Higher Education and Student Affairs (HESA)**

Stephen P. Wanger, PhD—Associate Professor and Program Coordinator

**MS in Educational Leadership/Higher Education**

To be considered for admission to the Masters program with a specialization in Higher Education, applicants are expected to have an earned baccalaureate degree with at least 3.00 GPA (on a 4.00 scale) and career goals that match program learning objectives. Through the OSU Graduate College’s online application, applicants must provide a career objective essay, current academic vita or resume, critical issue essay, appropriate recommendations, and recent Graduate Record Exam (GRE) scores or Millers Analogy Test (MAT) scores. Students currently enrolled in the program have an average MAT scores of 57/410 or GRE scores of Verbal 149 (437) and Quantitative 145 (541). Applicants may be asked to complete an interview with program faculty. Applications to all HESA Master’s programs are accepted on a rolling basis. An applicant’s file will be reviewed when all materials have been uploaded through the online application system. Notification of the admission decision will follow before the beginning of the next semester.

**MS in Educational Leadership/College Student Development**

To be considered for admission to the Masters program with a specialization in College Student Development, applicants are expected to have an earned baccalaureate degree with at least 3.00 GPA (on a 4.00 scale) and career goals that match program learning objectives. Applicants must provide a personal statement, current resume or academic vita, appropriate recommendations, and a recent Graduate Record Exam (GRE) or Miller’s Analogy Test (MAT) scores. Students currently enrolled in the program have an average MAT score of 57/410 or GRE scores of Verbal 149 (437) and Quantitative 145 (541). Applicants may be asked to complete an interview with program faculty. Applications to all HESA Master’s programs are accepted on a rolling basis; however, for fullest consideration for graduate assistantships in the College Student Development program, please submit all materials by January 15. An applicant’s file will be reviewed when all materials have been uploaded to the online application system. Notification of the admission decision will follow before the beginning of the next semester.

**PhD in Educational Leadership and Policy Studies/Higher Education**

Through the OSU Graduate College’s online application, applicants for the Ph.D. program in Higher Education must provide a current academic vita/resume, a career objective essay, three letters of recommendation, a critical issue essay, two examples of written work, and either GRE (Graduate Record Exam) or MAT (Miller Analogy Test) scores. Students currently enrolled in the program have an average GRE score of Verbal - 153, Quantitative - 149, and Writing - 4.5 for exams taken on or after Aug. 1, 2011. Students currently enrolled in the program have an average MAT scores of 57/410. GRE scores must not be over five years old at the time of application review. Additionally, the program faculty may request an interview with applicants. The Ph.D. requires a one-year research experience completed simultaneously with late-stage coursework. All application material must be received by March 15; review of applications will begin soon thereafter. Notification of decisions will follow.

More information about the Higher Education Administration program, course requirements, other pertinent information, and an electronic copy of the application packet, can be found at [http://education.okstate.edu/hesa](http://education.okstate.edu/hesa).

The MS in Educational Leadership is offered with an option in College Student Development for individuals who desire a career in student services. Applications ([http://education.okstate.edu/hesa/application](http://education.okstate.edu/hesa/application)) are accepted on a rolling basis; however, preference for graduate assistantships positions will be given to those candidates who submit completed applications by February 1.

Applications for all degree programs can be found on the EHA Graduate Studies website at [http://education.okstate.edu/graduatemsterstudies](http://education.okstate.edu/graduatemsterstudies).
Social Foundations (SCFD)
Guoping Zhao, PhD—Professor and Program Coordinator

Social foundations of education is an interdisciplinary study of schooling and other forms of education. Ever since it began during the 1930s at Teachers College of Columbia University, social foundations has brought together scholars who situate education in historical, philosophical, economic and social contexts. Using the tools of the humanities and the social sciences, social foundations scholars ask perennial questions, such as: What is the purpose of schooling in a democracy? What knowledge and values should be taught and to whose benefit? How are issues of race, ethnicity, social class, gender and ability manifested in schools?

Drawing from history, philosophy, sociology, anthropology, international studies and other disciplines to teach their courses, faculty in the social foundations program area ask that educators reflect critically on the social and cultural dynamics in educational settings and how policy and practices might be improved. Students from other human service professions and other disciplines are invited to make similar use of the content of these courses for their professional practice.

MA in Social Foundations of Education
This program will be offered beginning Fall 2018.

PhD in Education/Social Foundation
The mission of the PhD in education with social foundations option is to educate scholars who have the abilities to discover, integrate and apply knowledge about the culture in which the institutions called school reside, as well as the culture the institution creates. In the broadest sense, social foundations option is intended to educate scholars so they can disseminate new knowledge to educational, governmental, social economic and other scholarly communities interested in the advancement of the educational enterprise at the national and international levels.

To be considered for admission to the PhD program, applicants are expected to have an earned master’s degree with minimum GPA averages of 3.50 on a 4.00 scale, and have career goals that match the program. Applicants must provide appropriate recommendations (three), present either a Graduate Record Exam (GRE) or Miller Analogy Test (MAT) score. Preferred GRE scores are: Verbal-151, Quantitative-150, and Analytic Writing-4.5. For the MAT, a raw score of 400 is expected. A recent scholarly writing sample is also expected. For students with little or no background in education, additional leveling courses may be required.

Faculty
Susan Stansberry, EdD—Associate Professor and School Head
Professors: Tim Bliss, EdD; Edward Harris, PhD; Guoping Zhao, PhD
Associate Professors: Lucy Bailey, PhD; Laura Barnes, PhD; Denise Blum, PhD; Chad Depperschmidt, EdD; Kerri Kearney, EdD; Jon Loffi, EdD; Tami Moore, PhD; Mwarumba Mwavita, PhD; Penny Thompson, PhD; Steven Wanger, PhD
Assistant Professor and Program Coordinator (School Administration): Jackie Mania-Singer, EdD
Assistant Professors: Tutaleni Asino, PhD; Benjamin Bindewald, PhD; Mallory Casebolt, PhD; Ki Lynn Cole, PhD; Sarah Gordon, PhD; Jam Khojasteh, PhD; Kalianne Neumann, PhD; Matt Vance, PhD; Jane Vogler-Cragun, PhD; Michael Yough, PhD
Teaching Assistant Professor: Kathryn Gardner-Vandy, EdD
Manager, Aviation: Lance Fortney, MS
Aerospace Administration and Operations: Aerospace Logistics, BS

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

**American History & Government**

Select one of the following: 3

- HIST 1103 Survey of American History
- HIST 1483 American History to 1865
- HIST 1493 American History Since 1865
- POLS 1113 American Government

**Analytical & Quantitative Thought (A)**

- MATH or STAT course designated (A)

**Humanities (H)**

Courses designated (H) 6

**Natural Sciences (N)**

Must include one Laboratory Science (L) course

Courses designated (N) with one (L) 7

**Social & Behavioral Sciences (S)**

- ECON 2103 Introduction to Microeconomics (S) 3

**Additional General Education**

Courses designated (A), (H), (N), or (S) 9

**Hours Subtotal** 40

**Diversity (D) & International Dimension (I)**

May be completed in any part of the degree plan

- Select at least one Diversity (D) course
- Select at least one International Dimension (I) course

**College/Departmental Requirements**

- EDUC 1111 First Year Seminar 1

**Recommended Courses:**

Select 19 hours

- ACCT 2203 Managerial Accounting
- AVED 1114 Theory of Flight
- AVED 1222 Private Flight Laboratory I
- AVED 4100 Specialized Studies in Aviation
- AVED 4200 Internship in Aviation
- ECON 2203 Introduction to Macroeconomics

**EDTC 4113** Applications of Media and Technology 20

**Major Requirements**

- Minimum GPA 2.50 with a minimum grade of “C” in each course
- ACCT 2103 Financial Accounting 3
- AVED 2113 History of Aviation 3
- AVED 3433 Aviation/Aerospace Ethics 3
- AVED 3443 Aviation Legal and Regulatory Issues 3
- AVED 3453 Aviation/Aerospace Security Issues 3
- AVED 3513 Aviation/Aerospace Management Principles 3
- AVED 3523 Airport Planning and Management 3
- AVED 3543 Aerospace Organizational Communications 3
- AVED 3563 Aviation Marketing 3
- AVED 3573 Aviation/Aerospace Finance 3
- AVED 3663 Aerospace and Air Carrier Industry 3
- AVED 3883 Space Flight 3
- AVED 4113 Aviation Safety 3
- AVED 4173 Aerospace Logistics Quality Programs 3
- AVED 4653 International Aerospace Issues (I) 3
- AVED 4663 Aerospace Leadership 3
- AVED 4883 Capstone Course in Aviation Management 3
- AVED 4943 Basic Aircraft Accident Investigation 3
- AVED 4953 Corporate and General Aviation Management 3
- AVED 4993 Aviation Labor Relations 3

**Hours Subtotal** 60

**Total Hours** 120

**Other Requirements**

- 40 hours of upper-division course work.
- A 2.50 GPA is required in the Major Requirements with no grade below a “C”.

**Additional State/OSU Requirements**

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

Other courses considered on an individual basis, using the Evaluation Criteria for Electives published by HESA Faculty and the co-coordinators of the Leadership Minor

Other Requirements

Mentoring Experience

- As part of HESA 3113 Civic Leadership or subsequent course per professional goals and learning objectives articulated in HESA 2513 Foundations of Ethical Leadership, each student will be matched with a leadership mentor identified from a pool of OSU alumni and friends with established leadership experience in relevant area. The
mentoring experience will continue through remaining course in the minor.

**Additional OSU Requirements**

**Undergraduate Minors**

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

School of Teaching, Learning and Educational Sciences

Jennifer Sanders, PhD—Associate Professor and School Head

The School of Teaching, Learning and Educational Sciences develops outstanding education professionals and school psychologists who have the confidence and demonstrated competence to be leaders, advocates, and agents of change in regional, national and world communities. We employ and model authentic, engaging methods and innovative, collaborative practices to develop scholars, especially teachers, teacher educators and school psychologists who are transformative leaders and reflective practitioners adept at using creative and effective methods to foster productive and just communities. Programs in the School of Teaching, Learning and Educational Sciences (STLES) include curriculum studies, elementary education, gifted and talented education, secondary education, literacy education, career and technical/workforce and adult education, science/mathematics education, special education and school psychology. Consistent with the University’s Professional Education unit conceptual framework, all programs leading to teacher certification at both initial and advanced levels incorporate the L.E.A.D.S. framework based on leadership, ethics and professionalism, academic and professional roles, diversity and service orientation/community outreach. Graduate program goals in STLES focus on the concepts of agency, pedagogy, diversity and research.

Course Prefixes

Most courses in STLES programs carry the CIED (Curriculum and Instruction) prefix. Other course prefixes include CTED (Career and Technical Education), GTED (Gifted and Talented Education), SPED (Special Education), SMED (Science/Mathematics Education), SPSY (School Psychology), and WAED (Workforce and Adult Education).

Undergraduate Programs

- Jill Metzger, MS—Clinical Instructor and Elementary Education Coordinator
- Gayla Foster, PhD—Clinical Associate Professor and Secondary Education Coordinator
- Mary Jo Self, EdD—Associate Professor and Career and Technical Education Program Coordinator

The School offers undergraduate degrees in elementary, secondary, and K-12 education, and career and technical education. The Bachelor of Science in Elementary Education degree qualifies the student for an Oklahoma elementary teaching certificate (grades 1-8). The program is intended to provide students with:

- a breadth of knowledge reflecting the broad traditions of general education, and
- a depth of knowledge in the area of specialization.

The degree includes four field experiences, culminating in a full-semester clinical internship, through which students work in diverse school settings and demonstrate and strengthen their pedagogical knowledge. This degree is offered on both the Stillwater and Tulsa campuses, and Tulsa students have an opportunity to participate in the Urban Education Program, a cooperative effort between OSU and Tulsa Public Schools. Stillwater students can apply to the ExCEL experience, providing site-based coursework in Stillwater elementary schools for the final two semesters of enrollment. The culminating clinical internship placement opportunities include placement through the Urban Education Program, placement in accredited schools in Stillwater and the surrounding area, or international placement. All students complete a Professional Portfolio with three separate submissions. It should be noted that all previous coursework must be successfully completed prior to participation in the final two semesters. Oklahoma certification also mandates the Certification Examinations for Oklahoma Educators.

The Bachelor of Science in Secondary or K-12 Education degree is designed to prepare teacher candidates who are life-long learners, emerging professionals and subject matter specialists with strong liberal arts backgrounds. Each secondary/K-12 degree and certification program includes general education courses, extensive specialization course work in the discipline area, and professional education courses accompanied by school-based field experiences. Tulsa-area students have an opportunity to participate in the Urban Education Program, a cooperative effort between OSU and Tulsa Public Schools. Degree options leading to certification for teaching grades 6-12 are English and social studies. The foreign language option leads to certification in grades K-12. Secondary science and mathematics education students pursue degrees from the College of Arts and Sciences through the OSU Teach program. Students complete a Professional Portfolio with three separate submissions. Oklahoma certification also mandates the Certification Examinations for Oklahoma Educators.

The Bachelor of Science in Career and Technical Education (CTED) is designed with two distinct options: the non-certification option for students interested in adult technical education, and the certification option for students interested in secondary career and technical education.

CTED Non-certification Option

- Students choosing the non-certification option are prepared to become instructional personnel for technical programs in community colleges, technical institutes and industry. Graduates with this option also accept technical employment of various types in business, industry and government.
- The non-certification option is designed primarily for graduates of technical programs in technical institutes and community colleges. Qualified students from pre-professional programs can be accepted with advanced standing. In addition, students desiring to prepare for careers in technical education may enter the program directly from high school and complete their technical major requirements at OSU.

CTED Certification Option

- Candidates selecting this option are prepared to serve as teachers in secondary or postsecondary schools, or in other related professional roles for career and technical education programs. Candidates completing this option are qualified to teach in career and technical departments of high schools and area career and technology centers.
- The certification options include business information technology, marketing education, health occupations education, technology education, and technical and industrial education. The specializations in technical and industrial education are selected from but not limited to the trade and industrial fields of air conditioning heating and refrigeration, automotive technology, aviation technology, building and grounds maintenance, carpentry, commercial photography, computer repair technology, cosmetology, diesel engine technology, drafting, electronics, graphic design, law enforcement, and refrigeration. This degree is offered on both the Stillwater and Tulsa campuses, and Tulsa students have an opportunity to participate in the Urban Education Program, a cooperative effort between OSU and Tulsa Public Schools. Stillwater students can apply to the ExCEL experience, providing site-based coursework in Stillwater elementary schools for the final two semesters of enrollment. The culminating clinical internship placement opportunities include placement through the Urban Education Program, placement in accredited schools in Stillwater and the surrounding area, or international placement. All students complete a Professional Portfolio with three separate submissions. It should be noted that all previous coursework must be successfully completed prior to participation in the final two semesters. Oklahoma certification also mandates the Certification Examinations for Oklahoma Educators.

The Bachelor of Science in Secondary or K-12 Education degree is designed to prepare teacher candidates who are life-long learners, emerging professionals and subject matter specialists with strong liberal arts backgrounds. Each secondary/K-12 degree and certification program includes general education courses, extensive specialization course work in the discipline area, and professional education courses accompanied by school-based field experiences. Tulsa-area students have an opportunity to participate in the Urban Education Program, a cooperative effort between OSU and Tulsa Public Schools. Degree options leading to certification for teaching grades 6-12 are English and social studies. The foreign language option leads to certification in grades K-12. Secondary science and mathematics education students pursue degrees from the College of Arts and Sciences through the OSU Teach program. Students complete a Professional Portfolio with three separate submissions. Oklahoma certification also mandates the Certification Examinations for Oklahoma Educators.

The Bachelor of Science in Career and Technical Education (CTED) is designed with two distinct options: the non-certification option for students interested in adult technical education, and the certification option for students interested in secondary career and technical education.

CTED Non-certification Option

- Students choosing the non-certification option are prepared to become instructional personnel for technical programs in community colleges, technical institutes and industry. Graduates with this option also accept technical employment of various types in business, industry and government.
- The non-certification option is designed primarily for graduates of technical programs in technical institutes and community colleges. Qualified students from pre-professional programs can be accepted with advanced standing. In addition, students desiring to prepare for careers in technical education may enter the program directly from high school and complete their technical major requirements at OSU.

CTED Certification Option

- Candidates selecting this option are prepared to serve as teachers in secondary or postsecondary schools, or in other related professional roles for career and technical education programs. Candidates completing this option are qualified to teach in career and technical departments of high schools and area career and technology centers.
- The certification options include business information technology, marketing education, health occupations education, technology education, and technical and industrial education. The specializations in technical and industrial education are selected from but not limited to the trade and industrial fields of air conditioning heating and refrigeration, automotive technology, aviation technology, building and grounds maintenance, carpentry, commercial photography, computer repair technology, cosmetology, diesel engine technology, drafting, electronics, graphic design, law enforcement, and refrigeration. This degree is offered on both the Stillwater and Tulsa campuses, and Tulsa students have an opportunity to participate in the Urban Education Program, a cooperative effort between OSU and Tulsa Public Schools. Stillwater students can apply to the ExCEL experience, providing site-based coursework in Stillwater elementary schools for the final two semesters of enrollment. The culminating clinical internship placement opportunities include placement through the Urban Education Program, placement in accredited schools in Stillwater and the surrounding area, or international placement. All students complete a Professional Portfolio with three separate submissions. It should be noted that all previous coursework must be successfully completed prior to participation in the final two semesters. Students complete a Professional Portfolio with three separate submissions. Oklahoma certification also mandates the Certification Examinations for Oklahoma Educators.
training, machining, masonry, mechatronics, printing, plumbing, telecommunications, and welding technology. For the technical and industrial option, the specific field is determined by the specialization proficiency and teaching aspirations of the student. The required specialization competency may be acquired by completing a career and technical program in an approved high school, area career and technical school, technical college, community junior college, by apprenticeship training, by actual experience in the field of specialization, or by a combination of these. See the section “Professional Education Unit” (p. 1438) for details regarding state certification requirements and procedures.

Programs/Areas of Emphasis Degrees
Degrees offered through STLES programs include Bachelor of Science (BS), Master of Arts in Teaching (MAT), Master of Science (MS), Education Specialist (EdS), and Doctor of Philosophy (PhD).

Career and Technical Education
- Career and Technical Education
  - Certification - BS
  - Non-Certification - BS
- Workforce and Adult Education - MS
- PhD in Education/Workforce and Adult Education - PhD

Elementary Education
- Elementary Education - BS, MAT

Secondary Education
- Secondary Education
  - English - BS
  - Foreign Language - BS
  - Teaching
    - Secondary Mathematics - MAT
    - Secondary Science - MAT

Teaching, Learning, and Leadership
- Teaching, Learning and Leadership - MS
- College Teaching - GRCT
- Curriculum Studies - MS, PhD
- Professional Education Studies - PhD
- Language, Literacy, and Culture - PhD
- Mathematics Education - MS, PhD
- Science Education - MS, PhD
- Special Education - MS, PhD
- Workforce and Adult Education - MS

School Psychology
- School Psychology - EdS, PhD

Undergraduate Programs
- Career and Technical Education: Certification, BS (p. 1408)
- Career and Technical Education: Non-Certification, BS (p. 1410)
- Elementary Education, BS (p. 1412)
- Secondary Education: English, BS (p. 1414)
- Secondary Education: Foreign Language, BS (p. 1416)
- Secondary Education: Social Studies, BS (p. 1418)
- Multi-Tiered Systems of Instructional Support (MTSI), Minor (p. 1420)
- Special Education (SPED), Minor (p. 1421)

Graduate Programs
The School offers graduate degree programs at the master’s and doctoral levels. While specialization is required, maximum program flexibility enables students to meet individual goals. Programs are designed to prepare persons to enter public or private elementary and secondary schools as teachers or school psychologists, curriculum directors, department heads, reading/literacy specialists and instructional leaders or enter other educational institutions and community agencies as educational leaders. Doctoral programs provide preparation for university teaching and research, as well as for P-12 roles, such as curriculum administrators.

Programs in the School offer the Master of Science (MS) in Teaching, Learning, and Leadership, Master of Arts in Teaching (MAT), Master of Science in School Psychology, a Graduate Certificate in College Teaching, an education Specialist in School Psychology, a Doctor of Philosophy in School Psychology, and a Doctor of Philosophy (PhD) in Education.

Master of Science in Teaching, Learning and Leadership (TLL)
Donita Shaw, PhD – Associate Professor and TLL Degree Coordinator
A student may earn the degree of Master of Science (MS) in Teaching, Learning, and Leadership. Students specialize in several areas highlighted below as TLL options. All options include at least one research course. Students planning an emphasis in K-12, secondary education, or math/science education may incorporate graduate coursework from an academic discipline. The master’s degree program is also frequently designed to qualify graduates for certification in a specific area.

The Curriculum and Leadership Studies option provides a sound foundation in curriculum knowledge including the social, philosophical, ethical, political, historical and psychological aspects of curriculum, curriculum planning, pedagogy and curriculum leadership. The degree program will deepen one's knowledge of curriculum and will prepare graduates for positions as curriculum leaders, curriculum planners, curriculum administrators, curriculum consultants, teacher leaders and teacher researchers. Program content will benefit those teachers pursuing National Board Certification. Many classes are offered on both Stillwater and Tulsa campuses.

The Elementary, Middle, Secondary, or K-12 option (EMSK12) provides choices for students to include coursework to enhance their understanding of teaching and learning at their chosen level, and in the case of secondary or K-12 to include content area coursework.

The Gifted and Talented Education option is designed to broaden understandings of giftedness and showcase evidence-based curriculum and instruction. The option is designed to develop practitioners who have the skills to advocate for the needs of gifted and talented students and who will place a focus on the development of quality gifted programming. Courses are offered primarily on the Tulsa campus in a cohort model. Students who complete the coursework requirements can
be recommended to the Oklahoma State Department of Education for
P-12 Gifted Specialist certification.

The Math/Science Education option provides extended coursework in
both content area and pedagogy as students take courses in math or
science education and additional math or science courses through
the College of Arts and Sciences. The option also includes coursework
integrating math and science pedagogy so that graduates will be skilled
in content integration between the two areas. The option is designed to
prepare teacher leaders in math education and/or science education.
This option asks applicants to either hold an undergraduate major or
minor in mathematics or science or post a satisfactory score on the
quantitative portion of the Graduate Record Exam.

The Reading and Literacy option provides students with experiences
to develop knowledge of comprehensive, P-12 literacy curriculum and
instruction including regular and intensive reading instruction, literacy
assessment and evaluation, language arts/writing instruction, and the
roles of children’s literature. The program also supports candidates’
development in the areas of education theory and research, curriculum
design, creating literate environments, appreciating and including diverse
learners, and providing quality professional development as program
administrators or literacy coaches. Students who complete the Reading
Specialist requirements can be recommended to the Oklahoma State
Department of Education for P-12 Reading Specialist certification.

The Special Education option is designed to prepare educators to work
effectively with children and youth with mild to moderate disabilities. The
option encompasses two primary pathways: Advanced Educator and
Initial Certification. The option is also delivered in a “bootcamp” format on
the Tulsa campus with new cohort groups admitted to a set sequence of
classes designed for degree completion in four semesters. Classes are
scheduled during evenings and weekends, and can be taken on a part-
time or full-time basis. Classes utilize a variety of instructional formats
including face-to-face classroom interaction, compressed video and
hybrid design, where instruction includes both classroom interaction and
online learning. To be eligible for state certification, students must pass
Teacher Certification Examinations.

The Workforce and Adult Education option is flexible in content coverage,
offering coursework appropriate for a wide range of people, including
Career Tech educators, technical educators and other personnel in higher
education, career and occupational counselors, adult trainers in business
and industry, and workforce development professionals from all fields.
Courses are offered using a variety of delivery options, including evening
face-to-face classes, two-way video broadcast, online and weekends.
Many classes are offered on both the Stillwater and Tulsa campuses.

Master of Arts in Teaching (MAT)
Adrienne Redmond-Sanogo, PhD – Associate Professor and MAT Degree
Coordinator

The school offers a Masters of Arts in Teaching degree with options in
Elementary Education (grades 1-8), Secondary Mathematics (grades
6-12), and Secondary Science (grades 6-12). The purpose of the Master
of Arts in Teaching program are to provide high-quality instruction to
graduate students who are seeking to continue their education and
seeking initial teaching certification. The objectives are to develop
elementary, secondary and PK-12 teachers’ understanding of the roles
and responsibilities of teachers and manage a diverse classroom,
ability to design and implement curriculum that addresses the needs of
students with special needs and linguistically/culturally diverse students,
understanding of a variety of instructional and assessment strategies
to meet diverse learners’ needs, and confidence in abilities to teach
in PK-12 classroom through high-quality field experiences. Extensive
specialization coursework is offered in each discipline area and the
program culminates with a full 15-week clinical internship (student
teaching) experience through which students work in diverse school
settings and demonstrate and strengthen their pedagogical knowledge.
Additionally, students participate in at least 60 hours of field experience
prior to student teaching. All students complete a Professional Portfolio
with three separate submissions. It should be noted that all previous
coursework must be successfully completed prior to participation in the
final semester. Oklahoma certification also mandates the Certification
Examinations for Oklahoma Educators.

Master of Science in School Psychology
A degree in educational psychology with an option in school
psychometrics is awarded to students who are en route for either the
EdS or PhD degree in school psychology. Students must be admitted to
the EdS or PhD program to receive the MS. (Students are not admitted
directly to the MS degree.)

College Teaching Graduate Certificate
College Teaching Graduate Certificate is housed in Curriculum Studies
Program at School of Teaching, Learning and Education Studies. It is a
stand-alone certificate program to help current college and university
faculty (including both full-time and part-time faculty as well as graduate
teaching assistants who have college teaching assignments) develop
and improve knowledge, skills, and capacities for successful college
teaching, as well as advance their teaching vision, philosophy and
adaptability in a rapidly changing society at a range of institutions of
higher education. Credit hours successfully completed are transferable to
Curriculum Studies options in MS and PhD degree.

Education Specialist (EdS) in School Psychology
Brian Poncy, PhD—Associate Professor, EdS Program Training Director

The NASP-approved (National Association of School Psychologists)
specialist program is available. The EdS is the appropriate level of
training for those who are interested in applying psychology to a
variety of child-related learning and adjustment problems, and for the
improvement of children's mental health in school settings. Specialist-
level school psychologists typically work in school systems and function
in diverse roles including consultation, psychological and psycho-
educational assessment, and intervention to facilitate success for all
children. The EdS program at OSU is approximately 77 hours, consistent
with the NASP standards for training, and meets the Oklahoma State
Department of Education certification requirements. Successful
completion of this program leads to eligibility for certification by the
Oklahoma State Department of Education as a school psychologist
and also the NASP National Certification in School Psychology (NCSP).
Applications for the EdS program are due February 1 for consideration for
admission the following semester.

PhD in School Psychology
Gary Duhon, PhD—Professor and PhD Program Training Director

The doctoral program in school psychology is accredited by the American
Psychological Association and approved by the National Association
of School Psychologists. The program follows the scientist practitioner
model that emphasizes the application of the scientific knowledge and
methodological rigor in the delivery of school psychological services and in conducting research. Training in the scientist/practitioner model is for the purpose of developing a Science-Based Child/Learner Success orientation in students. Doctoral-level school psychologists function in diverse and important roles including consultation, assessment, intervention therapy, supervision, program evaluation and research to facilitate success for all learners. They add to the understanding of children and their families by contributing to the scientific knowledge base related to all aspects of child development. They are employed in many different settings including elementary and secondary schools, private practice, university, hospitals and mental health centers. School psychologists work with diverse populations and provide psychological services to children, youth, families, caregivers, school personnel, adult learners and individuals with special needs, as well as to the systems in which these individuals need to be successful. Applications for the PhD program in school psychology are due by January 1 for the following fall enrollment.

**Doctor of Philosophy in Education**

Students in the Doctor of Philosophy in Education program critically analyze teaching and learning in different contexts both inside and outside of school, explore how these processes are embedded in wider social, political and economic contexts, and envision the possibilities for improving teaching and learning. To this end, the program has an emphasis on the critical production of research with the intent that graduates from this program will contribute to their scholarly fields while addressing the needs of the state of Oklahoma, the country and the larger global community. The integration of seven degree options—Curriculum Studies; Educational Technology; Language, Literacy, and Culture; Mathematics and Science Education; Professional Education Studies; Social Foundations of Education; and Workforce and Adult Education—provides a conceptually coherent doctoral program in which students and faculty explore teaching and learning in new ways within various cultural milieus, such as the family, occupations, public schools and universities. The Ph.D. degree, with options housed in two Schools within the College of Education, Health and Aviation, prepares researchers and leaders to serve in professional positions in universities, P-12 schools, career and technical schools, research agencies, policy agencies and other educational settings (such as museums, educational publishing, and curriculum development).

The Curriculum Studies option’s mission is to educate scholars with a deep understanding and ability to create and use knowledge of curriculum studies in the field of education and in other scholarly communities interested in the advancement of education at the state, national, and international levels. In articulating the field of curriculum studies, it is important to acknowledge the broadest views of curriculum, including content and organization of school, the social context in which school is situated, and the process of education both in and out of school. Curriculum studies is understood as both a disciplinary and an interdisciplinary field of study with its own distinctive history, conceptions, and modes of inquiry, always open to new scholarship. Curriculum theorizing, curriculum development and assessment, pedagogy, curriculum inquiry, curriculum history, leadership and advocacy, critical media literacy, teacher research, and intercultural and international dialogue are all part of the scholarship of curriculum studies in the program. Particular attention is also devoted to those absent from typical curriculum decision making; curriculum studies is concerned with issues of equity, access, and voice. This option is housed in the School of Teaching, Learning and Education Sciences.

The Educational Technology option focus is on the core areas of the field: design, development, utilization, production and evaluation of instructional systems, human computer interaction and technology applications to support learning and teaching. The doctoral program emphasizes research using educational technology in applied settings. The Ph.D. in Education/Educational Technology prepares future researchers for a variety of professional positions. Graduates are typically employed as university faculty, educational or instructional technology specialists in universities, community colleges and schools, or as training managers or instructional designer/developers in corporate settings. This option is housed in the School of Educational Foundations, Leadership and Aviation (SEFLA).

The Mathematics Education option prepares students to conduct research on teaching and learning mathematics at the P-12 level. Research may focus on a variety of aspects of teaching and learning mathematics including the affective domain and employ a wide variety of quantitative, qualitative or mixed methods. Graduates are prepared to teach a broad range of mathematics education courses at both the undergraduate and graduate levels and are qualified for faculty positions in community colleges or secondary teacher education programs as well as other mathematics education leadership positions. This option is housed in the School of Teaching, Learning and Education Sciences.

The Language, Literacy, and Culture option focuses on the intersection of theory, research, practice and policy in the examination of language, literacy and culture from early childhood through adulthood recognizing the centrality of literacy in promoting equitable opportunities in our global society. Students explore language and literacy across contexts and across social movements to promote equity and honor linguistic and socio-cultural diversity as cultural capital. Specializations in this option include reading, writing and New Literacies; English education; children’s and adolescent literature; and world language education. This option is housed in the School of Teaching, Learning and Education Sciences.

The Professional Education Studies option is intended to develop scholars of educational theory and research who advance knowledge fundamental to teaching and learning in a diverse and global society and fundamental to social justice and equity in education. Diverse perspectives include but are not limited to in-depth study of theories used to advance social justice and equity in education, teaching and learning; analyses of diverse teaching and learning contexts; application of inquiry-based teaching-learning theory; use of research methodologies (qualitative, quantitative, mixed methods and conceptual/theoretical methodologies) for studies in education; and conceptualization and reconceptualization of the meaning and value of social justice and equity in education, teaching, learning and teaching-learning contexts. This option is housed in the School of Teaching, Learning and Education Sciences. Maximum flexibility is provided for students to develop a specialization that meets their scholarly interests and career goals. Special Education is one specialization/emphasis area available in this option.

The Science Education option prepares students to conduct research on teaching and learning science at the P-12 level, and beyond. Research may focus on a variety of aspects of teaching and learning science and employ a wide variety of quantitative, qualitative or mixed methods. Graduates are prepared to teach a broad range of science education courses at both the undergraduate and graduate levels and are qualified for faculty positions in community colleges or secondary teacher education programs as well as other science education leadership programs.
positions. This option is housed in the School of Teaching, Learning and Education Sciences.

The Social Foundations option is intended to prepare future scholars and educators to employ a number of different disciplinary perspectives to analyze critically and evaluate policies and practices within and outside education to understand better how such policies and practices shape educational institutions. This approach is intended to heighten students’ abilities to examine, understand and explain educational arrangements, processes and practices to develop a disciplined sense of policy-oriented educational responsibility. Scholars in social foundations are expected to contribute to advancing the educational enterprise at national and international levels. This option is housed in the School of Educational Foundations, Leadership and Aviation (SEFLA).

The Workforce and Adult Education option is intended to strengthen research activities for improving practice in occupational education, provide graduate programs that reflect transformative roles in occupational education and the workplace, strengthen leadership and outreach services to the discipline, expand activities in international workforce development, and strengthen the cultural diversity in the field of occupational education studies. The focus is to prepare persons for leadership positions in higher education; international occupational education and workforce development organizations; national, state and community agencies; as well as public and private educational institutions. This option is housed in the School of Teaching, Learning and Education Sciences.

General Program Requirements, Application Procedures and Financial Aid

Master’s Program
TLL master’s degree options requires a minimum of 36 hours of coursework. In addition to coursework students take a comprehensive exam and complete either a Creative Component or Thesis. The Creative Component can take a variety of forms, as approved by the Advisory Committee, from an advanced paper to a creative demonstration of expertise gained through the degree. The thesis is original research. The student's Advisory Committee (three members) assists the student through all aspects of the program. Application to the Graduate College precedes program admission decisions. For unqualified admission an applicant must have completed an undergraduate degree in Education or a related field and must submit a curriculum vita and goals statement aligned with the option area chosen. Option areas have minimum grade-point requirements for the undergraduate degree and may have additional materials that make up the admissions packet.

Doctoral Program
The Doctor of Philosophy (PhD) degree requires a minimum of 69 semester hours beyond the master’s degree. Application to the Graduate College precedes program admission decisions. For program admission, candidates submit scores from the Graduate Record Exam or the Miller Analogies Test, a Statement of Goals and Objectives, references and examples of written expression. An interview may be required. To enter candidacy, students must pass a qualifying exam. Candidates conduct independent, original research reported through a dissertation. The student's Advisory Committee (four members) assists the student through all aspects of the program.

Financial Aid
Some support is available each year for research assistantships and for qualified graduate students to assume teaching responsibilities in the undergraduate curriculum. Interested persons are encouraged to apply at any time. Applications can be obtained from the School of Teaching, Learning and Education Sciences.

Faculty
Jennifer Sanders, PhD—Associate Professor and School Head
Professors: Pamela U. Brown, EdD; Gary Duhon, PhD; Pamela Fry, PhD; Christine Ormsbee, PhD; Terry Stinnett, PhD; Juliana Utley, PhD; Hongyu Wang, PhD; Qiuying Wang, PhD; Virginia Worley, PhD
Associate Professors: Julie Angle, PhD; Tony Ivey, PhD; M. Sue Christian Parsons, PhD; Brian Poncy, PhD; Jennifer Sanders, PhD; Adrienne Redmond-Sanogo, PhD; Donita Massengill Shaw, PhD; Sheri Vasinda, PhD; Shelbie Witte, PhD; Georgette Yetter, PhD
Associate Professor and Career and Technical Education Program Coordinator: Starla Holcomb, PhD
Assistant Professors: Christopher Anthony, PhD; Penny Cantley, PhD; Jennifer Cribbs, PhD; Erin Dyke, PhD; Candace Gann, PhD; Stephanie Hathcock, PhD; Shanedra Nowell, PhD
Clinical Associate Professor and Secondary Education Coordinator: Gayla Foster, PhD
Clinical Assistant Professors: Starla Halcomb, PhD; Claudia Otto, PhD
Clinical Instructor and Elementary Education Coordinator: Jill Metzger, MS
Clinical Instructors: Amy Olson, MS; Nicole Styers, MS; John Weaver, MS
Career and Technical Education: Certification, BS

Technical & Industrial Education Option

See NOCTI information above or the transfer of approved technical work in a teaching area.

Other Requirements

- 40 hours of upper-division course work.
- Required for graduation and recommendation for Standard Certification:
  a. 2.50 Overall GPA;
  b. 2.50 GPA in Major Requirements; and
  c. 2.50 GPA in Professional Core Requirements.
- The student must earn minimum grades of “C” or “P” in each course in the Major Requirements and Professional Core Requirements and must earn grades of “P” in all sections of observation courses and student teaching for recommendation for Certification.
- Students must demonstrate proficiency in a foreign language at the novice high level from among those languages identified by the Office of Educational Quality and Accountability.

Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
## Career and Technical Education: Non-Certification, BS

**Requirements for Students Matriculating in or before Academic Year 2018-2019.** Learn more about University Academic Regulation 3.1 (p. 812).

**Minimum Overall Grade Point Average:** 2.00  
**Total Hours:** 124

### General Education Requirements

**English Composition**

- See Academic Regulation 3.5 (p. 813)
- ENGL 1113 Composition I 3

| Hours Subtotal | 26 |

| Total Hours | 124 |

1  Full admission to Professional Education required.

Other Requirements

- 40 hours of upper-division course work. Required for graduation and recommendation for Standard Certification:
  a. 2.75 Overall GPA;
  b. 2.75 GPA in Major Requirements and specified general education requirements; and
  c. 2.75 GPA in Professional Core Requirements.
- The student must earn minimum grades of "C" or "P" in each course in the Major Requirements and specified General Education and Professional Core Requirements and must earn grades of "P" in all sections of observation courses and student teaching for recommendation for Certification.
- Students must demonstrate proficiency in a foreign language at the novice high level from among those languages identified by the Office of Educational Quality and Accountability. For clarification see OSU academic advisor.

Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

### Other Requirements

- 40 hours of upper-division course work.
- Required for graduation and recommendation for Standard Certification:
  a. 2.50 Overall GPA;
  b. 2.50 GPA in Major Requirements and specified general education courses; and
  c. 2.50 GPA in Professional Core Requirements.
- The student must earn minimum grades of "C" or "P" in each course in the Major Requirements and Professional Core Requirements and must earn grades of "P" in all sections of observation courses and student teaching for recommendation for Certification.
- Students seeking licensure should demonstrate, in an official Oral Proficiency Interview, oral proficiency in their target foreign language at the advanced-low level.

### Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
Secondary Education: Social Studies, BS

**Hours Subtotal** 30

**Total Hours** 124

1 Minimum GPA 2.50 required in combination with Major Requirements. Certification requirements that meet GE requirements.

2 Full admission to Professional Education required.

**Other Requirements**

- 40 hours of upper-division course work.
- Required for graduation and recommendation for Standard Certification:
  a. 2.50 Overall GPA;
  b. 2.50 GPA in Major Requirements; and
  c. 2.50 GPA in Professional Core Requirements.
- The student must earn minimum grades of “C” or “P” in each course in the Major Requirements and Professional Core Requirements and specified courses in General Education; and must earn grades of “P” in all sections of observation courses and student teaching for recommendation for Certification.
- Students must demonstrate proficiency in a foreign language at the novice high level from among those languages identified by the Office of Educational Quality and Accountability.
- For teacher certification, students must successfully complete OSAT (017), “U.S. History/OK History/Government/Economics”.
- Students may also take OSAT (018), World History/Geography” and/or OSAT (032) “Psychology/Sociology” to add additional certification areas.

**Additional State/OSU Requirements**

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student's declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

School of Kinesiology, Applied Health and Recreation

Dr. Doug Smith, PhD—Professor and School Head

The School of Kinesiology, Applied Health and Recreation (KAHR) offers undergraduate and graduate programs in Applied Exercise Science, Physical Education, Recreation Management and Recreational Therapy, and Leisure Studies. These programs provide excellence in graduate and undergraduate education through current academic relevance and proven standards. Candidates are encouraged to engage in scholarly inquiry and research productivity to benefit the people of Oklahoma and beyond. Areas of service extend through involvement with the university, community, state and nation. The commonality in programs within the KAHR provides unique opportunities for program interaction and collaboration for both faculty and students.

Course Prefixes

Course prefixes in KAHR include HHP (Health and Human Performance); RMRT (Recreational Management and Recreational Therapy); and LEIS (Leisure Studies).

Applied Exercise Science

Jason Defreitas, PhD—Assistant Professor and HHP Coordinator

The program in Applied Exercise Science at OSU prepares students through coursework such as biomechanics, exercise physiology, exercise psychology, exercise testing, sports nutrition, cardiac rehabilitation, strength and conditioning, and overall fitness for both healthy individuals and those with special needs. The Degree offers two options: Pre-Professional and Strength and Conditioning. The Pre-Professional concentration is designed for undergraduates interested in careers in Clinical Exercise Physiology, Cardiac/Stroke Rehabilitation, Physical Therapy, Occupational Therapy, Athletic Training, and graduate school. The Strength and Conditioning concentration is designed for students interested in careers in Strength and Conditioning, Personal Training, Fitness Instructor, Coaching, Fitness Facility Management, etc. This degree would also serve to prepare the student for various professional certification examinations, such as Certified Strength and Conditioning Specialist (CSCS), Certified Special Population Specialist (CSPS), Certified Personal Trainer (NSCA=CPT), Physical Therapist (CPT), Certified Health Fitness Specialist (HFS), Certified Exercise Physiologists (EP-C), etc.

Physical Education

Patricia Hughes, PhD—Associate Professor and Program Coordinator

The undergraduate program includes a curriculum designed for professional preparation as a certified teacher of physical education, PK-12. Core courses for all physical education students include science-based courses, teaching methods, health and content-specific courses. Students engage in two formal field-based experiences: (1) a 45-hour practicum consisting of on-site observational experiences in one or more public school settings; and (2) a clinical experience (student teaching) in elementary and secondary schools during the final semester. A minor in Coaching Science is also offered, for which a student does not need to be a Physical Education major.

Recreation Management and Recreational Therapy

Tim Passmore, EdD, CTRS/L—Associate Professor and Program Coordinator

The program in Recreation Management and Recreational Therapy Program prepares students at the undergraduate and graduate levels for careers in recreation management and recreational therapy. The undergraduate program in Recreational Therapy is accredited through the Commission on Accreditation of Allied Health Programs. Students completing the Recreational Therapy program are eligible to sit for the National Council for Therapeutic Recreation Certification (CTRS) and apply for Medical Licensure in the State of Oklahoma through the Oklahoma Medical Licensing Board. Recreational Therapy prepares students to work in a variety of settings including hospitals, rehabilitation centers, day programs, institutions and within the community. Recreational Therapy is a valued part of the health care and human services. Individuals with illness, disabilities or limitations are helped to restore, enhance or maintain their health, independence and well-being through recreational therapy.

Those students completing the Recreation Management program are eligible to sit for the Certified Park and Recreation Professional. Recreation Management prepares students for employment in a variety of settings such as municipal, commercial, and corporate recreation; state and national park services; YMCAs and YWCAs; and armed services recreation. Recreation Management is a growing field and is a multi-billion dollar industry. Non-majors may complete a 21-credit minor in Recreation Management.

Sports & Coaching Science

Program Area Faculty: Tim Baghurst, PhD—Associate Professor

The Sports & Coaching Science degree prepares students at the undergraduate level for careers in athletic coaching and ancillary fields. The curriculum prepares professionals for certification via various sports organizations relevant to their specific sport of interest (e.g., United States Tennis Association, National Football League, United States Volleyball Association), or prepares them to successfully achieve other sport and exercise-based certifications such as personal training. The degree will also prepare students for the many graduate programs available nationwide in coaching science and education.

The Sports & Coaching Science Program prepares students for work and further study in a variety of settings including: professional, collegiate, or secondary school sport organizations; elite training facilities; athletic league officiating; small businesses (e.g., karate, cheer, gymnastics); sport psychology; athletic training; strength and conditioning; and sports management.

Programs/Areas of Emphasis Degrees

Degrees offered through KAHR programs include Bachelor of Science (BS), Master of Science (MS) and Doctor of Philosophy (PhD).

Applied Exercise Science

- Applied Exercise Science
  - Pre-Professional - BS
  - Strength and Conditioning - BS
Health and Human Performance
- Health and Human Performance - MS
- Health, Leisure and Human Performance - PhD
- Leisure Studies - MS
- Physical Education
  - Teaching - BS

Recreational Management and Recreational Therapy
- Recreational Management and Recreational Therapy
  - Recreation Management - BS
  - Recreational Therapy - BS

Sports and Coaching Science
- Sports and Coaching Science - BS

Undergraduate Programs
- Applied Exercise Science: Pre-Professional, BS (p. 1424)
- Applied Exercise Science: Strength and Conditioning, BS (p. 1426)
- Physical Education: Teacher Education, BS (p. 1429)
- Recreation Management and Recreational Therapy, Recreation Management, BS (p. 1432)
- Recreation Management and Recreational Therapy, Recreational Therapy, BS (p. 1434)
- Sports and Coaching Science, BS (p. 1436)
- Coaching Science (COAS), Minor (p. 1428)
- Recreation Management and Recreational Therapy (RMRT), Minor (p. 1431)

Graduate Programs
Graduate Program
Doug Smith, PhD—Professor and Graduate Coordinator

MS in Health and Human Performance
The health and human performance program provides preparation at the master’s level with the option of health promotion. The 36-hour degree offers a Thesis and Non-thesis (Creative Component) option. The program focuses on advancing the students understanding of the proximal and distal determinants of mental and physical health.

PhD in Health, Leisure and Human Performance
The purpose and focus of this program is to prepare excellent entry-level research scholars for formal and informal learning organizations. They may serve in such roles as faculty members at colleges and universities and scholar practitioners in the workplace. Students meet their career needs and goals through (1) community-based, translational research and (2) classroom experiences focusing on social justice and diversity. The option in health and human performance is designed to permit flexibility within the Health discipline while assuring that all students in the program are provided the opportunity to develop research skills which facilitate functioning as future faculty members or scholar practitioners.

Master of Science in Leisure Studies
Beyond the baccalaureate level, the program in leisure studies provides preparation at the master’s level across the discipline. Students develop a plan of study, under the advisement of a graduate committee and may focus on various emphasis areas in recreation, parks and leisure services or in recreational therapy. Graduates of the master’s degree are typically employed in management and administrative positions in a wide variety of recreation, parks and leisure service settings. Graduates with a master’s degree with the focus on Recreational Therapy are typically employed in healthcare settings to include hospitals, physical rehabilitation facilities, behavioral health, facilities, long-term care facilities and other facilities focused on healthcare. These include areas such as campus recreation, municipal parks and recreation, military recreation, YMCAs, state parks and others. The master’s degree is 36 credit hours beyond the bachelor’s degree and many graduate assistantships are available for qualified students.

PhD in Health, Leisure and Human Performance, with an option in Leisure Studies
Students seeking the terminal degree in Leisure Studies engage in the PhD in HLHP. Those completing this program are well prepared for entry-level positions as faculty members in a wide range of colleges and universities. To facilitate student readiness to work in academia, doctoral students work closely with faculty, engage in coursework and examinations, and participate in opportunities for experiences in teaching, scholarship and service. Core learning experiences include an understanding of curriculum, applied ethics and administration, as well as developing an understanding of the common tripartite mission of most universities - scholarship, teaching, and service. The PhD requires 60 hours of coursework beyond the master’s degree; many graduate assistantships are available for qualified students.

Faculty
Douglas Smith, PhD—Professor and Head
Regents Professor: Bert Jacobson, EdD
Associate Professors: Timothy Baghurst, PhD; Patricia Hughes, PhD; Donna Lindenmeier, PhD; Tim Passmore, EdD; Melissa Zahl, PhD
Assistant Professors: Jason DeFreitas, PhD; Nathaniel Jenkins, PhD; Taryn Price, PhD
Visiting Lecturer: Melissa Jensen, MS

Graduate Program
Tim Passmore, EdD, CTRS/L—Associate Professor and Graduate Coordinator
Applied Exercise Science: Pre-Professional, BS

Other Requirements

- 40 hours of upper-division course work.
- Documentation of current first aid/CPR certification prior to completion of HHP 4480 Internship in Health and Human Performance.
- Required for graduation:
  a. 3.00 Overall GPA;
  b. 3.00 Overall GPA for enrollment in HHP 4480 Internship in Health and Human Performance;
  c. 3.00 Overall GPA in College/Departmental Requirements; and
  d. 3.00 Grad/Ret GPA in Major Requirements.
- The student must earn minimum grades of “C” or “P” in the College/Departmental Requirements and Major Requirements.

Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student's declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

1 Full Admission to Professional Education Required

Other Requirements

- 40 hours of upper-division course work.
- Required for graduation and recommendation for Standard Certification:
  a. 2.50 Overall GPA;
  b. 2.50 GPA in Major Requirements; and
  c. 2.50 GPA in Professional Core Requirements.
- The student must earn minimum grades of “C” or “P” in the Major Requirements and Professional Core Requirements, and must earn grades of “P” in all sections of student teaching for recommendation for Certification.
- The student must earn minimum grades of “C” or “P” in the College/Departmental requirements.
- Prior to enrollment in the student teaching experience the student must:
a. have all course work completed, and  
b. demonstrate proficiency in a foreign language at the novice high level  
c. supply evidence of First Aid/CPR certification valid through the end of the student teaching experience

**Additional State/OSU Requirements**

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
Recreation Management and Recreational Therapy (RMRT), Minor

Requirements for Students Matriculating in or before Academic Year 2018-2019. Learn more about University Academic Regulation 3.1 (p. 812).

Select 6 hours of RMRT electives (one course must be 4000-level, no credit for Leisure/Activity courses) in consultation with RMRT faculty or Education advisor

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

**Other Requirements**
- 40 hours of upper-division course work.
- Required for graduation:
  a. 2.75 Overall GPA;
  b. 2.75 GPA in College/Departmental Requirements; and
  c. 2.75 GPA in Major Requirements.
• The student must earn minimum grades of “C” or “P” in the College/Departmental Requirements and Major Requirements.

Additional State/OSU Requirements

• At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.

• Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.

• Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.

• Degrees that follow this plan must be completed by the end of Summer 2024.
Professional Education Unit

Officers of the Professional Education Council

John Romans, PhD — Dean and Executive Director of Professional Education

Robin Fuxa, PhD — Director of Professional Education

The College of Education, Health and Aviation coordinates all professional education programs offered at Oklahoma State University. All programs are operated in collaboration with the colleges of Agricultural Sciences and Natural Resources, Arts and Sciences, Human Sciences and the Graduate College. The Dean of the College of Education, Health and Aviation serves as the Executive Director of the Professional Education Unit (PEU). The Professional Education Council has been established as the governance and oversight structure for the Professional Education Unit. The Unit has a mission statement, goals and a strategic plan that guide the operation of its programs.

Professional Education Unit Core Values

The underlying structure of the unit is articulated through its conceptual framework that guides the direction of programs, teaching practices, candidate performance, faculty scholarship, and service. The core values of the conceptual framework emphasize leadership, ethics and professionalism, academics and professional roles, diversity and service orientation/community outreach. (L.E.A.D.S.)

Leadership

The PEU prepares candidates who are committed to the belief that professional educators who provide quality education are the foundation of a prosperous and democratic society.

Ethics and Professionalism

The PEU prepares candidates who demonstrate ethical and professional behavior in their interactions with students, families, colleagues and communities and practice social justice.

Academic and Professional Roles

The PEU provides opportunities to prepare knowledgeable candidates who reflect upon the connections between academics and their professional roles.

Diversity

PEU prepares candidates who believe everyone deserves the opportunity to learn and can learn; they possess knowledge, skills, and dispositions to serve as effective professionals who understand and meet the needs of a diverse society. (See Professional Education Diversity policy for more information: https://education.okstate.edu/site-files/im-files/peu/peu_policy_statements.pdf.)

Service Orientation/Community Outreach

The PEU prepares candidates who value and engage in service and meaningful involvement of the learner/client and their families, as well as their school and their community.

All Professional Education programs are administered by the Dean of the College of Education, Health and Aviation and are coordinated through the Office of Professional Education. Upon completion of an approved program or degree, passing the appropriate Certification Examinations for Oklahoma Educators (CEOE), and the recommendation of the University, the candidate will be eligible for certification to serve in Oklahoma schools. All candidates completing an approved program or applying for an initial or advanced certificate are subject to all rules and regulations specified by the OSU Professional Education Unit, the Oklahoma State Board of Education and the Office of Educational Quality and Accountability (OEQA). State-mandated changes in teacher certification may result in additional requirements for certification.

Certification programs are offered at various levels in the College of Education, Health and Aviation as well as in the Colleges of Agricultural Sciences and Natural Resources, Arts and Sciences, and Human Sciences, but all require earning at least a bachelor's degree for recommendation for a standard certificate. Each candidate (regardless of level or college) seeking recommendation for certification from OSU through a Professional Education program must make formal application to do so using the “Application for Admission to Professional Education” and must meet the admission standards specified. Graduate programs leading to the master’s degree, the education specialist degree, and both the Doctor of Education and the Doctor of Philosophy degrees are offered in several areas. In addition, we offer pathways for non-traditional routes to certification in some certification areas. Professional Education programs at Oklahoma State University are accredited by the Council for the Accreditation of Educator Preparation (CAEP) (formerly NCATE) and the OEQA.

Information regarding all Professional Education policies and practices may be obtained from the Office of Professional Education or the College of Education, Health and Aviation website. Inquiries concerning any aspect of Professional Education programs at Oklahoma State University should be addressed to the head of the School or Department offering the program or the Office of Professional Education, 325 Willard.

The Unit prepares educator candidates with the knowledge, skills, and dispositions for a wide range of certification and teaching areas. There are increasing employment opportunities in business, industry and state and federal agencies for persons with strong preparation in education specialties.

Undergraduate Initial Teaching Certification Programs

Elementary Level (PK-8) Programs

Early Childhood Education (PK-3)
Elementary Education (1-8)

Elementary/Secondary Level (PK-12) Programs

Art Education
Foreign Language (French, German, Spanish)
Music-Instrumental
Music-Vocal
Physical Education/Health/Safety

Secondary Level Programs

Agriculture Education
Secondary English
Secondary Mathematics
Secondary Science
Secondary Social Studies
Criteria for Admission to Undergraduate Professional Education Programs

The student must meet all of the following criteria to be fully admitted to Professional Education:

1. Orientation to Professional Education Course and Field Experiences. An appropriate orientation to Professional Education course must be completed with a grade of "C" or better. One semester credit hour of early field experiences must be completed with a grade of "C" or better or grade of "P".
2. Basic Skills Competency. Basic skills competency must be demonstrated by successful completion of the Oklahoma General Education Test (OGET).
3. Minimum cumulative overall GPA of 2.50 or higher as specified by the individual program. The minimum cumulative overall GPA must be earned based on no fewer than 40 credit hours of courses to include lower-division general education requirements as specified in the student's program.

Criteria for Admission to Graduate (post-baccalaureate) Professional Education Programs

Graduate (post-baccalaureate) students must complete the Application for Admission to Professional Education form. Post-baccalaureate candidates must meet one of the following criteria for full admission to Professional Education:

1. The student must have completed an approved Professional Education program and hold a valid Oklahoma certificate or Provisional, Standard, or Professional Certificate; or a valid certificate from a state with which the Oklahoma State Department of Education has an interstate contract. The certificate or Provisional, Standard, or Professional Certificate must have included successful completion of (a) one semester credit hour of early field experiences with a grade of "C" or better or a grade of "P" and (b) an orientation to professional education course with a grade of "C" or better or a grade of "P". If the graduate student does not hold a valid credential and did not successfully complete the criteria listed above, he or she must meet 2 or 3.
2. Students in a Master's program must satisfy the departmental requirements for unqualified admission to the Master's degree program:
   - a. have a minimum cumulative overall GPA of at least 2.50 or higher as specified by the individual program;
   - b. complete one semester credit hour of early field experiences with a grade of "C" or better or a grade of "P" and
   - c. complete an orientation to Professional Education course with a grade of "C" or better or a grade of "P" and receive a passing score on the OGET.
3. Students classified by the Graduate College as "special" or "provisionally admitted" must:
   - a. (a) have a minimum cumulative overall GPA of at least 2.50 or higher as specified by the individual program; and
   - b. (b) complete one semester credit hour of early field experiences and an orientation to Professional Education course with a grade of "C" or better or a grade of "P" and receive a passing score on the OGET.

Professional Education Dispositions

Following is a list of professional dispositions all pre-service teachers should exhibit in coursework, field experiences and student teaching: ethics, commitment to student learning, respect for diversity, professionalism, professional growth, communication and advocacy (further description and assessment tool available on the Professional Education website). Faculty of Professional Education and specialization courses will assess candidates throughout the program. Candidates evaluated below target on dispositional assessments will be offered remediation and their placement in PEU field experiences/clinical practice is not guaranteed.

Admission to Professional Education

The criteria for admission to Professional Education programs are based on University-wide policies recommended by the Executive Director of Professional Education through the Professional Education Council. Requirements are applicable to all Professional Education administrative units of the colleges preparing educators. Students should submit an Application for Admission to Professional Education form to the Professional Education Unit as early as possible in their programs. The candidate is not considered a fully-eligible participant in a Professional Education program until formally admitted to the Professional Education Unit.

Full admission is required to enroll in the restricted courses in teaching methods and the clinical practice internship.
Professional Portfolio
Candidates in Professional Education are required to submit a professional portfolio for review and approval at designated checkpoints prior to certification. Details of the portfolio are available in the Professional Education Student Handbook (http://education.okstate.edu/peu).

Transfer Students
Transfer students must work toward meeting the criteria for full admission to Professional Education established by Oklahoma State University as soon as possible during the first semester at OSU. It may be possible to transfer admission from another Oklahoma institution. For information see the OSU site http://education.okstate.edu/peu or contact the Office of Professional Education.

Retention in Professional Education
For participation in all courses requiring full admission to and for continued acceptability in the Professional Education unit, an undergraduate candidate must maintain a grade-point average required for graduation of at least 2.50 or 2.75 depending on the program. If this GPA falls below 2.50/2.75, the candidate is placed on probation. When the required graduation GPA is raised above 2.50/2.75, the candidate is removed from probation. If the candidate fails to meet the graduation GPA requirement in that probationary semester or fails to have at least a 2.50/2.75 GPA for that semester, the candidate will be suspended from the Professional Education Unit. A candidate not satisfying the probation requirements at the end of the semester following the initial probationary semester will be administratively withdrawn from the Professional Education Unit and all courses having full admission as a prerequisite. Readmission to the Professional Education Unit will require a new application. Advisers are available to assist the candidate in regularly reviewing continuing retention or reinstatement in Professional Education programs. A retention review prior to enrollment and again prior to the beginning of classes each semester is encouraged when continuing retention is in question.

Graduate students, including those classified as graduate special students, admitted to the Professional Education unit must meet and maintain the requirements of the Graduate College to remain in good academic standing. This will require that graduate candidates earn and maintain a 3.00 GPA at Oklahoma State University following admission to Professional Education.

Remediation Opportunities
It is important for candidates to recognize the importance of milestones (admission requirements, testing, portfolio, etc.), professionalism and dispositions as non-negotiable requirements in Oklahoma State Statutes and national accreditation requirements. Program area faculty, advisers, and PEU staff are available to assist candidates through remediation opportunities as needed.

Foreign Language Proficiency
Candidates in Professional Education programs may be required to document competency in a foreign language at the novice high-level.

Program Completers
In Oklahoma, a program completer is defined as a person who has met all the requirements of an accredited educator preparation program. Program completers include all those who are documented as having met such requirements. OSU requirements include a degree, program credentials as documented on a transcript and written proof of having met the program’s requirements which include successful completion of all certification examinations and a professional portfolio. The certification check sheets are available at http://education.okstate.edu/peu/certification and detail requirements for each certification area.

Background Check for Field Placements
In alignment with Oklahoma state statutes and administrative code (OS §70-6-190, OS §70-3-104, OAC 210:20-9-98), the Oklahoma State University (OSU) Professional Education Unit (PEU) requires a state level background check (name check) on ALL non-certified candidates prior to placement in any field experience or clinical practice. The candidate is responsible for associated fees, which may vary depending on in-state or out-of-state student status. The PEU may request an updated background check as needed. While we make every effort to place candidates in the best possible field experience or clinical practice situation, school districts do review background checks and past criminal history in terms of their own policies and may decline hosting a particular candidate for field experiences or clinical practice. (In most cases this would be an Oklahoma check, however, in the case of an out-of-state transfer student it could be a check from their originating state.) This process if facilitated by the Office of Professional Education (325 Willard).

Diverse Placement in Field Experiences
Since OSU is a land-grant institution, we are particularly proud of partnering with Oklahoma public schools. Candidates will experience diverse placements in a variety of settings (rural, urban, and suburban), varied school community socio-economics, and experiences with diverse groups of students. Previous clinical/field experiences will be considered when determining the internship placement. See the Professional Education Diversity Statement for clarification: http://education.okstate.edu/peu/diversity.

Data on all field experience and clinical practice placements is maintained by the Professional Education Unit and Assistant Director of Assessment. Initial and Advanced certification programs work directly with the Coordinator of Field Experiences and Clinical Practice to best serve candidates and our partnering school districts with research-based experiences. Placements are based on the following criteria:

1. OSU must have a contractual agreement with the participating school district,
2. the Principal and the Mentor Teacher/Educator must be in agreement about the placement,
3. the Mentor Teacher/Educator must meet established criteria to work with a candidate,
4. a qualified OSU Supervisor must be available for travel to that site, and
5. a program Faculty recommendation for clinical practice (based on academics, field experiences, and dispositions).

Clinical Practice Requirements
In order to participate in clinical practice, all teacher candidates must complete the Clinical Practice Internship Application during the prior semester. Clinical practice information including the Clinical Practice Application link is available in the PEU Student Handbook. In addition, the link to the Clinical Practice Application will be sent to all candidates enrolled in a Professional Education course with a pre-internship field observation. Music and Physical Education students
who have completed pre-internship requirements will also receive the link. Candidates must submit their on-line applications electronically prior to specific dates in September and February. For placement in Spring semester clinical practice, the Clinical Practice Application must be submitted by the third Wednesday in September by 5 pm, and for placement in Fall semester clinical practice the Clinical Practice Application must be submitted by the third Wednesday in February by 5 pm. Candidates must complete submissions 1 and 2 of the portfolio, pass all required certification tests, and complete all required coursework with the specified GPAs before a placement will be sought. Candidates will be notified by e-mail of their placements after the Professional Education staff has received confirmation from the cooperating schools.

Candidates should not meet with teachers or principals in an attempt to establish their own placement. The following guidelines should be considered when listing your placement preferences in the space provided on the application:

- Public Schools: All internships occur in public schools.
- Placement in Diverse and Geographic Settings: Candidates will experience diverse placements: a variety of settings (rural, urban, and suburban), varied school community socio-economics, and experiences with diverse groups of students. Previous clinical/field experiences will be considered when determining the internship placement.
- Professional Experiences: Candidates will be placed in a location where professional experiences can develop. You will not be placed in a school where your children attend, a relative is employed, or you have developed personal relationships. In addition, candidates will likely not be placed in a school system from which they attended.
- Finances: Finances cannot be considered when determining the internship placement.
- Out of Area/State Placements: Out-of-area/out-of-state placements are rare and only granted in extreme cases. To request an out-of-area/out-of-state placement, refer to the policy on the OSU Professional Education website. Note that the intern must appeal to the Field Experiences Committee for consideration, and, if granted, the intern bears all financial responsibility associated with placement, travel to on-campus meetings, supervision and fees charged by a cooperating institution. Some programs facilitate international student teaching; check with your program for details.

NOTE: Check with your program area for information about any additional placement requirements for your certification area prior to completing your application.

Criteria for clinical practice placement for all Professional Education candidates are:

1. Continued full admission to a program in the Professional Education unit (see "Retention in Professional Education" on the previous page);
2. A current overall grade-point average of at least 2.50 or higher as specified by the program;
3. A grade-point average of at least 2.50 or higher as specified by the program in courses listed on the current approved program for certification in the areas of professional core, major and college/departmental requirements. No grade lower than a "C" or a "P" in either of these areas;
4. Completion of all professional education course work that includes at least one course in social foundations, all early field experiences (60 clock hours minimum), exceptional learners, and human growth and development, with no grade lower than "C" or "P" in any of these courses. It is recommended that all professional sequence coursework be completed.
5. Successful completion of submission II requirements for the Professional Education Program portfolio. The exact submission dates for portfolio are set by the Professional Education Unit in collaboration with programs. Portfolios should contain the materials listed in the Portfolio Handbook (http://education.okstate.edu/peu/portfolio) for the pre-internship submission and any additional items required by a specific program. The portfolio is completed in conjunction with the internship and should not be separate.
6. Successful completion of the appropriate subject area test for certification.

**Required Grades in Clinical Practice**

A candidate must receive grades of "P" in all sections of clinical practice in order to be recommended for a teaching certificate. A candidate assigned a grade of "F" in any section of clinical practice will not qualify for a recommendation for any level of certification.

Placements in clinical practice are made based on program faculty recommendation, availability of a qualified cooperating teacher, school district and site preferences, availability of a university supervisor, and candidate request. Candidates do not contact schools to secure their own placements. Candidates will not be placed in a school where a relative(s) attends or is employed or where the candidate has developed personal relationships with teachers or administration. In addition, candidates will not be placed in the school system from which they graduated. Finances cannot be considered when determining the internship placement. As a general rule, interns are placed within an approximate 75-mile radius of Stillwater.

**Out-of-Area/Out-of-State Placements**

A candidate requesting an out-of-area/out-of-state placement due to extenuating circumstances or seeking an assignment that provides exceptional professional experiences that would not be afforded by a local placement must submit a written request and receive the approval of the degree program area coordinator, the unit head and the PEU Field Experiences Committee. Securing placements and supervision are the responsibility of the Office of Field Experiences and Clinical Practice and the program area coordinator.

Extenuating circumstances may include, but are not limited to, medical or health issues that would impede the progress of the pre-service candidate's internship, family issues that would cause a hardship in the pre-service candidate's ability to successfully complete the student teaching assignment, or an issue of personal concern that cannot be addressed through a change in local placement site. Financial exigency alone is not grounds for an out-of-area/out-of-state placement.

Candidates granted an out-of-area/out-of-state placement must meet all clinical practice deadlines and requirements, including attendance of on-campus meetings and are required to pay the following fees:

1. All necessary and appropriate fees required in securing and finalizing the placement (e.g., such as reimbursement for cooperating teacher, supervisor, etc.). These fees are payable to the Office of Professional Education or designated office and/or out-of-state university at the beginning of the semester in which the placement is sought.
2. If a recommendation for certification is to be made by Oklahoma State University, the candidate is responsible for reimbursing visits
performed by the cooperating institution. All other criteria pertaining to in-state clinical practice placements apply as previously stated.

3. OSU fees - A non-refundable administrative fee to cover time and extra work related to securing an out-of-area placement may be assessed when an approved request is submitted to the Clinical Practices Office. The fee is due upon approval of designated site(s).

4. Supervising teacher fees - The out-of-area/out-of-state supervising fee is determined by each supervisor, the out-of-area/out-of-state university, and the Field Experience and Clinical Practices Office and typically ranges from $400 to $800 to cover the expenses incurred to conduct the required observations and student teaching evaluations. Students are responsible for all costs related to their out-of-area/out-of-state supervision. The fee is to be paid to Office of Professional Education, who will then pay the supervisor.

5. Cooperating teacher fees - Whereas local cooperating teachers are compensated with tuition vouchers, an out-of-area/out-of-state cooperating teacher may not benefit from such compensation.

6. Additional fees - The local (out-of-area/out-of-state) cooperating university may require a fee for supervision for a student not enrolled in their university or require co-registration in additional credits as a student at their university to attend their student teaching seminars.

Exceptions to this policy are permitted for students who are enrolled in programs that have a specific out-of-area/out-of-state placement policy and for students who participate in special placements abroad.

Qualifications for consideration of out-of-state/out-of-area placement request:

1. Minimum cumulative 3.0 GPA and 3.0 GPA in content/certification area classes.
2. Successful interview with Program Area Coordinator presenting your request for an out-of-area placement.
3. Recommendation from Program Area faculty.
4. Agreement from local (out-of-area/out-of-state) university to supervise the student teacher.
5. Availability and willingness of qualified university-affiliated supervisor to observe and evaluate student teacher.
6. A memorandum of understanding signed by the student, the Program Area Coordinator, and the PEU or Program Representative must be on file prior to the request for placement being sent to the school district. The out-of-area/out-of-state university may require additional signed documentation.

The Internship Experience

The clinical practice intern is supported by their student teaching course instructor, the assigned OSU Supervisor and Mentor/Cooperating Teacher and the School Principal. Mentor Teachers and OSU Supervisors are asked to complete training in co-teaching prior to the experience. If needed during the internship, the problem-solving process includes the support team above as well as Professional Education Unit representatives. The Memorandum of Understanding candidates sign at the application stage signifies their understanding of conduct to be followed during the internship. A breach in this agreement can result in removal from the internship.

Insurance

Neither school districts nor OSU insure candidates during the internship; candidates are responsible for carrying their own insurance of any type that may apply. Candidates are strongly encouraged to obtain professional liability insurance. Candidates are encouraged to consider student membership of the Oklahoma Education Association (SOEA) or the Professional Oklahoma Educators (POE), which typically provide liability insurance.

Outside Activities/Classes during the Clinical Practice Internship

The clinical practice internship experience is considered the beginning of your professional career and your energies should be directed toward making the most of your professional assignment. Therefore, outside employment or taking coursework other than the internship courses is definitely not advised during the internship. If you believe employment is a necessity, you must confer with your program area supervisor to determine if such employment should continue, or if you should consider completing your internship another semester.

Appeals

By enrolling in Professional Education programs at Oklahoma State University, students accept the responsibility for complying with all applicable Professional Education Council policies and procedures that allow them to maintain good academic standing. If the student believes that the established policies of the Professional Education Council have not been fairly or consistently followed, he/she has the right to pursue an appeal.

Certification Examinations for Oklahoma Educators

All candidates who graduate or are seeking recommendation for certification from a Professional Education program are required to complete the Certification Examinations for Oklahoma Educators before a license or area of certification can be issued. The examinations, which include a general education test, subject area tests, and a professional teaching exam (OGET, OSAT, and OPTE), are administered by the Evaluation Systems, Pearson for the Office of Educational Quality and Accountability. Registration materials are available online at www.ceoe.nesinc.com (http://www.ceoe.nesinc.com). Candidates for Elementary, Early Childhood and Special Education certification must also pass the Oklahoma Reading Test.

Teacher candidates must successfully complete the OGET prior to admission to Professional Education, the OSAT prior to student teaching placement and the OPTE at or near completion of their program and prior to a certification recommendation.

Registration deadlines and score report dates are indicated on the website.

Recommendations for Certificate, or Additional Certification Areas

Application information for an Oklahoma certificate can be obtained in the Office of Professional Education, 325 Willard. Candidates seeking advisement concerning teacher certificates can be assisted by a Coordinator in the Office of Professional Education.
Effective May 31, 2001, Title 68 O.S. 238.1 requires all certificate holders be in compliance with Oklahoma state income tax laws before a teaching certificate can be obtained or renewed.

Effective November 1, 2001, Oklahoma Statute 70 O.S. 6-190 requires applicants for initial Oklahoma teacher certification to have a full federal fingerprint-based background clearance.

To receive Oklahoma State University's in-state or out-of-state certification 'Recommendation' or 'Verification' of program completion, the applicant must:

• be admitted and maintain admission to OSU's Professional Education Unit;
• complete the appropriate level of degree;
• meet the Foreign Language Proficiency Requirement;
• meet the Computer Proficiency Requirement;
• complete the required courses with the required grades and grade-point averages;
• have confirmation of the final clearance of portfolio submission III;
• pass the required Certification Examinations for Oklahoma Educators for Oklahoma certification; and
• complete the state's application for certification.

Unless the applicant has successfully completed all of the above, Oklahoma State University will not make a recommendation or verify program completion for an in-state or out-of-state certificate.

A candidate assigned the grade of "F" in any section of clinical practice will not qualify for a recommendation for a license or any level of certification. Requirements for certification and degrees are not necessarily the same thing. Candidates must meet all other certification requirements, including portfolio and foreign language proficiency if appropriate.
COLLEGE OF ENGINEERING, ARCHITECTURE AND TECHNOLOGY

College Administration
Paul J. Tikalsky, PhD, PE, FASCE, FACI, EACR—Dean and Donald & Cathey Humphreys Chair
Randy Seitsinger, FAIA—Associate Dean of Academic Affairs and AT&T Professor
Charles F. Bunting, PhD—Associate Dean for Research and Henry Bellmon Chair
Raman P. Singh, PhD—Associate Dean for Engineering, OSU-Tulsa and Director, Helmerich Research Center
Ed Kirtley, MA—Assistant Dean of Engineering Extension

Campus Address and Phone
Address: 201 Advanced Technology Research Center, Stillwater, OK 74078
Phone: 405-744-5140
Website: www.ceat.okstate.edu (http://www.ceat.okstate.edu)

The vision of the College of Engineering, Architecture and Technology (CEAT) is "To be the leading public university in engineering, architecture, and technology that engages diverse students, faculty and staff with industry and government to deliver excellence in advanced learning, leadership, relevant research, and benefits to society."

“Our mission is to provide a diverse population with a quality education in engineering, architecture and technology. Through CEAT, OSU develops ethical leaders who promote economic and community vitality with technical knowledge, innovation, and communication expertise that connects scientific research, professional education, technical assistance and scholarship to industry, the State of Oklahoma, the nation and the world.”

The College of Engineering, Architecture and Technology is a community of scholars, innovators and leaders that is transforming our lives. The preparation of professionals that anticipate the needs of a changing world is at the nexus of society, economy, ethics, sustainability and humanity. The College is committed to training professionals that innovate, design and build projects that provide solutions for both the developed and the developing world.

The mission of the College of Engineering, Architecture and Technology (CEAT) is one that embraces students from diverse backgrounds to imagine and discover the challenges of engineering, architecture and technology, and to bring about innovation using their proficiency in science, mathematics, communications, ethics and humanity. This mission is built on the foundation of the University’s mission and the expectations of a world class university.

As Oklahoma’s land-grant university, CEAT fulfills the most fundamental premise that founded OSU; to promote economic and community viability through technical assistance, academic and professional education, training and communication in the areas of engineering, architecture and technology, and by connecting scientific research and scholarship to industry, communities, and individual citizens in Oklahoma, the region and the world.

As we progress into the future, professionals with a higher education will continue to be largely responsible for shaping our world. The power they exercise is an exciting prospect and presents a sobering responsibility. Less complex problems have been solved and are now a part of history. Many difficult problems remain. The need for talented and highly trained professionals is obvious; one will be embarking on a lifetime of challenge as he or she prepares for a career in engineering, engineering technology or architecture at Oklahoma State University.

The College of Engineering, Architecture and Technology offers a complete spectrum of educational opportunities at both the undergraduate and graduate levels designed to give graduates the capability and flexibility to meet the ever-changing needs of a society that is committed to technological innovation. To make continuing contributions, engineers, architects and technologists must have many abilities at their command. The modern tools and processes of industry must be understood. The processes of design and analysis require a firm understanding of mathematics and the sciences. An effective engineer, architect or engineering technologist must develop sensitivity to human needs, ideas, institutions and cultures. These programs prepare graduates to be effective contributors within human organizations and provide an increased understanding of both the technical and non-technical factors that shape our human environment. With this firm foundation, and a commitment to lifelong learning, College of Engineering, Architecture and Technology graduates are fully prepared to make contributions to society throughout their professional careers.

The curriculum in each program provides the optimum combination of breadth in the enduring fundamentals and specialization in a discipline. Each curriculum sensitizes the student to ethical, social, cultural, and global issues that will shape their ideas and contributions. To equip the student to contribute to solutions at the cutting edge of technology, curricula are continuously evolving to include current applications of the principles. Through the combination of theory, practice and improved sensitivity to diverse issues, graduates will be prepared to support their diverse interests while positively contributing to the advancement of technology and the world.

Academic Programs
Academic programs offered in the College of Engineering, Architecture and Technology culminate in the following degrees:

Schools of Engineering
- Bachelor of Science in Aerospace Engineering, Biosystems Engineering with options in bioprocessing and food processing, environment and natural resources, machine systems and agricultural engineering, and premedical; Chemical Engineering with options in biomedical/biochemical and premedical; Civil Engineering with an option in environmental; Computer Engineering; Electrical Engineering; Industrial Engineering and Management; and Mechanical Engineering with options in premedical or petroleum.
- Master of Engineering in Electrical Engineering.
- Doctor of Philosophy in Biosystems Engineering, Chemical Engineering, Civil Engineering, Electrical Engineering, Industrial Engineering, Mechanical and
Engineering and Management, Materials Science and Engineering, and Mechanical and Aerospace Engineering.

**School of Architecture**
- Bachelor of Architecture, Bachelor of Architectural Engineering.
- Graduate Certificate in Integrative Design of Building Envelope.

**Division of Engineering Technology**
- Bachelor of Science in Engineering Technology in Construction Engineering Technology with options in building and heavy, Electrical Engineering Technology with a computer option, Fire Protection and Safety Engineering Technology, and Mechanical Engineering Technology.
- Master of Science in Engineering Technology with an option in Fire Safety and Explosion Protection.

**Accreditation**
Undergraduate engineering programs are separately accredited by the Engineering Accreditation Commission of the ABET, http://www.abet.org.

The Bachelor of Architecture program is accredited by the National Architectural Accrediting Board, Inc., http://www.naab.org/.

The undergraduate engineering technology programs are separately accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.

**High School Preparation**
In addition to the curricular requirements for admission specified by OSU, the College of Engineering, Architecture and Technology strongly recommends that students have a fourth year of mathematics and an additional year of laboratory science.

Initial placement in OSU mathematics courses is by placement examination to ensure that each student will be challenged, but has the preparation to be successful in the first mathematics course. Placement in science courses is based on prior preparation in the science and completion of or placement beyond prerequisite mathematics courses. When appropriate, a student with an exceptionally strong background can obtain academic credit by advanced standing examination or by College Level Examination Program (CLEP) tests.

**Enrolling in the College of Engineering, Architecture, and Technology**
A freshman student who has been admitted to OSU can be enrolled directly into a CEAT pre-professional degree program if the student has both of the following performance requirements:

1. an ACT Composite score of 24 or higher, or a total SAT score of 1090 or higher, or a SAT R score of 1160 or higher, and
2. an ACT MATH score of 24 or higher, or a SAT Math score of 560 or higher, or a SAT-R Math score of 600 or higher, OR achieve a GPA of 3.5 or higher (on a 4.00 grading scale standard weighting (1.0) to The College Board's Advanced Placement courses and the International Baccalaureate higher-level courses) in the required 15 core high school courses.

**SAT total score is the combination of Critical Reading and Math sections only. SAT/R scores indicated here represent tests taken on or after the National March 2016 test.**

Prospective engineering, architecture or technology students who do not meet these performance qualifications may enroll in any other college or may enroll in University College in the Pre-CEAT program and work with a CEAT-focused adviser to gain the academic background for enrollment in CEAT pre-professional degree programs. That student will be enrolled in a CEAT pre-professional degree program when he/she has met the following performance requirements:

1. passed all prerequisite MATH courses needed to enroll in Calculus I or Technology Calculus I, and
2. has an OSU Cumulative GPA of at least 2.5.

Transfer students can enroll directly into a CEAT pre-professional degree program if they satisfy all OSU resident transfer student requirements, have a GPA of at least 2.5, and are qualified to enroll in Calculus I or higher in the MATH sequence. Other transfer students may enroll in University College in the Pre-CEAT program until they meet the qualifications for enrolling in a CEAT pre-professional program.

Students transferring to CEAT pre-professional school from another major at OSU must meet the same requirements for admission as a student transferring from another college or university.

International student applications must be received by June 15, November 1 or April 1 for the fall, spring and summer terms, respectively, to be considered for admission to pre-professional school.

**Special College Programs**

**CEAT Living/ Learning Program.** CEAT residential floors have been established in Parker Hall and Allen Hall for both male and female CEAT students. Parker Hall is reserved for CEAT Freshman and Allen Hall is reserved for CEAT sophomores and upperclassmen. Living/ Learning Programs provide an atmosphere that is conducive to study. The students experience a community where they can work together, have access to tutoring and other services, and serve as role models for other students. Special activities are planned for the floors, including events with faculty and other leaders. They are highly recommended for student success in CEAT.

**CEAT Summer Bridge** is a two-week residential, on campus, preparatory program for incoming freshmen students who have been accepted to Oklahoma State University and who plan to study a major in CEAT. This program is designed to guide students as they transition from high school to the academic rigors of CEAT coursework through academic review, mock exams, orientation seminars and engineering design projects. In addition, the students will build relationships with peers, faculty and staff, and start the process of building strong study habits with the assistance of CEAT upperclassmen as mentors. https://studentservices.okstate.edu/summer-bridge-program

The **Discover Architecture Program** introduces high school students to Architecture, Architectural Engineering, Landscape Architecture, and Construction Science and Management. This week-long summer program has academic projects that are designed to stimulate creativity and be fun! Participants live in campus housing, and complete projects that include the application of sketching and designing in model, using computer presentation tools, and several hands-on building projects to help students understand if a career in the building arts might be right for them. The program is offered by Oklahoma State University faculty at the Stillwater campus for students who are at least 16 years of age. http://arch-ceat.okstate.edu/discover-architecture
The Pre-CEAT Program is housed within University College but located in CEAT. This program provides a focused adviser, tutoring and other activities to help students get academically ready for success in CEAT.

CEAT Scholars Program provides educational experiences for a select group of students to develop and enhance their technical competence, world view, professional and public responsibility, and leadership skills. Based on demonstrated academic and leadership potential, up to 100 scholars are selected each year, by application and interview, to enter this four-year program. Students participate in special lectures, regional tours, cultural events, seminars, personal development activities, faculty mentoring, and summer tours in the U.S. and abroad. https://ceat.okstate.edu/ceat-scholars-program

CEAT Freshman Research Scholars Program provides opportunities for accelerated intellectual development of a select group of students. Each student is assigned a research faculty mentor and participates in a research program. The initial assignment is for one year and it may be extended based on student interest, research project continuation and mentor availability. https://scholardevelopment.okstate.edu/freshman-research-scholars/prospective-freshman-researchers

WW Allen Scholars Program is designed for top academic students, who also show significant promise in leadership and career ambition. The program is highlighted by the opportunity to pursue a master's degree at the University of Cambridge in the UK following graduation from OSU. http://ceat.okstate.edu/w-w-allen-scholars-program

Phillips 66 SHIELD Scholars Program provides scholarships and professional and personal development through enrichment activities, seminars and community service. The program is for current students enrolled full-time in chemical engineering, civil engineering, computer engineering, electrical engineering, fire protection safety engineering technology, industrial engineering, mechanical engineering or materials engineering. http://ceat.okstate.edu/scholarships

CEAT Grand Challenge Scholars Programs focus on preparing students to be the generation that solves the grand challenges facing society in this century with emphasis on integrative research, interdisciplinary curriculums, entrepreneurship, global understanding and service learning. https://ceat.okstate.edu/gcsp

CEAT Diversity Programs (CDP) provide services to support, retain and graduate all CEAT students which includes underrepresented populations such as Native Americans, African Americans, Hispanic/Latino Americans, Women, First-Generation, Non-Traditional, Disabled, Veterans and LGBTQ. All students are welcome to participate, learn and celebrate the value of a diverse CEAT community. https://studentservices.okstate.edu/diversity

CEAT Career Services is dedicated to helping students reach their career goals by providing individualized career assistance, specialized workshops, and resources on a variety of topics including: career exploration, job search strategies, resume and job search correspondence preparation, interviewing skills, and salary negotiation. The office also supports the Cooperative Education Program (Co-op) and provides individual career assessments for undergraduate students. As part of the OSU Career Services system, CEAT Career Services works in close partnership with CEAT Student Academic Services to link academic and career success. http://studentservices.okstate.edu/career (http://studentservices.okstate.edu/career)

CEAT Cooperative Education Program (Co-op) provides an avenue for undergraduate students to complete a year of full-time work experience directly related to their academic studies. Co-op students alternate terms of major-related employment with terms of full-time course work to achieve a quality education and industry experience. In addition to professional development, participation in the Co-op program earns academic credit and maintains full-time enrollment status for students during the work experience terms. http://studentservices.okstate.edu/cs/co-op

CEAT Study Abroad Programs offer students the opportunity to expand their education by traveling and studying outside the United States. Opportunities range from shorter faculty-led programs to semester exchange opportunities.

must be accepted by Feb. 1 students should apply and be accepted to CEAT by November 1st. You acceptance to OSU and CEAT, for priority scholarship consideration based off of the student’s eligibility through their OSU application and potential, as well as financial need. Freshmen and undergraduate transfer the basis of academic achievement, campus involvement and leadership undergraduate and graduate students at all levels, and are granted on alumni, private and corporate donations. Awards are available for Numerous CEAT scholarships are funded through the generosity of scholarship Development/Leadership Programs can be found on the Honors College Information regarding The Honors College at OSU, and Scholar diploma is conferred upon graduation for successful completion of all Honors College requirements.

Scholarships
Numerous CEAT scholarships are funded through the generosity of alumni, private and corporate donations. Awards are available for undergraduate and graduate students at all levels, and are granted on the basis of academic achievement, campus involvement and leadership potential, as well as financial need. Freshmen and undergraduate transfer students are automatically considered for most CEAT scholarships, based off of the student’s eligibility through their OSU application and acceptance to OSU and CEAT, for priority scholarship consideration students should apply and be accepted to CEAT by November 1st. You must be accepted by Feb. 1st for all other scholarship consideration. All CEAT scholarships are awarded on a competitive basis. Some scholarships require additional applications. Details can be found at http://ceat.okstate.edu/scholarships.

Current undergraduate (continuing) students should submit applications for general CEAT scholarships online at http://ceat.okstate.edu/scholarships.

Computing Requirements
For students in Engineering, Architecture and Technology, the college requires that all students have several basic tools. Students in the College must have a scientific calculator and a laptop computer. The scientific calculator should be capable of computing trigonometric functions, logarithmic and natural logarithmic functions, basic statistical analysis, and all algebraic functions. The laptop requirements are published at http://ceat-its.okstate.edu.

Academic Advising
The College’s Office of Student Academic Services (http://studentservices.okstate.edu/) provides advisement for all CEAT freshman students except for BAE students who are advised in their academic department. Other CEAT students will transfer to advisement within their academic unit prior to or at admission to Professional School. University College provides advisement for OSU students who do not meet the qualifications for enrollment in CEAT but wish to become qualified to enroll in a CEAT degree program in the future. Each student is personally advised in the planning and scheduling of his or her coursework, assisted with the selection of a major, and is counseled and advised individually on matters of career choice, activities at OSU and on other academic matters.

Each CEAT student, and his or her adviser, carefully selects general education, core engineering or architecture, and elective courses to meet the curriculum objectives and accreditation criteria. To assist students in planning and mapping their academic success, an electronic account is created for each student at the time of initial enrollment. Students have access to their personal account, via the STAR System, where they can review their advising materials, degree sheet, flowchart and other documents. The adviser assists the student with academic decisions and works to ensure accuracy and compliance; however, the ultimate responsibility for meeting degree requirements rests with the student.

The College of Engineering, Architecture, and Technology Professional School Concept
Pre-Professional School. In each CEAT pre-professional degree program, lower-division coursework is devoted to preparing the student for professional school. The content of the pre-professional school program is similar for most engineering degree programs and includes English composition and technical coursework devoted to mathematics through calculus and differential equations, general chemistry, general physics, engineering and engineering sciences. Requirements vary for Architecture, and Technology degree programs. Once a student is admitted into the pre-professional school program, he/she will complete coursework that is typically taken during the first two years of an engineering, architecture, or technology curriculum. Near the completion of this coursework, the student is considered for admission to one of the professional schools of the College to continue in the upper-division program. After satisfying admission standards, the student is then permitted to pursue a curriculum leading to the designated undergraduate degree in his/her discipline.

Professional School. Upon formal admission to the professional school of his or her choice, the student proceeds through the junior and senior years of the degree program, fulfilling “Major Requirements” as listed in the right column on the degree requirement sheet. Degree requirement sheets can be found on the degree programs page (p. 794).

Engineering Professional School Admission Requirements
All undergraduate CEAT students must follow the curriculum and requirements for their chosen major, as prescribed on the degree programs page (p. 794), for their matriculation date, or upon their election, a later annual version of that publication. Students are encouraged to carefully read the program requirements for their chosen major and matriculation date.

To be admitted to one of the professional schools of engineering, the student must:
1. Complete a minimum of 60 credit hours of courses listed on the degree requirement sheet from an accredited institution of higher learning.
2. Complete all required courses noted on the degree requirement sheet.
3. Earn a grade of "C" or better in technical courses required for the degree and taken prior to admission to professional school. In these courses, meet or exceed the Technical GPA requirement listed in the Departmental GPA Requirements section below (when applicable).

4. Complete a minimum of 12 credit hours of courses at OSU Stillwater or Tulsa, required for the degree. In these courses, meet or exceed the OSU GPA requirement listed in the Departmental GPA Requirements section below (when applicable).

5. Complete a minimum of 9 credit hours of technical courses at OSU Stillwater or Tulsa, required for the degree. In these courses, meet or exceed the OSU Technical GPA (all technical courses required for the degree taken at OSU) listed in the Departmental GPA Requirements section below (when applicable).

6. Earn a final grade of "C" or better in all courses submitted to satisfy the University's English requirement.

7. Meet any additional requirements for the selected major, as specified below.

8. Demonstrate an acceptable level of academic competence in subject material comparable to that covered in pre-professional school as defined by the selected professional school below. Such demonstration may be by completion of coursework or by examination with not more than half the requirements satisfied by examination.

9. Demonstrate an acceptable level of professional potential, including academic integrity and ethical behavior, as determined by the department head.

**Departmental GPA Requirements**

All specified GPAs are calculated based on the last grade earned in repeated courses. The minimum GPA requirements by school, and any additional requirements, are as follows:

1. School of Biosystems and Agricultural Engineering:
   GPA Requirements for Professional School: Technical GPA-2.70, OSU GPA-2.70, OSU Technical GPA-2.70 and a grade of "C" or better in each course that is a prerequisite for a major course.

2. School of Chemical Engineering:
   GPA Requirements for Professional School: Technical GPA-2.70, OSU GPA-2.50, OSU Technical GPA-2.70. A final grade of "C" or better must be achieved in the required pre-professional courses (noted on the degree requirement sheet). If a "C" is obtained in ENGL 1113 Composition I or ENGL 1313 Critical Analysis and Writing I, ENGL 1213 Composition II or ENGL 1413 Critical Analysis and Writing II is also required.

3. School of Civil and Environmental Engineering:
   GPA Requirements for Professional School: Technical GPA-2.70, OSU GPA-2.50, OSU Technical GPA-2.70, and a grade of "C" or better in each course that is a prerequisite for a CIVE course and in all required technical pre-professional courses (noted on the degree requirement sheet) whether taken prior to professional school or not. Students may enroll in no more than nine hours of upper-division major requirements prior to admission to professional school unless they secure permission from the head of the school. However, enrollment preference in such courses will be given to students admitted to the professional school.

4. School of Electrical and Computer Engineering:
   GPA Requirements for Professional School: Technical GPA-2.70, OSU GPA-2.60, OSU Technical GPA-2.70.

5. School of Industrial Engineering and Management:
   GPA Requirements for Professional School: Technical GPA-2.50, and a grade of "C" or better in each course that is a prerequisite for an IEM course and in all technical pre-professional courses (noted on the degree requirement sheet) whether taken prior to professional school or not.

6. School of Mechanical and Aerospace Engineering:
   GPA Admission Requirements for Professional School: Technical GPA 3.0, OSU GPA 3.0, OSU Technical GPA 3.0.
   Admission and degree requirements: a grade of "C" or better in each course that is a prerequisite for an MAE course and in all technical pre-professional courses (noted on the degree requirement sheet) whether taken prior to professional school or not. Minimum GPA requirements for graduation: Overall GPA 2.50 GPA for MAE prefix courses-2.5 GPA for MAE 4000 level courses-2.5. Students may enroll in no more than nine hours of upper-division major requirements prior to admission to professional school unless they secure permission from the head of the school. However, enrollment preference in such courses will be given to students admitted to the professional school.

7. Refer to the School of Architecture catalog page (p. 1534) for requirements.

8. Refer to the relevant academic area on the Division of Engineering Technology catalog page (p. 1485) for requirements.

Biosystems and Agricultural Engineering

The School of Biosystems and Agricultural Engineering is administered jointly by the College of Agricultural Sciences and Natural Resources and the College of Engineering, Architecture and Technology.

Biosystems engineers are professionals who create and adapt engineering knowledge and technologies for the efficient and effective production, processing, storage, handling and distribution of food, feed, fiber and other biological products, while at the same time providing for a quality environment and preserving and protecting natural resources. Biosystems engineers directly address problems and opportunities related to food, water, energy and the environment—all of which are critical to the quality of life in our society. Subject-matter specialization is provided through the following four undergraduate option areas: bioprocessing and food processing, environment and natural resources, machine systems and pre-medical.

Biosystems engineering courses integrate engineering sciences, physical sciences, and biological sciences, and teach students to address real-world challenges. With the guidance of experienced faculty, students work both as individuals and in teams to design creative solutions to complex problems.

The overall objective of the undergraduate biosystems engineering degree program is to provide the comprehensive education necessary to prepare students for successful, productive and rewarding careers in engineering for agricultural, food and biological systems.

Within a few years of graduation, Biosystems Engineering program graduates will become top professionals, managers or leaders in a wide variety of industries and organizations involved with biosystems engineering, where they apply discovery, problem solving, and leadership skills for the benefit of their organization and the society at large.

The undergraduate educational program is divided into two components—pre-professional and professional. In the pre-professional portion of the biosystems engineering program (usually equivalent to two years of study) the focus is on the underlying biological, physical, chemical and mathematical principles of engineering, supplemented by appropriate general education courses in English, social sciences and humanities. Students who demonstrate proficiency in this portion of the program are eligible for admission to the professional school in biosystems engineering.

The professional school portion of the biosystems engineering curriculum (typically two years) builds systematically upon the scientific knowledge acquired in the pre-professional curriculum. In professional school, students have the opportunity to focus on the option areas listed above. The degree is accredited by the Engineering Accreditation Commission of ABET (see www.abet.org) under criteria for biological engineering and similarly named programs.

Each professional school course builds upon preceding engineering courses to develop in the student the ability to identify and solve meaningful engineering problems. The coursework is specifically sequenced and interrelated to provide design experience at each level, leading to progressively more complex, open-ended problems. The coursework incorporates the social and economic aspects of technical problems, and stresses the responsibilities of engineering professionals to behave ethically and promote occupational and public safety. The program culminates in senior year design courses in which students integrate the analysis, synthesis and other abilities they have developed throughout the earlier portions of their study into a capstone experience. At this point, students are able to design components, systems and processes that meet specific requirements, including such pertinent societal considerations as ethics, safety, environmental impact and aesthetics. The students have also developed and displayed the ability to conduct experiments essential to specific studies and to analyze the experimental results that lead to meaningful conclusions.

The biosystems engineering program verifies that our students possess core engineering knowledge and capability by requiring students to take the Fundamentals of Engineering exam, which is an important step toward becoming a professional engineer. All candidates for the BS degree in biosystems engineering must take the Fundamentals of Engineering exam prior to receiving their degree.

An integral part of this education continuum—from basic science through comprehensive engineering design—is learning experiences that facilitate the students’ abilities to function effectively in both individual and team environments. Moreover, the program provides every graduate with adequate learning experiences to develop effective written and oral communication skills. State-of-the-art computational tools are introduced and used as a part of their problem-solving experiences. Finally, the students’ experience in solving ever-more-challenging problems enables them to continue to learn independently throughout their professional careers.

A wide variety of employment opportunities are available for biosystems engineers in industry, public service and education. Some of these opportunities include positions in governmental agencies, consulting engineering firms, and agricultural and food equipment industries. Biosystems engineers are employed throughout the U.S. as well as internationally.

Students interested in a degree in Biosystems Engineering may initially enroll in the College of Engineering, Architecture and Technology or the College of Agricultural Sciences and Natural Resources. Through either college, they will be assigned a Biosystems Engineering adviser.

Undergraduate Programs

- Biosystems Engineering (General Option), BSBE (p. 1452)
- Biosystems Engineering: Bioprocessing & Food Processing, BSBE (p. 1454)
- Biosystems Engineering: Environmental and Natural Resources, BSBE (p. 1456)
- Biosystems Engineering: Machine Systems & Agricultural Engineering, BSBE (p. 1458)
- Biosystems Engineering: Pre-Medical, BSBE (p. 1460)

Graduate Programs

The Department of Biosystems and Agricultural Engineering offers programs leading to the Master of Science and Doctor of Philosophy degrees in Biosystems Engineering. These degrees emphasize research and development.

Excellent laboratory and computer facilities are available for students to explore research and design in such areas as bioprocessing, food engineering, sensor and control technology, waste management and
utilization, hydrology, water quality, porous media flow, and intelligent systems for agricultural machine design and production.

Research projects are supported by the Oklahoma Agricultural Experiment Station and by state, federal and private grants and contracts. Well-trained faculty members, many of whom are registered professional engineers with research, consulting and design experience, guide the graduate students' activities and plan programs to meet students' needs. Graduate students design experiments and special equipment to conduct their work. They are expected to demonstrate, by supporting research or by designs, the ability to identify a problem, define alternatives, propose a solution, organize a design or an experimental investigation, manage the project to completion, and report the results through peer-reviewed papers and professional presentations.

Admission Requirements
Admission to either the Master of Science or Doctor of Philosophy degree program requires graduation from an engineering curriculum accredited by the Engineering Accreditation Commission of ABET (www.abet.org). Students without accredited degrees may be admitted provisionally and may be required to take additional courses. A student must be accepted by an adviser in the department prior to official admission to the graduate program.

Degree Requirements
A candidate for either of the graduate degrees listed above follows an approved plan of study which must satisfy at least the minimum University requirements for that particular degree.

Faculty
John N. Veenstra, PhD, PE, BCEE—Professor and Department Head
Professor Orville L. and Helen Buchanan Endowed Chair: Carol Jones, PhD, PE
Regents Professor/Director, Biobased Products and Energy Center:

</table>

1 Courses that must be completed prior to admission to professional school.
2 Complete ENSC 2113 Statics, ENSC 3233 Fluid Mechanics, and 2 other ENSC courses prior to admission to Professional School.

Other Requirements

- Admission to Professional School is required.
- Refer to the OSU Catalog corresponding to your matriculation date for detailed admission requirements.
- A minimum grade of "C" is required in each course that is a prerequisite for a major course.
- Students are required to complete the Fundamentals of Engineering (FE) exam prior to graduation.
• A minimum of 40 semester credit hours and 100 grade points must be earned in courses numbered 3000 or above.
• A 2.00 GPA or higher in upper-division hours.

Additional State/OSU Requirements
• At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
• Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
• Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
• Degrees that follow this plan must be completed by the end of Summer 2024.

Total Hours | 125 |

1 Courses that must be completed prior to admission to professional school.
2 Complete ENSC 2113 Statics, ENSC 3233 Fluid Mechanics, and 2 other ENSC courses prior to admission to Professional School.

Other Requirements

- Admission to Professional School is required.
- Refer to the OSU Catalog corresponding to your matriculation date for detailed admission requirements.
- A minimum grade of 'C' is required in each course that is a prerequisite for a major course.
- Students are required to complete the Fundamentals of Engineering (FE) exam prior to graduation.
• A minimum of 40 semester credit hours and 100 grade points must be earned in courses numbered 3000 or above.
• A 2.00 GPA or higher in upper-division hours.

Additional State/OSU Requirements
• At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
• Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
• Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
• Degrees that follow this plan must be completed by the end of Summer 2024.
CEAT Dean's Office and CEAT Online Learning

The CEAT Online Learning office provides administrative and technological support along with specialized recording classrooms and a studio to enable CEAT faculty to offer high quality online courses. To learn more about CEAT Online Learning and see their contact information, please visit the CEAT Online Learning website (https://ceatonline.okstate.edu).

Courses are open to non-degree seeking students who meet the course prerequisites.

Nuclear Engineering Minor

Oklahoma State University is part of the University Engineering Alliance (UEA). The UEA is a partnership of eight universities that offers online graduate and undergraduate coursework in nuclear engineering.

To learn more about the UEA, please visit their website (http://www.universityengineeringalliance.org).

To declare the OSU Nuclear Engineering minor or enroll in UEA nuclear engineering classes, contact the CEAT Online Learning office.

**Additional OSU Requirements**

**Undergraduate Minors**

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student's declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
Chemical Engineering

Chemical engineers use knowledge of how nature works (science) and the language of science (mathematics) to create value and solve difficult problems for the benefit of society. The key skill that differentiates chemical engineering from other disciplines is the ability to understand, design and operate transformation (physical or chemical) processes. Chemical engineers literally change (transform) the world. Many in the public assume chemical engineers work only in chemical plants and petroleum refineries. The reality is that chemical engineers work in a broad range of industries including pharmaceuticals, biochemicals, semiconductor materials, foods, plastics, paper, steel, consumer goods, automotive, specialty materials, oil & gas production, renewable energy, engineering services, and the list goes on. Key to providing a benefit to society, chemical engineers are responsible for resource conservation, minimizing pollution, minimizing costs, and maximizing quality and safety of processes that make the products.

The emphasis on the molecular or chemical nature of everything people use is what makes chemical engineers different from other engineers. The emphasis on the processes that make the products is what makes chemical engineers different from chemists.

Chemical engineers often find themselves defining a problem or product, developing a process to do what is needed, and then designing the equipment to carry out the process. After the installation, chemical engineers commonly manage operations, oversee equipment maintenance and supervise control of product quality. They trouble-shoot problems that hinder smooth operations, and they plan for future expansions or improvements. Their training and knowledge make them well-qualified to market products and processing equipment. The varied background and experience of chemical engineers make them ideally suited for advancement into top-level managerial and executive positions. An advanced degree in chemical engineering is not required.

Many who aspire to careers in medicine or law first obtain BS degrees in chemical engineering. The rigor of the program and the emphasis on critical thinking and analytical reasoning are highly valued by professional school admission committees. A career as a research scientist or academic typically requires a PhD degree.

Program Educational Objectives

The School has three broad objectives. Within the first few years after graduation, our BS graduates will have demonstrated:

1. Competencies – skill in tools and techniques that are fundamental to the job, many of which need to be learned after graduation.
2. Professionalism – partnership in the mission and within the human context of the enterprise - ethics, effectiveness, and awareness of the broad context of the detailed work.
3. Balance – a wise self-direction to life, community, health and self-view that finds the right balance between personal choices, which energizes self and others and enables effectiveness in relationships with others.

The goal of the BS degree program is to produce graduates who possess broad-based knowledge, skills and judgment that prepares them to succeed in the profession of engineering or in further studies at the graduate level, including medical school. To achieve this goal, the program is designed to progressively develop both technical and human skills.

In the pre-professional portion of the chemical engineering program (usually equivalent to two years of study), the focus is on the underlying scientific and mathematical principles of engineering, supplemented by appropriate general education courses in English, social sciences and humanities. Students who demonstrate proficiency in this portion of the program are eligible for admission to the professional school.

The curriculum in the professional school (typically the last two years) builds systematically upon the scientific knowledge acquired in the pre-professional curriculum. In professional school, students have the opportunity to focus in one of three emphasis areas:

1. the regular course prepares a graduate for a wide range of employment opportunities;
2. the pre-medical option is for those who wish preparation for medical school, and
3. the biomedical/biochemical option is for those who seek employment in bio-related professions.

Each emphasis area is accredited under the basic level EAC-ABET criteria for chemical engineering programs and each prepares a student for success in both employment and graduate study at OSU or other universities. A more complete description of exact degree requirements for the bachelor’s-level curricula is given in the publication Undergraduate Programs and Requirements at OSU.

Each professional school course builds upon the preceding chemical engineering courses to develop the ability to identify and solve meaningful engineering problems. The coursework is specifically sequenced and interrelated to provide design experience at each level, leading to progressively more complex, open-ended problems. The coursework includes sensitizing students to socially-related technical problems and their responsibilities as engineering professionals to behave ethically and protect occupational and public safety. The program culminates in the senior-year design courses in which the students integrate the analysis, synthesis and other abilities they have developed throughout the earlier portions of their study into a capstone experience. At this point, students will be able to design components, systems and processes that meet specific requirements, including such pertinent societal considerations as ethics, safety, environmental impact and aesthetics. The students will have developed and displayed the ability to design and conduct experiments essential to specific studies, and to analyze the experimental results and draw meaningful conclusions within an enterprise context.

Integral parts of this educational continuum from basic science through comprehensive engineering design are learning experiences that facilitate the students’ abilities to function effectively in both individual and collaborative environments. To achieve this, the program provides every student with adequate learning experiences to develop effective written and oral communication skills. State-of-the-art computational tools are introduced and utilized as a part of their problem-solving experiences. Finally, the students’ experience in solving ever-more-challenging problems gives them the ability to continue to learn independently throughout their professional careers.

Undergraduate Programs

• Chemical Engineering, BSCH (p. 1466)
• Chemical Engineering: Biomedical/Biochemical, BS (p. 1468)
• Chemical Engineering: Pre-Medical, BSCH (p. 1470)
Graduate Programs

The School of Chemical Engineering offers programs leading to the Master of Science and Doctor of Philosophy. A program of independent study and research on a project under the direction of a member of the Graduate Faculty will be satisfactorily completed by all graduate students. For the Master of Science candidate, the project may result in a thesis. For the Doctor of Philosophy candidate, the project will result in his or her dissertation.

Admission Requirements

Admission to either the Master of Science or Doctor of Philosophy degree program requires graduation from a chemical engineering curriculum approved by the ABET or a recognized equivalent from any international program.

Students with related undergraduate degrees, such as chemistry, automation engineering, etc., can be admitted conditionally, subject to completing prescribed undergraduate Chemical Engineering program courses. Admission is competitive based on undergraduate GPA, GRE and TOEFL (for international students), statement of interests, experience and recommendations.

The Master of Science Degree

Two options are offered for this degree, Research-Oriented and Practice-Oriented options. General requirements for the Research-Oriented MS degree in chemical engineering are 30 credit hours of work beyond the BS degree and an acceptable thesis. At least 18 hours must be in classwork and a minimum of six hours of credit is required for thesis research. The general requirements for the Practice-Oriented MS degree are 32 credit hours of work beyond the BS, including two hours of credit assigned to an acceptable technical report. For both options, the courses taken must include:

<table>

1. Courses that must be completed prior to admission to professional school.
2. Cannot use both ANSI 3423 Animal Genetics & BIOL 3023 General Genetics or BIOC 3653 Survey of Biochemistry & BIOC 3713 Biochemistry I.
3. See School policy. CHE advisor must approve.

### Other Requirements

**Admission to Professional School (required)**

- Refer to the OSU Catalog corresponding to your matriculation date for detailed admissions requirements.

**Graduation Requirements**

1. A minimum GPA of 2.00 is required in all CHE, CHEM, ENGR, and ENSC coursework.
2. The major engineering design experience, capstone course, is satisfied by CHE 4124 Chemical Engineering Design I and CHE 4224 Chemical Engineering Design II.

**Additional State/OSU Requirements**

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

### Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

### Other Requirements

**Admission to Professional School (required)**

- Refer to the OSU Catalog corresponding to your matriculation date for detailed admissions requirements.

**Graduation Requirements**

1. A minimum GPA of 2.00 is required in all CHE, CHEM, ENGR, and ENSC coursework.

**Hours Subtotal**: 6

**Total Hours**: 135

1. Courses that must be completed prior to admission to professional school.
2. Humanities courses - should select one from ENGL and one ART, ENGL, FLL, MUSI, PHIL or TH to also meet medical school requirements.
3. Social & Behavioral Sciences courses – should select from ANTH, PSYC, or SOC to also meet medical school requirements.

### Other Requirements

**Admission to Professional School (required)**

- Refer to the OSU Catalog corresponding to your matriculation date for detailed admissions requirements.

**Graduation Requirements**

1. A minimum GPA of 2.00 is required in all CHE, CHEM, ENGR, and ENSC coursework.
2. The major engineering design experience, capstone course, is satisfied by CHE 4124 Chemical Engineering Design I and CHE 4224 Chemical Engineering Design II.

**Additional State/OSU Requirements**

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
Petroleum Engineering (PETE), Minor

Requirements for Students Matriculating in or before Academic Year 2018-2019. Learn more about University Academic Regulation 3.1 (p. 812).

Runar Nygaard, runar.nygaard@okstate.edu, 420 Engineering North 405-744-5280

Minimum Overall Grade Point Average: 2.50
Total Hours: 18 hours

<table>

GEOL 3413 Petroleum Geology for Engineers is a prerequisite for all other courses. PETE 4303 Petroleum Rock and Fluids is a prerequisite for PETE 4313 Drilling and Well Completions, PETE 4333 Production Engineering and PETE 4343 Reservoir Engineering and Well Testing.

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).
Civil and Environmental Engineering

Civil engineers build the future. The exceptional diversity of professional practice in civil and environmental engineering presents many career opportunities for students.

The concern of civil engineers is infrastructure - the design, construction, management, alteration and utilization, which allows society to function. Civil engineers plan, design and construct, highways, waterway and railway systems, harbors and shipping facilities, systems for the treatment and distribution of water and for the collection and treatment of municipal and industrial waste, dams and hydroelectric works, airports and terminals, structures of every kind including buildings, bridges, towers, industrial plants, tunnels and subway systems, processes for the control of water and air pollution, and many other works of general benefit to society.

The professional curriculum in civil engineering is based on the pre-professional courses in mathematics, physical sciences and engineering sciences. On this foundation, required courses equip the student with the basic skills needed for the professional practice of civil engineering and provide the tools for more advanced study. Engineering theory and principles are developed in a way that will encourage their application to the practical solution of problems.

Educational Objectives

The Bachelor of Science in Civil Engineering degree program educates and prepares engineers who a few years after graduation will be:

1. Contributing to society through the practice of civil engineering in a variety of contexts, including the protection of public health and safety and the development of sustainable engineering solutions;
2. Effectively applying the technical knowledge, engineering principles, communication skills and personal attributes necessary to be adaptable and successful in the civil engineering profession;
3. Advancing within their profession, including attaining professional licensure and positions of leadership; and
4. Exhibiting life-long learning, including the pursuit of advanced degrees.

The curriculum is designed to enable students to satisfy the educational objectives in conjunction with the student outcomes. These outcomes state that graduates of the program will have:

a. an ability to apply knowledge of mathematics, science, and engineering,
b. an ability to design and conduct experiments, as well as to analyze and interpret data,
c. an ability to design systems, components, or processes to meet desired needs within realistic constraints (such as economic, environmental, social, political, ethical, health, safety and sustainability),
d. an ability to function on multi-disciplinary teams,
e. an ability to identify, formulate and solve engineering problems,
f. an understanding of professional and ethical responsibility,
g. an ability to communicate effectively,
h. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context,
i. a recognition of the need for, and an ability to engage in life-long learning, including an understanding of the importance of professional licensure,
j. a knowledge of contemporary issues, and
k. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

The School provides a curriculum that is effective and balanced among the major areas of civil engineering practice. Design capabilities are developed throughout the curriculum, culminating in a comprehensive senior design experience, incorporating much of the previous coursework. Some degree of specialization is provided through the choice of elective courses in structures, engineering mechanics, transportation engineering, soil mechanics and foundations, construction engineering and management, environmental engineering and water resources. There is a designated option for those students wishing to concentrate more heavily in the environmental area of practice.

Program curricula requirements are outlined in the publication Undergraduate Program and Requirements. The general civil option and the environmental option are accredited together by the Engineering Accreditation Commission of the ABET under the criteria for civil and similarly named engineering programs.

Southern Plains Transportation Center

Oklahoma State University, and seven other universities are members of the Southern Plains Transportation Center (SPTC). The regional transportation center is a US DOT designated Region 6 University Transportation Center (UTC) and cooperative venture with the Oklahoma Department of Transportation (ODOT), and other transportation agencies, operators and suppliers. The mission of the Center is to develop and transmit knowledge through research, training, technical assistance, and technology transfer; and to enhance the transportation systems that touch the lives of the people of Oklahoma and the region.

Undergraduate Programs

• Civil Engineering, BSCV (p. 1475)
• Civil Engineering: Environmental, BSCV (p. 1477)

Graduate Programs

The School of Civil and Environmental Engineering offers three programs leading to post-baccalaureate degrees—the Master of Science degree in civil engineering, the Master of Science degree in environmental engineering and the Doctor of Philosophy degree. The Master of Science degree is characterized by a technical specialization in a particular area of study. The Doctor of Philosophy degree is designed to prepare students for research and for the teaching profession in engineering.

Major areas of study in the School are applied mechanics, structural analysis, design, transportation, materials, construction engineering and management, geotechnical engineering, water resources and environmental engineering. Research in all major fields is continuously pursued. Master of Science in Civil Engineering candidates may choose to specialize or to engage in a broadly based program of study, in accordance with an approved and purposeful plan of study.

Admission Requirements

Candidates for the Master of Science or Doctor of Philosophy degree should have graduated from a civil engineering curriculum accredited by ABET. Graduates from other curricula and schools should submit transcripts to the head of the School of Civil and Environmental
Engineering for evaluation. Admission to the Master of Science in environmental engineering degree program is permitted for students who meet the minimum prerequisites as established by the School of Civil and Environmental Engineering.

Degree Requirements

All degree programs follow an approved plan of study that must be submitted at a designated time. All programs are characterized by the flexibility available in a study plan that is designed to satisfy the particular needs of the student, while conforming to the general requirements implied by the title of the degree and specified by the University.

The Master of Science degree in either civil or environmental engineering requires the completion of at least 30 credit hours beyond the bachelor’s degree, including a research thesis for which no more than six credit hours may be granted. The non-thesis option (32 credit hours) described in the Graduate College section may be permitted at the discretion of the student’s advisory committee.

The Doctor of Philosophy degree requires the completion of at least 90 credit hours of coursework beyond the bachelor’s degree, including not more than 30 credit hours for the research thesis. In addition, the candidate must meet the equivalency of the language requirement (six hours) in selected areas at the discretion of his or her committee to facilitate his or her research. Generally, official admission as a candidate for the Doctor of Philosophy degree in any program offered by the School will not be granted until a member of the Graduate Faculty in the School agrees to serve as major (or thesis) adviser for the prospective candidate.

Faculty

Norbert (Norb) Delatte, PhD—Professor and Head
Professor and M. R. Lohmann Chair: Norbert (Norb) Delatte, PhD, PE, F.ASCE, F.ACI
Dean, College of Engineering, Architecture and Technology, Professor and Donald & Cathey Humphreys Chair: Paul J. Tikalsky, PhD, PE, F.ASCE, F.ACI
Professor and Gilbert, Cooper, W&L Steel Chair: Tyler Ley, PhD, PE, F.ACI
Professor and Decker Dawson Chair: C. (Kelvin) Wang, PhD, PE

1 Complete courses prior to admission to Professional School.

**Additional State/OSU Requirements**

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

**Other Requirements**

**Admission to Professional School (required)**

- Refer to the OSU Catalog corresponding to your matriculation date for detailed admissions requirements.

**Graduation Requirements**

1. A minimum GPA of 2.00 is required in Professional School coursework (right hand column).
2. A 'C' or better is required in each course that is a prerequisite for a CIVE course.
3. The major engineering design experience, capstone course, is satisfied by CIVE 4043 Senior Design. If "B" or higher is not earned in ENGL 1113 Composition I, then ENGL 1213 Composition II must be completed.
Civil Engineering: Environmental, BSCV

Requirements for Students Matriculating in or before Academic Year 2018-2019. Learn more about University Academic Regulation 3.1 (p. 812).

1 Complete courses prior to admission to Professional School.

**Other Requirements**

**Admission to Professional School (required)**
- Refer to the OSU Catalog corresponding to your matriculation date for detailed admissions requirements.

**Graduation Requirements**
1. A minimum GPA of 2.00 is required in Professional School coursework (right hand column).
2. A ‘C’ or better is required in each course that is a prerequisite for a CIVE course.
3. The major engineering design experience, capstone course, is satisfied by CIVE 4143 Environmental Engineering Design. If "B" or higher is not earned in ENGL 1113 Composition I, then ENGL 1213 Composition II must be completed.

**Additional State/OSU Requirements**
- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
Construction Engineering Technology

The construction industry is the largest industry in the world. Leadership in this field requires a broad knowledge of labor, materials and equipment, capital and construction procedures. The interdisciplinary approach of the construction engineering technology program offers the student specialized coursework in all phases of construction, designed to prepare him or her for responsible positions in industry.

The primary goal of the Construction Engineering Technology (CET) program is to enhance the quality of the instructional program through effective management of the curriculum, teaching assignments and fiscal and physical resources. This goal includes providing instructional facilities, equipment and support services for faculty and students which maintain an excellent learning environment.

Program Educational Objectives

OSU Construction Engineering Technology graduates a few years after graduation will:

1. Solve problems typically found in the construction industry in construction engineering design, estimating, planning, scheduling and project management using mathematical, analytical and scientific skills of engineering technology.
2. Successfully work in teams and communicate effectively in written, oral and graphical forms.
3. Continue life-long career and professional growth by actively interacting with local industries and participating in appropriate professional societies.

Construction Engineering Technology graduates can expect to obtain these student outcomes upon graduation:

1. An ability to select and apply the knowledge, techniques, skills and modern tools of the discipline to broadly-defined engineering technology activities;
2. An ability to select and apply a knowledge of mathematics, science, engineering and technology to engineering technology problems that require the application of principles and applied procedures or methodologies;
3. An ability to conduct standard tests and measurements; to conduct, analyze and interpret experiments; and to apply experimental results to improve processes;
4. An ability to design systems, components or processes for broadly-defined engineering technology problems appropriate to program educational objectives;
5. An ability to function effectively as a member or leader on a technical team;
6. An ability to identify, analyze and solve broadly-defined engineering technology problems;
7. An ability to apply written, oral and graphical communication in both technical and non-technical environments; and an ability to identify and use appropriate technical literature;
8. An understanding of the need for and an ability to engage in self-directed continuing professional development;
9. An understanding of and a commitment to address professional and ethical responsibilities including a respect for diversity;
10. A knowledge of the impact of engineering technology solutions in a societal and global context; and
11. A commitment to quality, timeliness and continuous improvement.

Faculty with excellent credentials, including a balance of formal education, teaching ability and appropriate industry experience, are recruited nationwide and are provided opportunities for individual professional development and regular contact with the industry. Faculty members are encouraged to become involved in extension and research programs relating to the department’s areas of strength or growth and to serve the needs for continuing education within the industry, particularly in the regional construction community.

These needs and opportunities for service are assessed regularly through close cooperation with local and regional construction professionals and industry associations. An active Construction Engineering Advisory Board, representing a broad cross-section of the industry, meets regularly to offer support and guidance necessary to preserve uncompromising excellence.

The Construction Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org. The educational objectives of the Construction Engineering Technology program are consistent with those required by ETAC of ABET and are listed under “Division of Engineering Technology” in the Catalog.

Undergraduate Admission

Students who satisfy the CEAT admission requirements are eligible to enroll for the first two years of the program in the lower division of the curriculum for Construction Engineering Technology. In order to balance the number of students in the CET upper division with available CET resources, advancement to the CET upper division is by application. Applications are due to the CET no later than the last working day of April each year. To be eligible for program advancement, lower-division students must have:

1. Completed 60 credit hours of coursework counting toward the CET degree;
2. Completed all of the required (shaded) courses on the Degree Requirement Sheet (these courses are also listed on the Calculation Work Sheet of the Application to Upper Division form);
3. Achieved a grade of ‘C’ or better in the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMT 1213</td>
<td>Introduction to Construction</td>
<td>3</td>
</tr>
<tr>
<td>CMT 2253</td>
<td>Printreading &amp; BIM</td>
<td>3</td>
</tr>
<tr>
<td>CMT 2263</td>
<td>Estimating I</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 2103</td>
<td>Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 1214</td>
<td>College Physics II (LN)</td>
<td>4</td>
</tr>
<tr>
<td>GENT 2323</td>
<td>Statics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 2123</td>
<td>Calculus for Technology Programs I (A)</td>
<td>3</td>
</tr>
<tr>
<td>CMT 2352</td>
<td>Concrete Technology</td>
<td>2</td>
</tr>
</tbody>
</table>

A substitution for any of these courses must meet the same ‘C’ requirement.

4. Achieved a minimum Selection GPA (SGPA) of 3.05.

Annually, students who meet these criteria for program advancement and have made a timely application for admission to the upper division will be admitted to the upper division of the CET curriculum. The Selection
Grade Point Average (SGPA) is a weighted GPA based upon specified lower-division courses which have proven to be good indicators of student success in the program. For consideration of admission to the upper division of the Construction Engineering Technology program, the following courses and multipliers will be used in calculating SPGA’s:

- CMT 2352/2351 Concrete Technology & Concrete Technology Lab (x3 multiplier)
- CMT 2263 Estimating I (x3 multiplier)
- GENT 2323 Statics (x3 multiplier)
- CMT 2253 Printreading & BIM (x2 multiplier)
- CMT 1213 Introduction to Construction (x2 multiplier)
- MATH 2123 Calculus for Technology Programs I (A) (x2 multiplier)
- PHYS 1114 College Physics I (LN) (x2 multiplier)
- SPCH 2713 Introduction to Speech Communication (S) (x2 multiplier)
- ENGL 1113 Composition I (x2 multiplier)
- PHYS 1214 College Physics II (LN) (x1 multiplier)
- MATH 2133 Calculus for Technology Programs II (A) (x1 multiplier)
- EET 1003 Introduction to Microcomputer Programming (x1 multiplier)
- ACCT 2103 Financial Accounting (x1 multiplier)

Additional detailed information concerning admission to the upper division may be obtained directly from the CET program.

Transfer students are required to furnish transcripts and course descriptions for previous classroom courses, as well as examples of previous academic work. Evaluation and enrollment by the CET program is on a course-by-course basis for all transfer students.

The modern constructor must have a great deal of technical knowledge to keep abreast of rapidly changing equipment, materials and methods of construction. Specialized courses in estimating, surveying, structures, construction planning and scheduling, construction law and insurance, field and office management and construction procedures provide students with the background necessary for today’s construction industry. These specialized courses, in addition to a blend of the basic sciences, business and general studies, produce a well-balanced curriculum for students in construction engineering technology. Special attention is given to computer applications in construction estimating, and the development of graphic, written and oral communication skills is emphasized throughout the curriculum.

Students with an interest in building structures may select courses in the “building” option of the construction engineering technology curriculum, which provides them with knowledge of working drawings, mechanical and electrical equipment of buildings, and other coursework for a career in building construction.

Students with an interest in civil engineering structures may select courses in the “heavy” option of the construction engineering technology curriculum, which provides them with knowledge of highways, soils, foundations and other coursework for a career in the heavy and industrial construction industry.

The program attempts to identify and recruit highly qualified students who will benefit from the instructional platform, and faculty members promote retention and ultimate graduation of construction engineering technology students through effective instruction and advisement. A schedule of outcome assessment among graduates and their employers assures that the program continues to provide the academic training required for success.

Graduates of construction engineering technology have shown the curriculum to be successful in their development as productive members of the construction industry, holding responsible positions as project managers, estimators, material and equipment salespersons, and construction managers at all levels.

Hours Subtotal 6
Total Hours 124

1. Complete all required courses prior to admission to Upper Division. (These courses are also listed on the Calculation Work Sheet of the CET Application to Upper Division form.)

2. Achieve a grade of "C" or better.

Other Requirements

Admission to Upper Division (required)

1. Refer to the OSU Catalog corresponding to your matriculation date and the Policy for Admission to the Upper Division of the Curriculum for CET for detailed admissions requirements.
2. Complete a minimum of 60 credit hours (from the degree plan) prior to admission to Upper Division.
3. Achieve a minimum Selection GPA (SGPA) of 3.05 (from the Calculation Work Sheet of the CET Application to Upper Division form).

Graduation Requirements

1. A minimum overall GPA of 2.30 is required in all courses with engineering and engineering technology prefixes.
2. A grade of "C" or better is required in each course that is a prerequisite to a required course that has an engineering or engineering technology prefix.
3. Each student is required to sit for the American Institute of Constructors Level 1 – Associate Constructors Certification Exam.

Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

Division of Engineering Technology

Engineering technology education is concerned with the real-world application of engineering achievement. Almost all faculty members have extensive industrial experience, and students are educated and trained in such a way that they will be ready to work with little or no additional training after graduation.

Curricula

Engineering technology curricula at OSU are four-year programs which lead to the Bachelor of Science in Engineering Technology. Graduates of the program are known as “technologists and/or applied engineers.” The student receives an intensive education in his or her technical specialty and great depth in mathematics and technical sciences. The program provides breadth in related technical, communication and socio-humanistic studies. The graduate is to be capable of independent action in performance of technical activities and is frequently involved as a coordinator, expediter or supervisor of other technical personnel. His or her capability in technical sales and other public-contact positions is enhanced by his or her background in selected liberal studies.

The engineering technology graduate is qualified to select from a broad array of engineering-related positions. Job titles of engineering technology graduates include field engineer, test engineer, associate engineer, product engineer, sales engineer, tool designer, production engineer, engineering technologist, estimator, scheduler and project engineer.

Those who have the interest and aptitude toward applications are likely engineering technology majors. These students particularly appreciate the engagement of technical specialty courses beginning with the first semester and continuing throughout the course of study. The relevance of the technical science and related technical courses adds further satisfaction.

The Division of Engineering Technology is offering opportunities for its students to minor in entrepreneurship. Usually, students will take two or three additional classes to get a minor in addition to his/her degree.

The Bachelor of Science in Engineering Technology program is composed of the following curricular subdivisions:

- Mathematics and science—trigonometry, applied calculus, general physics, and chemistry or other science.
- Technical specialty—technical science and related technical courses.
- Communication—English composition, and written and oral technical communication.
- Social sciences and humanities—history, government, religion, literature, art, music.
- Electives—controlled and general.

Bachelor of Science in Engineering Technology Degree Programs

- Construction Management Technology, 124 hours
- Electrical Engineering Technology, 130 hours
- Fire Protection and Safety Engineering Technology, 125 hours
- Mechanical Engineering Technology, 122 hours

Master of Science in Engineering Technology Degree Programs

- Fire Safety and Explosion Protection, 30 or 32 hours

Master of Science Degree Programs

Doctorate of Philosophy Degree Programs

Fire and Emergency Management Administration, 33 hours

Fire and Emergency Management Administration, 45 hours beyond the master’s degree.

Accreditation

CO-OP Program

The College of Engineering, Architecture and Technology offers an experience-based program, Cooperative Education (Co-op). Co-op allows engineering technology students to achieve a balanced education through the combination of theoretical and practical knowledge during their early years of professional development. The student’s education is a cooperative effort between the University and industry. Students alternate semesters on campus with work semesters in industry during their junior and senior years. The periods of employment constitute an essential element in the educational process. Students gain practical knowledge which is carried back to the classroom, giving academic programs a sense of reality. By the time they receive their degrees, students have accumulated the equivalent of a year-and-a-half of progressively challenging work experience.

Participation in Co-op is voluntary; transfer students must successfully complete at least one semester at OSU prior to their first placement. Students may obtain further information about the program from the coordinator, 101A Engineering North.

Transfer Students

An important, contemporary educational development is the “two-plus-two” bachelor’s program. Those completing an associate degree in technology-oriented curricula at other institutions are generally admissible to the junior year with a minimum loss of academic time. The “two-plus-two” concept provides the attractive feature for students to obtain a four-year undergraduate degree in engineering technology.

Required coursework in mathematics and basic science is utilized to meet up to 18 semester hours of General Education requirements also. The Scientific Investigation requirement is met as a part of the coursework meeting professional requirements for basic science.

Academic Areas

- Construction Engineering Technology (p. 1479)
- Electrical Engineering Technology (p. 1496)
- Fire Emergency Management Program (p. 1503)
- Fire Protection and Safety Engineering Technology (p. 1506)
- Mechanical Engineering Technology (p. 1530)

Faculty

Young Chang, PhD, PE, CFPS—Professor and Interim Head

1 These courses are the same as MET 3803 and MET 4803, respectively.

Additional Requirements:
- 2.2 overall GPA in courses submitted for the minor
- Grade of C or better in each course submitted for the minor

Additional OSU Requirements

Undergraduate Minors
- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student's declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

Electrical and Computer Engineering

The School of Electrical and Computer Engineering is highly recognized throughout the nation for its student-centered, laboratory intensive curriculum. It is a partner of choice for employers seeking well-educated, highly-motivated and uniquely creative college graduates dedicated to life-long learning. The School has devoted professors from prestigious universities who serve, instruct and mentor undergraduate and graduate students pursuing BS, MEng, MS or PhD degrees in electrical engineering or a BS degree in computer engineering. Both the undergraduate Electrical Engineering and Computer Engineering programs are accredited by ABET—the leading accreditor of engineering programs—to assure students, parents, industry partners and other stakeholders that our programs are of the highest quality.

Electrical engineers and computer engineers have been at the center of the technological revolution that has occurred over the past 100 years. Marvels such as the transistor, radio, telephone, television, internet, microprocessor, computer, tablet, radar system, motor, wind generator, GPS, smart phone, laser, microwave oven, electric car, pacemaker, antennas and the flat panel display, to name only a handful, have resulted from the hard work and creative talents of electrical engineers and computer engineers. And since electricity and computers are essential in a modern society, the electrical engineer and the computer engineer will always be in high demand.

Electrical engineering encompasses many exciting subdisciplines including energy systems, machines, power electronics, analog electronics, digital electronics, mixed-signal electronics, VLSI chips, instrumentation, sensors, signal processing, machine vision, artificial intelligence, communications, control systems, robotics, wireless devices, electromagnetic fields, photonics, embedded controllers, networking, software development, biomedical devices and computer architecture. The School encompasses all of these subdisciplines in its curriculum or research activities.

Computer Engineering is a relatively young engineering discipline that combines a strong foundation in electrical engineering with elements of computer science, including hardware and software integration, and design. Computer engineering includes digital logic design, computer architecture, digital data communications, computer and sensor interfacing, microprocessors, digital control, VLSI circuits and systems, operating and software systems, and computer arithmetic.

Beyond creating technology, electrical and computer engineers of tomorrow must be aware of the social, economic, ethical and environmental impact of their respective technologies. They must also communicate effectively, possess excellent teamwork skills, and understand, perform and complete the process of engineering design. The undergraduate programs in electrical engineering and computer engineering at Oklahoma State University equip graduates with these critical skills.

Undergraduate Program Educational Objectives

The Undergraduate Program Educational Objectives reflect the aspirational expectations for our electrical engineering and computer engineering graduates after they enter their professional careers. Specifically:

• Our Graduates will be widely employed across the range of subdisciplines within electrical engineering and computer engineering, and will be highly sought after by industrial, academic, non-profit and governmental organizations.
• Our Graduates will compete in a technologically changing world, collaborate in a diverse workforce, and communicate effectively their knowledge and ideas to colleagues, employers, customers and stakeholders.
• Our Graduates will be recognized leaders, team players, problem solvers, innovators and entrepreneurs in their profession.
• Our Graduates will identify and contribute to solving grand-challenge problems that improve the lives of people in Oklahoma, the United States, and around the world, serving their communities and their profession to produce a lasting, significant and positive impact.
• Our Graduates will abide by the highest ethical standards of professional practice in a technologically changing, professional environment.
• Our Graduates will continue to develop professionally throughout their lives by being adaptive learners with a never ending desire to assimilate new knowledge and embrace new technologies.
• Our Graduates will have the knowledge to earn professional registration or certification in their field or earn an advanced post-graduate or professional degree should they choose.
• Our Graduates will make a positive difference in the world.

Undergraduate Program and Student Learning Outcomes

To support the aforementioned Program Educational Objectives, the School has established Student Learning Outcomes that are regularly assessed and expected of all students upon completion of their chosen program in Electrical Engineering or Computer Engineering. Attainment of the following outcomes prepares graduates to enter the professional practice of engineering:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science and mathematics;
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors;
3. an ability to communicate effectively with a range of audiences;
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts;
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives;
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions;
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The undergraduate electrical engineering and computer engineering programs at Oklahoma State University prepare each graduate for a life-long professional career. During the first two years of study, students enter into Pre-Professional School and complete a carefully designed program consisting of mathematics, physics, chemistry, statics,
introductory electrical and computer engineering courses, computer science and selected courses in the humanities and social sciences. After successfully completing Pre-Professional school, students are admitted into Professional School and enroll in specific electrical engineering and/or computer engineering courses.

Electrical engineering and computer engineering students in Professional School obtain fundamental knowledge and technical skills needed by tomorrow’s professionals. For electrical engineering students, these skills are learned in one of five areas of specialization that enable students to customize course choices to gain both a breadth of knowledge and a depth of understanding in a specific chosen area. These specializations areas include a) control systems, digital signal processing, and communication systems, b) energy and power, c) computer systems and digital electronics, d) analog electronics, and e) electromagnetics and optics. Computer engineering students learn these skills by focusing on their own challenging specialized curriculum, which is also designed to provide breadth and depth within the discipline. Specialized computer engineering topics include microcontrollers, embedded controllers, computer architecture, discrete mathematics, digital logic design, networking, cybersecurity, mobile computing and digital electronics.

By tailoring the program to align student interests with faculty strengths, the School enhances faculty-student interactions to ensure academic excellence. All electrical engineering and computer engineering students receive multiple engineering design experiences throughout Professional School. Instructional laboratories are a central part of the curriculum to grant opportunities for hands-on experience in areas such as microcomputers, digital logic design, electronics, networks, instrumentation, optics, real-time digital signal processing and electromagnetics.

Engineering design laboratories require students to solve open-ended problems in a manner that demonstrate the students’ ability to apply fundamental concepts, creativity and imagination, and to solve realistic problems of practical importance. These problems have several possible outcomes—students must choose an acceptable approach and demonstrate that the optimal outcome has been met.

The capstone design experience is a two-course sequence typically taken during the student’s last two semesters of the program. The capstone experience gives students an opportunity to apply and demonstrate the skills that they have developed throughout the program. These design courses integrate theory analysis, simulation, design and experimental skills the students have developed during their course of study. Teamwork, communication skills, and the complete engineering design process—from problem definition to prototype that includes both presentation and documentation—are emphasized.

Student design teams receive individual project mentoring from an appropriate faculty member who provides project management and supervision. The capstone experience concludes with a formal public design demonstration, oral presentation and written report. The new ECE Design Commons, an advanced design laboratory available to all students in electrical engineering and computer engineering, provides state-of-the-art capabilities for designing, prototyping, testing and diagnosing advanced hardware and software systems.

Degree Programs and Options

The School of Electrical and Computer Engineering (ECE) offers a full range of undergraduate and graduate program choices that allow students to excel in their careers. Specifically, the School of Electrical and Computer Engineering offers five degrees:

- Bachelor of Science in Electrical Engineering (BSEE)
- Bachelor of Science in Computer Engineering (BScpE)
- Master of Engineering in Electrical Engineering (MEngEE, non-thesis)
- Master of Science in Electrical Engineering (MSEE, thesis)
- Doctor of Philosophy in Electrical Engineering (PhD EE)

Bachelor of Science:

- This degree program is designed to provide fundamental scientific and mathematical knowledge needed for an engineering education and an entry-level engineering career.
- Broad-based and in-depth technical knowledge is provided to understand the scope of the electrical engineering and computer engineering professions.
- The degree focuses on analysis and design methods, laboratory and simulation experiences, and theoretical and practical problems.
- Requirements: 123 credits hours (BSEE) and 124 credit hours (BScpE).

Master of Engineering:

- This degree program is tailored to students who wish to gain advanced knowledge and expertise knowledge in subject areas associated with their professional pursuits.
- This non-research, non-thesis instructional program is ideal for Distance Education students or for baccalaureate graduates interested in professional development.
- This program is available online.
- Requirements: 33 credit hours of coursework. Specific requirements for the MEngEE program are available on the web in the document entitled “Memorandum to Graduate Students;” see https://ece.okstate.edu/.

Master of Science:

- This degree program is tailored to students who wish to gain advanced knowledge in subject areas associated with their professional pursuits.
- The program emphasizes research as part of the learning experience and culminates with the defense of a thesis.
- This program is an ideal preparatory experience for students who wish to pursue a PhD.
- This program is available online.
- Requirements: 24 credit hours of coursework and 6 credit hours of thesis research. Specific requirements for the MSEE program are available on the web in the document entitled “Memorandum to Graduate Students;” see https://ece.okstate.edu/.

Doctor of Philosophy:

- This degree program is tailored to students who desire to have a teaching and research career in academia or a research career in industry or government laboratories.
- This program is ideal for those students who have a passion to develop expertise knowledge.
- The program emphasizes the creation of new knowledge during the research process, the publication of that knowledge, and the defense of a dissertation.
• Requirements: 90 total credit hours beyond the BSEE/BSCpE degree. Specific requirements for the PhD program are available on the web in the document entitled “Memorandum to Graduate Students;” see https://ece.okstate.edu/.

Options: Students are also given the option to combine degrees to take advantage of common courses between various degrees, thereby reducing the total number of credit hours relative to non-combining options. These combining options are highly attractive from a financial and career point of view. That is, these options are less expensive and take less time. Knowledge gained in these degree programs adds value to what the student can do once or while employed. The current combining options are:

• Dual BSEE and BSCpE degrees (136 credit hours)
• Joint "4+1" BSEE/BSCpE plus MEngEE degrees (147/148 credit hours)

With effective planning, the dual BSEE and BSCpE program can be completed in four to five years by taking approximately 16 to 17 credit hours of courses each semester. It may even take less time if students have Advanced Placement credit hours. This dual degree program allows a student to have a true comprehensive education across the electrical and computer engineering spectrum, thus preparing the student for just about any entry-level career in electrical engineering or computer engineering. The program effectively requires the completion of the BSCpE degree plus 12 additional credit hours in non-computer, electrical engineering courses. A degree advising sheet for the dual program is posted on the School’s web page; https://ece.okstate.edu/. This sheet has been devised to assure that the degree requirements for both the BSCpE and BSEE degrees are satisfied in the most expeditious manner.

The "4+1" program—available only to OSU baccalaureate students—is a five-year program that combines the BSEE or BSCpE degree with the M.Eng.EE degree. It is designed to give students a broad-based education in electrical engineering or computer engineering along with a highly in-depth education in a few key areas. This program is ideal for those students who want advanced knowledge to enhance their competitiveness in the workforce and to satisfy their longing for in-depth knowledge that cannot be obtained in the baccalaureate degrees. Specific requirements for the "4+1" program are available on the web in the document entitled “Memorandum to Graduate Students;” see https://ece.okstate.edu/.

A degree in electrical engineering or computer engineering is an excellent foundation for other professional fields such as medicine and law. Many graduates also pursue advanced programs in business and management after earning a degree in engineering.

Undergraduate Programs
• Computer Engineering, BSCP (p. 1492)
• Electrical Engineering, BSEE (p. 1494)

Graduate Programs
The School of Electrical and Computer Engineering offers three graduate degrees, all in electrical engineering: Master of Engineering (MENGEE), Master of Science (MSEE) and Doctor of Philosophy (PhDEE).

These graduate degree programs are flexible in course selection and emphasis. Both the Mater of Engineering and the Master of Science programs are available online.

The Master of Engineering degree program is tailored to students who wish to gain advanced knowledge and expertise in subject areas associated with their professional pursuits. This non-research, non-thesis, instructional program is ideal for Distance Education students or for baccalaureate graduates interested in professional development to enhance their competitiveness in the workplace. It is well-suited for students who have little interest in a research-centric education.

The Master of Science degree emphasizes advanced mathematics, theory, design and research. It is intended for students interested in cutting-edge careers or who want to prepare for advanced research associated with the PhD program. This degree combines coursework with research that allows students to expand their knowledge in an in-depth area of electrical engineering or computer engineering. The MSEE program culminates with the defense of a thesis.

The Doctor of Philosophy degree is designed to prepare students for positions in academia, industry and government. This degree emphasizes the creation of new knowledge through the in-depth research process, as documented in the doctoral dissertation.

The School of Electrical and Computer Engineering also offers a "4+1" degree program that combines the BSEE/BSCpE degrees programs with the MEngEE degree program. The "4+1" program is only available to OSU baccalaureate students. It is designed to be completed in five years and to give students a broad-based education in electrical engineering or computer engineering along with a highly in-depth education in a few key areas. This program is ideal for those students who want advanced knowledge to enhance their competitiveness in the workforce and to satisfy their longing for in-depth knowledge that cannot be obtained in the baccalaureate degrees. Specific requirements for the "4+1" program are available on the web in the document entitled "Memorandum to Graduate Students;" see https://ece.okstate.edu/.

Students typically select coursework and participate in research and design projects in the following areas:

• Communication systems, cybersecurity and networks
• Control systems, robotics and mechatronics
• Analog, mixed-signal and RF electronics
• Computer architecture, VLSI digital circuits and arithmetic
• Electromagnetics and THz sciences
• Microcontrollers and embedded control
• Photonics and electro-optics
• Digital signal, image and video processing
• Energy and power
• Bioengineering

Admission Requirements
Admission to the Graduate College, as described under “General Regulations” in the “Graduate College” section of the University Catalog is required. Graduation from an electrical engineering or computer engineering program accredited by the ABET and sufficient GRE scores are required for admission to the School of Electrical and Computer Engineering.

Graduates from non-engineering fields such as mathematics, physics and computer science are also admitted to the School of Electrical and Computer Engineering graduate programs if an evaluation of the applicant’s official transcript indicates that the applicant is prepared to succeed in graduate-level course work in electrical and computer
engineering, or can be expected to do so after a reasonable amount of remedial coursework has been completed. This condition also applies to graduates of unaccredited engineering programs and engineering technology programs.

Degree Requirements

The Master of Engineering degree in Electrical Engineering (MEngEE) is awarded to those students who successfully complete an approved plan of study. The degree requires 33 credit hours of coursework; a thesis is not required. The plan of study requires, at a minimum, 18 hours of 5000-level courses in electrical and computer engineering. Most plans of study include additional 5000-level courses, depending upon the background and particular educational goals of the student. Additional remedial work in undergraduate electrical and computer engineering courses may be required for students who do not have a sufficient background in electrical engineering. Specific requirements for the MEngEE program are available on the web in the document entitled "Memorandum to Graduate Students;" see https://ece.okstate.edu/.

The Master of Science degree in Electrical Engineering (MSEE) is awarded to those students who successfully complete an approved plan of study. The degree requires 24 credit hours of coursework plus 6 credit hours for the thesis. In addition to the thesis requirement, the plan of study requires, at a minimum, 18 hours of 5000-level courses in electrical and computer engineering. Most plans of study include additional 5000-level courses, depending upon the background and particular educational goals of the student. Each student is encouraged to include courses in supporting disciplines such as mathematics, physics, computer science or other engineering fields. Additional remedial work in undergraduate electrical and computer engineering courses may be required for students who do not have a sufficient background in electrical engineering. Specific requirements for the MSEE program are available on the web in the document entitled "Memorandum to Graduate Students;" see https://ece.okstate.edu/.

The Doctor of Philosophy (PhDEE) degree is granted to recognize high achievement in coursework selected from the broad field of electrical and computer engineering. The degree is conferred on those who demonstrate the ability to perform independent research in a chosen field of specialization that generates new knowledge, as presented in a dissertation. For this degree the Graduate College requires a minimum of 90 credit hours of acceptable academic work beyond the bachelor’s degree, including credit for the dissertation. Specific requirements for the PhD program are available on the web in the document entitled "Memorandum to Graduate Students;" see https://ece.okstate.edu/.

The School of Electrical and Computer Engineering also participates in several interdisciplinary degree programs (See "Graduate Programs" under "Industrial Engineering and Management," and "Telecommunications Management" the "Graduate College" section of the Catalog).

Faculty

Jeffrey L. Young, PhD, PE—Professor and Head
Professor and OSURF Endowed Chair: Jeffrey L. Young, PhD, PE
Regents Professor and PSO/Albrecht Naeter Professor: Rama Ramakumar, PhD, PE
Regents Professors: Subhash Kak, PhD; Gary Yen, PhD
Associate Dean for CEAT Research, Professor and Henry Bellmon Chair: Charles F. Bunting, PhD
Cal and Marilyn Vogt Professor: Guoliang Fan, PhD
Earl and Carolyn Glimp Professor: James Stine, PhD

Professors: H. Jack Allison, PhD (emeritus); Charles M. Bacon, PhD (emeritus); James E. Baker, PhD (emeritus); Richard L. Cummins, PhD (emeritus); Daniel R. Grischkowsky, PhD (emeritus); Martin T. Hagan, PhD, PE (emeritus); Louis Johnson, PhD (emeritus); Jerzy S. Krasinski, PhD; Daqing Piao, PhD; Ronald P. Rhoten, PhD, PE (emeritus); Keith A. Teague, PhD, PE; James C. West, PhD; Rao Yarlagadda, PhD (emeritus); Weili Zhang, PhD
Associate Professors: Chriswell G. Hutchens, PhD, PE (emeritus); Carl D. Latino, PhD; George Scheets, PhD (emeritus); Weihua Sheng, PhD
Assistant Professors: Sabit Ekin, PhD; Nishantha Ekneligoda, PhD; Yannin Gong, PhD; Yuanxiong Guo, PhD; John O’Hara, PhD; Ickhyun Song, PhD

1. If a “B” or higher is not earned in ENGL 1113 Composition I, ENGL 1213 Composition II or ENGL 1413 Critical Analysis and Writing II is also required (per Academic Regulation 3.5 (p. 810)).  
2. Courses that must be completed prior to admission to professional school.  
3. A minimum GPA of 2.20 is required in all courses applied to Major Requirements indicated.
Other Requirements

Admission to Professional School (required)
- Refer to the OSU Catalog corresponding to your matriculation date for detailed admissions requirements.

Graduation Requirements
1. A minimum GPA of 2.00 is required in all courses applied to Major Requirements including ENGL 3323 Technical Writing, 3 hours of (S), and 6 hours of (H).
2. The major engineering design experience, capstone course, is satisfied by ECEN 4013 Design of Engineering Systems and ECEN 4024 Capstone Design.

Additional State/OSU Requirements
- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

• Degrees that follow this plan must be completed by the end of Summer 2024.
**Electrical Engineering Technology**

The electrical engineering technology (EET) curriculum provides preparation for outstanding career opportunities not only in the electronics industry itself, but also in many other areas in modern industry that depend upon electronics for control, communications or computation. Outstanding opportunities exist for graduates to work in diverse areas of electronics and computers.

The work of an electrical engineering technology graduate may range from assisting in the design and development of new equipment in the laboratory, applying modern microprocessors in the field, to the operation or supervision of production operations or field representatives.

The program offers the Bachelor of Science in Engineering Technology degree with a major in Electrical Engineering Technology. An option in computers is also available. To meet diverse needs, the program is laboratory-oriented and provides a strong foundation of specialized mathematics and science courses in applied electrical engineering and related technical areas, as well as courses in the area of communications, humanities and the social sciences.

**Program Educational Objectives**

OSU Electrical Engineering Technology graduates a few years after graduation will:

- Be employed in a technical or management position where the skills and knowledge of applied electrical engineering are utilized.
- Continue life-long learning and professional growth through participation and membership in professional organizations and/or through the continuation of professional studies.
- Work proactively and productively in teams and communicate effectively in written, oral and graphical forms.
- Successfully apply mathematical, analytical and technical expertise to industrial problems.

Electrical Engineering Technology graduates can expect to obtain these student outcomes upon graduation:

(a) an ability to select and apply the knowledge, techniques, skills and modern tools of the discipline to broadly-defined engineering technology activities;

(b) an ability to select and apply a knowledge of mathematics, science, engineering and technology to engineering technology problems that require the application of principles and applied procedures or methodologies;

(c) an ability to conduct standard tests and measurements; to conduct, analyze and interpret experiments; and to apply experimental results to improve processes;

(d) an ability to design systems, components or processes for broadly-defined engineering technology problems appropriate to program educational objectives;

(e) an ability to function effectively as a member or leader on a technical team;

(f) an ability to identify, analyze and solve broadly-defined engineering technology problems;

(g) an ability to apply written, oral and graphical communication in both technical and non-technical environments; and an ability to identify and use appropriate technical literature;

(h) an understanding of the need for and an ability to engage in self-directed continuing professional development;

(i) an understanding of and a commitment to address professional and ethical responsibilities including a respect for diversity;

(j) a knowledge of the impact of engineering technology solutions in a societal and global context;

(k) a commitment to quality, timeliness and continuous improvement;

(l) should have knowledge and hands-on competence in the application of circuit analysis and design, computer programming, associated software, analog and digital electronics, and microcomputers, and engineering standards to the building, testing, operation and maintenance of electrical/electronic(s) systems;

(m) the applications of physics or chemistry to electrical/electronic(s) circuits in a rigorous mathematical environment at or above the level of algebra and trigonometry;

(n) the ability to analyze, design and implement control systems, instrumentation systems, communications systems, computer systems or power systems;

(o) the ability to apply project management techniques to electrical/electronic(s) systems, and

(p) the ability to utilize statistics/probability, transform methods, discrete mathematics or applied differential equations in support of electrical/electronic(s) systems.

The Electrical Engineering Technology major provides graduates the ability to enter the many dynamic fields of the electrical engineering world. The demand for graduates having electronic and electrical engineering design and application skills remains important and relevant. Graduates of this program will be prepared for a wide range of opportunities for employment in an industry that requires considerable knowledge of the electrical engineering profession.

The Electrical Engineering Technology—Computer option curriculum provides the preparation for graduates to enter the growing field of computer hardware and software engineering. The demand for graduates having both computer hardware and software skills is quickly developing as the importance of automation, robotics and artificial intelligence is recognized. Graduates of this program will be prepared for these opportunities in industry that require considerable knowledge of both computer hardware and software engineering skills.

## Graduation Requirements

1. A minimum GPA of 2.00 is required in all courses with an EET, CHEM, MATH, or PHYS prefix.
2. A minimum grade of 'C' is required in each course that is a prerequisite to a required course.

## Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
• Degrees that follow this plan must be completed by the end of Summer 2024.

OSU’s Master of Science in Engineering Technology Management is a rigorous degree program designed specifically for experienced engineers and scientists who are interested in accelerating their management careers. The curriculum combines academic coursework with the latest business practices and can be tailored to meet an individual student’s needs. Managing today’s global organizations requires a complex set of knowledge and skills. Effective planning, selection, implementation and management of technology, and the teams involved, is essential to the success of any business in today’s time-critical, global markets. OSU-MSETM students learn to apply proven evaluation concepts and implementation strategies to fast moving, technical management decisions that make the difference in both career and business success. The MSETM program specifically addresses the real needs identified by industry leaders. The MSETM curriculum permits you to build a strong degree that directly addresses your needs and prepares you for the future. The degree consists of 32 credit hours. The MSETM program is provided by the OSU colleges of Engineering, Architecture and Technology; Arts and Sciences; and the Spears School of Business.

Please see the ETM website, https://etm.okstate.edu, for more information about the program.

Program Educational Objectives
The OSU Engineering and Technology Management program exists to provide accessible, career-enhancing educational opportunities to practicing engineers, scientists and technical managers.

The program’s learning objectives are that:

1. Each student shall be able to demonstrate the ability to view the organization systemically.

2. Each student will be able to critically analyze a management problem.

3. Each student will be able to identify and act on strategic issues.

4. Each student will be able to articulate and defend their ideas in a professional manner.

Admission Requirements
The guidelines for admission to the MSETM program are a bachelor’s or higher degree, in engineering or the physical/mathematical sciences, with a 3.00 GPA, and professional employment in a related technical field since graduation with a bachelor’s degree. Applicants not meeting these standards may be granted provisional admission based upon their overall academic and professional practice history and accomplishments. Since many course assignments are integrated into current issues in the work environment, students must be managing or employed in a technical organization in order to be successful in the program. For this reason, the program is not appropriate for full-time on-campus students. The MSETM student body is made up entirely of full-time employed, technical professionals who receive the courses through distance education technologies. An applicant must submit the following documents to the MSETM office:

1. an official OSU Application for Graduate Admission,
2. an official transcript of all academic work and degrees received,
3. an application fee ($50 domestic, $75 international),
4. MSETM program application,
5. a professional resume,
6. A statement of goals and objectives.

International applicants must also submit official results of the TOEFL with a minimum score of 89 IBT Application instructions can be found online at https://etm.okstate.edu.

Degree requirements can be found at https://etm.okstate.edu.
Fire Emergency Management Program (FEMP)

Overview
Oklahoma State University’s graduate program in Fire and Emergency Management Administration Program is one of the oldest programs in the nation. Students receive a superior academic experience in preparing leaders in the fire services, disaster management, emergency management professions, as well as educators and researchers in these fields.

Students can complete degree requirements either online as distance students or as a resident on campus. Online Graduate courses typically meet in real time. Distance students join on-campus students in lecture, discussion, and group work, utilizing state of the art classrooms designed for distance education. The FEMP program requires that a minimum of nine hours must be completed on campus in Stillwater, Oklahoma. This can be accomplished during one-week courses in the summer.

The program was established in 1996 as a Master of Arts specialization in Fire and Emergency Management within political science. In 1999, the degree changed to the Master of Science in Fire and Emergency Management Administration. The curriculum includes public policy, strategic administration and organizational management, human dimensions of disaster, leadership, and terrorism.

In 2009, the Doctor of Philosophy in Fire and Emergency Management Administration was instituted. The PhD degree is designed to produce proficient and active research scholars. It emphasizes preparing talented individuals for faculty careers at major research-oriented academic institutions, but we also welcome applicants whose career interests may lean towards non-academic settings or academic institutions that stress teaching.

Regardless of their post-graduation plans, all PhD students are given the same standard of preparation. After all, it takes a competent research scholar to maintain currency in the field and provide their students or employers the best, most contemporary information the discipline has to offer.

Only July 1st, 2018 the Fire and Emergency Management Program moved to the College of Engineering Architecture and Technology as part of the Division of Engineering Technology. This move strengthened the relationship between the FEMP program and the other internationally known, fire-related programs at Oklahoma State University.

A major component of Oklahoma State University’s land grant mission is service to community, state, and nation by preparing professionals for jobs in critical service sectors. The mission of the Fire and Emergency Management Administration Program is to prepare professionals for management positions in the critical service professions of fire and rescue, emergency management, emergency medical services, law enforcement, homeland security and related fields in both the public and private sectors. These professions are concerned with the mitigation of, preparedness for, response to, and recovery from the adverse effects of acute exposures to natural, technological, and social hazards. The program specializes in strategic policy, public management, and organizational behavior, human dimensions of disaster, leadership, and counter-terrorism. It also facilitates professional networking among its students and with leaders in the field. The curriculum is designed to provide students with theoretical and substantive knowledge about management structures and functions, analytical skills that enable the practical application of theories, research skills that enable critical analysis of real-world problems, and written communication skills necessary for effective management.

The Learning Outcomes for the Fire Emergency Management programs are that:

1. Graduates can demonstrate mastery of substantive theories in and knowledge of fire and emergency management administration and of its application to practical problems and issues in the field.
2. Graduates are able to conduct research and critically analyze problems in the fire and emergency management field.
3. Graduates can demonstrate effective written communication skills.

Undergraduate Programs
- Emergency Management, Minor (p. 1505)

Graduate Programs
The Fire and Emergency Management Program, housed in the CEAT Division of Engineering Technology offers a Master of Science degree in fire and emergency management administration, a PhD in fire and emergency management and administration, and an undergraduate minor in emergency management.

The MS and Phd in Fire and Emergency Management Administration are specialized degrees designed to provide an educational foundation for those who are currently serving or aspire to serve as managers or administrators in the fire service, emergency management, emergency medical services, law enforcement, or homeland security in the public, private, or nonprofit sectors.

Admission Requirements for Master’s Degree Programs
Any student having a bachelor’s degree with an overall 3.00 grade-point average (on a 4.00 scale) may be admitted as a student in full standing. Those with less than an overall 3.00 grade-point average are considered for admission on a probationary basis.

In addition to the general requirements outlined above, candidates for the Master of Science degree in fire and emergency management administration must meet one of the following requirements:

1. Have significant practical experience in a fire or emergency service organization.
2. Have a bachelor’s degree or a minor in fire or emergency services related discipline such as fire protection technology, fire management administration, fire science, emergency management, disaster science, criminal justice, emergency services administration; or
3. Not meeting the criteria specified in 1 or 2 above, completed a minimum of 12 hours of undergraduate study in fire protection and/or emergency management, or provide significant proof that studies in another field led to knowledge and experience in fire or emergency services field, such as a final project related to fire or one of the emergency services listed above or an internship with a fire, emergency service, or law enforcement related organization in the public, private, or nonprofit sector.
A complete application for admission to the master’s program must include:

1. A completed Graduate College application submitted with a non-refundable application fee.
2. A copy of undergraduate transcript(s).
3. Two letters of recommendation with at least one from an employer or faculty member familiar with the applicant’s academic abilities.
4. TOEFL results for students for whom English is a second language. Students must have a score above 549 (paper exam) or 79 (internet based test) to be considered for admission.
5. A brief letter indicating interests, career goals and other information the applicant considers relevant.

Degree Requirements for the MS in Fire and Emergency Management Administration

In addition to the general requirements of the Graduate College, requirements for the Master of Science degree in fire and emergency management administration are listed below.

1. A minimum of 33 credit hours in FEMP or closely related courses. Required courses include a 21-hour scope of the field core requirement, a six-hour methods requirement, and six hours of electives. Students must complete a three-hour practicum research project or a thesis with a minimum of six hours. Students are required to complete a minimum of nine hours on campus in Stillwater, Oklahoma. This can be accomplished during one-week courses offered each summer. Most courses in the FEMP MS program are conducted in the department’s state-of-the-art virtual classroom, where both on-site and off-site students participate simultaneously in the same class sessions.
2. Satisfactory completion of a final assessment project (either a Thesis or a Practicum).
3. Minimum 3.00 grade-point average, with only one grade of "C" allowed.

Admission Requirements for PhD in Fire and Emergency Management Administration

OSU Graduate College admission requirements include the following: an OSU Graduate College Application, payment of the OSU Graduate Application fee and transcripts of all previous college level coursework including transcripts that verify receipt of an undergraduate and graduate master’s degree.

1. GPA: minimum cumulative GPA of 3.0.
2. GRE: Scores from the Graduate Record Examination taken within the past 5 years.
3. Professional experience in a fire or emergency services related field is preferred, but not required.
4. Academic experience in a fire or emergency services related field is preferred. If applicant has a degree outside of the fire or emergency services related field, they should spend time explaining how their academic background (i.e. degree, courses, research) has prepared them for the pursuit of a PhD in Fire and Emergency Management Administration.

5. English Language Proficiency. For international students, a minimum TOEFL score of 79 (Internet) and 550 (paper) is required.
6. A current resume
7. Three letters of recommendation: At least two letters must come from individuals who can speak directly to the applicant’s abilities in the classroom and conducting research.
8. An essay: This 1-2 page essay should address the applicant’s previous professional and academic experience and how it has prepared them to seek a PhD in Fire and Emergency Management Administration. Candidates should also address their 5 and 10 year goals, discuss their research interests, and explain how the FEMP program and faculty can help them reach their goals and develop their research interests.
9. Copy of the applicant’s thesis or other written example of applicant’s research abilities.
10. Copies of any published materials authored by the candidate.

Degree Requirements for the PhD in Fire and Emergency Management Administration

Degree candidates must have completed a master’s degree. In addition, they must complete 45 hours of required common coursework that includes 12 hours in a common core, 12 hours of research tools, three hours from an International core, nine hours of electives and 15 hours of dissertation research. An additional nine hours of courses are required in either a fire service administration track or an emergency management administration track. Students are required to complete a minimum of nine hours on campus in Stillwater, Oklahoma. This can be accomplished during one-week courses offered each summer. Finally, candidates must take written and oral comprehensive exams and must successfully defend their dissertation before their dissertation committee. Most courses in the FEMP PhD program are conducted in the department’s state-of-the-art virtual classroom, where both on-site and off-site students participate simultaneously in the same class sessions.

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student's declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).
Fire Protection and Safety Engineering Technology

The fire protection and safety engineering technology (FPST) curriculum provides preparation for assessing and reducing the loss potential with respect to fire, safety, industrial hygiene and hazardous material incidents. With respect to fire, reducing the loss potential might involve setting design criteria with a special emphasis on life safety or fire resistivity or specifying automatic detection or extinguishing systems. When considering safety, reducing accidents may require special protective equipment or clothing, or the redesign of machinery or processes. Reducing losses caused by environmental problems may require sampling air for contaminants, such as asbestos or toxic chemicals, or monitoring noise levels, and the development of procedures to address practical approaches to compliance with state and federal regulations. Addressing the problems of handling and disposing of hazardous chemicals, such as spill control, is often required. Managing risk and compliance with federal laws and regulations relative to occupational safety and health and hazardous materials is an increasingly important job activity.

The fire protection and safety engineering technology program began at Oklahoma State University in 1937 - which is the oldest fire-related program in North America. The demand by business and industry for loss control specialists has resulted in the evolution of the program into one that now places emphasis on fire protection, safety and occupational/environmental health. The FPST program prepares graduates for careers in loss control. The loss control profession is segmented into three major areas: loss from fire, loss from physical accidents and loss from environmental exposure.

The curriculum is designed to immediately introduce the student to studies in fire protection and safety. Therefore, students are able to measure their interest in a fire protection and safety career early in their academic program. The curriculum is rigorous in the areas of mathematics and the physical sciences. Two semesters of calculus are required as well as two semesters of calculus and one semester of physics. Computer usage is an essential component of most fire protection and safety courses. Interested high school students should design their high school programs to prepare themselves for college level mathematics and science classes.

The program concludes with the Bachelor of Science in Engineering Technology degree in Fire Protection and Safety Engineering Technology.

Program Educational Objectives

OSU Fire Protection and Safety graduates a few years after graduation will be:

1. Earning and pursuing personal, technical and professional advancement through their employment.
2. Continuing the pursuit of life-long learning through membership and participation in professional organizations.
3. Developing business expertise within their selected employment organization.
4. Successfully applying mathematical, analytical and technical skills to solve complex problems in the selected field.
5. Meeting the highest standards of ethical practice in their profession.

Fire Protection and Safety Technology degree graduates can expect to obtain these student outcomes upon graduation:

1. an ability to select and apply the knowledge, techniques, skills, and modern tools of the discipline to broadly-defined engineering technology activities;
2. an ability to select and apply a knowledge of mathematics, science, engineering and technology to engineering technology problems that require the application of principles and applied procedures or methodologies;
3. an ability to conduct standard tests and measurements; to conduct, analyze and interpret experiments; and to apply experimental results to improve processes;
4. an ability to design systems, components or processes for broadly-defined engineering technology problems appropriate to program educational objectives;
5. an ability to function effectively as a member or leader on a technical team;
6. an ability to identify, analyze and solve broadly-defined engineering technology problems;
7. an ability to apply written, oral and graphical communication in both technical and nontechnical environments; and an ability to identify and use appropriate technical literature;
8. an understanding of the need for and an ability to engage in self-directed continuing professional development;
9. an understanding of and a commitment to address professional and ethical responsibilities including a respect for diversity;
10. a knowledge of the impact of engineering technology solutions in a societal and global context;
11. and a commitment to quality, timeliness and continuous improvement.

The graduates of the fire protection and safety engineering technology program at Oklahoma State University are consistently recruited by the major businesses and industries of the United States. Graduate placement, salary offers and advancement into managerial positions have been excellent due to the uniqueness and high technical quality of the OSU fire protection and safety engineering technology program.

Undergraduate Programs

- Fire Protection and Safety Engineering Technology, BSET (p. 1508)
- Fire Suppression and Emergency Operations (FSEO), Minor (p. 1511)
- Homeland Security Science and Technology (HSST), Minor (p. 1512)
- Safety and Exposure Sciences (SAES), Minor (p. 1513)

Graduate Programs

The Fire Protection and Safety Engineering Technology (FPST) program offers a graduate program leading to the Master of Science in Engineering Technology with an option in Fire Safety and Explosion Protection (FSEP). The program extends the FPST undergraduate program into graduate research, scholarship and creative activities. The FSEP program is designed to prepare students for professional practice that may include research or consulting components, with major emphasis in fields of interest such as fire protection engineering,
explosion protection, fire and explosion hazards, and process safety. This is the nation's only master's degree program that is dedicated to both fire and explosion protection and related to safety. The program is geared toward recent graduates and professionals in a variety of industries, including insurance companies, the oil & gas industry, and fire protection engineering companies. The graduates of this program will have the deeper knowledge base that is needed to safeguard people in Oklahoma, the nation and world. The FSEP program is intended to be especially attractive to engineering and engineering technology graduates from any disciplines, and many science majors. The program is interdisciplinary in nature and hence students with undergraduate degrees in fire and safety related fields or other STEM disciplines are invited to apply for admission. Students can complete degree requirements either online as distance students or as a resident on campus.

Admission Requirements. Admission to the Master of Science degree program requires a B.S. degree in engineering or engineering technology from an ABET accredited (or equivalent) program. Alternately, B.S. students from other related disciplines may also be considered. Admission is competitive based on undergraduate GPA and TOEFL (for international students), statement of interests, experience and recommendations.

Degree Requirements. A candidate for the graduate degree must satisfy at least the minimum University requirements for that particular degree. The program consists of 30 hours of coursework with a thesis option or 32 hours of coursework with a non-thesis option. For both options, the courses taken must include GENT 5013, 5023, 5033 and FSEP 5113, 5133, 5143.

Faculty

Virginia Charter, MS, PE—Assistant Professor and Program Coordinator
Associate Professor, Graduate Program Coordinator and Dale F. Janes
Endowed Professorship: Qingsheng Wang, PhD, PE, CSP
Associate Professor: Bryan Hoskins, PhD, PE
Assistant Professors: Robert Agnew, MS, CSP, CIH; Haejun Park, PhD
Clinical Assistant Professor: Leslie Stockel, MS, CSP
Assistant Dean, CEAT Outreach & Extension and Adjunct Assistant Professor: Ed Kirtley, MS
Fire Protection and Safety Engineering Technology, BSET

Diversity (D) & International Dimension (I)
May be completed in any part of the degree plan
Select at least one Diversity (D) course
Select at least one International Dimension (I) course

**College/Departmental Requirements**

**Engineering**
Select one of the following: 2
- ENGR 1322 Engineering Design with CAD
- ENGR 1332 Engineering Design with CAD for MAE
- ENGR 1342 Engineering Design with CAD for ECEN
- ENGR 1352 Engineering Design with CAD for CHE
- MET 1123 Technical Drawing and Basic CAD
- CMT 2203 Construction Drawings (for non-majors)

**Engineering Science**
- ENSC 2113 Statics
  - or GENT 2323 Statics
- Select one of the following: 3
  - ENSC 2213 Thermodynamics
  - MET 3433 Basic Thermodynamics
  - MET 4433 Heat Transfer
- Select one of the following: 3
  - ENSC 2613 Introduction to Electrical Science
  - PHYS 1214 College Physics II (LN)
  - PHYS 2114 University Physics II (LN)

**Specialty**
- FPST 1213 Fire Safety Hazards Recognition
- FPST 1373 Fire Suppression and Detection Systems
- FPST 2023 Industrial and Occupational Safety
- FPST 2243 Design and Analysis of Sprinkler Systems
- FPST 2343 Elements of Industrial Hygiene
- OR FPST 2344
- FPST 2483 Fluid Mechanics for Fire Protection

Hours Subtotal: 29

**Major Requirements**
Select one of the following: 3
- CHEM 3013 Survey of Organic Chemistry
- CHEM 3015 Survey of Organic Chemistry
- GENT 3323 Strength of Materials
- ENSC 2143 Strength of Materials
- ENSC 3313 Materials Science
- Select one of the following: 3
  - STAT 2013 Elementary Statistics (A)
  - STAT 4013 Statistical Methods I (A)
  - STAT 4033 Engineering Statistics
  - MGMT 3013 Fundamentals of Management (S)
  - or IEM 4413 Industrial Organization Management
  - IEM 3503 Engineering Economic Analysis
  - or IEM 3513 Economic Decision Analysis
  - FPST 3013 Safety Management
  - FPST 3143 Life Safety Analysis
  - FPST 3213 Human Factors in Accident Prevention

**Hours Subtotal** 6  

**Total Hours** 125

1. The combined credits for FPST 2343 or FPST 2344 and that of FPST 4982 and FPST 4992 or FPST 4993 needs to equal 7 credits. If FPST 2344, FPST 4982 and FPST 4983 are taken together, one hour can be applied towards the specialty or controlled electives.

**Graduation Requirements**

1. A grade of ‘C’ or better is required in each course that is a prerequisite to a required course that has an engineering or engineering technology prefix.
2. A minimum overall GPA of 2.5 is required in all courses that are used in this degree plan with engineering or engineering technology prefixes.

**Additional State/OSU Requirements**

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as
these changes do not result in semester credit hours being added or do not delay graduation.

- Degrees that follow this plan must be completed by the end of Summer 2024.

Additional OSU Requirements

Undergraduate Minors

• An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
• A minimum of six credit hours for the minor must be earned in residence at OSU.
• The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
• A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

Industrial Engineering and Management

Industrial engineering and management focuses on production systems that produce goods or provide services for customers. Industrial engineers define, design, build, operate and improve production processes that convert resources to high quality products or services effectively, efficiently and safely.

People are the fundamental component of production systems. People provide the creativity and leadership essential to make things happen. Hence, industrial engineering is the most people-oriented discipline within the engineering family. Industrial engineers are trained to think in both broad and specific terms. Practicing industrial engineers understand business parameters as well as physical and social parameters within production systems. This breadth allows industrial engineers to function effectively in a wide spectrum of activities ranging from strategic business planning to detailed task design. The wide-angle vision of industrial engineering provides career flexibility, leading to high-level leadership or specialized technical responsibilities.

Industrial engineers are employed in manufacturing organizations (e.g., automotive, electronics, food, and medical manufacturers), service enterprises (e.g., airlines, banks, consulting groups, hospitals, retail companies, transportation companies) and governmental organizations (e.g., public service and regulatory organizations).

Vision

IEM’s vision is to place industrial engineers in a wide variety of industries including manufacturing, service, energy, healthcare, humanitarian and others, so that our society at large can benefit from systems that efficiently produce goods or provide services, effectively use an optimal set of resources and enrich the quality of life for all.

Mission

The School of Industrial Engineering and Management’s mission is to develop professionals and leaders in industrial engineering and management by being a leader in education, research and outreach.

Core Values

Faculty, students and staff work together to build and maintain a learning/mentoring environment where:

- Innovative practices are developed, tested and validated.
- Knowledge and practices are shared.
- Each individual develops to his/her full potential.
- Professional ethics are practiced at all times.

Educational Objectives and Outcomes

Within a few years after graduation, Industrial Engineering program graduates will become professionals, managers or leaders in a wide variety of industries and apply discovery, problem-solving, leadership and management skills for the benefit of their organization and society at large.

Student Learning Outcomes

Graduating baccalaureate students possess an understanding of fundamental industrial engineering and management concepts, methodologies and technologies as demonstrated by:

- an ability to apply knowledge of mathematics, science and engineering,
- an ability to design and conduct experiments, as well as to analyze and interpret data,
- an ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability.
- an ability to function on multidisciplinary teams,
- an ability to identify, formulate and solve engineering problems,
- an understanding of professional and ethical responsibility,
- an ability to communicate effectively,
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context,
- a recognition of the need for, and an ability to engage in life-long learning,
- a knowledge of contemporary issues, and an ability to use the techniques, skills and modern engineering tools necessary for engineering practice.

The curriculum consists of three primary parts:

1. general studies,
2. core engineering, and
3. professional school topics.

General studies consist of courses such as mathematics, statistics, chemistry, physics, English, behavioral science, history, humanities and arts. Core engineering courses consist of engineering sciences such as materials, statics, electrical circuits, fluid mechanics and thermodynamics. Professional school courses consist of topics such as systems thinking and analysis in engineering, economic analysis, manufacturing processes, computer-aided modeling, work analysis, operations research, quality control, experimental design, facility location and layout, management and leadership, production control, system simulation modeling, information systems, ergonomics and human factors, and energy and water management. A capstone design experience, working with a real-world organization, integrates classroom and lab work together in the senior year. Details regarding degree requirements are available in the Undergraduate Programs and Requirements publication.

The IEM program is accredited by the Engineering Accreditation Commission of ABET under the industrial engineering criteria.

Each IEM student, along with the faculty adviser, develops an individual plan of study that guides the student through the curriculum. Coursework is sequenced and interrelated to provide theoretical and applied knowledge, along with hands-on laboratory and project experience. Students work as individuals and as teams to integrate and apply mathematical, scientific, and engineering knowledge and concepts in order to address both traditional academic questions as well as open-ended design and analysis challenges. Instruction in experimental methods is integrated in the curriculum through the design, execution, analysis and interpretation of experiments. Project work is used to develop both technical and communications skills. Technical skills are used to identify, formulate and address engineering problems, both simple and complex. Communications skills are developed and practiced in written, oral and team interaction formats.
The means to define and design detailed solutions to address customer needs from a system-wide perspective is introduced in the sophomore year, and reinforced through the capstone senior design project. Additionally, global perspectives or production systems are introduced and emphasized in the sophomore year so that students understand the nature of global customer bases as well as global competition early in their studies. The curriculum is continually updated to assure that contemporary issues, thinking and tools are integrated in course content as well as instructional delivery. Professional responsibility and ethical behavior are introduced and reinforced throughout the curriculum. Additionally, the need for life-long learning after graduation is stressed.

Students are offered opportunities to enhance their classroom and laboratory experiences through student organizations such as the student chapter of APICS, the Institute of Industrial and Systems Engineers, the Institute for Operations Research and the Management Sciences, and the American Society for Quality. Outstanding scholars are recognized by Alpha Pi Mu, the national honor society for industrial engineering students. Additionally, opportunities for internship and co-op experiences are offered to IEM students so that they can gain professional experience during their collegiate program. Please visit our Internet site http://iem.okstate.edu for more information.

Undergraduate Programs

- Industrial Engineering and Management, BSIE (p. 1516)

Graduate Programs

The School of Industrial Engineering and Management offers graduate programs leading to the Master of Science Industrial Engineering and Management degree and the Doctor of Philosophy degree.

The Master of Science degree is characterized by a higher degree of technical specialization in a particular field of study (beyond a BS degree). This degree program is designed to prepare students for professional practice that may include research or consulting components. The Master of Science degree is especially attractive to industrial engineering graduates, engineering graduates from other disciplines, and many science majors. The MS degree includes a strong technical component and an orientation to business and engineering management that is complementary to a technical background.

The Doctor of Philosophy degree is designed to position the student on the leading edge of knowledge in the profession of industrial engineering and engineering management. It is intended to prepare students for highly specialized positions, such as research and consulting in industry, government and service organizations, and for teaching or research positions in colleges and universities.

The basic consideration in graduate education in industrial engineering and management is effective and efficient utilization of human, physical and economic resources. Instruction in management embraces both qualitative and quantitative concepts, including analytical methodologies and social considerations pertinent to organizations.

Advanced degree programs are designed with major emphasis in fields of interest such as engineering management, manufacturing systems, operations research, quality and reliability, facilities and energy-management, and enterprise systems and supply chains. Students may complement industrial engineering and management courses with work in other branches of engineering, as well as economics, business administration, computer science, statistics, mathematics, psychology and sociology.

Admission Requirements

Admission to the Graduate College is required of all students pursuing the MS or PhD degree. Graduation from an industrial engineering curriculum with scholastic performance distinctly above average qualifies the student for admission to the School of Industrial Engineering and Management as a candidate for the master’s and doctorate degrees. Graduates from related disciplines may be admitted if an evaluation of their transcripts and other supporting materials by the School of Industrial Engineering and Management indicates that they are prepared to take graduate-level course work in industrial engineering, or can be expected to do so after a reasonable amount of prerequisite work.

All applicants must submit GRE scores. In addition, the Graduate College may require certain international applicants to submit TOEFL scores.

Degree Requirements

The Master of Science degree in industrial engineering and management may be earned by one of two plans as follows:

Plan I—coursework with thesis. Minimum 30 credit hours consisting of 24 hours of coursework and 6 hours of research with a grade of "SR."

Plan II—coursework without thesis. Minimum of 33 credit hours. May include no more than three hours of independent study project.

The Doctor of Philosophy degree requires the completion of at least 90 credit hours beyond the bachelor’s degree or 60 credit hours beyond the master’s degree; including a minimum of 18 credit hours of dissertation research and a minimum of 30 credit hours of course work beyond the master’s degree.

The School of Industrial Engineering and Management also participates in the Master of Science in Engineering and Technology Management program. Current IE&M program information can be found on the School website http://iem.okstate.edu.

## General Education Requirements

All General Education coursework requirements are satisfied upon completion of this degree plan.

### English Composition

- ENGL 1113 Composition I¹, ²
- or ENGL 1313 Critical Analysis and Writing I
- ENGL 3323 Technical Writing

### American History & Government

- Select one of the following: ³
  - HIST 1103 Survey of American History
  - HIST 1483 American History to 1865
  - HIST 1493 American History Since 1865
- POLS 1113 American Government

### Analytical & Quantitative Thought (A)

- MATH 2144 Calculus I (A)²
- MATH 2153 Calculus II (A)²
- MATH 2163 Calculus III²
- or MATH 2233 Differential Equations

### Humanities (H)

Courses designated (H)

### Natural Sciences (N)

- Must include one Laboratory Science (L) course
- CHEM 1414 General Chemistry for Engineers (LN)²
- PHYS 2014 University Physics I (LN)²

### Social & Behavioral Sciences (S)

- SPCH 2713 Introduction to Speech Communication (S)
- Select 3 hours of any course designated (S)

### Hours Subtotal

42

## Diversity (D) & International Dimension (I)

May be completed in any part of the degree plan.

- Select at least one Diversity (D) course
- Select at least one International Dimension (I) course

## College/Departmental Requirements

### Basic Science

- PHYS 2114 University Physics II (LN)²

### Engineering

- ENGR 1111 Introduction to Engineering²
- ENGR 1322 Engineering Design with CAD²
- or ENGR 1332 Engineering Design with CAD for MAE
- ENGR 1412 Introductory Engineering Computer Programming²

### Engineering Science

<table>
<thead>
<tr>

<td>Probability and Statistics for Engineers I²</td>
<td>3</td>
</tr>
<tr>
<td>IEM 3703</td>
<td>Probability and Statistics for Engineers II²</td>
<td>3</td>
</tr>
</tbody>
</table>

### Hours Subtotal

27

## Major Requirements

### Mathematics

- MATH 3013 Linear Algebra

### Engineering Science

- ENSC 2113 Statics²
- Select two of the following:
  - ENSC 2123 Elementary Dynamics
  - ENSC 2143 Strength of Materials
  - ENSC 2213 Thermodynamics
- ENSC 2613 Introduction to Electrical Science
- ENSC 3213 Computer Based Systems in Engineering
- ENSC 3233 Fluid Mechanics

### Industrial Engineering & Management

- IEM 3303 Manufacturing Processes
- IEM 3403 Collaborative Engineering Project Management
- IEM 3503 Engineering Economic Analysis
- IEM 3523 Engineering Cost Information and Control Systems
- IEM 3813 Work Design, Ergonomics, and Human Performance
- IEM 4013 Operations Research
- IEM 4103 Quality Control
- IEM 4113 Industrial Experimentation
- IEM 4203 Facilities and Material Handling System Design
- IEM 4413 Industrial Organization Management
- IEM 4613 Production Planning and Control Systems
- IEM 4713 Systems Simulation Modeling
- IEM 4723 Information Systems Design and Development
- IEM 4913 Senior Design Projects

- Select 3 hours of the following:
  - IEM 4163 Service Systems and Processes
  - IEM 4623 Supply Chain Management
  - IEM 4953 Industrial Assessment and Improvement
  - IEM 4990 Selected Topics in Industrial Engineering and Management (3)
Other Requirements

Admission to Professional School (required)

Refer to the OSU Catalog corresponding to your matriculation date for detailed admissions requirements.

Graduation Requirements

a. A minimum GPA of 2.00 is required in all courses applied to Professional School coursework.

b. A ‘C’ or better is required in each course that is a prerequisite for an IEM course and in technical courses listed, whether taken prior to admission to Professional School or not.

c. The major engineering design experience is satisfied by IEM 4913 Senior Design Projects.

Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

---

1 If a “B” or higher is not earned in ENGL 1113 Composition I, ENGL 1213 Composition II or ENGL 1413 Critical Analysis and Writing II is also required (per Academic Regulation 3.5 (p. 810)).

2 Courses that must be completed prior to admission to professional school.
The field of materials science and engineering is expanding into a period of unprecedented intellectual challenges, opportunities and growth. Products created using materials science and engineering research contribute to the economic strength and security of not only the state, but also the country.

The School of Materials Science and Engineering (MSE) is located at OSU-Tulsa Greenwood campus at the Helmerich Research Center, a premier facility which places the College of Engineering, Architecture and Technology in a unique position to conduct world-class education, research and technology development and transfer in advanced materials of strategic importance to our nation. Current research programs focus on materials for energy technologies, bio-materials for medical technologies, advanced materials for aerospace and defense, and materials for electronics and control technologies.

Program Educational Objectives
OSU is currently offering only a graduate program in Materials Science and Engineering.

Graduate Programs
The School of Materials Science and Engineering offers programs leading to the Master of Science and Doctor of Philosophy. A program of independent study and research on a project under the direction of a member of the Graduate Faculty will be satisfactorily completed by all graduate students. For the Master of Science candidate, the project may result in a thesis. For the Doctor of Philosophy candidate, the project results in a dissertation.

Four research areas of strategic importance have been identified at the Helmerich Advanced Technology Research Center (HRC) at OSU by industry leaders in and around Tulsa. These include: Materials for Energy Technologies, Bio-Materials for Medical Technologies, Advanced Materials for Aerospace, and Materials for Electronics and Control Technologies. All areas fall under the broad umbrella of the School of Materials Science and Engineering.

Admission Requirements
Admission to either the Master of Science or Doctor of Philosophy degree program requires graduation from a materials science and engineering or related curriculum approved by the ABET or a recognized equivalent from any international program.

Students with related undergraduate degrees, such as chemistry, physics, engineering physics, applied physics, etc., can be admitted conditionally, subject to completing prescribed Materials Science and Engineering program core courses. Admission is competitive based on undergraduate GPA, GRE and TOEFL (for international students), statement of interests, experience and recommendations.

The Master of Science Degree
The M.S. degree in MSE has both thesis and creative component (non-thesis) options. The thesis option requires a total of 30 credit hours, which includes 24 hours of formal coursework (regularly scheduled classes, not independent study) and 6 hours of a thesis. The non-thesis option or creative component requires a total of 35 credit hours, which includes 33 hours of formal coursework (regularly scheduled classes, not independent study) and 2 hours of a creative component or project.

The main difference between the two options is that in the thesis option, students conduct independent research while in the creative component option, students conduct critical review of the literature on an advanced topic of interest to the MSE program. Both options require a professional report or thesis and an oral presentation. Students take 15 hours of core courses (required) with the remainder of the hours being MSE elective courses or their equivalent (to be approved by MSE graduate coordinator and the thesis adviser or has been considered as an equivalent MSE course). Students must complete no less than 21 hours of MSE 5000-and 6000-level courses through Oklahoma State University. For both options the courses taken must include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MSE 5013</td>
<td>Advanced Thermodynamics of Materials</td>
<td>3</td>
</tr>
<tr>
<td>MSE 5023</td>

<td>3</td>
</tr>
<tr>
<td>MSE 5033</td>
<td>Composite Materials</td>
<td>3</td>
</tr>
<tr>
<td>MSE 5043</td>
<td>Advanced Materials Characterization</td>
<td>3</td>
</tr>
<tr>
<td>MSE 5083</td>
<td>Advanced Ceramics Processing</td>
<td>3</td>
</tr>
</tbody>
</table>

The Doctor of Philosophy Degree
The general credit requirement is a minimum of 90 credit hours beyond the BS degree, including at least 36 hours of credit for research and at least 30 hours of class work. It is expected that the courses must include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MSE 5013</td>
<td>Advanced Thermodynamics of Materials</td>
<td>3</td>

<tr>
<td>MSE 5113</td>
<td>Diffraction in Materials</td>
<td>3</td>
</tr>
</tbody>
</table>

Students are responsible for consultation with their doctoral advisory committee in preparing the plan of study. Furthermore, students have to pass the PhD qualifying exam and the dissertation proposal defense to become eligible for candidacy for the PhD Degree, successfully conduct independent research for the dissertation, and pass the final dissertation defense in order to qualify for the PhD degree. More details can be found in the MSE Graduate Student Handbook.

Faculty
Raman P. Singh, PhD—Associate Dean for Engineering at OSU-Tulsa and Director, Helmerich Research Center, Helmerich Family Endowed Chair Professor and Head
Regents Professor: Raj N. Singh
Varnadow Endowed Professor: Ranji Vaidyanathan, PhD, PE

Assistant Professors: Pankaj Sarin, PhD; Do Young Kim, PhD
Assistant Research Professor: Nirmal Govindaraju, PhD
Assistant Research Professor: Kunal Mishra, PhD
Mechanical and Aerospace Engineering

No other profession unleashes the spirit of innovation like Mechanical Engineering and Aerospace Engineering. From research to real-world applications, mechanical and aerospace engineers discover how to improve lives by creating bold new solutions that connect science to life in unexpected, forward-thinking ways. Few have such a direct and positive effect on everyday lives and we count on mechanical and aerospace engineers, and their imaginations, to help us meet the needs of the 21st century.

Mechanical and aerospace engineers know that life takes engineering, and that their disciplines provide freedom to explore, shape the future, encompass an enterprising spirit and call for limitless imagination.

Engineering makes a world of difference and is essential to our health, happiness and safety. Creative problem solving, while turning dreams into reality, is the core of Mechanical and Aerospace Engineering. These professional disciplines involve the invention, design and manufacture of devices, machines and systems that serve the ever-changing needs of modern society.

Mechanical engineering is an exceedingly diverse field that spans an exceptionally wide range of systems, devices and vehicles. Mechanical engineers are vitally concerned with all forms of energy production, utilization and conservation. They are the key professionals in bringing about the green revolution, finding ways to reduce or eliminate pollution, minimize waste, reduce energy usage, and re-use waste, scrap and recycled goods. They deal with everything mechanical and energy-consuming, whether small or large, simple or complex—from fuel cells to nuclear power plants, gas turbine engines to interplanetary space vehicles, artificial limbs to life support systems, robotic manipulators to complex automatic packaging machines, precision instruments to construction machinery, household appliances to mass transit systems, heating and air-conditioning systems to off-shore drilling platforms, and powered home and garden appliances to vehicles of all types. In virtually every organization where engineers are employed, mechanical engineers will be found.

The BS degree program in mechanical engineering, together with the premedical option in mechanical engineering, is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET) under the criteria for mechanical and similarly named engineering programs. In the Fall 2018 semester, there will be a new petroleum option offered for the BS degree in mechanical engineering.

Aerospace engineering is concerned with the science and technology of flight, and the design of air, land and sea vehicles for transportation and exploration. This exciting field has led people to the moon and continues to lead in the expansion of frontiers deeper into space and into the ocean’s depths. Because of their unique backgrounds in aerodynamics and lightweight structures, aerospace engineers are becoming increasingly involved in solving some of society’s most pressing and complex problems, such as high-speed ground transportation and pollution of the environment. The BS degree program in aerospace engineering is accredited by the Engineering Accreditation Commission of the ABET under the criteria for aerospace and similarly named engineering programs.

MAE Mission

The mission of the School of Mechanical and Aerospace Engineering is to create a vibrant and stimulating learning and research environment and to instruct and encourage our students to reach their full potential in technical expertise, innovative expression, intellectual curiosity, and collaborative design.

MAE Mission for Undergraduate Instruction

The School of Mechanical and Aerospace Engineering will support the MAE and CEAT missions and the mission for instruction of Oklahoma State University by providing a first class education to students that is grounded in engineering fundamentals. The Faculty of MAE are committed to preparing engineers who are:

- Competitive nationwide and internationally for employment opportunities and who will become respected achievers within their discipline.
- Well prepared for the pursuit of advanced studies at any university.
- Prepared for a lifetime of continuing development, which is demanded by disciplines involved with rapidly progressing technology.

Rigor

The GPA requirements for MAE professional school admission and the degree requirements for graduation are the highest in CEAT (see Departmental GPA Requirements, item f). This is essential to fulfill the MAE Mission for Undergraduate Instruction.

Program Educational Objectives

Program educational objectives are statements that describe the expected accomplishments and professional status of mechanical and aerospace engineering graduates three to five years beyond the baccalaureate degree. The School of Mechanical and Aerospace Engineering at Oklahoma State University is dedicated to graduating mechanical and aerospace engineers who:

1. Develop exemplary careers and become leaders to the greater benefit of society.
2. Earn a reputation as responsible and ethical professionals.
3. Develop innovative technologies and adapt to changing professional and societal norms with wisdom and integrity.

Student Outcomes and Specific Program Criteria

The student outcomes for students graduating from the mechanical and aerospace engineering BS programs are:

1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics;
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors;
3. an ability to communicate effectively with a range of audiences;
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts;

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives;

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions;

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies;

ABET requires specific program criteria which must be supported by the curricula and are unique to engineering disciplines. For the BSME Program, the specific ME program criteria are broken into three elements. The ME curriculum prepares graduates to:

1. ME1 - demonstrate an ability to apply principles of engineering, basic science and mathematics (including multivariate calculus and differential equations);

2. ME2 - demonstrate an ability to model, analyze, design, and realize physical systems, components or processes; and

3. ME3 - be prepared to work professionally in either thermal or mechanical systems areas while taking courses in each area.

For the BSAE Program, the specific AE program criteria are also broken into three elements. The AE curriculum prepares graduates with:

1. AE1 - knowledge of the following aeronautical topics: aerodynamics, aerospace materials, structures, propulsion, flight mechanics, and stability and control;

2. AE2 - knowledge of some of the following aeronautical topics: orbital mechanics, space environment, attitude determination and control, telecommunications, space structures and rocket propulsion; and

3. AE3 - graduates must have design competence which includes integration of aeronautical or astronautical topics.

Because mechanical engineering is perhaps the broadest of all engineering disciplines, the program provides not only excellent grounding in all engineering fundamentals, but also allows some flexibility in selecting controlled technical electives to suit the student's interests. In this selection, no one area may be unduly emphasized at the expense of another. For the aerospace engineering, biomedical engineering, and premedical programs, prescribed course work provides students with more focused development. Graduates are fully competent as mechanical or aerospace engineers, with abilities in design, and in-depth knowledge in their areas of concentration.

As a fundamental component of all BS programs, engineering design is strongly emphasized in the junior and senior years but is integrated throughout the curriculum. Most MAE courses at the 3000- and 4000-levels include some design content, ranging from a minimum of one-half to a maximum of four credit hours of design content. Each professional school course builds upon the preceding mechanical and aerospace engineering courses to develop in the student the ability to identify and solve meaningful engineering problems. The coursework is specifically sequenced and interrelated to provide design experience at each level, leading to progressively more complex, open-ended problems. The coursework includes sensitizing students to socially-related technical problems and their responsibilities as engineering professionals to behave ethically and protect occupational and public safety. The program culminates in a senior-year design course in which students integrate analysis, synthesis and other abilities they have developed throughout the earlier portions of their study into a capstone experience. The design experiences include the fundamental elements and features of design with realistic constraints such as economics, safety, reliability, social and environmental impact, and other factors. At this point, students are able to design components, systems and processes that meet specific requirements, including such pertinent societal considerations as ethics, safety, environmental impact and aesthetics. Students develop and display the ability to design and conduct experiments essential to specific studies and to analyze experimental results to draw meaningful conclusions.

An integral part of this educational continuum, from basic science through comprehensive engineering design, are learning experiences that facilitate the students’ abilities to function effectively in both individual and team environments. The program also provides every graduate with adequate learning experiences to develop effective written and oral communication skills. State-of-the-art computational tools are introduced and used as a part of their problem-solving experiences. Finally, the students’ experience in solving ever-more-challenging problems gives them the ability to continue to learn independently throughout their professional careers.

The broad background and problem-solving ability of mechanical and aerospace engineers make them suited to engage in one or more of the following activities: research, development, design, production, operation, management, technical sales and private consulting. Versatility is their trademark. A bachelor’s degree in mechanical or aerospace engineering is also an excellent background for entering other professional schools such as medicine, dentistry, law or business (MBA). The premedical option in mechanical engineering is available for students wishing to enroll in medical school.

In the professional school, (essentially the junior and senior years of the program) mechanical and aerospace engineering students extend their study of the engineering sciences and consider applications of fundamental principles and analysis tools to the solution of real technological problems of society. Some design courses involve students in the solution of authentic, current and significant engineering problems provided by industrial firms. Students may also help smaller firms that need assistance with the development of new products.

The student designs, with the guidance of an adviser, an individualized program of study consistent with his or her interests and career plans. Some students terminate their studies with a bachelor’s degree, while others receive one of several graduate degrees.

**Undergraduate Programs**

- Aerospace Engineering, BSAE (p. 1522)
- Mechanical Engineering, BSME (p. 1524)
- Mechanical Engineering: Petroleum, BSME (p. 1526)
- Mechanical Engineering: Pre-Medical, BSME (p. 1528)

**Graduate Programs**

The School of Mechanical and Aerospace Engineering offers programs leading to the degree of Master of Science in Mechanical and Aerospace Engineering, and the degree of Doctor of Philosophy in Mechanical and Aerospace Engineering. Both of these degrees offer an option in
Unmanned Aerial Systems and prepare the graduate for research and development positions in industry and government, or for the teaching profession in engineering. They are distinguished by the incorporation of a research component.

Students may select coursework and participate in research or design projects in the following areas: aerodynamics, aeroelasticity, biomedical engineering, design, computational mechanics, heat transfer, dynamic systems and controls, fluid mechanics, materials, manufacturing processes, refrigeration, solid mechanics, thermal and HVAC systems, unmanned aerial systems, and web handling systems. Students are encouraged to take courses in mathematics and science and in other fields of engineering which fit into their programs.

Admission Requirements

Admission to the Graduate College is required of all students pursuing the MS or PhD degree. Graduation from a mechanical or aerospace engineering curriculum accredited by ABET, with scholastic performance distinctly above average, qualifies the student for admission to the School of Mechanical and Aerospace Engineering as a candidate for the MS and PhD degrees. Graduates from disciplines other than mechanical or aerospace engineering may be admitted if an evaluation of their transcripts by the School of Mechanical and Aerospace Engineering indicates they are prepared to take graduate-level course work in mechanical or aerospace engineering, or can be expected to do so after a reasonable amount of prerequisite work.

Degree Requirements

All degree programs follow an approved plan of study designed to satisfy the individual goals of the student, while conforming to the general requirements of the School of Mechanical and Aerospace Engineering and the Graduate College.

The Master of Science degree program with the thesis option requires 24 credit hours of approved graduate-level course work and a suitable research thesis of six credit hours. The non-thesis option requires 35 credit hours of which two must be for an acceptable, directed research activity that results in a written and oral report to the faculty.

A new Master of Engineering degree program is being introduced in the 2018-2019 academic year. This degree has a potential option in Unmanned Aerial Systems. This is a non-thesis degree plan that will require 24 core credit hours and 9 hours of controlled technical electives. A capstone requirement must be satisfied in an MAE 5000- or 6000-level graduate-level course.

The Doctor of Philosophy degree requires a minimum of 60 credit hours beyond the master's degree, including a dissertation for which no more than 30 credit hours may be awarded.

Faculty

Daniel E. Fisher, PhD, PE—Professor and Head

**American History & Government**

Select one of the following:
HIST 1103 Survey of American History 3
HIST 1483 American History to 1865 3
HIST 1493 American History Since 1865 3
POLS 1113 American Government 3

**Analytical & Quantitative Thought (A)**
MATH 2144 Calculus I (A) ³ ³ 4
MATH 2153 Calculus II (A) ³ ³ 3
MATH 2163 Calculus III ³ ³ 3

**Humanities (H)**
Courses designated (H) 6

**Natural Sciences (N)**
Must include one Laboratory Science (L) course.
CHEM 1414 General Chemistry for Engineers (LN) ³ ³ 4
or CHEM 1515 Chemistry II (LN) ³ ³ 4
PHYS 2014 University Physics I (LN) ³ ³ 4

**Social & Behavioral Sciences (S)**
Course designated (S) 6

**Hours Subtotal**
42

**Diversity (D) & International Dimension (I)**
May be completed in any part of the degree plan.
Select at least one Diversity (D) course.
Select at least one International Dimension (I) course.

**College/Departmental Requirements**

**Math and Basic Science**
MATH 2233 Differential Equations ³ ³ 3
PHYS 2114 University Physics II (LN) ³ ³ 4
Select one of the following:
ASTR 1013 The Solar System (N) ³ ³ 3
ASTR 1023 Stars, Galaxies, Universe (N) ³ ³ 3
BIOL 1114 Introductory Biology (LN) ³ ³ 3
CHEM 3053 Organic Chemistry I ³ ³ 3

**Engineering Science**
ENGR 1111 Introduction to Engineering ³ ³ 1
ENGR 1332 Engineering Design with CAD for MAE ³ ³ 2
ENGR 1412 Introductory Engineering Computer Programming ³ ³ 2

**Engineering Science**
ENSC 2113 Statics ³ ³ 3
ENSC 2123 Elementary Dynamics ³ ³ 3
ENSC 2143 Strength of Materials ³ ³ 3
ENSC 2213 Thermodynamics ³ ³ 3
ENSC 2613 Introduction to Electrical Science ³ ³ 3

**Major Requirements**

**Engineering Science**
ENSC 3233 Fluid Mechanics ³ ³ 3
ENSC 3313 Materials Science ³ ³ 3

**Specific Professional School**
MAE 3013 Engineering Analysis and Methods I ³ ³ 3
MAE 3113 Measurements and Instrumentation ³ ³ 3
MAE 3253 Applied Aerodynamics and Performance ³ ³ 3
MAE 3293 Fundamentals of Aerodynamics ³ ³ 3
MAE 3324 Mechanical Design I ³ ³ 4
MAE 3403 Computer Methods in Analysis and Design ³ ³ 3
MAE 3724 Dynamic Systems Analysis and Introduction to Control ³ ³ 4
MAE 4223 Aerospace Engineering Laboratory ³ ³ 3
MAE 4243 Aerospace Propulsion and Power ³ ³ 3
MAE 4283 Aerospace Vehicle Stability and Control ³ ³ 3
MAE 4374 Aerospace System Design ³ ³ 4
MAE 4513 Aerospace Structures I ³ ³ 3
IEM 3503 Engineering Economic Analysis ³ ³ 3

3 hours of technical elective to be selected from the following list: ³ ³ 3

3000-level or above from:

BAE
CHE
CIVE
ECEN
IEM
MAE
PETE engineering
BCOM 3223 Oral Communication

Biological Science
Biochemistry
Chemistry
Computer Science
Legal Studies in Business
MATH 3303 Advanced Perspectives on Functions and Modeling for Secondary Teachers

MGMT 3133 Developing Leadership Skills

Geology

PHIL 3803 Business Ethics (H)

PHIL 3833 Biomedical Ethics (H)

Physics

4000-level or above courses from:

Math

Mechanical Engineering Technology

MGMT 4073 Management and Ethical Leadership

MGMT 4533 Leadership Dynamics

Statistics

Hours Subtotal 51

Total Hours 123

1 Courses that must be completed prior to admission to professional school.

Admission to Professional School (required)

• Refer to the OSU Catalog corresponding to your matriculation date for detailed admissions requirements.

Graduation Requirements

1. A minimum GPA of 2.50 is required in all MAE prefix Courses.
2. A minimum overall GPA of 2.50 is required in 4000-level MAE prefix courses.
3. A ‘C’ or better is required in each course that is a prerequisite for a major course taken.
4. The major engineering design experience, capstone course, is satisfied by MAE 4374 Aerospace System Design

Additional State/OSU Requirements

• At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
• Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
• Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
• Degrees that follow this plan must be completed by the end of Summer 2024.

</thead>
<tbody>
<tr>
<td>Total Hours</td>
<td>135</td>
</tr>
</tbody>
</table>

1. Courses that must be completed prior to admission to professional school.
2. Denotes medical school requirements. PSYC 1113 Introductory Psychology (S) is recommended to satisfy (3) hours of (S) requirement. PHIL 3833 Biomedical Ethics (H) is recommended to satisfy (3) hours of (H) requirement.

Note: The entrance requirements of medical schools of choice should be reviewed to ensure an application is competitive.

**Admission to Professional School (required)**

- Refer to the OSU Catalog corresponding to your matriculation date for detailed admissions requirements.

**Graduation Requirements**

1. A minimum GPA of 2.50 is required in all MAE prefix Courses.
2. A minimum overall GPA of 2.50 is required in 4000-level MAE prefix courses.
3. A ‘C’ or better is required in each course that is a prerequisite for a major course taken.
4. The major engineering design experience, capstone course, is satisfied by MAE 4344 Design Projects or MAE 4354 Aerospace Systems Design for Mechanical Engineers.

**Additional State/OSU Requirements**

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.

• Degrees that follow this plan must be completed by the end of Summer 2024.
Mechanical Engineering Technology

Mechanical engineering technology (MET) is the component of engineering that specializes in design and application. MET includes the broad areas of mechanical design, mechanical power and manufacturing. Mechanical engineering technology is applied in mechatronics, robotics, automotive manufacturing, computer-aided drafting and design, computer-aided manufacturing, agricultural machinery and processing, mining, shipbuilding, spacecraft, electronics manufacturing, food processing, aircraft metals and plastics production—nearly the entire spectrum of the industry. In the power areas, MET graduates are involved in vapor power cycles, gas power cycles, air conditioning, fluid power and power transmission. Manufacturing areas involving MET graduates include tool design, cost evaluation and control, plant operations, production planning and manufacturing methods.

An important element in MET is the use of laboratory experience as a teaching tool. The MET program has laboratories in fluid power, materials, fluid mechanics and applied thermal sciences, basic instrumentation, computer-aided design (CAD), and manufacturing (CAM). A senior capstone design course, composed of student teams, integrates the knowledge and skills learned during their course of study. Laboratories are equipped with the latest computer software that supports the design function. Where appropriate, laboratories with modern computer data acquisition systems and on-screen displays are available.

In addition to the required mechanical engineering technology courses, students are provided a solid foundation in algebra, trigonometry and calculus, physics, chemistry, statics, dynamics, instrumentation, thermodynamics, computer science and entrepreneurship (as a minor).

Program Educational Objectives

A few years after graduation, OSU Mechanical Engineering Technology graduates will have the capability to:

1. Be employed in a technical or management position where the skills and knowledge of mechanical engineering technology are utilized.
2. Effectively apply engineering principles and technical knowledge to industrial problems.
3. Work proactively and productively to create value as both members and leaders of teams.
4. Communicate effectively in written, oral and graphical form.
5. Continue life-long learning by bringing new technology into their workplace, through participation and membership in professional organizations and/or through the continuation of professional studies.

Student Outcomes. Students graduating from the MET program are expected to achieve the following student outcomes (a-k):

a. an ability to select and apply the knowledge, techniques, skills, and modern tools of the discipline to broadly-defined engineering technology activities;
b. an ability to select and apply a knowledge of mathematics, science, engineering, and technology to engineering technology problems that require the application of principles and applied procedures or methodologies;
c. an ability to conduct standard tests and measurements; to conduct, analyze, and interpret experiments; and to apply experimental results to improve processes;
d. an ability to design systems, components, or processes for broadly-defined engineering technology problems appropriate to program educational objectives;
e. an ability to function effectively as a member or leader on a technical team;
f. an ability to identify, analyze, and solve broadly-defined engineering technology problems;
g. an ability to apply written, oral, and graphical communication in both technical and non-technical environments; and an ability to identify and use appropriate technical literature;
h. an understanding of the need for and an ability to engage in self-directed continuing professional development;
i. an understanding of and a commitment to address professional and ethical responsibilities including a respect for diversity;
j. a knowledge of the impact of engineering technology solutions in a societal and global context; and
k. a commitment to quality, timeliness, and continuous improvement.

Preparation for a specific industrial function is accomplished by selecting courses that emphasize a given design area, such as fluid power, mechanical design, computer-aided design (CAD) power generation, and air conditioning and heating. Because the program focuses on the application of engineering principles to the pragmatic solution of problems, graduates are immediately productive with minimal on-the-job training, thus increasing their value to industry. Graduates of the MET program are prepared to function in the areas of product design, testing and evaluation; product application and maintenance field engineering; and technical sales and liaison. Industries employing MET graduates include manufacturing companies of all types (aircraft, automobile, compressor and turbine, fluid power manufacturers and others); energy companies (such as natural gas, electrical power generation, and the oil and gas industries); and service companies (transportation industry, architecture and professional engineering firms, and those supporting the oil and gas industry).

Companies utilizing the talents of MET graduates are diversified in their products, as well as geographical location, thus providing a variety of choices in respect to both type of work and place of residence and in diverse industrial, governmental and educational institutions.

**Hours Subtotal** 48

**Electives**

**Hours Subtotal** 3

**Total Hours** 121

1. If B or higher is not earned in ENGL 1113 Composition I or ENGL 1313 Critical Analysis and Writing I, ENGL 1213 Composition II or ENGL 1413 Critical Analysis and Writing II is also required (per Academic Regulation 3.5 (p. 810)).

**Graduation Requirements**

1. A minimum average GPA of 2.00 is required in all courses with an engineering or engineering technology prefix.
2. A grade of C or better is required in a 1000-3000-level GENT, EET, ENSC, or MET course in order to advance to a course for which the GENT, EET, ENSC, or MET course is prerequisite.
3. Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made so long as the changes do not delay graduation or result in semester hours being added.

**Additional State/OSU Requirements**

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
School of Architecture

The School of Architecture, founded in 1909, offers professional degree programs in both architecture and architectural engineering. The integration of these programs through shared faculty, facilities and coursework is a major strength of the School. It is one of the few such integrated programs in the United States, and as such produces graduates who are particularly prepared for the integrated team processes used in professional practice. The School of Architecture is a primary unit in the College of Engineering, Architecture and Technology, and therefore benefits from excellent state-of-the-art resources which significantly enhance the School’s professional programs. The program moved into a brand new facility, the Donald W. Reynolds School of Architecture Building in 2009, and at the same time celebrated its centennial as a School of Architecture.

The School of Architecture is dedicated to providing a high quality and focused professional education to students whose career goals are to enter the practice of architecture or architectural engineering. Professional and liberal study electives provide opportunities for educational breadth or depth and a possible double degree in both architecture and architectural engineering. Minor plans of study are also available from the School of Architecture; the Architectural History/Theory minor (ASHT), the Architecture and Entrepreneurship minor (ASAE). A twelve-credit hour Graduate Certificate is now available, focused upon Integrative Design of the Building Envelope.

Oklahoma State University graduates are recruited by the leading architectural and architectural engineering firms both in Oklahoma and nationally. The Oklahoma State University School of Architecture is particularly proud of having among its alumni many of the leaders of the best firms in the country, an AIA Gold Medalist (the highest award given to an architect), and presidents of the American Institute of Architects (AIA), the National Architectural Accreditation Board (NAAB), and the National Council of Structural Engineering Associations (NCSEA).

Mission and Goals

Architecture is the difficult and complex art and science of designing and building a setting for human life. It is unique among today’s professions in that its successful practice requires a blend, in roughly equal shares, of traits normally considered less than compatible: human empathy, artistic creativity, technological competence, and organizational and economic acumen. In contrast to other fine arts, architecture is rarely self-generated; it is rather a creative response to a stated or perceived human need. It must, therefore, be more user-oriented than fine art alone and more humane than pure science. Its design solutions must avoid the total subjectivity and detachment of other arts while striving to be functionally, technically and economically objective and sound. Yet, in a seemingly insoluble contradiction, the keenest technological and economic functionality will fall far short of becoming architecture unless it also strongly appeals to human spiritual and emotional values. When one thinks of the environment, one cannot help but see or recall architectural images: pyramids in Egypt, Greek and Roman temples, gothic cathedrals, medieval castles, industrial cities, modern skyscrapers and dwellings or entire cities which significantly express the culture and values of the people who live or lived there.

The mission of the School of Architecture is to cultivate a collaborative learning community focused upon critical thinking and ethical responsibility. To do so, the faculty embrace the established fundamentals and encourage the exploration of emerging innovations in design. The vision of the school is to empower students to make creative contributions in the cause of architecture.

The School of Architecture endeavors to instill in each individual sensitivity to human needs, a genuine concern for quality, integrity and high ideals, a positive attitude for life-long learning, and an appreciation for one’s own self-esteem.

The School’s primary goal is to provide excellence in professional education for students preparing to enter the private practice of architecture or architectural engineering. This professional focus is to educate not only qualified candidates for the degree, but graduates who, during their careers, will be licensed professionals and will assume positions of leadership within the profession and society.

Accreditation

The School of Architecture offers two separately accredited professional degree programs. The Bachelor of Architecture degree, BArch, is accredited by the NAAB. The Bachelor of Architectural Engineering degree, BArchE, is accredited by the Accreditation Board for Engineering and Technology (ABET http://www.abet.org) as an engineering program. Both programs require approximately five years of study to complete. In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB) which is the sole agency authorized to accredit U.S. professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture and the Doctor of Architecture. A program may be granted an eight-year, three-year or two-year term of accreditation, depending on the extent of its conformance with established educational standards. Doctor of Architecture and Master of Architecture degree programs may require a pre-professional undergraduate degree in architecture for admission. However, the pre-professional degree is not, by itself, recognized as an accredited degree. The Oklahoma State University School of Architecture offers the following NAAB-accredited degree programs - BArch. (154 undergraduate credits).

The next accreditation visit will occur in 2025.

Architecture

Architecture is the complex synthesis of creatively solving problems involving both art and science through the disciplined orchestration of image-making, activity organization, technological applications, legal constraints and budgetary parameters which together express culture, enhance quality of life and contribute to the environment.

Education in architecture consists of campus-oriented classroom and studio courses, as well as off-campus studies. It is conducted in an intellectual climate which stimulates inquiry, introduces principles and values, and teaches the disciplines necessary to work in collaboration with others. The goal of the program is the education of future leaders within the architecture profession.

In the pre-professional portion of the architectural program (approximately two years of study), the focus is on the fundamental principles of design and technology supplemented by appropriate general education courses in English, social sciences, natural sciences, math and humanities. These courses allow students to assimilate a beginning knowledge base in architecture along with a broader liberal-based component to their education.
Students who demonstrate proficiency in this portion of the program by meeting a specific set of admission criteria are eligible for admission to the professional program in architecture.

The professional program in architecture (typically three years) builds systematically upon the knowledge acquired in the pre-professional curriculum. Students expand their design and problem-solving abilities through a sequential series of design studios informed by sequences of courses dealing with structure, systems and materials, building technology, the history and theory of architecture, and business and project management principles. In addition students fully utilize the computer as a design and communication tool in the problem-solving process.

The design studio is the center of the School’s educational program. It is the setting where students and faculty work most closely together, and where all specialized study and knowledge comes together and is synthesized in design. The record of OSU students’ achievements in the design studios is evidenced by the success in national and international architectural design competitions. In addition to a student’s design studio education, he or she is required to complete sequential courses in structures, architectural history/theory, technology, and management that work in correlation with the design studio sequence.

The program has long been known as one of the strongest professional programs in the United States. OSU graduates are consistently offered employment opportunities in many of the best architectural offices in Oklahoma and throughout the United States. The program is fully accredited by the National Architectural Accreditation Board.

Architectural Engineering

Architectural engineering is a profession that combines the art and science known as architecture with a detailed background in fundamental and applied engineering principles. In its broadest sense, it involves the creative application of science and technology to the design of structures meant for human occupancy. Architectural engineering differs from architecture in its focus upon the design of elements, systems and procedures for buildings, rather than the design of buildings themselves. Architectural engineers practice in a wide variety of professional engineering settings such as consulting firms, architectural firms, industrial or commercial organizations and governmental agencies.

The objective of the Bachelor of Architectural Engineering program is to provide basic and professional education to engineering students in building-related systems. OSU graduates possess broad-based knowledge, skills and judgment that prepare them to succeed in the profession of architectural engineering or in further studies at the graduate level. The program is designed to prepare students to contribute to society as professional engineers dealing with analysis, design and related activities within the construction industry. The program utilizes the broad resources of the University to exploit a close relationship with the architectural program and to provide in-depth understanding of the professional field and sensitivity to other less technical concerns related to the building environment faced by architectural engineers.

The primary focus of the architectural engineering program at OSU is the safe and economical design of technical systems used in buildings. Structural systems must withstand the various forces of nature such as gravity, winds and earthquakes, as well as the forces of man. These systems require a working knowledge of the mechanics of those materials commonly used for building structures such as steel, timber and reinforced concrete. Two new options are available for consideration in the architectural engineering program: Mechanical Electrical and Plumbing, and Construction Project Management.

The study of architectural engineering is an integrated mix of liberal studies, design and technical education. Architectural engineers need to be able to conceptualize aesthetic issues and design complex technical systems.

In the pre-professional portion of the architectural engineering program (approximately two years of study), the focus is on the underlying scientific and mathematical principles of engineering and the basic design principles of architecture supplemented by appropriate general education courses in English, social sciences, natural sciences, math and humanities. These courses allow students to assimilate a beginning knowledge base in architecture and engineering along with a broader liberal-based component to their education. Students who demonstrate proficiency in this portion of the program by meeting a specific set of admission criteria are eligible for admission to the professional program in architectural engineering.

The professional program in architectural engineering (typically three years) builds systematically upon the scientific and architectural knowledge acquired in the pre-professional curriculum. Students acquire detailed technical and architectural knowledge and problem-solving abilities through a series of progressively more detailed and comprehensive courses and studios.

Each architectural engineering course builds upon the preceding architectural engineering courses to develop in the student the ability to identify and solve meaningful architectural engineering problems. The coursework is specifically sequenced and interrelated to provide design experience at each level, leading to progressively more complex, open-ended problems. This coursework includes sensitizing students to socially-related technical problems and their responsibilities as engineering professionals to behave ethically and protect public safety. The program culminates in a fifth-year course in which the students integrate analysis, synthesis and other abilities they have developed throughout the earlier portions of their study into a capstone experience.

An integral part of this educational continuum from basic knowledge through comprehensive architectural engineering design are learning experiences that facilitate the students’ abilities to function effectively in both individual and team environments. Students are exposed to a wide variety of problems dealing with contemporary issues in an international context. Moreover, the program provides every graduate with adequate learning experiences to develop effective written and oral communication skills. State-of-the-art computational and CAD tools are introduced and used as a part of the students’ problem-solving experiences. Finally, the students’ experience in solving ever-more-challenging problems gives them the ability to continue to learn independently throughout their professional careers.

Architectural Engineering Educational Objectives. The educational objectives expected of program graduates a few years after graduation are as follows. These graduates:

- Will utilize their education in architectural engineering to contribute to society as licensed professional engineers;
- Will excel in their careers, displaying leadership, initiative, and broad-based knowledge and skills;
- Will have displayed a sensitivity to human needs and other less technical concerns related to the building environment;
Undergraduate Curriculum

The programs in architecture and architectural engineering are five years long and offer the professional degrees of Bachelor of Architecture and Bachelor of Architectural Engineering.

Undergraduate Admission

Students who satisfy the University admission requirements and CEAT Admissions standards are eligible to enroll for the first two years of the program (pre-professional). Upon completion of these two years, the most qualified students are selected, upon application, by the School for admission to the upper division (professional program). Admission is based upon academic achievement and professional potential. Admission criteria are subject to annual review by the School and may be obtained directly from the School.

Transfer students are required to furnish transcripts and course descriptions for previous classroom courses, as well as examples of previous studio work. Evaluation and enrollment by the School is on a course-by-course basis for all transfer students.

General Education

All students of OSU are required to complete 40 hours of general education coursework. English composition, American History, Political Science, Social sciences, basic science and mathematics are part of the General Education requirements. Some required course work in History and Theory of Architecture can be used for General Education (H) credit.

Electives

Electives should be selected to comply with the appropriate undergraduate degree requirements for the program. (See 3.2 “Changes in Degree Requirements” in the “University Academic Regulations (p. 810)” section of the Catalog.) These requirements assure compliance with institutional and accreditation criteria.

Study Abroad

The School of Architecture is committed to preparing its graduates for the professional opportunities presented by the expanding global economy. As part of this preparation, the School offers a five-week Summer European Study Program based in Rome, Italy. This program has been designed to supplement the required curriculum. Students study, in an organized and disciplined fashion, major examples of modern and historic European architecture, including urban issues. Both analytic and artistic sketching skills, and descriptive writing, are the main tools developed in this course of study.

Experience has shown that the Summer European Study Program significantly increases a student’s level of maturity, independent thinking, and cultural and social awareness of others. Knowing the values and accomplishments of other cultures not only deepens and broadens knowledge and abilities; it also makes a student a better and more responsible citizen of his or her own country. Starting for freshman matriculating in the fall of 2016, the BArch curriculum will require a longer-term study abroad experience as a condition for graduation.

Faculty and Facilities

In keeping with the professional orientation of the School, the faculty have extensive experience as successful practicing architects and architectural engineers, as well as outstanding scholastic records. The diversity of the faculty is a strength.

The school moved into a new facility in 2009, the Donald W. Reynolds School of Architecture Building, which includes spacious design studios, a greatly expanded architectural library, day-lighting lab, computer lab, classroom facilities and many other amenities. The Donald W. Reynolds School of Architecture received an AIA Oklahoma Honor Award recognizing its outstanding design in 2011.

Computers

All School of Architecture students enrolled in either the architecture or architectural engineering programs will be required to purchase a laptop computer as they enter the design studio sequence. Updated specifications for the computer and software will be provided each year, and posted to the School’s website.

Student Work

Projects submitted for regular class assignments may be retained by the School. All work not retained will be returned to the student.

Student Body

With the curriculum based upon extensive and personalized student-faculty interaction, the student-faculty ratio in studio courses is set at approximately 16 to one. Annual student enrollment is approximately 300 students.
Academic Advising
The College’s Office of Student Academic Services provides initial advisement for all entering freshmen pre-professional architecture students. Beginning the second semester of the curriculum, academic advisement is provided by the School of Architecture.

Each student is personally advised in the planning and scheduling of his or her coursework and is counseled and advised individually on matters of career choice, his or her activities at OSU, and on other academic matters. An academic file is created for each student at the time of initial enrollment.

Admission to Professional School
Students applying for admission to the Professional School must first meet the required criteria established for each program. Applicants will be selected based upon their performance in the First and Second Year Architecture and Architectural Engineering curricula. Particular courses in the curricula, which have proven to be good indicators of success in the two programs, will be factored with a multiplier to increase their influence in the selection procedure. To be considered for either program, applicants must:

1. Complete a minimum of 55 credit hours of coursework (applicable to the degree plan) prior to admission to professional school.
2. Complete the following required first- and second-year courses with a grade of “C” or better:
   - For the Architecture program:
     - ARCH 1112 Introduction to Architecture
     - ARCH 2003 Architecture and Society (HI)
     - ARCH 1216 Architectural Design Studio I
     - ARCH 2116 Architectural Design Studio II
     - ARCH 2216 Architectural Design Studio III
     - ARCH 2263 Building Systems
     - MATH 2144 Calculus I (A)
     - PHYS 2014 University Physics I (LN)
     - ENGL 1113 Composition I
     - ENGR 1412

3. Achieve a grade of “C” or better in all required ARCH prefix courses, substitutes for ARCH prefix courses, and prerequisites for ARCH prefix courses.

4. Achieve a grade of “C” or better in all required ARCH prefix courses, substitutes for ARCH prefix courses, and prerequisites for ARCH prefix courses.

The Selection Grade Point Average (SGPA) will be calculated for each applicant by multiplying course credit hours by the multiplier, multiplying by the numerical course grade and dividing by the total factored hours.

For consideration of admission to the Architecture program, the following courses and multipliers will be used in calculating SGPA:
- ARCH 1112 Introduction to Architecture (x1 multiplier),
- ARCH 2003 Architecture and Society (HI) (x1 multiplier),
- ARCH 1216 Architectural Design Studio I (x2 multiplier),
- ARCH 2116 Architectural Design Studio II (x2 multiplier),
- ARCH 2216 Architectural Design Studio III (x2 multiplier)
- ARCH 2263 Building Systems (x1 multiplier),
- ARCH 3252 Digital Applications I (x2 multiplier),
- MATH 2144 Calculus I (A) (x1 multiplier),
- PHYS 2014 University Physics I (LN) (x1 multiplier),
- ENSC 2113 Statics (x1 multiplier),
- ENGL 1113 Composition I (x1 multiplier).

For the Architectural Engineering program the following courses are used in the SGPA calculation:
- ARCH 1112 Introduction to Architecture (x1 multiplier),
- ARCH 1216 Architectural Design Studio I (x1 multiplier),
- ARCH 2116 Architectural Design Studio II (x1 multiplier),
- ARCH 2216 Architectural Design Studio III (x2 multiplier),
- ARCH 2263 Building Systems (x1 multiplier),
- MATH 2144 Calculus I (A) (x2 multiplier),
- PHYS 2014 University Physics I (LN) (x2 multiplier),
- ENSC 2113 Statics (x3 multiplier),
- ENSC 2143 Strength of Materials (x2 multiplier),
- ENGL 1113 Composition I (x1 multiplier),
- ENGR 1412 (X1 multiplier).

Double Degree
Applicants wishing to enter into the Professional School in both the BArch and BArchE degree programs must apply for both programs and be accepted to each, independent of the other.

Change of Program
Changing programs, Architecture to Architectural Engineering or vice versa, typically occurs via formal application and admission to the other program through the Professional School application and admission process.

Taking ARCH Prefix Courses When Not Admitted to Professional School
Students not admitted to Professional Schools may not enroll in any 3000-level or higher ARCH prefix course or ARCH 2203 History and Theory of Architecture Since 1900 without prior permission of the instructor and Academic Adviser.

Transfer Students
Students wishing to transfer into Professional School of the OSU School of Architecture must apply for admission to the Professional School in the same manner as OSU students.

Completion of Required Pre-Professional School Courses
All students applying for admission to Professional School must satisfactorily complete all required courses for consideration by the end of the spring semester of the year of application.

Application and Notification Dates
Application for admission, readmission or transfer to Professional School of Architecture and Architectural Engineering must be made by the last working day of April of the year of intended admission. Notification of
selection decisions will normally be made soon after June 1st but not before a two-week period after Grade Reports have been received by the School—if there should be any problem with a grade that may impact acceptance to Professional Schools the student should contact the School immediately. Selected applicants must confirm acceptance of the offer of a position in Professional School by the date indicated in the letter of offer.

**Reapplication**

Applicants not admitted may reapply for admission to Professional School the following year; such applicants do not carry any priority or disadvantage but are included in the full application pool.

**Undergraduate Programs**

- Architectural Engineering: Construction Project Management, BEN (p. 1539)
- Architectural Engineering: Mechanical, Electrical and Plumbing, BEN (p. 1541)
- Architecture Engineering: Structures, BEN (p. 1545)
- Architecture, BAR (p. 1547)

- Architectural Studies: Architecture and Entrepreneurship (ASAE), Minor (p. 1543)
- Architectural Studies: History and Theory (ASHT), Minor (p. 1544)

**Faculty**

Suzanne D. Bilbeisi, MArch, AIA—Centennial Professor and Head

AT&T Professor and Associate Dean, CEAT Academic Affairs: Randy Seitsinger, MArch, FAIA

**Professors:** Mohammed Bilbeisi, MArch, RA; Khaled Mansy, PhD; Tom Spector, PhD, AIA

**Associate Professors:** Jeanne Homer, MArch, AIA; John Phillips, MArchE, PE; Seung Ra, MArch, AIA; Michael Rabens, PhD; Carisa Ramming, MArchE, PE; Nathan Richardson, MArch, AIA; Awilda C. Rodriguez, MArch, RA; Paulo Sanza, MArch, RA; Jerry L. Stivers, MArch, AIA

**Assistant Professors:** Stan Carroll, MArch, AIA

1 Courses that must be completed prior to admission to professional school.

### Admission to Professional School (required)
- Refer to the OSU Catalog corresponding to your matriculation date for detailed admissions requirements.

### Graduation Requirements
1. A final grade of 'C' or better in all ARCH prefix courses, substitutions for ARCH prefix courses, and all non-ARCH prefix courses that are a prerequisite to an ARCH prefix course.
2. The capstone course for Architectural Engineering majors is ARCH 5226 Architectural Engineering Comprehensive Design Studio.

### Additional State/OSU Requirements
- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
Architectural Engineering: Mechanical, Electrical and Plumbing, BEN

1 Courses that must be completed prior to admission to professional school.

---

### Admission to Professional School (required)

- Refer to the OSU Catalog corresponding to your matriculation date for detailed admissions requirements.

### Graduation Requirements

1. A final grade of 'C' or better in all ARCH prefix courses, substitutions for ARCH prefix courses, and all non-ARCH prefix courses that are a prerequisite to an ARCH prefix course.

2. The capstone course for Architectural Engineering majors is ARCH 5226 Architectural Engineering Comprehensive Design Studio.

### Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.

- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.

- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.

- Degrees that follow this plan must be completed by the end of Summer 2024.
Architectural Studies: Architecture and Entrepreneurship (ASAE), Minor

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student's declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).
Architectural Studies: History and Theory (ASHT), Minor

### Admission to Professional School (required)
- Refer to the OSU Catalog corresponding to your matriculation date for detailed admissions requirements.

### Graduation Requirements
- A final grade of 'C' or better in all ARCH prefix courses, substitutions for ARCH prefix courses, and all non-ARCH prefix courses that are a prerequisite to an ARCH prefix course.
- The capstone course for Architecture majors is ARCH 5117 Architectural Design Studio VIII.

### Additional State/OSU Requirements
- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

COLLEGE OF HUMAN SCIENCES

College Administration
Stephan M. Wilson, PhD, CFLE—Dean
Jorge Atiles, PhD—Associate Dean for Extension and Engagement
Christine Johnson, PhD—Associate Dean for Research and Graduate Studies
Shiretta Ownbey, PhD—Associate Dean for Academic Programs and Services
Ben Goh, EdD—Assistant Dean and Director, School of Hospitality and Tourism Management

Campus Address and Phone
Address: 101 Human Sciences, Stillwater, OK 74078
Phone: 405-744-5053
Website: humansciences.okstate.edu (http://humansciences.okstate.edu)

Mission
The College of Human Sciences advances and applies knowledge while developing effective professionals, engaged citizens and visionary leaders who promote the physical, social and economic well-being of people.

Vision
The College of Human Sciences will be a world leader in the discovery and application of knowledge, preparing the next and upcoming generations of professionals who advance the quality of life.

The College of Human Sciences (COHS) is composed of three departments—Design, Housing and Merchandising; Human Development and Family Science; and Nutritional Sciences—and the School of Hospitality and Tourism Management. Each science-based program focuses on the reciprocal relationship between people and their natural, constructed or social environments. Graduates pursue professional careers in business, health, communications, design, education, international service, research, social welfare and a variety of agencies, organizations and institutions. Pre-professional options and advisement are offered for students interested in pursuing graduate education in law, medicine and allied health fields, as well as within their major fields of study.

Core Values
Excellence - We are committed to excellence and continuous improvement in all our endeavors.
Integrity - We are committed to the principles of truth and honesty; we will be equitable, ethical and professional.
Service - We believe that serving others is a noble and worthy endeavor.
Intellectual Freedom - We believe in ethical and scholarly questioning in an environment that respects the rights of all to freely pursue knowledge.
Diversity - We respect others and value diversity of opinion, freedom of expression, and other ethnic and cultural backgrounds.
Stewardship of Resources - We are dedicated to the efficient and effective use of resources. We accept responsibility of the public's trust and are accountable for our actions.

Creativity - We foster creativity and innovation utilizing world-class facilities and leading technologies to attract and support prestigious faculty and competitive graduates.

Further information may be found at humansciences.okstate.edu (http://humansciences.okstate.edu).

Accreditation
The Council for Interior Design Accreditation (CIDA) has accredited the undergraduate interior design program. The preproduction and the production management apparel curricula is endorsed by the American Apparel and Footwear Association (AAFA) Education Foundation, making it one of only 13 approved programs in North America. The Child Development Laboratory is licensed by the Oklahoma Department of Human Services (DHS) and has received a Three Star Differential Quality Certification. The Child Development Laboratory is also accredited by the National Association for the Education of Young Children (NAEYC).

Program approval has been granted to the Early Childhood Education Teacher Preparation program by the Oklahoma State Board of Education. In addition, the Early Childhood Education program is accredited by the Council for Accreditation of Educator Preparation (CAEP). The Family and Consumer Sciences Education program has been accredited by the Oklahoma Commission for Teacher Preparation in cooperation with the Council for Accreditation of Educator Preparation (CAEP). The Marriage and Family Therapy program is accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE). The Didactic Program in Dietetics and the Dietetic Internship at OSU are both currently granted continuing accreditation by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics, 120 South Riverside Plaza, Suite 2000, Chicago, IL 60606-6995, ph. 312.899.0040 ext 5400.

The Patricia Kain Knaub Center for Student Success
The Patricia Kain Knaub Center for Student Success is located in 101 Human Sciences on the south wing of the Human Sciences building. This location is the destination of every student and accompanying family arriving in the College. The Center provides a welcoming entry point and a continuing resource for a wealth of integrated academic programming and student services. A student interested in learning about the College of Human Sciences and its academic programs may schedule an appointment with the Coordinator for Prospective Student Services for information and a tour of the College facilities. Upon admission to the College of Human Sciences, students receive an array of services within the Center.

The Center for Student Success serves as a leader within the OSU system and to human sciences academic units nationally to elevate academic advising, the first-year experience, leadership development, and career development through highly engaging, purposeful and integrated programming that educates students to become intentional learners.

The Center offers the following comprehensive and integrated services to undergraduate students in the College of Human Sciences:

- Services to prospective students and their families that clearly articulate College of Human Sciences academic programs.
- Developmental academic advising, emphasizing a student-centered, holistic approach.
- A foundational first-year experience to facilitate transition of students to a large university.
• Strong leadership development experiences through the first-year experience courses, Freshman Scholar Leaders, Student Council, Ambassadors and other student leadership organizations.
• Career development opportunities to effectively link educational experiences with career goals and career destinations.

The Career Consultant within the Center for Student Success is a certified Global Career Development Facilitator (GCDF) and provides services designed specifically for College of Human Sciences students. The College of Human Sciences Career Services offers students opportunities to explore traditional and nontraditional careers, complete career-related assessments, and enhance their professional presence in writing, in person and online.

Career development projects are integrated into the first-year experience courses required of all freshmen and transfer students. Outside of the classroom, students are provided opportunities to refine their job search materials, interview with practicing professionals who represent Human Sciences fields of study, participate in career empowerment workshops, learn of part-time job opportunities related to Human Sciences areas of study and identify internship experiences. The College of Human Sciences Career Services provides a link to OSU Career Services, making students aware of resources available throughout campus, including career fairs, career and skill assessments, on-campus interviews and an array of other valuable opportunities. The College of Human Sciences Career Services has an online presence via our website and through participation in several major-specific LinkedIn groups. In addition, we utilize Twitter to share information about upcoming events and opportunities.

Human Sciences Outreach

The College of Human Sciences Outreach office performs a vital role in the academic programs and services mission within the College, providing support services for courses using a variety of delivery methods to serve diverse student needs. Various types of international study programs are offered to engage students in international opportunities and education. In addition, courses that take students to various locations to experience hands-on education are offered through Outreach. Web-based courses and other distance delivery methods serve students who are unable to access traditional educational offerings. As a member of the Great Plains Interactive Distance Education Alliance, the College of Human Sciences Outreach office provides support services for online master’s programs in family financial planning, family and community services, gerontology, retail merchandising leadership and dietetics. Consistent with the missions of OSU and the College of Human Sciences, Outreach serves state, national and international audiences.

Honors

Outstanding students in the College of Human Sciences who meet the requirements of The Honors College may earn the Honors College Degree while completing their undergraduate degree in this college.

College honors are earned at the upper division (3000- and 4000-level classes) in the student’s major and are one of the requirements for receiving a bachelor’s degree with honors. College honors requires nine hours of upper-division honors credit in the department and three hours of honors thesis or creative component. For further information on the Honors College, refer to https://honors.okstate.edu/content/awards or visit the Honors College in 101 Old Central.

Scholarships

Oklahoma State University has a scholarship program for entering freshmen and first-year transfer students. College of Human Sciences scholarship applications are typically due for continuing students in December and scholarship awards are announced in April for the coming academic year. Freshmen and first-year transfer student scholarships are awarded during the fall and spring semester to students entering Human Sciences in the following fall semester. Criteria for and the amount of the scholarship awards vary.

Academic Programs

Undergraduate Programs

The Bachelor of Science degrees within the College of Human Sciences are offered by three departments and one school. The majors are:

• Design, Housing and Merchandising (DHM), with options in fashion design (apparel design and production), interior design and fashion merchandising.
• Human Development and Family Science (HDFS), with options in early childhood education, child and family services, and family and consumer sciences education.
• Hospitality and Tourism Management (HTM).
• Nutritional Sciences (NSCI), with options in allied health, community nutrition, dietetics, and human nutrition/premedical sciences.

Subject-focused minors are available through three departments within the College of Human Sciences. Details regarding these minors may be obtained by contacting the appropriate programs.

Transfer Student Admission Requirements

Students transferring into the College of Human Sciences from another institution or another college at OSU must have a minimum retention GPA as determined by the academic unit. See DHM, HDFS and NSCI transfer admission requirements on degree requirement sheets for details.

Departmental Clubs and Honor Societies

American Association of Textile Chemists and Colorists
American Hotel and Lodging Association (student chapter)
American Society of Interior Designers Student Chapter
Club Manager’s Association of America
Early Childhood Education Club
Eta Sigma Delta (hotel and restaurant administration honor society)
Graduate Students in Human Sciences Association
Graduate Students in Nutritional Sciences
Hospitality Administration Graduate Student Association
Human Development and Family Science Club
Human Sciences Ambassadors
Human Sciences Scholar Leaders
Human Sciences Student Council
International Facility Management Association Student Chapter
International Interior Design Association Student Chapter
Meeting Professionals International
Merchandising and Apparel Design Association
National Society of Minorities in Hospitality
Nutritional Sciences Club
OSU Student Restaurant Association
Phi Upsilon Omicron (scholarship and leadership honor society)
Sigma Phi Omega (gerontology honor society)
Academic Areas

- Design, Housing and Merchandising (p. 1553)
- Hospitality and Tourism Management (p. 1564)
- Human Development and Family Science (p. 1567)
- Nutritional Sciences (p. 1582)

Undergraduate Programs

- Design, Housing & Merchandising: Apparel Design & Production, BSHS (p. 1556)
- Design, Housing & Merchandising: Interior Design, BSHS (p. 1558)
- Design, Housing & Merchandising: Merchandising, BSHS (p. 1560)
- Early Child Care and Development, BSHS (p. 1572)
- Hospitality and Tourism Management, BSHS (p. 1565)
- Human Development and Family Science: Child and Family Services, BSHS (p. 1574)
- Human Development and Family Science: Early Childhood Education, BSHS (p. 1577)
- Human Development and Family Science: Family & Consumer Sciences Education, BSHS (p. 1579)
- Nutritional Sciences: Allied Health, BSHS (p. 1585)
- Nutritional Sciences: Community Nutrition, BSHS (p. 1587)
- Nutritional Sciences: Dietetics, BSHS (p. 1589)
- Nutritional Sciences: Human Nutrition/Pre-Medical Sciences, BSHS (p. 1591)

Minors

- Apparel Design and Production (ADP), Minor (p. 1555)
- Child Development (CHDV), Minor (p. 1571)
- Gerontology (GERO), Minor (p. 1573)
- Human Services (HSVC), Minor (p. 1581)
- Merchandising (MERC), Minor (p. 1562)
- Nutritional Sciences (NSCI), Minor (p. 1584)
- Sustainable Design (SD), Minor (p. 1563)

Graduate Programs

Master's Programs

The Master of Science degree is available in design, housing and merchandising; hospitality administration; human development and family science and nutritional sciences.

Students seeking admission to a master's degree program in any of the departments/school must be qualified graduates of colleges and universities of recognized standing. In addition, those seeking admission must have completed 30 semester credit hours in human sciences or closely related subject matter. A student with background deficiencies must compensate for such deficiencies before admission to the master's program. Graduate Record Examination (GRE) scores are required by master's programs within the DHM, HDFS and NSCI departments with the exception of online master's programs offered by these departments. The School of HTM require submission of GRE/GMAT scores for admission consideration. The plan of study for a master's degree student is individually planned to develop academic excellence specific to the student's career goals. Refer to descriptions of specific master's degree programs for each department or school. The selection and organization of courses are made in consultation with the adviser and the student's advisory committee. At least 21 semester credit hours must be completed in courses numbered 5000 or above.

Online Master's Programs

The Master of Science degree in family financial planning (FFP) is offered collaboratively online through the Great Plains Interactive Distance Education Alliance (Great Plains IDEA), of which OSU is a member. The FFP master's curriculum is a board registered program through the Certified Financial Planner Board of Standards and requires 36 credit hours, and the graduate certificate requires 18 credit hours, meeting the educational requirements to take the Certified Financial Planner™ (CFP®) examination.

The Department of Design, Housing and Merchandising offers an online Retail Merchandising Leadership online master's program through the Great Plains Interactive Distance Education Alliance and requires 36 credit hours. The program helps strengthen emerging needs in the retail industry for consumer research skills and analytics driven problem solving.

The Human Development and Family Science master's program, with options in family and community services and gerontology, is offered through the College of Human Sciences in collaboration with the Great Plains Interactive Distance Education Alliance. The online version of the gerontology program requires 36 credit hours, as does the family and community services program.

An online master's program in dietetics is offered through the Department of Nutritional Sciences and the Great Plains IDEA. Students admitted to this program must hold the Registered Dietitian (RD) credential or must have met both the academic and supervised practice requirements of the Academy of Nutrition and Dietetics and be ready to sit for the national credentialing exam to become a Registered Dietitian. The program requires 36 credit hours.

Doctoral Program

The Doctor of Philosophy degree is a multidisciplinary degree program through the College in conjunction with the departments of Design, Housing and Merchandising, Human Development and Family Science, and the School of Hospitality and Tourism Management. There is a separate PhD degree program in Nutritional Sciences. Individualized programs lead to an area of specialization in any one of the departments/school. Admission to the programs is based upon evidence that the applicant meets general requirements of the Graduate College, has demonstrated academic and professional achievements, and can successfully complete a doctoral program, as evidenced by prior academic work, minimum 3.25 GPA in graduate level coursework, letters of recommendation, a statement of purpose and goals, and GRE or GMAT scores. Applications are reviewed by a graduate faculty committee in each department or school. These programs offer a combination of courses and research experiences. The programs include a strong emphasis on research and application of statistical procedures, as well as having students gain experience in resource generation, knowledge sharing and community engagement.

A minimum of 60 semester credit hours beyond the master's degree is required for the PhD degrees. The PhD degrees prepare individuals to be researchers and educators for research positions in universities,
business and industry, for university teaching and for administrative or management level positions.

Human Development and Family Science and Nutritional Sciences additionally offer a 90 semester credit hour PhD program which incorporates the requirements to achieve both a Master of Science degree and a Doctor of Philosophy degree. Students accepted into the 90-hour PhD option will complete requirements in the first 30 credit hours for either a MS degree in Human Development and Family Science (Developmental and Family Sciences option) or in Nutritional Sciences (thesis option).

- Apparel Design and Production, MS (p. 1553)
- Applied Human Services, MS (p. 1567)
- Design, Housing and Merchandising, PhD (p. 1553)

- Nutritional Sciences, PhD (p. 1582)
- Nutrition, MS (p. 1582)
- Retail Merchandising Leadership, MS (p. 1553)
Design, Housing and Merchandising

The mission of the Department of Design, Housing and Merchandising (DHM) is to be recognized leaders in Technology and Sustainable Design in partnership with industry and community. Three undergraduate options are available: fashion (apparel) design and production, interior design and fashion merchandising each requiring a summer internship between the junior and senior years.

Students in apparel design and production are preparing for careers in the apparel and sewn products industries. The program emphasizes the integration of design principles, construction methods, consumer preferences and mass production strategies. Coursework includes principles of design, anthropometrics and pattern grading, apparel assembly and production, draping techniques, methods of mass production, quality assurance, properties and performance evaluation of textiles, patternmaking, computer-aided design and technology, entrepreneurship, and a required internship to acquire apparel design industry experience. The American Apparel and Footwear Association (AAFA) Education Foundation has endorsed the undergraduate curricula, making OSU one of only 13 schools in North America recognized with an AAFA-approved apparel program. Career opportunities include apparel designer, technical designer, product development manager, accessory designer, patternmaker, textile designer, sourcing manager, quality assurance manager, production manager and apparel engineer.

Students in interior design are preparing for careers as professionals who assist businesses and families in planning and solving problems relative to the function and quality of interior living and working environments. Coursework includes fundamentals of design, design analysis, ergonomics, concept development, space planning and programming, universal design principles, computer-aided design (CAD) and related aspects of environmental design. Students must pass the Proficiency Review Process at the end of their freshman year to be accepted into the professional level interior design program. Upon acceptance, students are expected to have their own laptop computer with sufficient capacity for graphics software used in the profession. Career opportunities include professional practice in interior design and architectural firms, lighting, design, facility management, historic restoration and preservation and product design and sales management. The undergraduate interior design program is accredited by the Council for Interior Design Accreditation (CIDA) and the program has achieved national ranking by the publication Design Intelligence.

The merchandising program prepares students for careers at every level of the fashion industry. Analytic analysis, retail buying, wholesaling product lines to retailers, product development, trend forecasting, managers, visual merchandisers as well as auxiliary industries including fashion journalism, event planning and logistics. Coursework includes retailing, merchandise planning and analysis, sustainable design, visual merchandising and communication, market analysis, quality assurance, retail technology and global sourcing. Merchandising graduates are in high demand among retailers, manufacturers, product developers, supply chain and sourcing managers and designers.

Students in all three options will develop business management, communication, creative problem solving and administrative skills. Minors are available in both merchandising and apparel design and production.

Admission Requirements

Transfer students must meet the following minimum retention GPA requirements in order to be admitted to the DHM undergraduate program:

<table>
<thead>
<tr>
<th>Total Hours Attempted</th>
<th>Minimum GPA required</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 31 hours</td>
<td>2.00</td>
</tr>
<tr>
<td>31-45 hours</td>
<td>2.25</td>

<tr>
<td>Over 45 hours</td>
<td>2.50</td>
</tr>
</tbody>
</table>

Undergraduate Programs

- Design, Housing & Merchandising: Apparel Design & Production, BSHS (p. 1556)
- Design, Housing & Merchandising: Interior Design, BSHS (p. 1558)
- Design, Housing & Merchandising: Merchandising, BSHS (p. 1560)
- Apparel Design and Production (ADP), Minor (p. 1555)
- Merchandising (MERC), Minor (p. 1562)
- Sustainable Design (SD), Minor (p. 1563)

Graduate Programs

The Department of Design, Housing and Merchandising offers graduate work leading to the Master of Science in Design, Housing and Merchandising and the Doctor of Philosophy in Human Sciences with an option in design, housing and merchandising. The programs are scientifically based research and/or design oriented. Graduate degrees in the department are tailored to departmental areas of expertise, professional goals of the candidate and College of Human Sciences and Graduate College requirements. Graduate programs may focus on either merchandising or design. Students may investigate design and merchandising from the following perspectives: product development and evaluation, consumer and supplier behavior, business development and management, and constructed environmental and individual interrelationships.

The Master of Science Degree

The Master of Science degree is awarded in four options—Apparel Design and Production, Interior Design, Merchandising, and Retail Merchandising Leadership (offered online through the Great Plains Interactive Distance Education Alliance)—and is designed to prepare individuals for careers in business, industry, extension and post-secondary or college teaching. The thesis plan (research or design) is available for students in apparel design and interior design. For merchandising master students, research thesis and non-thesis options are available. For retail merchandising leadership master students a non-thesis plan is required. Programs of study are built around the academic background, experience, needs, special interests and professional goals of the student. The selection of courses that meet departmental requirements is made in consultation with the advisory committee. A minimum of 21 credit hours must be taken in the department. Additional courses may be selected from other areas of human sciences or from supporting areas such as marketing, sociology, history and physiology. If the undergraduate degree is not in the area of specialization, specific undergraduate courses in design, housing and merchandising will be required as prerequisites. The newest offering is an accelerated MS degree for current students in Apparel Design and Production and Interior Design where students can earn the MS degree in one year beyond the BS degree.
The Doctor of Philosophy Degree

The PhD prepares individuals for research positions in universities, business and industry, for university teaching and for administrative or management level positions. The student will be expected to have a master’s degree or equivalent in design, housing and merchandising or in a closely-related area from a college or university of recognized standing. A student may be required to demonstrate competence in the area of specialization and in related areas, and further coursework may be required before admission will be granted.

The plan of study is individually determined for the student in cooperation with an advisory committee. Each plan of study will be an integrated combination of courses and research providing for specialization within an area of design and merchandising, including synthesis of knowledge drawn from departments within and outside of human sciences. Emphasis is on attainment of competencies rather than on the completion of specific numbers of credits; however, a minimum of 60 credit hours beyond the master’s degree must be completed. Each student will develop competence in the area of specialization which includes courses in the major and the support area. International and management dimensions are included.

The program includes a strong emphasis on research and application of statistical procedures, as well as having students gain experience in resource generation, knowledge-sharing and community engagement.

More detailed information on graduate study in the Department of Design, Housing and Merchandising can be obtained from the department website humansciences.okstate.edu/dhm (http://humansciences.okstate.edu/dhm) or by writing the head of the department.

Faculty

Jane Swinney, PhD—Associate Professor and Head
Gina Peek, PhD—Associate Professor and Associate Head
Professors: Jorge Atiles, PhD; Paulette Hebert, PhD; Mihyun Kang, PhD; Shiretta Ownbey, PhD
Associate Professors: Cosette Armstrong, PhD; Greg Clare, PhD; Semra Peksoz, PhD; Adriana Petrova, PhD
Assistant Professors: Tilanka Chandrasekera, PhD; Aditya Jayadas, PhD; June Park, PhD; Alana Pulay, PhD; Emily Roberts, PhD
Teaching Instructor: Diane Limbaugh, MS
Apparel Design and Production (ADP), Minor

Other Requirements

• Merchandising option must complete 19 credit hours in addition to the requirements for their option.

• Acceptance to the minor based upon an overall GPA of 2.0 if less than 31 hours completed; 2.25 if 31-45 hours completed; 2.50 if over 45 hours completed; Minimum of "C" required in all minor courses.

Additional OSU Requirements

Undergraduate Minors

• An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.

• A minimum of six credit hours for the minor must be earned in residence at OSU.

• The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).

• A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

Other Requirements

- 40 upper-division hours required.
- A 2.50 Major GPA is required. This includes all courses in College and Major Requirements.
- A 2.50 Major GPA is required for full admission to the Internship Program.
- Proficiency review required to take upper-level DHM Apparel Design courses.
- **Transfer Admission Requirements**: 2.00 for less than 31 hours; 2.25 for 31-45 hours; 2.50 for more than 45 hours.

Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
Requirements for Students Matriculating in or before Academic Year 2018-2019. Learn more about University Academic Regulation 3.1 (p. 812).

**Other Requirements**

- 40 upper-division hours required.
- A 2.50 Major GPA is required. This includes all courses in College and Major Requirements.
- A 2.50 Major GPA is required for full admission to the Internship Program.
- Transfer Admission Requirements: 2.00 for less than 31 hours; 2.25 for 31-45 hours; 2.50 for more than 45 hours and minimum grade of “C” in MATH 1483 Mathematical Functions and Their Uses (A) or MATH 1513 College Algebra (A).

**Additional State/OSU Requirements**

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
Merchandising (MERC), Minor

Requirements for Students Matriculating in or before Academic Year 2018-2019. Learn more about University Academic Regulation 3.1 (p. 812).

Other Requirements

- ADP option must complete 19 credit hours in addition to the requirements for their option.
- Acceptance to the minor based upon an overall GPA of 2.0 if less than 31 hours completed; 2.25 if 31-45 hours completed; 2.50 if over 45 hours completed.
- Minimum of "C" required in the prerequisite course ACCT 2003 Survey of Accounting.
- Minimum of "C" required in all minor courses.

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student's declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

Hospitality and Tourism Management

The mission of the School of Hospitality and Tourism Management (HTM) is to be a world leader in hospitality education through purposeful research, superior teaching and innovative experiential learning to enhance the lives of those we serve.

Our focus:

• High-quality academic foundation centered on a focused and relevant curriculum with the integration of research and engagement,
• Diverse experiential learning labs that are operated professionally and ethically using sound business principles,
• Student organizations which actively partner with national and international hospitality professional associations, and
• Signature events that provide experiential learning for students and bring together individuals and communities while supporting the land grant university mission.

Career opportunities include lodging and resort management, food and beverage management, conference and event planning management, club management and tourism development. Other opportunities include revenue management, hospitality training and development and hospitality-related entrepreneurial endeavors. Students have the opportunity to gain hands-on experience volunteering with student-led and other events such as: the Wine Forum of Oklahoma, the Distinguished Chef Scholarship Benefit Series, Craft Beer Forum of Oklahoma, Hospitality Days Career Fair, Hospitality Legal Summit and the Hotel Investment Conference.

A new educational facility opened fall 2016 which unites technology with state-of-the-art laboratories, classrooms, exhibit areas and faculty offices. Specific accommodations include: quantity food preparation areas with commercial equipment, dining room management and table service laboratory, quick service restaurant, basic food preparation laboratory, demonstration classroom and the Hirst Center for Beverage Education. The Hirst Center for Beverage Education promotes a curriculum at the forefront of beverage education featuring a variety of formats including coffees, teas and other beverages.

To meet the needs of the industry and provide sound academic preparation at the undergraduate level, the curriculum emphasizes professional and general education. The professional area includes courses in accounting, law, cost controls, revenue management and economics. Courses in service management, food and beverage production, purchasing and control, facility management and design, sales and marketing, front office management, and advanced hospitality and tourism management are also included in the specialized area. The BS degree with a major in hospitality and tourism management may be arranged globally in cooperation with industry executives and the OSU faculty. Study abroad programs and international internships are available.

Successful completion of 480 hours of industry work experience and a management internship of 320 hours are required. Internship placement is arranged globally in cooperation with industry executives and the OSU faculty. Study abroad programs and international internships are available.

Further information may be found at humansciences.okstate.edu/htm (https://humansciences.okstate.edu/htm).

Undergraduate Programs

• Hospitality and Tourism Management, BSHS (p. 1565)

Graduate Programs

The Master of Science Degree

Admission to the graduate program in Hospitality Administration is selective and is based on a variety of factors including undergraduate grade-point average, industry work experience, GRE/GMAT score, letters of recommendation and goals of the applicant. Prerequisite courses may be required for students with undergraduate degrees in areas other than hospitality or tourism administration. The master’s degree requires a minimum of 32 credit hours for the thesis plan or 32 credit hours for the professionally focused non-thesis plan.

Please visit our Future Graduate Student page for more information (https://humansciences.okstate.edu/htm/future-graduate-students).

The Doctor of Philosophy Degree

The PhD is awarded in Human Sciences with an option in Hospitality Administration. This program focuses on research and prepares researchers, educators and practitioners to make contributions to hospitality higher education and literature in the hospitality field. The doctoral program requires a minimum of 60 hours beyond the master’s degree or 63 hours if a thesis was not completed in the master’s program. The program includes a strong emphasis on research and application of statistical procedures, as well as having students gain experience in resource generation, knowledge sharing and community engagement.

A customized part-time doctoral degree program is also available for those students, especially educators, who would prefer to pursue their degree without maintaining full-time enrollment on campus.

Competitive graduate teaching and research assistantships, graduate fellowships and tuition waivers are available to qualified applicants.

More detailed information on graduate study in the School of Hospitality and Tourism Management can be obtained by visiting our website at https://humansciences.okstate.edu/htm/future-graduate-students/index.html.

**Other Requirements**

- 40 hours must be upper-division.
- Hospitality work experience of 480 hours required for no grade prior to internship.
- **Transfer Admission Requirement:** 2.00 GPA

**Additional State/OSU Requirements**

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.

- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
The Department of Human Development and Family Science (HDFS) is a premier academic program dedicated to the discovery, integration and application of knowledge to enhance the resilience of diverse individuals and relationships. The department prepares students to work with individuals, couples and families. The department’s primary focus is on integrative approaches to developing and maintaining individual and family resilience. The distinguishing feature of HDFS is the interdisciplinary and multidisciplinary integration of instruction, research and application between and among human development, family science, gerontology, early childhood education and marriage and family therapy.

Committed to enhancing the quality of life of individuals and families by maximizing resilience and reducing risk, the Department of Human Development and Family Science provides a dynamic environment for life-long learners through engagement in:

- instruction that fosters creative and critical thinking for individuals in their professional and personal lives;
- research that contributes to the discovery of knowledge and understanding of human development and family relationships; and
- application of knowledge that is responsive to and informed by constituents’ needs.

The department offers undergraduate students options in early childhood education (ECE), child and family services, and family and consumer sciences education. Each of these options emphasizes integration of theory, research, policy and practice.

Criteria for undergraduate students wishing to transfer into HDFS include a required minimum retention grade-point average.

The early childhood education (ECE) teacher certification option provides professional preparation for individuals to teach infants through third grade. This option provides a foundation in child development to prepare students to design, implement and evaluate developmentally appropriate curricula for young children.

An early childhood education (ECE) certificate is required to teach prekindergarten through third grade in Oklahoma public schools. All students completing the early childhood education option must meet Oklahoma State University and Oklahoma professional education requirements.

The child and family services (CFS) option prepares individuals for careers in providing services and leadership to children, youth, adults and their families. The course content focuses on individual development, family dynamics, family life education, policy, management, and professional skills in the context of the community. Career opportunities are in public and private social services agencies, policy and advocacy centers, and in business and industry.

The CFS option also provides education for individuals planning to continue their education in graduate programs, medical school, law school or other specialized graduate programs. The curriculum focuses on developing skills in critical thinking, scientific investigation, and written and oral communication. Students are prepared for advanced education in such areas as family therapy, child life, medicine, physical therapy, law and psychology. This option provides flexibility to accommodate the student’s particular area of interest or to meet prerequisites for a professional school.

The family and consumer sciences education (FACSED) option prepares individuals to provide comprehensive knowledge and skills that will help individuals, families and communities make informed, healthy, research-based and practical decisions to improve their well-being, society and the economy. Two paths are available for career preparation: one for Cooperative Extension Services and one for secondary school instruction. In both, FACSED students take specialized coursework in apparel design and production, family science, hospitality management, housing and interior design, human (including child) development, nutritional sciences, parenting, resource management, textiles and educator preparation so they are equipped to work in educational settings where they will have a significant impact on the lives of others.

A semester-long internship or student teaching experience during the senior year in an outstanding program completes the undergraduate university preparation. Upon graduation, students meet the employment requirements for the Oklahoma Cooperative Extension Service and/or the certification requirements for the Oklahoma State Department of Education, depending on which option was chosen. The job market remains strong for both careers in Oklahoma and throughout the nation.

The BS degree requires a minimum of 124 semester credit hours. Minors in child development, gerontology, and human services are also available in the department; information on requirements may be obtained from the HDFS department office or the Patricia Kain Knaub Center for Student Success. Articulation agreements between Oklahoma State University and Tulsa Community College and between Oklahoma State University and Northern Oklahoma College provide for a transition toward a baccalaureate degree in human development and family science.

Further information may be found at humansciences.okstate.edu/hdfs (http://humansciences.okstate.edu/hdfs).

Undergraduate Programs

- Early Child Care and Development, BSHS (p. 1572)
- Human Development and Family Science: Child and Family Services, BSHS (p. 1574)
- Human Development and Family Science: Early Childhood Education, BSHS (p. 1577)
- Human Development and Family Science: Family & Consumer Sciences Education, BSHS (p. 1579)
- Child Development (CHDV), Minor (p. 1571)
- Gerontology (GERO), Minor (p. 1573)
- Human Services (HSVC), Minor (p. 1581)

Graduate Programs

Graduate study in the Department of Human Development and Family Science (HDFS) is designed to prepare students in the creation, dissemination and application of knowledge focused on reducing risk and enhancing resilience within individuals and among families. HDFS offers graduate study leading to the Master of Science degree and Doctor of Philosophy degree. Graduate study in HDFS emphasizes the integration of theory, research and application to address key issues in risk and resilience. The MS options include Applied Human Services,
Developmental and Family Sciences, Early Childhood Education, Family and Community Services, Marriage and Family Therapy, and Gerontology. The PhD is offered in Human Sciences with an option in Human Development and Family Science. Students work with their advisers and advisory committees to develop flexible yet rigorous programs that meet degree requirements and professional competencies in the area of the specialization. Graduate programs in HDFS are central to departmental research. Faculty and students engage in the integration of theory and research to advance the development and application of knowledge to reduce risk and enhance resilience for individuals and families across cultures and generations.

HDFS has provided high quality graduate education programs for decades and has graduates in leadership positions across the state and nation in all areas of specialization. The department includes four centers/institutes that enhance student experiences in graduate study:

a. the Child Development Laboratory/Rise Program, licensed by the state of Oklahoma and the National Association for the Education of Young Children
b. the Center for Family Services, offering high quality marriage and family therapy to the public and a training environment for master's degree students who choose the Marriage and Family Therapy option;
c. the Gerontology Institute, focused on advancing the quality of life for aging populations through interdisciplinary programs of instruction, research and public service; and
d. the Center for Family Resilience focused on the promotion of resilience and reduction of risk among individuals, couples, and families across the lifespan in rural and urban areas of Oklahoma through multidisciplinary research, education and outreach.

**The Master of Science Degree**

The MS degree in Human Development and Family Science is awarded in six options. Applicants specify the option in which they are seeking the MS degree as part of the application process: Applied Human Services (available on both the Stillwater and Tulsa campuses), Developmental and Family Sciences (available on both the Stillwater and Tulsa campuses), Early Childhood Education (available on the Stillwater campus), Marriage and Family Therapy (COAMFTE Accredited; available on the Stillwater campus), Gerontology (offered on the Stillwater campus and online through the Great Plains Interactive Distance Education Alliance) or Family and Community Services (offered online through the Great Plains Interactive Distance Education Alliance).

Admission to the MS program is selective and requires the completion of a bachelor's degree in Human Development, Family Science, Child and Family Services, Early Childhood Education, or a related area. Admission decisions are based on a variety of criteria, including grade-point average (3.0 minimum grade-point average in undergraduate work), GRE scores (minimum scores of 150 for the verbal section, 147 for the quantitative section, and 3.5 for the analytical writing section are preferred for admission), TOEFL scores (required for students for whom English is a second language, 79 minimum), three letters of recommendation, statement of student goals, and a résumé or vita. Admission is available only for the fall semester in the Marriage and Family Therapy option. Applications are reviewed for the fall and spring (on a space available basis) in the other five options.

Students in each option take a minimum of 18 credit hours of department core courses designed to prepare them to integrate theory, research and application focused on reducing risk and enhancing resilience within individuals and among families across cultures and generations. Additional coursework (ranging from a minimum of 12 semester hours to a maximum of 44) in each option, approved by the adviser and student's advisory committee, is focused on integrating theory, research and application within the option. Three options (Early Childhood Education, Marriage and Family Therapy, and Gerontology) offer both a thesis and non-thesis option. The Developmental and Family Sciences option requires a thesis. The minimum number of semester hours required for each option is: Applied Human Services (33 semester hours for non-thesis plan), Early Childhood Education (30 semester hours for thesis plan or 32 for non-thesis plan), Developmental and Family Sciences (30 semester hours for thesis plan), Marriage and Family Therapy (63 semester hours), and Gerontology (39 semester hours for thesis plan; 36 semester hours for the non-thesis plan; and 36 semester hours for the online program through the Great Plains Interactive Distance Education Alliance). The Family and Community Services option offered online through the Great Plains Interactive Distance Education Alliance requires 36 hours in a non-thesis format.

Graduates of the Applied Human Services option provide leadership in diverse human services careers. Graduates (a) demonstrate an ability to describe, discuss and integrate theory, research and application to address key issues related to individual and family risk and resilience; (b) establish a solid theoretical foundation in Human Development and Family Science, and (c) gain experiences and establish competence related to professional issues in human services. Students select a specialization area based on career goals and interests.

The Early Childhood Education BS/MS option emphasizes child development as a foundation for the study and practice of professional education of children from birth through age eight. This program was designed for HDFS undergraduate students seeking both the BS and MS specializing in Early Childhood Education prior to entering the profession. The integrated program is designed to be completed in five years, including two summers, but the MS option is also open to graduates from other departments or universities. To help students gain a strong understanding of how theory and research inform classroom and professional practice, students take courses in history and theory, curriculum, issues and observation and assessment. Students also complete a field experience in early childhood education as part of the degree program.

This degree program prepares graduates for careers including: early childhood teacher educator; staff training and development; administration and evaluation; child, family and educational advocate; early childhood consultant; early childhood classroom teacher (requires teacher certification prior to the MS program). The Early Childhood Education dual BS/MS option is available only on the OSU-Stillwater campus.

The Developmental and Family Sciences option prepares students to describe, discuss and integrate theory, research and application focused on reducing risk and enhancing resilience. In consultation with their major advisers and advisory committees, students identify courses and experiences that focus on preparing for research-related careers and/or doctoral study. Coursework focuses on the integration of theory and research in human development and family science, research methods and statistics. Students complete a thesis and gain practical research experience. The Developmental and Family Sciences option is available on both the OSU-Stillwater and OSU-Tulsa campuses.

The Marriage and Family Therapy option is accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE) of the American Association for Marriage and Family Therapy. The
Marriage and Family Therapy option provides students with basic knowledge, clinical skills and a professional identity essential for entry level practice of marriage and family therapy. Students specializing in marriage and family therapy operate the Center for Family Services, an on-campus family therapy clinic. The MFT curriculum takes at least two and one-half years (including summers) to complete. The academic course work includes courses in systems theory, marriage and family therapy techniques, ethics and professionalism, and research. Course work provides a framework for the application of marriage and family therapy theory and research in clinical practice. In addition, all students are required to take at least 18 months of clinical practice. Graduation requirements include the completion of required coursework, a minimum of 500 client contact hours, and the completion of either a thesis or non-thesis plan. The Marriage and Family Therapy option is only available on the OSU-Stillwater campus.

The Gerontology option engages students in an in-depth study of adulthood, the aging process, needs of aging individuals and family caregivers, and services for aging populations. Students may complete the on-campus program (thesis or non-thesis) or the online master's program, a collaborative program of the Great Plains Interactive Distance Education Alliance (Great Plains IDEA).

More information on HDFS MS programs may be obtained from the HDFS department, on the web at humansciences.okstate.edu/hdfs (http://humansciences.okstate.edu/hdfs) or by e-mail: hdfs@okstate.edu (humansciences.hdfs@okstate.edu). For additional information on the online master's programs in Gerontology and Family and Community Services, visit the website at gpidea.okstate.edu (http://gpidea.okstate.edu).

The Doctor of Philosophy Degree

The PhD in Human Sciences with option in human development and family science (HDFS) is a research doctoral program designed to promote breadth, depth and integration of knowledge in HDFS through research collaborations. Doctoral students collaborate with faculty and other graduate students on research projects which integrate the theoretical and empirical knowledge base in HDFS and investigate key processes associated with risk and resilience. Upon graduation, doctoral students have the knowledge and experience to develop into leading scholars able to conduct high quality basic and applied research, to provide relevant instruction, develop effective interventions and contribute to the development of informed public policy that reduces risk and enhances resilience within individuals and among families across cultures and generations.

The PhD option in HDFS provides students with the opportunity to concentrate on one of the following disciplines: Human Development or Family Science. Students are admitted to the program to focus in a primary discipline in the department (human development or family science) and to take additional course work in a secondary discipline (human development is the secondary discipline for family science students and family science is the secondary discipline for students in human development).

PhD graduates are prepared to apply knowledge in human development and family science in a collaborative manner in diverse settings. To accomplish this goal, the program is designed around four primary themes: breadth (knowledge of substantive content across the two disciplines of human development and family science), depth (knowledge of substantive content within one discipline, either human development or family science), integration (knowledge synthesized to capitalize on the strengths of the disciplines of human development and family science) and experience (knowledge through involvement in research, instruction and a variety of applications associated with reducing risk and enhancing resilience of individuals and families).

To achieve breadth, depth and experience in the primary emphasis area and in the integration between human development and family science, students take courses and participate in individualized experiences, approved by their major adviser and doctoral advisory committee, that guide the student in mastering the forms (teaching, research and service) and functions (discovery of knowledge, integration of knowledge, application of knowledge and transmission of knowledge) of scholarship expected of doctoral graduates in HDFS.

Two options are available: 90-hour program for BS graduates and 60-hour program for MS graduates (with additional coursework possible for students with BS and MS degrees in other fields). Doctoral training includes participation in research throughout the doctoral program, a qualifying examination in statistics, and completion of portfolio documents designed to integrate knowledge from coursework and experiences and demonstrate attainment of doctoral competencies. Coursework includes a minimum of 15 semester hours in human development and family science content classes, 15 hours in human development and family science methods classes and research practica, 12 semester hours in research and statistics classes, three semester hours in human sciences and 15 hours of dissertation research. Students who did not complete a thesis for the master’s degree are required to complete a thesis equivalent project (beyond the 60 semester hour requirement).

Admission to the PhD program is selective and requires the completion of an MS in human development, family science or related field. Admission decisions are based on a variety of criteria including grade-point average (3.0 grade-point average in undergraduate work and 3.5 in prior graduate study preferred; 3.25 in previous graduate study required), GRE scores (minimum scores of 150 for the verbal section, 147 for the quantitative section, and 4.0 for the analytical writing section are preferred for admission), TOEFL scores (required for students for whom English is a second language, minimum score of 79 on the internet-based TOEFL), three letters of recommendation, a statement of student goals and a résumé.

More information on the PhD option in HDFS may be obtained from the HDFS department at humansciences.okstate.edu/hdfs (http://humansciences.okstate.edu/hdfs) or by e-mail: hdfs@okstate.edu (human.sciences.hdfs@okstate.edu).

Faculty

Sissy R. Osteen, PhD, CFP®—Associate Professor and Head
Assistant Department Head: Jarrod Nofftsger, MS
Regents Professor and Dean: Stephan Wilson, PhD
Regents Professors: Laura Hubbs-Tait, PhD; Jennifer Hays-Grudo, PhD
Regents Professor and George Kaiser Family Foundation Endowed Chair in Child Development: Amanda Morris, PhD
Professor and Endowed Professor in Parenting: Robert Larzelere, PhD
Professor and Bryan Close Professor: Amanda W. Harrist, PhD
Professor and Center of Family Resilience Director: Michael Merten, PhD
Professor and Graduate Coordinator: Karina Shreffler, PhD
Professors: Carolyn S. Henry, PhD; Christine Johnson, PhD
Associate Professor and Gerontology Program Coordinator: Alex Bishop, PhD
Associate Professor and Marriage & Family Therapy Program Coordinator: Matt Brosi, PhD
Associate Professor and George Kaiser Family Foundation Endowed Chair in Child and Family Resilience: Ron Cox, PhD
Associate Professor and George Kaiser Family Foundation Endowed Chair in Family and Community Policy: Michael Stout, PhD
Associate Professors: Lana Beasley, PhD; Michael Criss, PhD; Kami Gallus, PhD; Brandt Gardner, PhD; Charles Hendrix, PhD; Amy Williamson, PhD

Other Requirements

• 15 hours upper division with a 2.50 GPA.

Additional OSU Requirements

Undergraduate Minors

• An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
• A minimum of six credit hours for the minor must be earned in residence at OSU.
• The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
• A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

Health Professions (HP)
Pre-Professional/Pre-Health controlled electives. Check specific admission requirements at university/professional school of choice.

Individualized Plan (IP)
21 hours with a clearly articulated emphasis approved in writing by the HDFS department head or an OSU minor that supports the HDFS major and student’s career goals, as approved by an adviser. Note: a course required elsewhere on this degree sheet cannot be counted towards two requirements. With approval from adviser and department head, a maximum of 30 hours from an accredited doctoral law or health program may be used for up to 21 hours of electives. Up to 9 hours may be substituted for HDFS 2433 Relationship Development and Marriage (S), HDFS 4433 Family Life Education, and HDFS 4473 Policy, Law and Advocacy.

Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

Other Requirements
• 9 hours upper-division with 2.50 GPA.

Additional OSU Requirements

Undergraduate Minors
• An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
• A minimum of six credit hours for the minor must be earned in residence at OSU.
• The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
• A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).
Nutritional Sciences

The Department of Nutritional Sciences advances health and quality of life of individuals and communities and prepares professionals through discovery, education and application of scientific knowledge.

Graduates are prepared to apply nutrition knowledge in dietetic internships, healthcare professional schools, graduate programs and food and nutrition-related professions. Four degree options and a minor are offered through the department.

The human nutrition/premedical sciences option is ideal for students desiring greater depth in the physiological and biochemical sciences in preparation for medical and other professional schools, graduate study and research in human nutrition. It includes the prerequisites for admission to most medical, dental, optometry and pharmacy schools. The allied health option provides required coursework for most nursing schools, physician assistant programs, schools of physical and occupational therapy, dental hygiene and other health professions. The community nutrition option offers coursework for positions in nutrition education, wellness, school food service management and other areas as well as the prerequisites for the MS in Athletic Training. The dietetics option provides the coursework required to become a Registered Dietitian (see OSU Didactic Program in Dietetics below).

The mission of the OSU Didactic Program in Dietetics is to promote human health and quality of life by preparing students for future roles in dietetics and dietetics-related professions. The dietetics profession is diverse and dynamic, integrating human nutrition, food service administration, food science, chemistry, physiology, management and interpersonal skills. The dietetics option is the only option that includes the Didactic Program in Dietetics (DPD) coursework required to apply for competitive dietetic internships (DI). When students successfully complete the academic requirements (DPD) and supervised practice component (DI), they are eligible for the national Registration Examination for Dietitians administered by the Commission on Dietetic Registration (CDR) of the Academy of Nutrition and Dietetics (the Academy). Individuals who successfully complete the examination become Registered Dietitians/Nutritionists and are entitled to use the initials “RD” or “RDN” to signify professional competence. Many states, including Oklahoma, also require a license to practice dietetics in the state. Each state law varies in its scope. Didactic Program in Dietetics information and the DPD Student Handbook are found at humansciences.okstate.edu/dpd (https://humansciences.okstate.edu/nsci/undergraduate-students/dietetics-program-osu.html).

The Didactic Program in Dietetics is currently granted continuing accreditation by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics, 120 South Riverside Plaza, Suite 2000, Chicago, Illinois 60606-6995, 312.899.0040 ext. 5400.

Nutrition professionals work in a wide range of settings, in both the public and private sectors and assume an array of challenging responsibilities. Career opportunities for a registered/licensed dietitian include: health care dietitian and administrator, nutrition researcher, fitness/wellness consultant, public health nutritionist, school nutrition director, Cooperative Extension educator, entrepreneur in dietetic programs and services, and corporate dietitian/nutritionist. DPD Graduates who do not enter dietetic internships may work in related fields which do not require the RD credential such as school food service, Cooperative Extension, pharmaceutical or food sales, food service management and government programs; take the certified dietary manager (CDM) exam; or enter related graduate programs such as Master of Science in Public Health. Upon earning the DPD “verification statement,” students may take the CDR exam to become dietetic technicians, registered (DTR). University teaching and research in the field of nutrition and some specialized careers require advanced degrees or additional course work.

Admission Requirements

Transfer students must have earned a 2.5 retention GPA in order to be admitted to the NSCI undergraduate program.

Further information may be found at humansciences.okstate.edu/nsci (http://humansciences.okstate.edu/nsci).

Dietetic Internship

The dietetic internship (DI) at Oklahoma State University requires a bachelor's degree and prior completion of the DPD requirements for admission and meets the Academy's 1200-hour supervised practice requirement for registration eligibility. Its mission is to advance health and quality of life of individuals and communities by preparing dietetic professionals for competent practice through education, discovery and application of scientific knowledge. The internship provides experience in clinical, management, and community practice settings where interns develop entry-level practice competence. Entry into the dietetic internship is competitive, requiring an application to the OSU DI and NSCI Master's Degree and participation in the Academy of Nutrition and Dietetics computer matching or pre-selection process. All students admitted to the Dietetic Internship must earn the departmental Master of Science in nutritional sciences (nutrition option) or enter with at least an MS which is essentially equivalent to the NSCI MS (nutrition option).

The Dietetic Internship at OSU is currently granted continuing accreditation by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics, 120 South Riverside Plaza, Suite 2000, Chicago, Illinois 60606-6995, 312.899.0040 ext. 5400.

Dietetic Internship information is found at https://humansciences.okstate.edu/nsci/graduate-students/dietetic-internship.html.

• Nutritional Sciences: Human Nutrition/Pre-Medical Sciences, BSHS (p. 1591)
• Nutritional Sciences (NSCI), Minor (p. 1584)

Graduate Programs

The Department of Nutritional Sciences offers graduate study leading to a Master of Science degree in nutritional sciences and a Doctor of Philosophy degree in nutritional sciences. Graduate study in NSCI emphasizes the conduct and application of research to the field of human nutrition. Graduate students work with an adviser and advisory committee to develop flexible, yet rigorous programs of study and research that meet the degree requirements and each student’s professional goals within an area of specialization in the field.
The Master of Science Degree

The MS degree program is designed to develop research skills, stimulate independent thought and critical thinking, and provide up-to-date knowledge in a variety of areas of human nutrition. Admission to the MS graduate program is selective and is based on a variety of factors including the student’s grade-point average (overall and science GPA), Graduate Record Examination (GRE) scores, letters of recommendation and goal statement. The prerequisite for the MS program is a BS in nutritional sciences. Students with a BS degree in a subject area other than nutrition are required to have a minimum of 30 credit hours of undergraduate/graduate coursework related to nutritional sciences, including at least one course in biochemistry, one course in physiology and one upper-level nutrition course prior to full admission. Applicants who do not meet these requirements may be considered for conditional academic acceptance and required to take prerequisite courses and/or demonstrate academic ability.

Students in the MS program-nutrition option can choose one of two tracks: thesis or non-thesis. The MS degree with thesis requires a minimum of 30 credit hours, including six credit hours for thesis research (NSCI 5000 Master’s Thesis). Thesis research is conducted within the adviser’s area of interest and is approved by an advisory committee. The non-thesis MS degree requires a minimum of 34 credit hours with three credit hours of NSCI 5843 Non-thesis Graduate Capstone, including a comprehensive examination, a written research paper, and an oral presentation. The student’s plan of study and research is determined in consultation with his/her adviser and advisory committee.

An online Master of Science degree in nutritional sciences with an option in dietetics is also offered to Registered Dietitians (RD) or individuals who are RD eligible. OSU offers this degree program as a member of the Great Plains Interactive Distance Education Alliance (Great Plains IDEA) which provides the opportunity for Registered Dietitians to study with faculty from eight universities in the Alliance via Internet-based courses. The MS in Dietetics requires completion of 36 credit hours, including nine core credits, six OSU Nutritional Sciences Core credits, 18 elective credits and NSCI 5843 Non-thesis Graduate Capstone. A faculty adviser and the graduate committee from the Nutritional Sciences department must approve a student’s program of study. More detailed information can be found at: gpidea.okstate.edu (http://gpidea.okstate.edu).

The Doctor of Philosophy Degree

The PhD degree is awarded in nutritional sciences. Two programs are available: a 60-hour program for MS graduates and a 90-hour program for BS graduates. The focus of the program is to prepare individuals for careers in a variety of areas including higher education, industry, healthcare and governmental programs. Admission to the program is competitive and applicants are expected to provide evidence of exceptional academic ability and preparation, a statement of goals and letters of recommendation. Grade-point average in previous undergraduate, professional school and graduate coursework and Graduate Record Examination (GRE) scores are considered in the evaluation of the applicant. If a thesis was not required as a component of the applicant’s MS program, a thesis or equivalent must be completed in addition to the requirements for the doctoral degree. Prerequisite coursework for full admittance to the PhD program includes at least one graduate or undergraduate course in biochemistry and physiology, six credit hours at the graduate level in nutrition and three credit hours of statistics. Students with MS degrees in a subject area other than nutrition will also be required to have a minimum of 30 credit hours of undergraduate/graduate coursework related to nutritional sciences, including the prerequisite courses listed above. Applicants who do not meet these requirements may be considered for conditional acceptance and required to take additional prerequisite courses.

The PhD program includes a strong emphasis on research in areas ranging from basic molecular and cellular sciences to clinical and community applications. Students also gain experience in resource generation, knowledge sharing and community engagement. Each program of study is designed by the student under direction of his/her faculty adviser and advisory committee to develop the student’s competence in an area of specialization and research methodologies. Doctoral training includes 15-30 hours of dissertation research, a qualifying examination covering core nutrition knowledge, a comprehensive examination focused on the area of specialization and participation in research throughout the program.

More detailed information on graduate study in the Department of Nutritional Sciences can be obtained by writing the graduate coordinator, or accessing the website at humansciences.okstate.edu/nsci (http://humansciences.okstate.edu/nsci).

Faculty

Stephen L. Clarke, PhD, RD—Department Head and Professor
Regents Professor and Marilyn Thoma Chair: Barbara J. Stoecker, PhD, RD/LD, FAND
Regents Professor and John and Sue Taylor Endowed Professor and Associate Dean Graduate College: Brenda Smith, PhD
Professor and Graduate Coordinator: Gail Gates, PhD, RD, FAND
Professor and Jim and Lynne Williams Endowed Professor: Edralin Lucas, PhD
Professor: Janice Hermann, PhD, RD/LD
Associate Professor and Associate Department Head: Deana Hildebrand, PhD, RD/LD
Associate Professors: Barbara Brown, PhD, RD/LD; Tay Kennedy, PhD, RD/LD;
Assistant Professors: Winyoo Chowanadisai, PhD; Sam Emerson, PhD; Dingbo (Daniel)Lin, PhD; McKale Montgomery, PhD, RD; Jillian Joyce, PhD, RD
Teaching Assistant Professor: Lauren Amaya, PhD, RD/LD
Teaching Instructor: Michael Rhone, MS, RD
Teaching Assistant Professor and Director of Dietetic Internship: Gena Wollenberg, PhD, RD/LD
Director of Didactic Program in Dietetics and Assistant Director of Dietetic Internship: Catherine Palmer, MS, RD/LD
Instructors: Shannon Campbell, MS, RD; Embry Pollet, MS, RD
Associate Extension Specialist and CNEP Coordinator: Candance Gabel, MS, RD/LD
Assistant State Specialists and CNEP Nutritionist: Jenni Kinsey, MS, RD/LD; Diana Romano, MS, RD/LD, Jennie Till, MS, RD/LD
Visiting Assistant Professor: Shirley Evans, PhD, PA, RD/LD

Select one of the following (see advisor):

| CHEM 3015 | Survey of Organic Chemistry | 1 |
| CHEM 3053 | Organic Chemistry I | |
| & CHEM 3112 | Organic Chemistry Laboratory | |
| & CHEM 3153 | Organic Chemistry II (complete series) | |
| HHP 2802 | Medical Terminology for the Health Professions | 2 |
| HLTH 2603 | Total Wellness (S) | 3 |
| MICR 2123 | Introduction to Microbiology | 3 |
| MICR 2132 | Introduction to Microbiology Laboratory | 2 |
| UNIV 2511 | Introduction to Health Careers | 1 |
| 19-22 hours of controlled electives to total 72 hours of major requirements | |

| Hours Subtotal | 22 |

| Total Hours | 69 |

1 If a student takes CHEM 1215 Chemical Principles I (LN), one hour will count as a controlled elective. If student completes CHEM 3015 Survey of Organic Chemistry, he/she must take 22 hours of controlled electives. If student completes CHEM 3053 Organic Chemistry I, CHEM 3112 Organic Chemistry Laboratory and CHEM 3153 Organic Chemistry II, he/she must take 19 hours of controlled electives.

Consult admissions requirements for specific professional programs.

Ensure that enough upper-division controlled electives are taken to meet the 40 hour upper-division Regents requirement.

This degree program does not meet all the Didactic Program in Dietetics academic course requirements. See the NSCI Major/Dietetics Option sheet for courses to be added.
Other Requirements

- 40 upper-division hours required.
- A 2.50 Major GPA is required. This includes all courses in College/Departmental and Major Requirements.
- A grade of “C” or better is required in all NSCI 3000 and 4000-level courses.
- Transfer Admission Requirement: 2.50 GPA

Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

<tr>
<td>Select 26 hours of Controlled Electives working with adviser to identify courses which support the NSCI major and a clearly articulated career path. This may be accomplished by the addition of an OSU minor.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Career paths may include: Cooperative Extension, Food Sales, Public Policy, Communications and International Nutrition. Plan must be approved by department head.

Note: Care must be taken not to include credit hours twice under different sections of the degree sheet.

Ensure that enough upper-division controlled electives are taken to meet the 40 hour upper-division Regents requirement.

This degree program does not meet all the Didactic Program in Dietetics academic course requirements. See the NSCI Major/Dietetics Option sheet for courses to be added.

Other Requirements

- 40 upper-division hours required.
- A 2.50 Major GPA is required. This includes all courses in College/Departmental and Major Requirements.
- A grade of “C” or better is required in all NSCI 3000 and 4000-level courses.
- Transfer Admission Requirement: 2.50 GPA

Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

Students with AP or CLEP credit must talk to advisors.

One writing-intensive English course is recommended for medical school admission. Students are encouraged to select a course with (D,H) designation such as ENGL 2413 Conversations in Literature (DH).
This degree program meets pre-med requirements for Oklahoma medical schools. Consult the admissions requirements for medical schools of choice for additional prerequisites, such as calculus.

This degree program does not meet all the Didactic Program in Dietetics academic course requirements. See the NSCI Major/Dietetics Option sheet for courses to be added.

**Other Requirements**

- 40 upper-division hours required.
- A 2.50 Major GPA is required. This includes all courses in College/Departmental and Major Requirements.
- A grade of “C” or better is required in all NSCI 3000- and 4000-level courses.
- This degree sheet includes requirements for pre-medical, pre-dental and pre-optometry.
- Transfer Admission Requirement: 2.50 GPA.

**Additional State/OSU Requirements**

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
SCHOOL OF GLOBAL STUDIES AND PARTNERSHIPS

College Administration
Randy Kluver, PhD—Dean
Jami Fullerton, PhD—Director of Academic Programs

Campus Address and Phone
Address: 204 Wes Watkins Center, Stillwater, OK 74078
Phone: 405-744-6609
Email: i-study@okstate.edu
Website: http://global.okstate.edu

Mission
In keeping with OSU’s commitment as a land-grant institution, the School of Global Studies and Partnerships is committed to leading the university in both creating knowledge and sharing it with the global community.

Academic Programs
The School of Global Studies and Partnerships offers an interdisciplinary Master of Science degree in Global Studies and an undergraduate, interdisciplinary minor in International Studies.

The Master of Science degree in Global Studies is designed to prepare students to cope with international responsibilities and address world problems that confront individuals working in the public and private sectors around the world. The curriculum is designed to educate students in the challenges and issues facing local and global communities, with an emphasis on understanding the economic, political, environmental, social, and cultural contexts that drive contemporary society. This interdisciplinary structure allows our students to draw from the best courses that Oklahoma State University has to offer, as well as to develop globalized, multi-skilled talents that will influence the world in a variety of career paths.

The graduate program in global studies is designed to prepare students for internationally-oriented degrees in a number of professional contexts including business, trade development, cultural industries, nonprofit organizations, media, and public and international policy. The program at OSU emphasizes the real challenges that face developing and developed nations alike, and seeks to bring a global problem-solving perspective to address those challenges. Students have opportunities to participate in research or internships abroad, tailor coursework to meet their educational needs, and to gain skills necessary to compete and thrive in an ever-growing global society. Graduates of the program work in numerous industries around the world including business, non-profit organizations, or government service around the world.

There are two tracks within the program: thesis and non-thesis.

Thesis Track: 30 hours of coursework including 6 hours of thesis
Non-thesis Track: 33 hours of coursework

This interdisciplinary program allows students to choose from one of five focus areas. Additionally, students are required to take an introductory course (INTL 5013 – Contemporary Issues) and a graduate-level research course. Candidates for the master’s degree must also demonstrate foreign language proficiency and complete an international experience.

Depending on whether the student chooses the thesis or non-thesis track, the number of focus area courses will vary from 9-12 hours chosen from a list that are offered by departments across campus.

Focus Areas Include:

- International Business and Economic Relations
- International Trade and Development
- International Human Development, Society and Education
- Cultural Heritage and Tourism Development
- Preservation of Environmental and Ecological Resources

Iranian and Persian Gulf Studies
The IPGS unit offers seminars, visiting speakers, workshops, courses and other programs that allow OSU faculty and students to better understand Iran, its history, society and current challenges, and its relationship to the US and other nations. The IPGS also administers the Farzaneh Professorships in Iranian Studies, which allow OSU faculty to develop specific research areas related to Iran and its region.

Global Briefing Series
SGSP brings in noteworthy speakers from around the nation and the world to provide background and commentary on important global issues, whether economic, geopolitical, social or other. The speakers add significant international perspective for the OSU community, and allow students and faculty access to top global thought leaders and insight into trends that are facing the world.

Admissions
Application to the School of Global Studies Graduate Program is made through a central online application process (http://www.applyweb.com/apply/oksugrad) administered by the Oklahoma State University Graduate College.

The School of Global Studies has floating deadlines for Fall, Spring, and Summer semesters. The priority deadline is November 1st for Spring and April 1st for Fall. Applying by the priority deadline will allow applicants to receive priority consideration for graduate assistantships available for the term.

To apply, students must provide their transcripts, resume, statement of purpose and the names and email addresses for three people who can provide a recommendation for them. The School of Global Studies does not require students to take the GRE or GMAT for admission.

English Proficiency Requirement
The School of Global Studies does not have English proficiency requirements beyond those required by the OSU Graduate College (https://admissions.okstate.edu/information/international/admission-requirements.html).

Foreign Language Requirement
The foreign language requirement is designed to ensure that all students who graduate from the School of Global Studies Graduate Program have language skills to successfully embark upon global careers.

To fulfill the foreign language requirement, native speakers of English must have accomplished:

Website: http://www.applyweb.com/apply/oksugrad
1. Complete 9 semester hours of a second language or 3 semester hours of intermediate or advanced modern foreign language courses with a minimum grade of "C."

2. Obtain an intermediate level rating on the ACTFL Oral Proficiency Interview (OPI). For more information on the OPI, see the website at www.actfl.org (http://www.actfl.org).

This requirement must be completed prior to graduation from the School of Global Studies Graduate Program. Language courses may be completed at OSU or outside institutions during your time in the program. We also accept previous coursework in foreign language but may ask for proof of completion.

No waivers of foreign language requirement will be permitted, and any undergraduate hours of language courses cannot be counted toward the hours necessary to complete the master's degree.

International Experience Requirement
Students from the U.S. must have an international experience to qualify for the Master of Science in Global Studies degree. The time outside the U.S. must be a minimum of 3 weeks, involve a structured program of coursework or internship, and have occurred during the student's undergraduate or graduate programs. Due to the great variety of opportunities available, the international experience must be approved by the SGSP Director of Academic Programs.

Student Clubs and Honor Societies
Student Association of Global Affairs (SAGA)
Sigma Iota Rho Honor Society for International Studies
Phi Beta Delta Honor Society for International Scholars

Scholarships
The School of Global Studies Graduate Program offers six fellowships and scholarships to students every year. To apply, students will submit one application, which will consider them for all six scholarships and fellowships. Applications must be submitted to i-study@okstate.edu or in person to 204 Wes Watkins Center.

• The Lawrence L. Boger Distinguished Graduate Fellowship
• The Wes And Lou Watkins Distinguished Graduate Fellowship
• The Dr. James G. Hromas Distinguished Graduate Fellowship
• Hugh Rouk Fellowship
• Jud and Vera Milburn Fellowship
• Raymond Sidwell Family Endowment for International Outreach Scholarship

Undergraduate Minor in International Studies
The minor in international studies provides undergraduate students with the opportunity to include an international dimension to any academic major. This interdisciplinary minor offers flexible course selection outside of the major and encourages students to understand social, political, economic and cultural contrasts throughout the world. The minor is designed to give students a background in global studies to supplement their chosen career path. Students should contact their undergraduate adviser to declare the minor. The minor must be declared prior to the semester of graduation.
## International Studies (INTS), Minor

### International Experience

**Select 3 hours**

3

---

### Other Requirements

- Plus 6 hours of one foreign language or equivalent proficiency.
- GPA of 2.0 in U/D courses.

### Additional OSU Requirements

#### Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student's declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).
SPEARS SCHOOL OF BUSINESS

College Administration
Ken Eastman, PhD—Dean
Carol Johnson, PhD—Associate Dean
Marlys Mason, PhD—Associate Dean
Ramesh Sharda, PhD—Vice Dean

Campus Address and Phone
Address: 370 Business Building, Stillwater, OK 74078
Phone: 405-744-5064
Website: business.okstate.edu (http://spears.okstate.edu)

The Spears School of Business focuses on preparing students to make a difference in the world by teaching essential interpersonal skills alongside a high-quality business education backed by impactful research and outreach.

We live in a deeply interconnected world where business is personal while simultaneously more distant. In this world, companies rise and fall based on the strength and success of the relationships they forge.

Spears Business prepares our students for this world by having them live and learn in an environment where personal connections are paramount and academic excellence is strengthened by interpersonal prowess.

We take soft skills seriously. We study business collaboratively. We use technology to include and never to exclude. Community isn't just a byproduct of what we do. At Spears, we empower students to follow their own dreams, not the dream we have for them—because the purpose of business isn't just individual gain, but a gain for every individual.

With an emphasis on people and community, we ensure our students are just as real as they are ready. In a rapidly changing world, the only constant is people. This is why students choose Spears, why employers choose our graduates and why we make business personal.

Accreditation
The Spears School of Business (business.okstate.edu (http://spears.okstate.edu)) at Oklahoma State University is accredited by The Association to Advance Collegiate Schools of Business (AACSB International). All Spears programs are AACSB accredited with the exception of the M.S. in Economics and the PhD in Economics which do not come under the AACSB’s scope of review.

High School Preparation
Although a sound high school program is adequate preparation, prospective business students will benefit from a strong background in English and mathematics. Also, coursework in history and government, science, geography, computer science, foreign language and public speaking will be quite valuable.

Scholarships
Oklahoma State University has an extensive scholarship program which includes entering freshmen. For full consideration as a prospective student, applications should be sent to the OSU Office of Scholarships and Financial Aid by November 1 during one’s senior year in high school. Spears School of Business scholarships are primarily designated for sophomores, juniors and seniors. Scholarship awards are based on academic performance, participation, leadership and need, and applications must be received by mid-January.

Academic Advisement and Enrollment Procedure
The Business Student Success Center believes in a holistic approach to advising, beginning with prospective students that are interested in programs through Spears Business. After admission to OSU, each undergraduate student is assigned an academic counselor who is eager to help students create an academic plan of action, guide them toward university resources and serve as a mentor. The professional academic counselors are invested in each student’s collegiate life, as well as their success at OSU and beyond. The Business Student Success Center provides a link between the Spears Business and other university resources that are available to facilitate student success.

Academic Programs
Undergraduate Programs
The Bachelor of Science in Business Administration degree is offered by four departments and three schools. Departmental majors are listed below.

- Accounting, with a major in accounting.
- Economics and Legal Studies in Business, with majors in economics (with options in business economics and quantitative studies and pre-law) and general business (with an option in pre-law).
- Entrepreneurship, with a major in entrepreneurship.
- Finance, with a major in finance and an option in commercial bank management.
- Management, with a major in management and options in business sustainability, human resource management, non-profit management and sports management.
- Management Science and Information Systems, with a major in management information systems and options in data science and information assurance.
- Marketing and International Business, with majors in marketing and international business.

Additional information about the undergraduate programs in the Spears School of Business can be found on the Internet at https://business.okstate.edu/undergraduate/degrees.html.

Outstanding students in the Spears School of Business who meet the requirements of the Honors College may earn various honors designations while completing their undergraduate degree in this School. For more information, please refer to the Honors College (p. 1672) information in the Catalog.

Master’s Degree Programs
Two types of master’s degrees are available to students desiring to undertake advanced work in the business area, specialized master’s of science degrees and the interdisciplinary Master of Business Administration degree.

The Master of Business Administration degree allows concentrations in Accounting, Economics, Energy Business, Entrepreneurship, Global Marketing, Human Resource Management, Data Science, Information Assurance, Risk Management, Marketing Analytics, Business...
Sustainability and Non-profit Management. The following identifies where additional information about this degree can be found in the Catalog:

- The Master of Business Administration degree. See "Business Administration (https://business.okstate.edu/watson/mba)."

The Master of Science degree requires completion of a graduate major in accounting, economics, entrepreneurship, management information systems, business analytics, quantitative financial economics or information assurance. Most of our programs are offered on a full-time basis in Stillwater; and part-time in Tulsa as well as online. Please see specific program websites for details. The following identifies where additional information about these degrees can be found in the Catalog:

- Master of Science in Accounting degree. See "School of Accounting (p. 1653)."
- Master of Science in Business Analytics degree. See "School of Marketing and International Business (p. 1663)."
- Master of Science in Economics degree. See "Department of Economics and Legal Studies in Business (p. 1604)."
- Master of Science in Entrepreneurship degree. See "School of Entrepreneurship (p. 1657)."
- The Master of Science in Management Information Systems (MIS) degree. See "Department of Management Science and Information Systems (p. 1642)."
- Master of Science in Quantitative Financial Economics degree. See "Department of Finance (p. 1618)."
- Master of Science in Information Assurance degree. See "Department of Management Science and Information Systems (p. 1642)."

1 The Master of Science in Economics is not subject to AACSB accreditation.

Doctor of Philosophy Degree Programs

Graduate work toward the Doctor of Philosophy degree with a major in economics is offered in the Department of Economics and Legal Studies in Business. Graduate work toward the Doctor of Philosophy degree with a major in business administration is offered in the departments of Finance, Management, Management Science and Information Systems, the School of Accounting, the School of Entrepreneurship and the School of Marketing and International Business. The Spears School also offers a PhD in Business Administration that is tailored for executives.

Additional information about PhD programs can be found in the "Business Administration (p. 1601)" section as well as in the various departmental sections.

1 The PhD in Economics is not subject to AACSB accreditation.

The Eastin Center for Career Readiness

The Eastin Center for Career Readiness provides students with resources to build interpersonal skills and professionalism and ensure graduates are job ready. The center unites career readiness, career services and corporate engagement. Programs begin with the first-year experience by integrating career development projects and extend through the student’s time at OSU. The career consultants within Spears Business are certified Global Career Development Facilitators. The center also provides students with a direct link to OSU Career Services and showcases numerous resources across campus.

General Education Requirements

The minimum general education requirements are summarized as follows: not less than 40 semester hours, including six hours of English composition and 31 hours in the breadth areas. These include: six hours in American history and government, three hours in social and behavioral sciences, six hours in humanities, three hours in analytical and quantitative thought and seven hours in the area of natural sciences, with one of the hours in scientific investigation.

Students are also required to take a "diversity" (D) designated course. This may be met in any part of the student’s program, and thus does not necessarily add to the number of hours required. Diversity courses provide an understanding of the cultural context of relationships, issues and trends in a multicultural and diverse society related to such factors as culture, ethnicity, nationality, age, gender, sexual orientation, mental and physical characteristics, education, family values, religious and spiritual values, socioeconomic status and unique characteristics of individuals, couples, families, ethnic groups and communities.

An additional requirement is an "international dimension" (I). This also may be met in any part of the student’s program, and thus does not necessarily add to the number of hours required. The international dimension simply requires each student to learn about cultures and societies outside the United States. The scientific investigation requirement involves some kind of laboratory experience with student involvement. More details concerning these other requirements can be found in the next section, "Lower-division Requirements."

Lower-Division Requirement

Work in the freshman and sophomore years is planned in such a way as to give the student basic information in the general areas of the following:

1. behavioral and social sciences,
2. communications,
3. humanities and fine arts,
4. natural science and mathematics, and
5. business foundation courses.

The student may also select additional hours from courses in these areas, with the opportunity of achieving either further breadth or a certain degree of depth by concentrating these hours in a particular area of interest. As part of the student’s general education, one course must be selected that is identified as satisfying the international dimension (I) requirement and one must be selected to satisfy the diversity (D) requirement.

During the freshman and sophomore years, the student will complete courses in each of the following areas:

- Behavioral and social sciences: American history, three semester credit hours; American government, three hours; and three hours elected from courses identified by the University as satisfying social science (S) credit. MGMT 3013 and MKTG 3213, which are required courses for all business majors also carry a social science (S) designation.
- Humanities and fine arts: Six semester credit hours elected from courses identified by the University as satisfying humanities (H) credit.
- Natural science and mathematics: A minimum of 10-13 semester credit hours with the specific number of required hours in mathematics and natural science varying with the major chosen.
Specific requirements for each major are published by the University in the book Undergraduate Programs and Requirements.

- **Communications**: English composition, six semester credit hours. For non-business students, the University prerequisite for upper-division courses applies. (See "Academic Regulations (https://catalog.okstate.edu/university-academic-regulations)" in the Catalog.)
- **General electives**: In addition, the student may elect courses from any area except lower-division aerospace studies and military science and LEIS and HHP activity courses to complete degree requirements.

Credits earned during the freshman and sophomore years at a two-year college may not be substituted for junior and senior course requirements in majors in the Spears School of Business.

Spears Business Accreditation

Accreditation

The Spears School of Business (spears.okstate.edu (http://spears.okstate.edu)) at Oklahoma State University is accredited by The Association to Advance Collegiate Schools of Business (AACSB International). All Spears programs are AACSB-accredited with the exception of the M.S. in Economics and the PhD in Economics which do not come under the AACSB's scope of review.
Business Administration

Graduate Programs
The Master of Business Administration Degree
The Master of Business Administration program provides graduate professional education for individuals preparing for administrative careers in either the private or public sectors. It is a comprehensive yet flexible program providing the knowledge and analytical tools to cope with the complexities of management within diverse environments. There are a number of delivery options for the MBA: full-time, part-time and distance.

Full-Time MBA
The full-time MBA is a 45-credit-hour semi-lockstep program designed for individuals who want a cohort-based experience. Applicants must have earned a four-year undergraduate degree or equivalent from an accredited university and have competitive GPA and GMAT scores. Full-time students may choose between a general MBA and an in-depth specialization. Students choosing a general MBA are free to select 12 hours of electives in functional areas of business such as marketing, finance or management. Students seeking a more in-depth area of study may select from the following twelve options: Accounting, Business Sustainability, Data Science, Economics, Energy Business, Entrepreneurship, Global Marketing, Human Resource Management, Information Assurance, Marketing Analytics, Non-profit Management and Risk Management.

Part-Time MBA
The part-time MBA is a 42-credit-hour program designed for individuals who wish to enroll on a part-time basis. The self-paced program allows students to take classes as their schedules permit. Applicants must have earned a four-year undergraduate degree or equivalent from an accredited university and have competitive GPA and GMAT scores.

Online
The MBA part-time program can be completed through a distance-learning format. Distance learning is an ideal educational format for individuals seeking an alternative to the traditional on-campus classroom experience. Classes are delivered via video streaming on the Internet. Interaction with faculty and other students occurs through a web-based environment.

Regardless of the delivery option, admission is granted to those students whose potential for successful graduate study is clearly indicated by the undergraduate grade-point average, the score on the Graduate Management Admissions Test, letters of recommendation from three sources, past work experience, extracurricular and community activities and stated career goals.

The Doctor of Philosophy Degree
The PhD in business administration is an interdepartmental program in the Spears School of Business, including accounting, entrepreneurship, finance, management, management information systems/management science and marketing. The degree emphasizes flexibility to meet the particular needs and objectives of individual candidates. The program is designed to provide the highest degree of preparation for the individual student, enabling him or her to make significant professional contributions in research, teaching or business or governmental positions.

Requirements
Students select one major area of study from either accounting, entrepreneurship, finance, management, management information systems/management science or marketing, and two minor areas. The dissertation is usually written in the student’s major area. One of the minor areas must be taken in the Spears School of Business. The second minor may be taken from another department within the Spears School of Business or from a department outside the Spears School.

All candidates for the PhD degree in business administration are expected to have a basic competence in all the major functional areas of business administration—accounting, economics, finance, management, management information systems/management science and marketing. In addition, basic competence is expected in finite mathematics, calculus and statistics. Students who possess a recent master’s degree in business from a program accredited by the Association to Advance Collegiate Schools of Business (AACSB International) will generally have satisfied most of the basic competence requirements in these areas.

Administration
The program is administered by the dean of the Graduate College and the department in which the student enrolls with the assistance of a faculty advisory committee.

Major and Minor Areas
The candidate’s advisory committee is responsible for assisting in the development of a plan of study that assures competence in the major and minor areas and in economics and quantitative analysis. All PhD students in residence are required to do teaching or research on a half-time basis while earning the degree.

For additional information about the PhD see the respective departments.
Certificates

Undergraduate Certificates

- International Competency (INTC) (p. 1603)
International Competency (INTC), Undergraduate Certificate

Total Hours: 15-30 Hours

This certificate provides students from any college or major with an opportunity for depth in a specific international region. All applicable courses that count toward the certificate, with the exception of the "International College Courses" area, MUST be specific to a single country or region. For approved requirement sheets, see the program contacts.

International College Courses: Complete three hours of upper-division coursework from the approved list for the certificate. This course will address general international issues within a discipline rather than within a specific region or country.

International Experience: Complete three hours of coursework that has a required travel component within the specified country or region.

General Education: Complete nine hours of approved Humanities (H) or Social and Behavioral Sciences (S) from the approved certificate list that focus on the specified country or region.

Language Proficiency: Demonstrate language proficiency in the primary language of the specified country or region by completing one of the following:

- Fifteen (15) hours of the appropriate foreign language sequence with a "C" or better in each course;
- Five (5) hours of intermediate or advanced coursework in the appropriate foreign language that requires at least the same competency level as completion of the first fifteen hours of the regular language sequence; or
- Pass an approved Oklahoma State University examination that demonstrates at least the same competency level as completion of the first fifteen hours of the regular language sequence.

For detailed and latest information on this program, please contact one of the following:

- School of International Studies, 107 Wes Watkins Center, 405-744-6606
- Dr. Marlys Mason, m.mason@okstate.edu, 201 Business, 405-744-5064
Economics and Legal Studies in Business

Economics is a social science concerned with behavior of individuals, governments, firms and nations when confronted with scarcity imposed on mankind by the physical world. The discipline is based on a simple set of principles that are used to model decision-making in a wide variety of other fields of study. Economic principles are used to analyze and predict the both intended and unintended consequences of human action. Economics provides a comprehensive view of how a society is organized to transform the limited resources available into want-satisfying goods and services. It investigates the principles underlying the operation of the economic system and seeks to determine its weaknesses and to prescribe policy measures that will improve its operation. In the process, it ranges over a host of the most important problems confronting contemporary society—the causes of and remedies for economic depression and inflation, the determinants of and methods for improving income distribution, poverty problems and welfare measures, the role of the government in economic activity, the requisites for economic growth and development, pollution and congestion and their control.

The primary objectives sought in the undergraduate curriculum are to develop a broad understanding and perspective of the economic aspects of people’s activities coupled with thorough training in the fundamental tools of economic analyses. Toward these ends, the development of elementary mathematical and statistical skills is highly desirable, as is complementary study in the social and behavioral sciences, accounting and business administration.

A major in economics prepares students for positions with business firms, non-profit private organizations and national or international government agencies. A degree option in business economics and quantitative studies is offered to provide additional training in analytical methods and communication skills for both public- and private-sector occupations. The undergraduate degree in economics also provides an excellent background for studying law or international relations and, to this end, there is a pre-law option and an international economic relations option. A student interested in pursuing graduate studies in economics should include a wide range of math courses in their undergraduate curriculum.

General Business

The general business program gives students a broad, comprehensive type of business education preparing them to enter employment in a wide range of administrative positions in private business, government or non-profit organizations. The scope of their educational experience enables these graduates to assume management positions in organizations of varying sizes and ranges of operations.

Students majoring in general business will take general education or foundation course work in behavioral and social sciences, communications, humanities and fine arts, natural science, mathematics and statistics, as well as business foundation courses in accounting, business communications, business law, economics, finance, management information systems, management and marketing.

This major, which provides for a high degree of individual student choice, includes required upper-division coursework beyond the business core in each of the business disciplines as well as substantial work in business or business-related courses, selected by the student in consultation with his or her major adviser. A pre-law option is offered.

Graduate Programs

The department offers work leading to the Master of Science degree and the Doctor of Philosophy degree. The graduate program in economics prepares economists for academic careers as well as research and administrative positions in business and government agencies.

Graduate fields of specialization include regional and urban economics, international economics and economic development. In addition, graduate courses are offered in energy economics and econometrics.

The initial admission to a graduate program is determined by the graduate studies committee on the basis of the applicant’s previous academic record; verbal, quantitative and analytical scores of the Graduate Record Examination and three letters of recommendation.

The Master of Science Degree

Admission to the master’s program in economics is granted to college graduates with superior academic records. Students must have an undergraduate economics degree, be well grounded in economic theory, and have an excellent mathematical background. A total of 30-33 graduate credit hours are required to earn an MS in economics.

Each graduate student is guided in the preparation of a plan of study by the graduate adviser. At the master’s level, there are two options. One provides the student with a well-rounded program that does not specialize in a particular area of economics. The second option is applied economics, which stresses communication skills, quantitative analysis and coursework from other disciplines related to a career objective. The candidate for the master’s degree is required to show competence in basic economic theory and statistical methods, together with an understanding of the fundamental institutional operations of the United States economy.

A research report or thesis is required of all students who take only the MS degree. A foreign language is not required.

The Doctor of Philosophy Degree

Admission to the doctoral program in economics is granted to college graduates who have superior academic records. A total of 64 graduate credit hours are required to earn a PhD in economics.
The PhD program stresses balanced preparation in economic theory, mathematics and statistics, as well as competence in subject-area fields of specialization. The student is required to pass qualifying examinations in the theory core and in one field of specialization. (The theory core is not considered a field of specialization.) Competence must be demonstrated in a second field of specialization through coursework. The graduate adviser helps the student develop a plan of study to achieve these objectives. A foreign language is not required.

A dissertation based upon original research is required of the candidate for a PhD degree in economics. The final oral examination is the dissertation defense.

1. Our PhD in Economics is not subject to AACSB accreditation because many Economics programs reside and are administered in colleges of arts and sciences.

Faculty

Lee C. Adkins, PhD—Professor and Head
Regents Professor: Dan S. Rickman, PhD
Professors: Kevin Currier, PhD; Jim Fain, PhD; Harounan Kazianga, PhD; Jaebeom Kim, PhD;
Associate Professors: Mehtabul Azam, PhD; Mary N. Gade, PhD; Bidisha Lahiri, PhD; Laurie A. Lucas, JD; Geoffrey P.G. Pivateau, JD;
Assistant Professors: Laura Ahlstrom, PhD; John Holden, PhD; Kimberly Houser, JD; Karen Maguire, PhD; Michael Schuster, JD; Wenyi Shen, PhD
Clinical Faculty: Michael D. Morris, PhD
Other Faculty: Bill McLean, PhD; Tara Urich, JD, Hongbo Wang, PhD
Economics (ECBU), Minor

Business Student Success Center, 155 Business Building, 405-744-2772

Minimum Overall Grade Point Average: 2.00
Total Hours: 27 hours

For minors requiring 27 hours, 18 of the 27 hours must be taken in residence at OSU, and 6 of the 9 hours for the Specific Minor Area must be taken in residence at OSU. Students with majors outside of the SSB may find that some courses will have additional prerequisites. For minors with various required hours, please see specific minor.

Other Requirements

• Must have a 2.0 in the 15 hours of required economics courses.

Additional OSU Requirements

Undergraduate Minors

• An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.

• A minimum of six credit hours for the minor must be earned in residence at OSU.

• The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).

• A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

<th>Hours</th>
</tr>
</thead>
</table>
| Additional State/OSU Requirements

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 and 50% of the upper-division hours in the major field completed at OSU.

- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
• Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.

• Degrees that follow this plan must be completed by the end of Summer 2024.

1 Courses also meet College and Departmental Requirements and cannot be waived with an Associate’s degree.  
2 MGMT 3013 Fundamentals of Management (S) and MKTG 3213 Marketing (S) are common body requirements, but are counted in general education requirements.
Other Requirements
1. A minimum of 50 percent of the business hours required for a degree must be in residence at OSU.
2. Forty-five hours of upper division courses required.

Additional State/OSU Requirements
- **At least**: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 and 50% of the upper-division hours in the major field completed at OSU.
- **Limit of**: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
General Business Administration (GNBU), Minor

Requirements for Students Matriculating in or before Academic Year 2018-2019. Learn more about University Academic Regulation 3.1 (p. 812).

Business Student Success Center, 155 Business Building, 405-744-2772

Minimum Overall Grade Point Average: 2.00
Total Hours: 27 hours

For minors requiring 27 hours, 18 of the 27 hours must be taken in residence at OSU, and 6 of the 9 hours for the Specific Minor Area must be taken in residence at OSU. Students with majors outside of the SSB may find that some courses will have additional prerequisites. For minors with various required hours, please see specific minor.

**Additional OSU Requirements**

**Undergraduate Minors**

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

- Degrees that follow this plan must be completed by the end of Summer 2024.
Finance

Financial executives are of central importance to the overall planning, control and success of an organization. There are financial implications in virtually all organizational decisions, whether the organization is a business firm, a non-profit organization or a government. With each new innovation in the field of finance the importance of finance for all organizations has grown. Every decision-maker must have sufficient knowledge of finance to determine the financial implications of their decisions.

Finance has evolved from a descriptive discipline in the early 1900s to the analytical discipline we find today. Finance theoreticians use fundamental economic theory to develop valuation models and the tools of financial analysis and risk management that are used by finance practitioners to make financial decisions. Finance consists of three interrelated core areas: financial markets and institutions, investments and portfolio theory, and managerial (business) finance. Subsets of these core areas include personal finance, real estate finance, international finance, the management of financial institutions, insurance, energy finance, entrepreneurial finance, derivative securities, and risk management.

The primary objective of the undergraduate finance curriculum is to produce graduates who have a broad understanding of the financial aspects of their decisions and actions and who are capable of utilizing the fundamental tools of financial analysis. Toward these ends, the development of elementary mathematical and statistical skills and the study of economics, accounting and business administration are needed to accomplish the objective. The major in finance prepares students for positions that require special understanding of financial analysis, financial management and financial systems in a wide variety of organizations.

A career in financial management can begin in one of several positions that may lead to a major executive position, including chief executive officer. Initial positions in the managerial finance area include capital budgeting analyst, cash manager, credit analyst, financial analyst (who works closely with accountants), and risk manager. Alternatively, finance majors may choose to enter the financial services industries. Finance majors could enter the workforce in the banking industry as a loan officer or as a member of the trust department; in the securities industry as a securities analyst, as an investment banker, as a stockbroker or account executive, or as a financial planner; and in the insurance industry as an agent or underwriter.

Undergraduate Programs

- Finance: Two Options, BSBA (p. 1622)
- Energy Finance (EFIN), Minor (p. 1620)
- Finance (FIN), Minor (p. 1621)

Graduate Programs

Concentrations in finance are offered through the Master of Business Administration, Master of Science in Quantitative Financial Economics and Doctor of Philosophy degrees.

The Master of Science in Quantitative Financial Economics (MSQFE) Degree

(See “Business Administration (p. 1601).”)

The Master of Science in Quantitative Financial Economics Degree. The discipline of quantitative finance has evolved tremendously in recent years, spurred by business and financial institution demand for quantitative skills. Oklahoma State University offers a Master of Science Degree in Quantitative Financial Economics (MSQFE) to meet this demand. The objective of the MSQFE is to produce graduates with mathematical, statistical and financial-modeling skills necessary to support advanced financial and economic decision-making.

The MSQFE is a Spears School of Business degree program that draws on the combined expertise of five OSU departments—Finance, Economics, Mathematics, Statistics and Agricultural Economics. The program is designed to produce graduates with the skills necessary to participate in critical decision making processes at all levels of the organization. The program focuses on the analytical methods necessary for effective participation in the fields of investment management, risk management and financial engineering. Significant coursework is devoted to the development of mathematical and statistical skills. These skills are necessary to evaluate the uncertain outcomes found in financial decision-making. The program provides students the opportunity to apply their knowledge and skills to projects that utilize quantitative financial tools and techniques. The MSQFE program seeks to develop student competencies in risk evaluation methods, empirical estimation techniques, valuation theory and techniques, mathematical solution methods, capital budgeting, demand analysis and risk management.

The MSQFE is a 33 credit-hour program. The core 24 hours consists of classes required of all students in the program. Students may elect to complete a master’s thesis. This option would reduce the number of elective hours from nine to three.

The admission requirements include an earned undergraduate degree from a college or university of recognized standards. In addition to the Oklahoma State University Graduate College’s standard requirements, the program’s Curriculum Committee will consider the applicant’s letters of recommendation, GMAT or GRE score, previous academic performance and financial/statistical modeling experience. The background necessary to complete the program with only 33 hours of coursework includes ten hours of calculus, differential equations, statistical methods, intermediate microeconomics and principles of finance.

Additional information about the program is available on the Internet at http://watson.okstate.edu/msqfe/.

The Doctor of Philosophy Degree

A PhD in business administration with concentration in finance prepares the student for careers in academia, business or government.

The program is designed to meet the needs and objectives of individual students but all students will seek an in-depth understanding of the theoretical foundations of financial economics, and develop research competency and teaching skills. The small class size provides a supportive environment conducive to the exchange of ideas and the development of new insights by both faculty and students.

Students will select finance as their major area of study. Two areas of concentration are also to be selected. As support for the major field of
study, each student is required to attain graduate-level competence in economic theory and quantitative methods.

Prerequisites for admission to the program are appropriate basic courses in accounting, calculus, statistics and econometrics.

Competence in planning and executing research is demonstrated by a dissertation. In addition, each candidate must pass comprehensive qualifying examinations and a final oral examination on the dissertation itself.

Outstanding students with degrees in any field of study may apply. Applications for admission are evaluated on the basis of the following:

1. undergraduate and graduate grade-point averages,
2. score on the Graduate Management Admissions Test (GMAT),
3. a two- or three-page statement describing goals and academic interests,
4. at least three letters of recommendation,
5. evidence of research potential and
6. a personal interview when feasible.

It is the applicant’s responsibility to see that all materials related to these criteria are received by the Department of Finance. Additional information about the program is available on the internet at Watson.okstate.edu/financephd/ (http://Watson.okstate.edu/financephd).

**Additional OSU Requirements**

**Undergraduate Minors**

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

**Other Requirements**

1. A minimum of 50 percent of the business hours required for a degree must be in residence at OSU.
2. Forty-five hours of upper division courses required.

**Additional State/OSU Requirements**

- **At least:** 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 and 50% of the upper-division hours in the major field completed at OSU.
- **Limit of:** one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.

- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
Management

The purpose of organizations is to channel the efforts of individuals to accomplish goals working together in a meaningful way to realize success in business or in solving pressing social problems requiring skilled managers.

The field of management is concerned with applying social, psychological and economic theories of human behavior to the real-world problems of designing organizations leading and motivating employees, planning effective courses of action and efficiently allocating resources. Since the field of management deals with real-world problems, students should have an interest in acquiring a deep understanding of human behavior and applying this knowledge in a variety of different contexts to create value for themselves and others.

The Department of Management offers an undergraduate major in management with options in human resource management (HRM), sports management, business sustainability and nonprofit management. The department also offers graduate studies leading to an MBA degree or a PhD degree. The disciplines spanned by these degrees offer dynamic, exciting career possibilities to students at all levels.

Management

Undergraduate students should look forward to both intellectual growth and the development of management skills that are in high demand in today's competitive business world.

The Management major, as well as the four optional specializations, are concerned with the analytical process and the application of decision tools and relevant theory to creative problem solving. While the topics vary from one option to another, the common thread running through the Management major is the rational process of managing organizations, solving problems and accomplishing goals.

The major in management offers dynamic, exciting possibilities for study and employment by preparing students for leadership positions in all types of organizations. Some examples of topics include leadership, strategic management, planning courses of action, organizational behavior, resource allocation and administration. Students with degrees in management are employed by organizations of all types and sizes as managers or staff specialists. The major has flexibility so that the student may include coursework from any of the other business disciplines. The management major is a good choice for those interested in for profit leadership roles in business, non-profit and public sector organizations.

Option in Human Resource Management

Students in the human resource management option study topics pertaining to the management and well-being of an organization’s workforce, including compensation administration, forecasting demand for personnel, labor relations and collective bargaining, recruitment and selection, and training and development. This option is designed to prepare students for careers in human resource management or for careers that facilitate the attainment of a competitive advantage through human capital. A career as an HRM professional offers many opportunities for career satisfaction and personal development.

Option in Sports Management

The sports industry is a growing segment of our economy. Whether it is at the amateur, college, minor league or professional level, sports organizations are in need of graduates with business savvy. Sports enterprises are becoming increasingly concerned with their “bottom line,” and they need employees who have business skills as well as expertise in the sports industry. The sports industry includes amateur, college, minor league and professional level sports organizations and is an industry that is growing in importance in our economy and society. Our sports management program is one of the few in the country that is housed within a business management department, so we offer our students the opportunity to gain important business management skills while learning about the unique nature of sports organizations.

Option in Business Sustainability

A sustainable enterprise is built around the triple bottom line imperative of protecting and enhancing the current and long-term future of the organization, the quality of life of the people impacted by the organization, and the health of the natural environment. There is a growing need for individuals with training in sustainable enterprise, and the job opportunities for well-trained undergraduates are increasing. The Business Sustainability option prepares students for this growing and exciting field with extra class work in business ethics, corporate social responsibility and sustainable business practices.

Option in Nonprofit Management

The nonprofit sector plays an important part in our society and in our economy; providing services and experiences for citizens that are unmet by government or the private sector, or can be delivered in a different way. Many students volunteer in the nonprofit sector and will continue to do so after graduation. As the sector matures, expectations of professionalism and business knowledge have increased. Students in the nonprofit management program will gain skills and knowledge about the nonprofit sector and organizations that will prepare them to enter the sector as professionals or board members at a critical time—as the Baby Boomer generation that has been leading in this sector retires. Topics include differences between the for-profit and nonprofit sectors in regards to generating revenue, managing a blended workforce of paid staff and volunteers, public image, accountability and measures of success.

Certificates
• Sustainable Business Management (SBM), Undergraduate Certificate (p. 1641)

Graduate Programs
The Department of Management offers work leading to the Master of Business Administration and the Doctor of Philosophy in business administration degrees.

The Master of Business Administration (MBA) Degree
(See “Business Administration (p. 1601).”)

Graduate Certificates
Certificate in Nonprofit Management
A growing number of executives in non-profits are recognizing the need to incorporate contemporary management skills into their organizations. This certificate is designed to highlight management practices used in traditional businesses that can also be applied in the nonprofit context and explore the important interface between for-profit businesses and nonprofit organizations.

This certificate is aimed at working professionals who typically join organizations at entry to mid-level management positions without prior business management education. The certificate offers a range of courses that will examine how to apply business practices in nonprofit organizations. Those seeking the graduate certificate will complete 6 hours of required coursework and select another 6 hours of coursework that best fits their situation.

Certificate in Sustainable Business
A sustainable enterprise is built around the triple bottom line imperative of protecting and enhancing the current and long-term future of the organization, the quality of life of the people impacted by the organization, and the health of the planet. A combination of factors has made a focus on sustainability no longer an option for organizations—whether public, private, or governmental. First, from a cost perspective, managers must recognize that their actions (whether proactive or inactive) that negatively impact people (e.g., its shareholders, employees, customers, communities) can lead to lawsuits. Similarly, by reducing the waste that harms the planet, organizations can minimize costs. Second, from a revenue perspective, the development of green products can provide a competitive advantage in the marketplace. Third, from an ethical perspective, it is simply the right thing to do to protect the planet as well as present and future generations of people from the negative externalities of an organization’s actions. We are building these ideas into both our undergraduate and graduate management programs.

This certificate is aimed at working professionals and offers a range of courses that will examine how to apply business practices to sustainability practices in business. Those seeking the graduate certificate will complete 6 hours of required coursework and select another 6 hours of coursework that best fits their situation.

The Doctor of Philosophy Degree
The PhD in business administration program administered through the Department of Management prepares students for a career in university research and teaching. The program is flexible and individually structured to meet the needs and objectives of the candidate. Emphasis is placed on understanding the psychological, social and economic foundations of business administration and developing the analytical skills to publish research in the management specialties of organizational behavior, human resources and strategic management.

PhD students in management concentrate in either organizational behavior or strategic management and pursue two minors. At least one of the minor areas must be taken in the Spears School of Business. As support for the major and minor fields of study, each student is required to attain graduate-level competence in quantitative research methods.

As prerequisites to the program, all candidates must have completed appropriate basic courses in calculus and statistics. In addition, candidates are expected to have a basic competence in the major functional areas of business—accounting, finance, management, management information systems, management science and marketing. Competence in the functional areas is usually demonstrated through the completion of appropriate graduate courses in each area through a program accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Competence in planning and executing research must be demonstrated in a dissertation. In addition, each candidate must pass a series of comprehensive qualifying examinations, both written and oral, and a separate, final oral examination of the dissertation itself. To enhance teaching skills, all PhD students in residence are required to teach on a quarter-time or half-time basis for at least one semester while earning the degree.

Outstanding students with master’s degrees in any field of study are encouraged to apply. The application for admission to the program is evaluated on the basis of the following:

1. undergraduate and graduate grade-point averages,
2. the score on the Graduate Management Admissions Test,
3. a two- or three-page statement describing research interests,
4. three letters of recommendation,
5. evidence of research potential, and
6. a personal interview when feasible.

It is the responsibility of each applicant to ensure that all material related to the above criteria is received by the department.

Faculty
James M. Pappas, PhD—Associate Professor and Head
Professors: Federico Aime, PhD; Thomas H. Stone, PhD
Associate Professors: Raj Basu, PhD; W. Matthew Bowler, PhD; Bryan D. Edwards, PhD; Lisa Schurer Lambert, PhD; Chalmer E. Labig, Jr., PhD; Andrew L. Urich, JD

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).
Human Resource Management (HRM), Minor

Requirements for Students Matriculating in or before Academic Year 2018-2019. Learn more about University Academic Regulation 3.1 (p. 812).

Business Student Success Center, 155 Business Building, 405-744-2772

Minimum Overall Grade Point Average: 2.00
Total Hours: 16 hours

For minors requiring 27 hours, 18 of the 27 hours must be taken in residence at OSU, and 6 of the 9 hours for the Specific Minor Area must be taken in residence at OSU. Students with majors outside of the SSB may find that some courses will have additional prerequisites. For minors with various required hours, please see specific minor.

1. Courses also meet College and Departmental Requirements and cannot be waived with an Associate’s degree.
2. MGMT 3013 Fundamentals of Management (S) and MKTG 3213 Marketing (S) are common body requirements, but are counted in general education requirements.

Other Requirements
1. A minimum of 50 percent of the business hours required for a degree must be in residence at OSU.
2. Forty-five hours of upper division courses required.

Additional State/OSU Requirements
- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 and 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
• Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.

• Degrees that follow this plan must be completed by the end of Summer 2024.

- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 and 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence, 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
Management: Non-Profit Management, BSBA

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student's declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

Special courses: Students may receive 3-6 credits from Sustainability study in Costa Rica at Universidad de Earth and other Travel Abroad Sustainability courses (as approved by faculty).

For detailed and latest information on this program, please contact Dr. James Pappas, Spears School of Business, 321 Business, 405-744-7729.
Management Science and Information Systems

Emerging technologies continue to dramatically alter the way business and life is conducted. Those who wish to have a leading role in developing and implementing next generation information systems should consider a career in management information systems, including the sub-fields of data science and information assurance/cybersecurity. The need for knowledgeable workers with expertise in these information systems driven areas will continue to increase at substantial rates for the foreseeable future.

The Department of Management Science and Information Systems offers an undergraduate major in management information systems (MIS) with possible options of data science and information assurance (IA). It also offers graduate studies leading to master’s degrees in information assurance (MSIA) and management information systems (MIS). Also, PhD degrees in business administration with an option in MIS, information assurance, management science and operations management can be earned.

Undergraduate degrees in MIS require a common foundation of work in disciplines such as mathematics, statistics, behavioral sciences and communications. A second tier of required work consists of the courses required for all Spears School of Business students such as economics, marketing, accounting and management. The third tier of classes are core MIS courses that develop information technology, data science and cybersecurity expertise in students.

Management Information Systems (MIS)
The MIS degree focuses on the business applications of information technology. This includes emphasizing necessary skills required in the analysis, development, evaluation and implementation of various information and communication technologies critical for today’s global organizations. The integration of information technology throughout all aspects of business coupled with the critical need for responsive information systems has created a strong demand for graduates with expertise in information systems and business administration.

Once MIS students satisfy the first two tiers of requirements mentioned above, they will focus on specialized courses in areas such as systems analysis and design, web and mobile app development, database design and management, data science techniques and applications, data communications and cybersecurity, among other relevant areas.

Data Science
The data science option allows developing aptitudes in quantitative tools that are especially critical in today’s data-driven organization. Additional course work in statistics, and descriptive, predictive and prescriptive analytics is possible with a Data Science option.

Information Assurance
The Information Assurance option uses the expertise in the department that led OSU to be named a National Center of Academic Excellence in Information Assurance Education and Research by the NSA and the Department of Homeland Security. This option provides students with in-depth study and hands-on analysis of critical organizational issues in information assurance and cybersecurity.

Undergraduate Programs
- Management Information Systems, BSBA (p. 1647)
- Management Information Systems: Data Science, BSBA (p. 1649)
- Management Information Systems: Information Assurance, BSBA (p. 1651)
- Data Science (DS), Minor (p. 1644)
- Information Assurance (IA), Minor (p. 1645)
- Management Information Systems (MIS), Minor (p. 1646)

Graduate Programs
The Department of Management Science and Information Systems offers courses that lead to the completion of the Master of Business Administration (MBA), the Master of Science in information assurance (MSIA), the Master of Science in management information systems (MIS) and the Doctor of Philosophy in business administration (PhD).

The Master of Business Administration (MBA) Degree
(See "Business Administration (MBA) Degree"

The Master of Science in Information Assurance (MSIA) Degree
In response to industry’s need for skilled and knowledgeable cybersecurity graduates, Oklahoma State University offers a Master of Science degree in information assurance. This program is offered not only through traditional means to on-campus students but also via distance learning technologies to students at remote locations.

This program prepares graduates for managing the security aspects of today’s global firms, developing policies, procedures and technical expertise to protect their data assets. The graduates of this program are likely to be employed by providers or users of information assurance.

Information Assurance Curriculum
The program curriculum consists of 32-33 credit hours, including eight core courses and three electives. Students may choose either a part-time or full-time sequence. Full-time students can complete the program in one and one-half years while part-time students may complete it in two years.

MSIA degree candidates have the opportunity to develop broad knowledge in specific elective areas chosen to best fit their career aspirations.

Admission Requirements
Qualified graduates of colleges and universities of recognized standards are eligible to seek admission to the OSU Graduate College. Applicants must submit the completed application form to the Graduate College with official transcripts of all academic work and degrees received.

In addition to the OSU Graduate College’s standard requirements, the information assurance program admissions committee will consider students’ letters of recommendation, GMAT or GRE scores, previous academic performance and telecommunications experience.
Information about the program is available on the Internet at https://watson.okstate.edu/msia/.

The Master of Science in Management Information Systems (MIS) Degree

This degree program combines strong theoretical concepts with intense hands-on instruction, helping graduates not only to understand business processes and the concepts behind the information systems they work with, but also develop, modify, use and protect these rapidly-changing computing systems through their technical expertise.

The MS in MIS is a 33-34 hour program featuring a core of 25 hours (24 for part-time), including a business practicum, plus two options to highlight different interest areas: data science and application development. These options afford the student opportunities to focus on descriptive, predictive and prescriptive analytics as well as software design and implementation.

Admission requirements for the MS in MIS are similar to the admission requirements for the other master’s programs in the Spears School of Business. Information about the program is available on the Internet at http://mis-analytics.okstate.edu.

Certificate in Health Analytics

There is a dire need for professionals with practical knowledge and skills in health analytics—ones who can convert large data repositories into actionable insight for better decisions to enhance effectiveness and efficiency in the ever more complex and highly competitive health care domain. OSU’s internationally ranked MS in MIS program has collaborated with the Center of Health Sciences’ MS in Health Care Administration (HCA) program and the Center of Health Systems Integration (CHSI) research center focused on the intersection of health, healthcare, informatics and analytics/data sciences to create a new, unique interdisciplinary program—a Certificate in Health Analytics.

The program requires taking four courses (each three credit hours, totaling 12 credit hours) of coursework. This certificate program allows for the courses to double-count toward a master’s degree and this certificate degree.

The Doctor of Philosophy (PhD) Degree

The PhD in business administration program administered through the Department of Management Science and Information Systems provides intensive study in management information systems, management science, operations management and telecommunications management. It prepares the student for significant professional contributions in university teaching and research.

The program is flexible and individually structured to meet the needs and objectives of the candidate. Emphasis is placed on understanding the analytical and theoretical foundations of business administration, applications in the depth area of specialization and development of research capabilities in the discipline.

As prerequisites to the program, all candidates are to have completed appropriate basic courses in calculus and statistics. Likewise, candidates are expected to have a basic competence in the major functional areas of business—accounting, finance, management, management information systems, management science and marketing. Competence in the functional areas is usually attained by documenting that the student has recently completed the appropriate graduate courses in each area through a program accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Competence in planning and executing research must be demonstrated in a dissertation. In addition, each candidate must pass a series of comprehensive qualifying examinations, written and oral, and a separate, final oral examination of the dissertation. To enhance teaching skills, all PhD students in residence are required to teach on a quarter-time or half-time basis for at least one semester while earning the degree.

Outstanding students with master’s degrees in any field of study may apply. The application for admission to the program is evaluated on the basis of the following:

1. undergraduate and graduate grade-point averages,
2. the score on the Graduate Management Admissions Test,
3. a two- or three-page statement describing goals and academic interests,
4. three letters of recommendation,
5. evidence of research potential, and
6. a personal interview when feasible.

It is the responsibility of each applicant to ensure that all material related to the above criteria is received by the department.

Faculty

Rick L. Wilson, PhD—Professor and Head

Regents Professors: Dursen Delen, PhD; Ramesh Sharda, PhD

Professors: Ali Amiri, PhD; Nik Dalal, PhD; Jeretta H. Nord, EdD; Rathindra Sarathy, PhD; Mark Weiser, PhD

Associate Professors: David P. Biros, PhD; Jin Kyu Lee, PhD

Assistant Professors: Corey Baham, PhD; Bryan I. Hammer, PhD; Taha Havakhor, PhD; Andy Luse, PhD; Jason Nichols, PhD; Obi Ogbanufe, PhD

Clinical Faculty: James Burkman, PhD; Fletcher Glancy, PhD
Data Science (DS), Minor

Requirements for Students Matriculating in or before Academic Year 2018-2019. Learn more about University Academic Regulation 3.1 (p. 812).

Business Student Success Center, 155 Business Building, 405-744-2772

Minimum Overall Grade Point Average: 2.00
Total Hours: 15 hours

For minors requiring 27 hours, 18 of the 27 hours must be taken in residence at OSU, and 6 of the 9 hours for the Specific Minor Area must be taken in residence at OSU. Students with majors outside of the SSB may find that some courses will have additional prerequisites. For minors with various required hours, please see specific minor.

Other Requirements

• 12 of the 15 hours must be in residence at OSU.

Additional OSU Requirements

Undergraduate Minors

• An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
• A minimum of six credit hours for the minor must be earned in residence at OSU.
• The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
• A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

**Hours Subtotal**: 66

**Electives**

Select 11 hours

May be selected from any upper- or lower-division area except activity courses in LEIS and PE and lower-division AERO and MLSC. Twelve credit hours earned in advanced AERO and MLSC, exclusive of credit earned for summer camp, may be included in the 120 hours.

**Hours Subtotal**: 11

**Total Hours**: 120

1. Courses also meet College and Departmental Requirements and cannot be waived with an Associate's degree.

2. MGMT 3013 Fundamentals of Management (S) and MKTG 3213 Marketing (S) are common body requirements, but are counted in general education requirements.

**Other Requirements**

1. A minimum of 50 percent of the business hours required for a degree must be in residence at OSU.

2. Forty-five hours of upper division courses required.

**Additional State/OSU Requirements**

- **At least**: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 and 50% of the upper-division hours in the major field completed at OSU.

- **Limit of**: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence, 8 transfer correspondence hours.

- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.

- Degrees that follow this plan must be completed by the end of Summer 2024.

Hours Subtotal  66

Electives
Select 11 hours

May be selected from any upper- or lower-division area except activity courses in LEIS and PE and lower-division AERO and MLSC. Twelve credit hours earned in advanced AERO and MLSC, exclusive of credit earned for summer camp, may be included in the 120 hours.

Hours Subtotal  11

Total Hours 120

1 Courses also meet College and Departmental Requirements and cannot be waived with an Associate's degree.
2 MGMT 3013 Fundamentals of Management (S) and MKTG 3213 Marketing (S) are common body requirements, but are counted in general education requirements.

Other Requirements
1. A minimum of 50 percent of the business hours required for a degree must be in residence at OSU.
2. Forty-five hours of upper division courses required.

Additional State/OSU Requirements

• At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 and 50% of the upper-division hours in the major field completed at OSU.
• Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
• Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
• Degrees that follow this plan must be completed by the end of Summer 2024.

- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
School of Accounting

The School of Accounting offers three degree programs in accounting:

1. BS in Business Administration with a major in accounting,
2. MS in accounting, and
3. PhD in business administration with emphasis in accounting.

The common objective of the BS and MS in accounting programs is to educate students to commence and continue to develop in a wide range of professional accounting careers. The specific objective of the BS in accounting program is to provide basic conceptual and business knowledge as a foundation for accounting career development; the objective of the MS in accounting is to provide candidates with a greater breadth and depth in accounting than is possible in the BS program, and to prepare graduates for careers as professional accountants in financial institutions, industry, non-business organizations and public practice.

Students who are considering a professional accounting career should have above-average aptitudes in mathematics and English, disciplined work habits, an interest in working with people and an attitude of service.

Students who have the objective of sitting for the Uniform CPA Examination as an Oklahoma candidate must have a BS degree and are required to complete 150 semester hours consisting of 76 upper-division hours, 30 hours of accounting above introductory accounting (including 3 hours of external auditing), and nine upper-division hours from other business-related areas. The Professional Program in Accounting (PPA) is especially designed to enable students to become CPA-eligible. The PPA allows students to complete the requirement of 150 hours of education and receive a BS and MS in accounting. The MS in accounting earned at Oklahoma State University satisfies educational requirements for CPA candidates in most jurisdictions of the United States.

Accreditation

The School of Accounting is fully accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Undergraduate Programs

- Accounting, BSBA (p. 1655)
- Accounting (ACCT), Minor (p. 1654)

Graduate Programs

The Master of Science in Accounting Degree

The specific objective of the MS in accounting is to provide candidates with a greater breadth and depth in accounting than is possible in the BS program, to prepare graduates for careers as professional accountants in financial institutions, industry, non-business organizations and public practice, and to develop judgmental ability in accounting and related areas. Advanced courses provide a theoretical base for insight into significant problems confronting the accounting profession. The candidate receives assistance from the faculty in selecting a pattern of courses designed to prepare the student according to the chosen professional goals.

Graduates of recognized colleges and universities whose records indicate adequate intellectual capacity and desirable personal characteristics may qualify for admission. Minimum admission standards are a GMAT score of 550, an undergraduate grade-point average in accounting of 3.25, and an overall grade-point average of 3.0.

The Doctor of Philosophy Degree

The PhD in the Spears School of Business with a major in accounting emphasizes flexibility to meet the particular needs and objectives of individual candidates. The program is designed to provide the highest degree of preparation for the individual student, enabling the student to make significant professional contributions in research, teaching or business or government positions.

Graduates of recognized colleges and universities whose records indicate adequate intellectual capacity and desirable personal characteristics may qualify if they have a good academic record and achieve satisfactory scores on the GMAT. Admission is very competitive.

The PhD program is designed so that a candidate may, at his or her option, specialize in one of the following accounting areas: auditing, managerial accounting, financial accounting, accounting systems or taxation. All candidates are required to take a series of seminars that provide an overview of relevant academic literature. These seminars are restricted to PhD candidates. Two minor areas, one of which may be outside the Spears School of Business, are required, in addition to competence in economics and quantitative analysis. The candidate’s advisory committee is responsible for assisting in the development of a plan of study encompassing the above areas. Students in residence are required to do teaching or research on a half-time basis while earning the degree.

Faculty

Audrey A. Gramling, PhD, CPA, CIA—Professor and Head
Associate Professors: Carol B. Johnson, PhD, CFE; Brad Lawson, PhD, CPA; Teresa Lightner, PhD, CPA; Sandeep Nabar, PhD; William C. Schwartz, PhD, CPA; Angela Wheeler Spencer, PhD, CPA
Assistant Professors: Matt Bjornsen, PhD, CPA; Bryan Brockbank, PhD; Leah Muriel, PhD, CPA, CIA; Jaclyn Prentice, PhD, CPA; Craig A. Sisneros, PhD, CPA; Scott White, PhD, CPA
Professors of Practice: Rachel Cox, MS, CPA; Eddy R. Ditzler, MS, CPA; Rachel Domnick, MS, CPA; Melanie Harvey, MS, CPA; Sarah Johnson, MS, CPA; Alyssa Vowell, MBA, CPA
### Accounting (ACCT), Minor

**Requirements for Students Matriculating in or before Academic Year 2018-2019.** Learn more about University Academic Regulation 3.1 (p. 812).

**Business Student Success Center**, 155 Business Building, 405-744-2772

**Minimum Overall Grade Point Average:** 2.00  
**Total Hours:** 27 hours

For minors requiring 27 hours, 18 of the 27 hours must be taken in residence at OSU, and 6 of the 9 hours for the Specific Minor Area must be taken in residence at OSU. Students with majors outside of the SSB may find that some courses will have additional prerequisites. For minors with various required hours, please see specific minor.

</tr>
</tbody>
</table>

**Other Requirements**

- "C" or better in each accounting course, 9 of the 15 required accounting hours must be completed at OSU.

**Additional OSU Requirements**

### Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive, of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student's declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).

MSIS 4273  Legal and Ethical Issues in Information Systems
MKTG 4773  Services Marketing
STAT 3013  Intermediate Statistical Analysis

Hours Subtotal  72

Electives
Select 5 hours  5

May be selected from any upper- or lower-division area except activity courses in LEIS and PE and lower-division AERO and MLSC. Twelve credit hours earned in advanced AERO and MLSC, exclusive of credit earned for summer camp, may be included in the 120 hours.

Hours Subtotal  5

Total Hours  120

1 Courses also meet College and Departmental Requirements and cannot be waived with an Associate's degree.
2 MGMT 3013 Fundamentals of Management (S) and MKTG 3213 Marketing (S) are common body requirements, but are counted in general education requirements.

Other Requirements
1. A minimum of 50 percent of the business hours required for a degree must be in residence at OSU.
2. Forty-five hours of upper division courses required.

Additional State/OSU Requirements
- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 and 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this Academic Year 2018-2019 plan must be completed by the end of Summer 2024.
School of Entrepreneurship

The 21st century is the age of entrepreneurship. It is a time of dynamic change where organizations must be faster, more adaptable and flexible, more aggressive and more innovative in order to survive. The program in entrepreneurship helps prepare students for the entrepreneurial age. Students are encouraged to recognize and develop their innate entrepreneurial potential, and to apply an entrepreneurial mindset to both their professional and personal lives. The program emphasizes the role of entrepreneurial attitudes and behaviors in a wide variety of contexts, including new start-up ventures, growth-oriented small firms, family firms, non-profit entities and public sector organizations. Students are further encouraged to apply entrepreneurial thinking and acting within other disciplines, from architecture and engineering to social work and theatre.

Entrepreneurship is approached as opportunity-driven behavior. It is a process where individuals put resources together in new and novel ways to create value. The value created can be for customers in conventional markets, or it can be social value created for the community. The program centers on helping students develop competencies that will enable them to be more entrepreneurial in a wide variety of contexts. Eleven core competencies are emphasized, including recognizing opportunity, assessing opportunity, mastering your creativity, leveraging resources, guerrilla skills, mitigating and managing risk, planning when nothing exists, innovation-developing ideas that work, building and managing social networks, the ability to maintain focus yet adapt, and implementation of something novel or new. A leading-edge entrepreneurship curriculum is built around these competencies.

As a field of study, entrepreneurship helps students see themselves as agents of change and better equips them to implement creative solutions to emerging opportunities in literally any organizational context. To foster these abilities, the program places considerable emphasis on experiential learning. Innovative experiential opportunities are built into each of the entrepreneurship courses at the undergraduate and master’s levels. In addition, the School manages an incubator, where students can start ventures, a campus-wide business Pitch & Poster Competition and other student engagement initiatives.

In addition to graduate offerings, the program offers an undergraduate major and minor in entrepreneurship as well as a cross-campus program involving the integration of entrepreneurship into other disciplines (e.g., engineering, art, psychology). More information about entrepreneurship at OSU can be found at entrepreneurship.okstate.edu.

Undergraduate Programs

- Entrepreneurship, BSBA (p. 1661)
- Creativity Studies (CRST), Minor (p. 1659)
- Entrepreneurship (EEE), Minor (p. 1660)

Graduate Programs

The School of Entrepreneurship offers work leading to the Master of Science in Entrepreneurship degree, including both a residency and online program. In addition, concentration in Entrepreneurship is offered as part of the Master of Business Administration. A PhD in business administration with concentration in entrepreneurship is available to prepare students for careers in academia.

The Master of Business Administration (MBA) Degree with Entrepreneurship Concentration

(See “Business Administration (p. 1601)”)

Master’s in Entrepreneurship

The Master’s in Entrepreneurship (MSE) provides a rigorous immersion into the nature of entrepreneurship and the entrepreneurial process. Core content is coupled with a strong commitment to experiential learning. Students are provided the opportunity to start a venture while in the program. The program is a component of the university-wide entrepreneurship emphasis at Oklahoma State University. It is targeted to students with a passion for entrepreneurship in for-profit, non-profit and public sector contexts.

The master’s program consists of 33 credit hours of coursework and can be completed in one calendar year. The application for admission to the program requires:

1. Bachelor’s degree,
2. Proposal for a venture,
3. GMAT,
4. Entrepreneurial and other work experience (recommended but not required), and
5. Three letters of recommendation.

Based on this review, a personal interview is arranged with selected candidates and then a final acceptance decision is made. Applicants are responsible for ensuring all relevant materials are submitted to the School prior to deadlines. An online version of the program is also available.

The Doctor of Philosophy Degree

The PhD in business administration with concentration in entrepreneurship is primarily focused on producing scholars who will be thought leaders in the discipline of entrepreneurship. The program prepares students primarily for careers in academia. Coordinated by the School of Entrepreneurship, students are given an intense exposure to theory and research methods.

The doctoral program involves sixty credit hours beyond the master’s degree, of which approximately forty-two hours are coursework, depending upon the student’s background, the remaining hours are associated with dissertation work. It is a four-year program, with two years devoted to coursework, followed by comprehensive exams and a dissertation proposal, and then the writing and defending of the dissertation. Students complete fifteen hours of core doctoral seminars in entrepreneurship and management, twelve hours of statistics and research methods courses, nine hours of doctoral or equivalent hours in a minor field, and six hours of approved doctoral-level or equivalent electives. Students typically minor in such fields as psychology, sociology, anthropology, public policy or finance.

Doctoral students are expected to publish while in the program, and also to teach entrepreneurship courses. Faculty mentors work closely with students on research projects while they are in the program, initially involving the student in ongoing research projects, and ultimately working on projects initiated by the student. Students are expected to develop and refine their research interests over the first two years of the program, culminating in the identification of a dissertation topic. The
School of Entrepreneurship, with a world-class cadre of entrepreneurship researchers, is well-positioned to support a wide range of topical areas that fit the student’s interests.

Outstanding individuals with master’s degrees in any field of study may apply. The application for admission to the program is evaluated based on the following:

1. undergraduate and graduate grade-point averages,
2. the student’s score on the Graduate Management Admission Test (GMAT),
3. a two- to three-page statement describing career goals, academic interests and research questions that intrigue the applicant,
4. three letters of recommendation, and
5. evidence of research potential.

Based on this review, a personal interview is arranged with selected candidates, and then a final acceptance decision is made. Applicants are responsible for ensuring all relevant materials are submitted to the School prior to deadlines.

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student's declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

For additional information on requirements on minors, click here (https://stw.sp.okstate.edu/policies/Shared%20Documents/Requirements%20for%20Undergraduate%20and%20Graduate%20Minors.pdf).

- **At least**: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 and 50% of the upper-division hours in the major field completed at OSU.

- **Limit of**: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.

- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.

- Degrees that follow this plan must be completed by the end of Summer 2024.
School of Marketing and International Business

The School of Marketing and International Business provides two quite significant majors within the Spears School of Business. One of these is marketing. This is an exciting field of study leading to a variety of job opportunities both in the private sector and in not-for-profit organizations. Also, it provides an excellent career path to top management within an organization.

The second major provided by the department is international business. Almost every business has international operations or is affected by events, competitors and conditions in the global economy. This opens career opportunities in the field and prepares one for successful management within the domestic economy.

Marketing

Marketing is concerned with the identification of wants and needs by buyers and the development of products, distribution channels, price and communication methods to satisfy those wants and needs. The buyers may be individuals or organizations, and their buying may include products or services. Since the economic system is dependent on the ability of organizations to match resources with marketplace needs, marketing is gaining in prominence every year.

A marketing graduate will likely be involved in performance and management of many traditional areas of decision-making—sales, advertising, logistics and marketing research. In addition, one frequently assists in product planning, developing marketing information systems and general management. Since these tasks are necessary for all types of organizations, employers of marketing graduates include manufacturers, banks, hospitals, retailers and not-for-profit organizations.

The effective marketing manager must possess a perspective and capability that reflect a three-dimensional program of study:

1. a liberal education in the sciences, humanities, behavioral and social sciences, mathematics and communications;
2. an adequate knowledge of the major functional areas of business and
3. a high-level competency in marketing.

One's liberal education is emphasized during the freshman and sophomore years. The study of the functional areas of business begins in the sophomore year and continues into the junior year. During the junior and senior years, the focus is on marketing. In addition to the introductory course that provides an overview of the field of marketing, the student takes courses in areas such as consumer behavior, promotion, sales management, services marketing, electronic commerce, marketing research, channels and international marketing. While studying marketing, one typically selects courses in other fields such as international business, management, information systems, finance, advertising and public relations to support a particular career choice within the marketing field.

Certificate in Customer – Employee Interaction

Interactions between frontline employees and their customers form the building blocks from which businesses are made. Many undergraduate students join organizations at entry-level positions where the focus is on customer-related activities, including sales, retail and customer service. Such training will benefit not only students who upon graduation begin careers in retailing, sales or customer service, but also those who will eventually practice law, medicine or own their own business where successfully managing customer interactions forms the foundation for success.

The certificate offers a range of courses to give specialized training on effective customer interaction. All required coursework fits within the structure of the marketing undergraduate degree program. Those seeking the certificate will complete 9 hours of required coursework and select another 6 hours of coursework that best fit their particular interests.

International Business

The international business degree is a cross-disciplinary program of study that provides a solid, broad-based foundation of business coupled with the flexibility to tailor the program to the individual students’ specific interests. International business majors can choose to focus on specific areas or regions of the world by including geography, history or political science courses complemented by study of a foreign language important in that region. International Business majors can also increase their knowledge and abilities of a specific business discipline by adding a business minor. For international business students, the world truly is their oyster.

Many international business majors are interested in taking advantage of the opportunities afforded by Oklahoma State University to either study abroad or take an international internship. The Cagle Center is the Spear’s School of Business’ launching pad for taking short-term, faculty-led study abroad trips to exciting locations such as China, England, France, Greece and many other locales. OSU’s study abroad office, located in the Union, is a great place to get information about all of the long-term study opportunities available. What will surprise you is the amount of financial assistance for which you can apply. When you stop by the Cagle Center or the OSU study abroad office, make sure to ask about scholarship and grant programs that can make your dreams come true.

To earn an international business degree, you will complete 120 hours of undergraduate coursework. In addition to foundational coursework in accounting, economics, finance, management, management information systems and marketing, you will have the opportunity to take 15 hours of upper-division, internationally-focused business courses. See the degree requirements for the international business major for more information.

Undergraduate Programs

Certificates

• Customer Interface Excellence (CIE), Undergraduate Certificate (p. 1666)

Graduate Programs

The School of Marketing and International Business offers work leading to the Master of Business Administration, the Master of Business Analytics and the Doctor of Philosophy in business administration.
degrees. In addition, the School of Marketing and International Business offers work leading to Graduate Certificate in Business Data Mining and Graduate Certificate in Marketing Analytics.

The Master of Business Administration (MBA) Degree
See "Business Administration (p. 1601)."

The Master of Science in Business Analytics Degree
This is an interdisciplinary program that offers hands-on application of data analysis along with a unique blend of coursework in Analytics, Marketing, Statistics, Business, MIS and Industrial Engineering. The structure of the curriculum has been carefully designed in consultation with our advisory board companies to balance the need of understanding quantitative approaches, statistical modeling and machine-learning algorithms along with data visualization and exploration, interpretation of results and the ability to apply these results for solving business problems.

The MS in Business Analytics is a 37-hour program featuring a core of 25 hours (18 for part time), including a business practicum. The 12 hours of electives allow students to specialize in areas such as business, statistics, information science or industrial engineering. In addition to the MS in Business Analytics degree, students in this program may also receive the following three certificates depending on elective courses taken, credentials achieved and so on: SAS® and OSU Data Mining Certificate (core level), SAS® and OSU Predictive Analytics Certificate (advanced level) and SAS® and OSU Marketing Data Science Certificate (expert level).

Admission requirements for the MS in Business Analytics are similar to the admission requirements for the other master’s programs in the Spears School of Business. Information about the program is available on the Internet at http://analytics.okstate.edu/msba/.

The Doctor of Philosophy Degree
The PhD in business administration program through the School of Marketing and International Business provides intensive study in marketing. It prepares the student for significant professional contributions in university teaching and research or staff positions in business or government.

The program is quite flexible and individually structured to meet the needs and objectives of each candidate. The program is designed to create scholars and researchers in the field of marketing. Highly student-oriented, the program focuses on training individuals in current marketing theory and research techniques. Collaboration between students and faculty is strongly encouraged.

Program Content
The student will take 15 hours of PhD seminars in marketing. The student must also complete a nine-hour minor in another discipline such as economics, management, sociology or psychology. As support for the major and minor fields of study, extensive coursework (normally 18 credit hours) in the area of quantitative/research methodology is required.

As prerequisites to the program, all candidates are to have completed appropriate basic courses in calculus and statistics. Likewise, candidates are expected to have a basic competence in the major functional areas of business—accounting, finance, operations management, organizational theory, economics and marketing. Competence in the functional areas is usually assumed for candidates having recently completed an appropriate graduate course in each area in an MBA program accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Application Procedure
Outstanding undergraduate or graduate students from any field of study may apply. For those with an MBA, the program will normally consist of two years of coursework and two years of dissertation work. For those without a master’s degree, the plan of study for the PhD degree will typically allow for the granting of an MBA prior to completion of the PhD degree. Applications for admission to the program are evaluated on the basis of the following:

1. undergraduate and graduate grade-point averages,
2. the score on the Graduate Management Admissions Test or Graduate Record Examination,
3. a two- or three-page statement describing goals and academic interests,
4. three letters of recommendation,
5. evidence of research potential, and
6. a personal interview when feasible.

It is the responsibility of each applicant to ensure that all materials related to the above criteria are received by the School of Marketing and International Business. Application forms and detailed explanation of the PhD degree in business administration with an emphasis in marketing are available through the department.

Graduate Certificate in Business Data Mining
This certificate program is designed to help working professionals with technical background who do not want to pursue a full master’s degree yet want to acquire data mining or predictive analytics skills by taking a series of courses online. Working professionals admitted in this program can complete coursework in 12-24 months by taking courses online. Those enrolled in the graduate certificate in business data mining may be able transfer the credit hours to the MS in Business Analytics if they choose to apply for admission into the MS degree at a later date. Along with the graduate certificate in business data mining, students in this program may also receive all of the following three certificates (depending on courses taken, credentials achieved, etc.): SAS and OSU Data Mining Certificate (core level), SAS and OSU Predictive Analytics Certificate (advanced level) and SAS and OSU Marketing Data Science Certificate (expert level).

More details about this program (including procedure and admission requirements) are on the website: http://watson.okstate.edu/datamining/.

Faculty
Tom Brown, PhD—Professor and Head
Professors: Todd Arnold, PhD; Goutam Chakraborty, PhD; Karen Flaherty-Pappas, PhD;
Kevin Voss, PhD; Joshua L. Wiener, PhD

1 Courses also meet College and Departmental Requirements and cannot be waived with an Associate's degree.

2 MGMT 3013 Fundamentals of Management (S) and MKTG 3213 Marketing (S) are common body requirements, but are counted in general education requirements.

**Other Requirements**

1. A minimum of 50 percent of the business hours required for a degree must be in residence at OSU.
2. Forty-five hours of upper division courses required.
3. The student must indicate language proficiency as evidenced by:
   a. 9 hours of study of a single modern foreign language with a minimum grade of "C" or,
   b. study in a foreign country approved by the department head and 6 hours of study of a single modern foreign language with a minimum grade of "C" or
   c. three hours of intermediate or advanced modern foreign language courses with a minimum grade of "C", or
   d. passing an approved Oklahoma State University examination.

**Additional State/OSU Requirements**

- **At least:** 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 and 50% of the upper-division hours in the major field completed at OSU.
- **Limit of:** one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.

• Degrees that follow this plan must be completed by the end of Summer 2024.
Marketing (MKTG), Minor

Select 12 hours of any upper-division marketing classes 12

Other Requirements

- 12 of the 15 hours must be taken in residence at OSU.

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

HOURS SUBTOTAL: 40

Diversity (D) & International Dimension (I)
May be completed in any part of the degree plan
At least one Diversity (D) course
At least one International Dimension (I) course

Other Requirements
1. A minimum of 50 percent of the business hours required for a degree must be in residence at OSU.
2. Forty-five hours of upper division courses required.

Additional State/OSU Requirements
- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 and 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
THE HONORS COLLEGE

Keith Garbutt, PhD—Dean
Richard Frohock, PhD—Associate Dean
Ebonie Hill-Williamson—Program Coordinator
Shelly Schauer—Administrative Assistant
John Andrews, MFA—Honors Academic Counselor
Amanda Booth, MA—Honors Academic Counselor
Baylee Butler, MA—Honors Academic Counselor
O’donna Dean—Honors Academic Counselor
Cynthia Lane—Honors Academic Counselor

Oklahoma State University is an active member of the National Collegiate Honors Council and the Great Plains Honors Council. The Honors College Degree is composed of a university-wide General Honors component and specialized upper-division components at the departmental or college levels. The Honors College provides academically talented students with the opportunity to study, conduct research and exchange ideas in an exciting and supportive academic environment. Honors sections are offered in many general education courses, and special honors seminars, add-ons and interdisciplinary honors courses also are available. Honors classes are taught by outstanding faculty members and the classes are small in size to facilitate active student involvement.

Completion of the requirements for the General Honors Award leads to special designation on the student’s OSU transcript, as does completion of the requirements for the Departmental or College Honors Award in the student’s academic major. Students who earn a minimum of 36 honors credit hours and complete the Departmental or College Honors Award, as well as the General Honors Award, with a 3.50 cumulative grade-point average at graduation, receive the Honors College Degree, including a special entry on their transcripts and special honors diplomas.

Additional advantages for active participants in The Honors College (minimum of three honors credit hours per semester and nine honors credit hours for each two consecutive semesters for freshmen and sophomores and three honors credit hours per semester for juniors and seniors) include use of The Honors College Study Lounge in Old Central (with a computer lab), extended check-out privileges for library materials, priority enrollment for the following semester and an honors housing option in Stout Hall or Bennett Hall (on a rooms-available basis).

Admission of new freshmen to The Honors College is based on an ACT composite score of 27 or higher (or comparable SAT-R score) with a high school weighted or unweighted grade-point average of 3.75 or higher. Application forms are included in the OSU Application for Admission. Entering freshmen who fall just short of these criteria may request a petition form from The Honors College. Students other than new freshmen may be admitted to The Honors College on the basis of their graduation/retention grade-point average (7-59 hours earned: 3.30; 60-93 hours earned: 3.40; 94 or more hours earned: 3.50). Transfer freshmen must have completed at least seven college credit hours (not including concurrent enrollment while in high school) to be eligible on the basis of college performance if they do not have the required high school grade-point average and ACT score. There is a February 1 deadline for regular acceptance based on the criteria outlined above. Applications submitted after February 1 will be considered on a space-available basis.

For additional information about The Honors College, interested students should consult the Dean or Program Coordinator of The Honors College, 101 Old Central or visit http://honors.okstate.edu.

Graduate education at Oklahoma State University (OSU) is organized around the scholarly pursuit of new knowledge, both through didactic instruction and through independent and group research conducted utilizing the facilities and resources of a major research university. OSU's national and international reputation is grounded in the scholarly research and creative work performed by faculty and students under the auspices of OSU's graduate programs.

The first graduate degree was conferred by OSU in 1912, and the Graduate School was organized in 1929. OSU offers more than 200 graduate degree programs, including several interdisciplinary and joint-degree programs.

1.0 Overview

1.1 Graduate Students.
Over 4,400 graduate students currently study at OSU. Part of OSU's mission as a Land Grant University is to serve the people of the region, the state, the nation, and the world by making a first-class education available to all. In response to the growing diversity and demographic changes in the state and in the nation, OSU is committed to preparing graduates to live and work in a culturally pluralistic world. The Graduate College is proud of the diversity of its graduate student population and of their contributions to both the generation and dissemination of new knowledge through their involvement in the University's research and instructional programs. Numerous multicultural student organizations on campus provide information and support to international and diverse students to assist in the successful completion of their graduate studies.

1.2 The Graduate College.
The Graduate College supervises all graduate work offered by OSU, including graduate degree programs at OSU—Stillwater, OSU—Tulsa, the Center for Health Sciences in Tulsa and the Center for Veterinary Health Sciences in Stillwater. Professional degrees are offered through the Center for Veterinary Health Sciences and the Center for Health Sciences in Tulsa. The Graduate College sets standards for admission to graduate standing and recommends to the Board of Regents for degrees those students who have completed work required for graduation.

In addition, the Graduate College offers a number of student services and professional preparation opportunities specifically designed for graduate student success while at OSU as well as after graduation. These activities include graduate teaching assistant orientation programs, three-minute oral communication competitions and thesis/dissertation writing workshops.

1.3 Graduate College Memberships.
The Graduate College is a member of the Council of Graduate Schools (CGS), the Conference of Southern Graduate Schools (CSGS) and the Midwestern Association of Graduate Schools (MAGS).

1.4 Organization of the Graduate College.
Consistent with its objective of maintaining the highest standards in graduate education, the Graduate College administers the policies and procedures specified and established by the Graduate Faculty, Board of Regents for the Oklahoma Agricultural and Mechanical Colleges and the Oklahoma State Regents for Higher Education. The dean of the Graduate College is the senior administrator of the College as well as the dean for graduate students. The Graduate Council is the executive committee of the Graduate Faculty; it is elected by the Graduate Faculty to work with the dean of the Graduate College in the development and administration of applicable policy. The Graduate Council formulates and reviews policies concerning the conduct of graduate study at OSU, and it participates in the periodic review of graduate programs. All proposed policies and requests related to the initiation and development of graduate curricular offerings and programs are referred to the Graduate Council for review, comment and approval.

1.5 Accreditation.
OSU is accredited by the Higher Learning Commission, (HLC) of the North Central Association of Colleges and Schools. (HLC, 30 N. LaSalle Street, Suite 2400, Chicago, IL 60602-2504; ph 1-800-621-7440; www.hlcommission.org (http://www.hlcommission.org)). Several programs within the disciplinary colleges are also accredited by other agencies; see “Accreditation (p. 12)” in “The University (p. 12)” section of the Catalog.

1.6 General Regulation.
Full authority on all academic decisions within the Graduate College rests with the dean of the Graduate College. The Graduate College policies and procedures described in the Catalog are for informational purposes. They are subject to regular review and may be revised at any time by the dean of the Graduate College in consultation with the Graduate Council.

1.7 Responsibilities.
All graduate students are expected to read and to comply with the written regulations of their graduate programs and disciplinary college as well as the Graduate College and University. The regulations presented in the Catalog may be supplemented by written departmental or program requirements available at departmental offices and/or websites. Admission to a specific graduate program obligates the student to understand and adhere to the policies of that program.

General regulations in the following sections relate to requirements for admission, enrollment and academic standing. Subsequent sections outline requirements for the following credentials: Graduate Certificate, Master's, Specialist in Education, Doctor of Education, and Doctor of Philosophy degrees. Particular attention should be given to timing and substantive requirements for matriculation, especially admission, the Plan of Study, residency, language proficiency, research, dissertation/thesis创意 component/report, and graduation. The regulations are prescribed by the Graduate Council with the intent of assuring high-quality graduate programs and effective interaction of Graduate Faculty members and graduate students.
1.8 Email as Official Correspondence.
OSU uses the institutional O-Key email address as an official means of communication with OSU faculty, staff, administrators, and students. All students have an official OSU email address that is activated when they set up their O-Key account. Students are expected to activate and check their OSU email on a frequent and consistent basis to remain informed of their official University business and are expected to ensure that adequate email space is available to receive messages.

1.9 Tuition and Fees.
Refer to the "Tuition, Fees and Cost Estimates (p. 68)" section of the Catalog.

1.10 Exception Requests.
Any request for a waiver of, exception to, or deviation from, any requirement set forth in the "Graduate College" section of the Catalog must be in the form of a written petition to the dean of the Graduate College. Such petitions should include a supporting letter from the graduate faculty adviser or graduate program coordinator.

2.0 Services for Graduate Students
For a complete list of University services, please visit the "Current Student Resources" link on the Graduate College website (http://gradcollege.okstate.edu) or the "Student Life" link on the OSU website (http://go.okstate.edu).

2.1 Graduate and Professional Student Government Association.
The Graduate and Professional Student Government Association (GPSGA) is an official advisory body to the University President and dean of the Graduate College and serves as the representative voice for graduate and professional students at OSU. Its mission is to improve all aspects of post-graduate education and student life at OSU.

The Association provides for representation from each graduate and professional degree program. Representatives are nominated by the graduate programs with membership conferred by the GPSGA president. Each representative is appointed for a term of one year, a representative must be in good academic standing and enrolled in at least two graduate credit hours.

The GPSGA provides funds for graduate and professional student organizations and travel grants to help students defray costs incurred by attending and presenting at professional meetings. For more information consult gpsga.okstate.edu (http://gpsga.okstate.edu).

3.0 Funding Your Graduate Education
3.1 General Financial Aid.
One of the most common sources of funding for graduate students is graduate assistantships. Graduate teaching and research assistantships (GTAs/GRAs) support OSU's instructional and scholarly activities. Most academic programs routinely evaluate graduate admission applications not only for admission consideration but also for the possibility of assistantship offers. The graduate program will contact newly admitted students to inform them if a funding offer is available.

These awards assist students in paying for their graduate education and also offer opportunities to gain valuable skills and experience in their discipline and as a professional.

3.2 Federal Financial Aid.
All domestic students who want to qualify for federal financial aid should complete the Free Application for Federal Student Aid (FAFSA). Students are encouraged to complete the FAFSA annually as soon as possible to receive aid for the subsequent academic year. The FAFSA is available at www.fafsa.ed.gov (http://www.fafsa.ed.gov).

3.3 OSU Short-Term Emergency Loans.
In addition to potential federal loans that may be awarded based, OSU assists students in need of immediate funds through the Short-Term Emergency Loan Program. This program is designed to help OSU students who are currently enrolled and attending classes to meet educationally-related off-campus unexpected expenses. The program is not designed to pay a debt owed to OSU. Qualified students may borrow up to $500 less a $10 service charge one time per semester. Additional information about the Short-Term Emergency Loan Program can be found at https://financialaid.okstate.edu/aid/loans/stl.

3.4 Graduate Assistantships.
OSU recognizes two types of graduate assistants for students enrolled in master’s, specialist and doctoral degree programs. Students in graduate certificates and non-degree seeking students are not eligible for GTA or GRA positions or associated benefits.

A Graduate Teaching Assistant (GTA) must be admitted to and meet the requirements of the Graduate College and be fully admitted to a graduate degree program, enrolled, and be under the supervision of an appropriate graduate faculty member. In consultation with the supervisor, the GTA works to gain instructional skills and an increased understanding of the discipline. The GTA is provided a stipend and their primary responsibilities are to support the University's instructional mission.

Services provided by a GTA may include: classroom or laboratory teaching; advising and mentoring of students; proctoring examinations; grading papers, homework, and/or projects; accompanying/coaching musical or vocal performances, providing artistic instruction or assisting with preparation and management of materials and programs that are utilized in imparting knowledge or in the instructional process; or providing other general assistance in the instruction process. A GTA may be assigned primary responsibilities in an extension, outreach or service role for which those responsibilities support the instructional mission of the University. GTAs may not be given duties to support faculty research or those primarily clerical in nature.

A Graduate Research Assistant (GRA) must be admitted to and meet the requirements of the Graduate College, be fully admitted to a graduate degree program, enrolled, and be under the supervision of an appropriate graduate faculty member. A GRA is provided a stipend and their primary responsibilities are to provide general support to the University's research mission. These responsibilities may or may not relate directly to the student's thesis or dissertation. Duties of the GRA primarily involve applying and mastering research concepts, practices or methods of scholarship. Services provided by a GRA may include: assisting faculty members in a research or creative activity; perform degree-related professional or administrative services that supports research, instruction, professional development, or outreach missions of the University; developing and evaluating instructional materials or curricula; or assuming responsibility for designated scholarly endeavors.

“Perform degree-related professional or administrative services” does not include jobs that are outside the student’s field of study.
Assistantship inquiries should be addressed to the unit head or graduate program coordinator of the unit/department/school/program in which the appointment is desired. The service expected is governed by the terms of the appointment.

3.5 Graduate Assistantship Responsibilities.
An offer of an assistantship is a commitment by a unit/department/school/program to provide financial support to admitted graduate students. Assistantships are an investment made by a unit/department/school/program and are granted primarily to enable the student to pursue an advanced degree and gain valuable experience. Accepting an assistantship brings with it a professional obligation to fulfill all of the responsibilities associated with the assistantship assignment. Included in this professional obligation is the expectation that students who have accepted an assistantship will diligently pursue their degree to completion. In recognition of this commitment and to provide adequate time for students holding assistantships to devote to study, employment as a graduate assistant is limited to a total, from all University sources (including external grants and contracts), of 0.50 FTE (an average of 20 hours per week) in the Fall and Spring semesters, and 0.75 FTE (an average of 30 hours per week) between the end of the Spring semester and the beginning of the Fall semester. Exceptions to this limitation may be requested by the employing unit or graduate program to the dean of the Graduate College.

A student with an 0.50 FTE assistantship is expected to devote, on average, 20 hours per week to their duties as a graduate teaching or research assistant; the remainder of academic effort is devoted to his/her own studies and research. The time devoted to the assistantship may vary from day to day and week to week as long as it does not exceed the average given above.

As part of a graduate student’s educational experience, OSU makes a number of GRAs available on a routine basis. Graduate students on a GRA are expected to devote full-time effort to their graduate programs. While the GRA appointment provides a modest stipend for an average of 10 or 20 hours per week for a 0.25 or a 0.50 FTE assignment, respectively, in recognition of contributions to the OSU research enterprise, it does not indicate that no additional time and effort may be required of the graduate student who is actively pursuing a graduate research degree. Depending on the stage of the research project and the graduate student’s advancement in the program, the student may be enrolled in research credit hours for academic credit or only enrolled in formal coursework. Irrespective of that enrollment, it is expected that the graduate student is working full-time toward completion of the advanced degree. OSU, like most institutions nationwide, does not define the research credit hour as equating to a specific amount of time and effort, as the nature of research is highly dependent on the individual’s progress on the project. For instance, general OSU policy only requires a minimum enrollment in two credit hours when a graduate student is working on a research project and using OSU resources unless they are employed as a GTA/GRA.

In addition, all students holding a graduate assistantship are required to be full-time students - see "Enrollment Requirements" below. For fall and spring semesters, students employed 0.50 FTE must be enrolled in at least six credit hours to be considered full-time, while students employed less than 0.50 FTE must be enrolled in at least nine credit hours to be considered full-time. However, full-time enrollment for students admitted to doctoral candidacy is two credit hours. For the summer term, students employed at any level must be enrolled in at least two credit hours during any summer session to be considered full-time.

International students who are dependent upon an assistantship for their financial guarantee must remember that forfeiture of that assistantship may require the re-submission of a newly revised financial guarantee to the Office of International Students and Scholars. Students who forfeit their graduate assistantships risk rescission of tuition waivers, as well as any health insurance coverage for graduate assistants provided by the University.

Note that all graduate student benefit programs, such as tuition waivers, are only available to individuals with a primary classification as a graduate student enrolled in a degree program, which does not include certificate-seeking or non-degree seeking graduate students. OSU employees taking graduate classes do not qualify for graduate student benefit programs, irrespective of whether their employment is a benefit eligible position. One cannot selectively opt-out of certain benefits to seek eligibility for other benefits. Please contact the Graduate College or Human Resources if you have questions.

3.6 Graduate Assistantship General Benefits.
Graduate Teaching or Research Assistants employed at least 0.50 FTE in the fall/spring semester (average of 20 hours per week) are enrolled in a minimum of six (or two for doctoral candidates) eligible graduate hours will receive a tuition waiver (hours of enrollment must be required per the graduate degree program). Summer tuition waivers for the same GTA or GRA for spring semester will apply during the summer regardless of summer employment. Tuition waivers cannot be applied to independent study, leveling, undergraduate or outreach type courses. Granting of these tuition waivers is also contingent upon the student submitting an electronic GTA/GRA (GSSI) tuition waiver agreement through the Graduate College website (http://gradcollege.okstate.edu/FormsPage), by the first day of the semester, in which they acknowledge their employment, enrollment and good academic standing responsibilities. Once enrolled, good academic standing (i.e., not on academic probation – beyond probationary admission) is a requirement for OSU tuition waiver eligibility. Once matriculated, a graduate student going on probation is not eligible for tuition waiver benefits. This does not preclude a GTA/GRA appointment(s). Graduate programs can request a one-time exception for exceptional circumstances from the graduate dean. For more information regarding tuition waiver benefits or academic standing, please visit the Graduate College website (gradcollege.okstate.edu (http://gradcollege.okstate.edu)).

Any graduate student employed as a GTA and/or a GRA less than 0.50 FTE total per week will not be eligible for any type of tuition waiver benefit.

3.6.1 Health Insurance Benefits.
Graduate Teaching or Research Assistants employed in a 0.25 FTE GTA/GRA position during the fall or spring semesters and who are enrolled in at least nine graduate credit hours throughout that entire semester are eligible for single-person-coverage health insurance through OSU for the fall (or spring) semester. Note: Spring semester eligibility coverage continues through the following summer regardless of employment or enrollment status.

Graduate Teaching or Research Assistants who are not eligible for health insurance coverage during the summer session by virtue of their eligibility during the previous spring semester but who are employed in a 0.25 FTE GTA/GRA position during the eight-week summer session and enrolled in at least two graduate credit hours are eligible for single-person-coverage health insurance through OSU for the summer term.
The University subsidizes the student’s coverage on a semester-by-semester basis. Students receiving the GTA/GRA insurance are required to pay the semester health fee. Coverage is through United Healthcare. Information on the policy is available at https://www.uhcsr.com/okstate and OSU Human Resources http://hr.okstate.edu/student-health-plan.

Eligible graduate students are automatically enrolled for the insurance coverage if they meet eligibility requirements. If students have other insurance coverage or choose not to be enrolled in the student health plan, they may complete a declination form to opt out. A declination form can be found at the following site http://hr.okstate.edu/student-health-plan. The form will need to be submitted to OSU Human Resources, Benefits Office 106J Whitehurst.

3.7 Health Insurance for International Students.
The Oklahoma State University Board of Regents requires that all visa-holding (i.e. non-immigrant) students at OSU be covered by health insurance. The OSU Student Insurance Policy is the recommended health insurance and will be billed to all non-immigrant student accounts automatically. Payment for the student insurance is included in the costs listed on the financial affidavit that international students are required to submit to receive a F-1 or J-1 visa.

The insurance premium can be waived for non-immigrant students sponsored by the United States Government, a foreign government recognized by the United States of America, or certain international, government sponsored or non-governmental organizations. Such waivers will be based on the government or organization guaranteeing payment of all health care expenses including evacuation and repatriation.

The insurance premium will also be waived for students who provide documented evidence of health insurance coverage by an employer. Non-immigrant students employed by OSU and eligible for both employer-provided insurance and international student health insurance may select between the two, as long as the insurance selected includes evacuation and repatriation coverage.

Students covered by a private medical insurance plan with benefits comparable to or better than the OSU plan, may request a waiver from OSU’s international student health insurance requirement. Coverage must be in effect from the first day of their first semester classes for a 12-month period.

To use alternate insurance, students must complete and submit a waiver request no later than the fifth day of classes. Waiver forms can be found on the International Students and Scholars (ISS) website at http://iss.okstate.edu.

If a student holds an appointment at least a 0.25 FTE OSU GTA or GRA position, OSU provides the student health insurance policy.

3.8 McNair Graduate Fellowships for former McNair Scholars.
Entering graduate students who are graduates of a McNair Scholar Program as undergraduates may be eligible to become McNair Graduate Fellows. McNair Graduate Fellows receive a tuition waiver for all degree-eligible courses up to the number of hours in their degree program, irrespective of a qualifying assistantship. Such tuition waivers cannot apply to independent study, leveling, or outreach-type courses. The McNair Graduate Fellow Tuition Waiver Program is competitive and is not guaranteed, irrespective of the application waiver received. Please contact the Graduate College (gradi@okstate.edu) for more information as restrictions apply. Also, note that all graduate student benefit programs, such as the McNair Graduate Fellow Tuition Waiver Program, are only available to individuals with a primary classification as graduate students. OSU employees taking graduate classes do not qualify for graduate student benefit programs, irrespective of whether their employment is a benefit eligible position. One cannot opt-out of certain benefits in an a-la-carte manner to seek eligibility for other benefits. Please contact the Graduate College or Human Resources if you have any additional questions. McNair Graduate Fellows are required to submit the necessary contract to the Graduate College each year and restrictions apply.

3.9 City Year National Service Scholars.
Oklahoma State University is proud to partner with City Year through our shared visions and values of integrating the power of knowledge and service in addressing social problems. The OSU Graduate College City Year National Service Scholars Program provides City Year Alumni an application fee waiver and a tuition waiver for all degree-eligible courses up to the number of hours in their degree program; however, acceptance as an OSU Graduate College City Year National Service Scholar is competitive and is not guaranteed. The following are program requirements:

1. Must be completing your year of service or be a senior AmeriCorps member, alumni or staff;
2. Must provide a letter of program completion from your Director of City Year Alumni and Career Services;
3. Only applies to residential graduate programs on Stillwater, Tulsa, or Center for Health Sciences campuses – no distance learning or outreach formats;
4. Graduate certificate programs are not eligible for this or other tuition benefit programs;
5. Cannot be used to earn a second graduate degree;
6. Cannot accept or have access to other tuition waiver programs, including faculty/staff programs;
7. Must participate in OSU City Year National Service Scholars Program activities;
8. OSU City Year National Service Scholars fellowship and subsequent tuition waiver is applicable to one OSU graduate degree;
9. Renewal of the OSU City Year National Service Scholars fellowship is contingent upon satisfactory progress each term;
10. See the OSU City Year National Service Scholars Fellowship Tuition Waiver Agreement for additional provisions.

3.10 Spouse Tuition Waivers.
A spouse of a graduate teaching or research assistant who is receiving a tuition waiver that is associated with an eligible assistantship is eligible to apply for a waiver of the non-resident portion of tuition for all graduate level/eligible courses taken. Tuition waivers cannot apply to independent study, leveling or outreach-type courses. Contact the Graduate College for details.

3.11 Student Employment.
Career Services provides assistance to OSU students seeking part-time employment or work study programs. Students are informed of job opportunities on campus and in the Stillwater community. Applications are available in room 360 Student Union. Jobs on campus usually offer 12 to 20 hours of work per week in clerical, technical, food service or general labor positions. Rate of pay and work schedules vary.

Individual job search assistance is available with the graduate career consultant in the Student Union Career Services Office or with any of the
4.0 Admission to the Graduate College

Holders of baccalaureate or first professional degrees from accredited colleges and universities or those of recognized standing are eligible to seek admission to the Graduate College. Applicants must complete the web-based application and submit official transcripts of all academic work and degrees received including any previous graduate coursework and degrees. No application for admission will be reviewed until the application fee is paid.

The prospective student should obtain transcripts for bachelor’s degree(s) conferred or pending as well as for any graduate or professional coursework and upload these transcripts as part of their application (some programs may require applicants to upload transcripts from all institutions previously attended). If an applicant is offered admission to graduate studies, then the applicant will be required to have the institution that granted their bachelor’s degree to send one official transcript to the Graduate College, 202 Whitehurst, Stillwater, OK 74078.

To be official, the transcript must be issued from the school and must show the complete scholastic record, bear the official seal of the institution, be signed by the issuing officer, and be in a sealed envelope or electronically delivered directly from the issuing institution.

To assure adequate time for review, completed applications and transcripts should be received at least 60-90 days prior to the graduate program application deadline or the beginning of the semester, whichever comes first. All transcripts become the property of OSU and are not released or returned.

When the applicant’s file is complete, the faculty in the graduate program of the student’s area of interest reviews the material and recommends an admission status to the dean of the Graduate College. The final decision for admission to the Graduate College is determined by the graduate dean on the basis of the program’s recommendations, prior academic performance of the applicant, and availability of space, facilities, and faculty mentors in the program.

4.1 OSU Faculty Members.

No member of the faculty, with the rank of associate professor or above or equivalent rank at the time of completing the requirements, may be granted a degree or graduate certificate from this institution. This regulation also applies to faculty members in the schools of engineering holding the rank of assistant professor or above.

4.2 Types of Admission.

Admission to a graduate program at OSU is based on an evaluation of an applicant’s overall record, experience, personal qualifications, proposed area of study, and fit with the graduate program. For admission without qualification, a GPA of at least 3.00 on a 4.00 scale or the equivalent is expected in undergraduate coursework or a 3.00 in any graduate or professional coursework already completed. Graduate programs are encouraged to evaluate applications holistically and may petition the Graduate College on behalf of an applicant for an exception to the cumulative GPA requirement. Academic programs may set more stringent admission requirements. Please check with the graduate program to which you are applying in order to determine any program specific requirements.

4.2.1 Admission Without Qualification.

Students planning to work toward a graduate degree in a recognized graduate program may be admitted in good standing provided they meet all Graduate College and graduate program requirements.

4.2.2 Provisional Admission.

A student can be admitted provisionally upon recommendation of the graduate program and with concurrence by the dean of the Graduate College. Admission with provisional status is granted to an applicant who does not meet one or more of the graduate program's admission requirements or when the applicant does not have the necessary academic background. In this case, the graduate program requires specific provisions be met for admission in good standing. For example, a graduate program may require additional leveling coursework or higher test scores. The first obligation of a student admitted provisionally is to successfully meet all of the provisions specified at the time of admission. Failure to meet these provisions could result in the dismissal from the program.

4.2.3 Probationary Admission.

A student can be admitted with probation status upon recommendation of the graduate program with concurrence by the dean of the Graduate College. Admission with probation status is granted to an applicant who has deficiencies in previous academic coursework. A student admitted on probation status must make at least a 3.00 GPA through the semester in which s/he completes nine hours of courses eligible for graduate credit. Upon successful fulfillment of these requirements the student will be granted good academic standing. Failure to meet the required level of academic performance while in a probationary status may result in dismissal from the Graduate College.

4.2.4 Conditional Admission.

Several graduate programs at OSU will consider an applicant for conditional admission. An applicant can be admitted conditionally upon recommendation of the graduate program and with concurrence by the dean of the Graduate College. Conditional admission means that the applicant is academically qualified for admission to the graduate degree program but lacks a minimum TOEFL or IELTS score which satisfies the University’s or graduate program’s minimum (see “International Student Admission” for minimum requirements). Before the applicant will be allowed to matriculate in the graduate degree program, a sufficient TOEFL or IELTS score must be submitted. Failure to submit a sufficient TOEFL or IELTS score will result in the applicant not being allowed to enroll.

4.3 Non-Degree Seeking Student Status.

An applicant may be admitted to the Graduate College as a non-degree seeking student if he or she does not have immediate plans to become a degree candidate, but wants to take graduate courses, prerequisites, or other courses. Admission to the Graduate College as a non-degree seeking student means only that the student will be permitted to enroll in courses through the Graduate College. It does not imply that the student has been or will be admitted to a program leading to an advanced degree or that the student will be able to obtain a graduate degree from OSU. Non-degree seeking students are not eligible for GTA or GRA positions or associated tuition waiver benefits.

4.3.1 Non-Degree Seeking Student Status Requirements.

Non-degree seeking students are subject to the same admission standards as degree-seeking students, including English language proficiency. Applicants for non-degree seeking student status are not
automatically admitted without due deliberation of their past academic performance. A non-degree seeking applicant can be considered for admission "Without Qualification" provided his/her overall GPA is 3.00 or higher for all courses on his/her bachelor's degree transcript and/or transcripts from his/her graduate or professional coursework. An applicant whose GPA does not meet these criteria can be considered for admission after consultation and recommendation of the Graduate College's non-degree seeking student adviser who may consider additional factors in making a decision, such as the following:

- length of time since last attendance at an institution of higher learning,
- a written appeal from the applicant explaining exceptional circumstances that warrant admission, and/or
- a letter of recommendation written by faculty who can speak to the applicant's potential for graduate work.

The prospective student is responsible for filing a new application for admission to the Graduate College should he or she wish to become a degree-seeking candidate. The new application will be evaluated by the graduate program and the dean of the Graduate College to ascertain admissibility to the degree program.

Given that non-degree seeking coursework is not guided by a Plan of Study or approved by an adviser, no more than nine semester credit hours of coursework taken while a non-degree seeking student may be used on a Plan of Study to meet requirements for a graduate degree or graduate certificate program. In addition, only three semester credit hours of coursework taken while a non-degree seeking student may be used on a Plan of Study toward an MBA degree. Non-degree seeking students may not enroll in more than nine hours of courses eligible for graduate credit without permission of the dean of the Graduate College, or their designee. To ensure that non-degree seeking students do not inadvertently exceed this limitation, an enrollment hold will be placed on each student in this status after the student has registered for six or more credit hours. This hold may be removed by the Graduate College (see below) once the student has formally re-acknowledged this nine-hour limitation.

Non-degree seeking students are subject to the same academic regulations as those graduate students admitted into degree programs. Such students are strongly encouraged to consult with the instructor of any course in which they intend to enroll in order to ensure that they are adequately prepared for that course.

Non-degree seeking students may not enroll in thesis (5000) or dissertation (6000) courses.

Generally, International students with an F-1 visa, except students on Optional Practical training (OPT) or Curricular Practical training (CPT), may not be admitted or enroll as non-degree seeking students.

Academic advising for non-degree seeking student is provided by an adviser in the Graduate College. Students should contact the Graduate College at 405-744-6368 or gradi@okstate.edu for details.

4.4 International Student Admission.

International applicants are expected to submit applications, financial affidavits, transcripts and/or mark sheets, and, if required, official scores of the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examinations. Applicants who present a TOEFL score of at least 79 iBT/550 PBT or an IELTS academic stream score of at least 6.5 satisfy the Graduate College's English proficiency requirements for admission to a graduate program. Note that some graduate programs require a TOEFL score above these levels, and applicants should contact the program for specific TOEFL or IELTS requirements. Completed applications are due no later than February 1 for fall enrollment and August 1 for spring enrollment. Applications that become complete after these deadline dates may be reviewed, but the Graduate College cannot guarantee an admissions decision will be made with sufficient time for the issuance of the I-20 form required to obtain an entry visa.

4.4.1 English Proficiency.

As a condition of admission to graduate study at OSU, all persons for whom English is a second language are required to present proof of English competency regardless of the number of semesters or terms completed at OSU or in other institutions of higher education. A waiver of this requirement can be obtained for students who have completed a baccalaureate or graduate degree from an accredited institution of higher learning, at which English is the primary language of instruction, located in a country in which English is a recognized primary language. Note, however, that proof of specific English proficiency through the submission of test scores, such as the Internet Based TOEFL (IBT) scores, or additional testing may be still necessary if employment as a graduate teaching assistant is desired. Graduate programs may have additional requirements.

Proof of English competency can be in the form of an official TOEFL or IELTS, (academic stream), score. Either examination must have been taken within the last two years. Applicants who present evidence of undue hardship or other extremely extenuating circumstances may be admitted without a TOEFL or IELTS score. However, such students will be required to take the Test of English Language Proficiency (TELP) immediately upon arrival at OSU, and to comply with the provisions associated with that test.

Applicants who present a TOEFL score of at least 61 iBT/500 PBT, but less than 79 iBT/550 PBT (or an IELTS academic stream score of 6.0) and who demonstrate unusual academic promise may be admitted to graduate study on conditional status upon petition to the Graduate College by the graduate program.

Applicants with a TOEFL score of at least 61 iBT/500 PBT, but less than 79 iBT/550 PBT (or an IELTS academic stream score of 6.0), must successfully complete a minimum of 12 weeks of study at an intensive English program (IEP) approved by the Oklahoma State Regents for Higher Education State Regents. At least two-thirds (eight weeks) of the 12 weeks must be instruction at an advanced level. A list of State Regents’ approved IEPs can be found in the OSRHE Academic Affairs Procedures Handbook. The OSU intensive English program, known as the English Language Institute (ELI), is a state-approved IEP. More information on the OSU ELI program can be found here https://eli.okstate.edu/.

Applicants, who do not submit a TOEFL/IELTS score, can seek admission to the OSU English Language Institute (ELI) in their first semester. These students will be issued an I-20 by ELI. After achieving the required score (500) and immediately prior to admission, the applicant must successfully complete a minimum of 12 weeks of study at an intensive English program (IEP) approved by the State Regents as described above. Upon successful completion of the ELI program students will be issued an I-20 by the Office of International Students and Scholars and will be admitted into their graduate degree program. Such students will be required to take the institutional TELP (see below) at the first opportunity thereafter and to comply with its provisions. Students must continue to
enroll in ELI until their successful completion. Concurrent enrollment in graduate courses and ELI is not permitted.

4.4.2 Spoken English Proficiency for Employment.
OSU policy requires all persons for whom English is a second language to demonstrate an acceptable level of spoken English before being employed in an instructionally related capacity, including laboratory assignments. Graduate students who serve only as laboratory assistants (e.g., setting up and/or maintaining equipment) are not required to comply with these provisions. See http://gradcollege.okstate.edu/ita for specific policy requirements for the International Teaching Assistant Program. Any new international teaching assistant (ITA) is required to have a qualifying score of 26 or greater on the speaking portion of the iBT or to take the ITA test prior to being approved for instructional assignments. All new ITAs are also required to participate in the international teaching assistant orientation. See http://gradcollege.okstate.edu/ita for specific policy requirements.

5.0 Transfer of Graduate Credits
Transfer credit must be recommended by the graduate student’s advisory committee through the submission of a Plan of Study that is approved by the dean of the Graduate College.

Transfer credit will only be considered if it was earned when the student was post-baccalaureate (i.e., after earning a bachelor’s degree) at an accredited institution and the applicable course(s) was/were certified as graduate credit by that institution. All courses used as transfer credit must have a grade of “B” or better.

Transfer of credits from medical professional programs (e.g., DO, DVM and MD) to the Graduate College may also be considered when a student was admitted to a medical professional program at another accredited institution and the applicable courses were certified for enrollment restricted to professional-level study. All courses used as transfer credit must have a grade of “B” or better or a grade of “pass” for those institutions which only offer professional courses as a “pass/no pass” grading system.

Up to three hours of transfer credit may be used toward an OSU graduate certificate and up to nine credit hours of transfer credit may be used toward any OSU graduate degree. A doctoral student may transfer more than nine hours if the courses in question were housed in a department or program that offers an EdD or PhD (or equivalent) degree. Doctoral students must include a minimum of 30 hours of OSU credit on their Plan of Study.

Also, see Section 11.2 for the number of times a course can be used in multiple degree Plans of Study.

6.0 Enrollment Policies
6.1 Initial and Continuous Enrollment Policy.
A prospective student must enroll for courses at OSU within the time specified in his or her admission letter to retain active status. A prospective student who does not conform to these conditions must reapply for admission.

Any student who interrupts enrollment for one year (i.e., a consecutive period of one fall semester plus one spring semester plus one summer term) must re-apply for admission, and will be subject to the regulations in effect at the time of reapplication. See section 6.6 below for additional doctoral candidacy enrollment requirements.

6.2 Full-Time Enrollment.
To be considered enrolled full time, a graduate student must be enrolled in at least nine hours in either fall or spring semester and at least three hours during the summer sessions. Full-time enrollment for Graduate Teaching/Research Associate/Assistants (GTAs/GRAs) with a 0.50 FTE appointment is at least six hours in either fall or spring semester and at least two hours during a summer session.

6.3 Minimum and Maximum Enrollment.
Students are required to be enrolled in at least two credit hours in each semester in which they are using physical or faculty resources of the University. Students holding graduate assistantships should note that additional requirements apply (see below). Regardless of the number of hours taken, a student may not enroll in more than 12 (16 for the Spears School of Business graduate programs) credit hours in the fall or spring semester without permission of the dean of the Graduate College.
During the summer session, a student may not enroll in more than nine credit hours taken in any session during the eight-week summer period. No more than three credit hours can be taken during the first summer session (intersession). Summer intersession is defined as any course that begins after the end of the spring semester and ends prior to the beginning of the eight-week summer session. For any short course session less than eight weeks in length, enrollment shall not exceed one credit hour for each week.

International students on F-1 or J-1 visas must maintain full-time status as defined above during the first semester of enrollment, and during each fall and spring semester thereafter.

Also, see Section 11.2 for the number of times a course can be used in multiple degree Plans of Study.

6.4 Graduating Semester Enrollment.
Each degree-seeking graduate student must be enrolled in at least two hours of courses eligible for graduate credit during their graduating semester (defined as the semester in which they satisfactorily complete all degree requirements). However, a student would not need to be enrolled during their graduating semester if they meet the following conditions:
1. has been assigned an “Incomplete” (grade of I) in a non-research or creative component course;
2. the course is required for graduation; and,
3. the course in which the incomplete was received is the only graduation requirement left to fulfill.

Students must enroll in research, thesis, or dissertation hours, as appropriate, during each semester in which they are involved in research leading to a thesis or dissertation, irrespective of the number of credit hours of such courses either required or permitted for the degree.

6.5 Master’s Degree Enrollment Requirements.
Students with a fall (spring/summer) graduating semester who have research courses (i.e., courses numbered 5000) on their approved Plan of Study must satisfactorily complete no fewer than six hours of courses eligible for graduate credit during the calendar (academic) year which includes the graduating semester. As an example, a student wishing to graduate in a fall semester must be enrolled in a total of at least six hours for that fall semester plus the preceding spring semester and summer session. Doctoral students meet this requirement by virtue of the Doctoral Candidacy Enrollment Requirements noted below.
6.6 Doctoral Candidacy Enrollment Requirements.

Doctoral students who have completed the requirements for admission to doctoral candidacy and had their “Admission to Doctoral Candidacy” form approved by the dean of the Graduate College may enroll for a minimum of at least two credit hours during any term and be considered full-time. This post-candidacy reduced enrollment option applies to all qualified graduate students, including GTAs, GRAs, international students and veterans receiving VA benefits. A student is normally expected to enroll primarily in research hours or in program-approved courses after being admitted to doctoral candidacy.

Continuous enrollment post-candidacy is required of all students. Enrollment of a minimum of at least two credits per semester is required for every semester of a student’s candidacy (summer session excluded) until graduation. It is ultimately the responsibility of each student to ensure that they meet this enrollment requirement. Students who are not able to maintain active status are strongly encouraged to consult with their program, adviser and the Graduate College to determine whether requesting a Leave of Absence (LOA) is the most appropriate course of action.

6.6.1 Reinstatement Fee.

Post-candidacy students who do not maintain continuous enrollment will be assessed a reinstatement fee based upon their residency status at the time of last enrollment as follows:

- Resident: $750/semester (summer session excluded) of non-enrollment
- Nonresident: $1,900/semester (summer session excluded) of non-enrollment

In addition to the reinstatement fee, students whose continuous enrollment disruption exceeds one academic year also must apply for readmission to the graduate program (see Enrollment).

During the readmission process, previous coursework will be evaluated for applicability in accordance with coursework (10 years) and time-to-degree (9 years) time limits (see Time to Degree Requirements).

Notification of the conditions of readmission and reinstatement will be provided if an acceptance occurs. New program requirements may apply based on the aforementioned enrollment policy. Please note that reinstatement and readmission are not guaranteed and significant challenges may occur that hinder a student’s ability to complete a degree after a lapse in enrollment, such as the reapplication process (e.g., new letters of recommendation and unexpired standardized test scores); availability of the same graduate adviser, project and/or grant support; and new/revised program requirements and/or core courses for degree.

6.7 Enrollment and Financial Assistance.

For the purpose of receiving monetary assistance through the Office of Scholarships and Financial Aid, the amount of the award is related to the total number of enrolled credit hours that apply toward the degree (for graduate students, such courses must be offered for graduate credit), including 3000*, 4000* (G sections only), 5000 and 6000 level courses. OSU graduate certificate and master’s, specialist and, doctoral degree programs are federal aid-eligible programs, depending on a person’s personal circumstances.

In general, a graduate student must be enrolled in four hours of courses eligible for graduate credit each fall and spring semester, and two hours of courses eligible for graduate credit in the summer term, to be eligible for federal financial aid. Some students may be required to enroll in more hours in the fall or spring or summer to receive the full amount of federal financial aid. Students should verify with their financial aid adviser in the OSU Office of Scholarship and Financial Aid about the number of hours they are required to take. Certifiable enrollment status, based upon a combination of enrollment and employment, only assists with the deferral of loan repayments, never qualification for aid, which is based solely on enrollment.

6.8 Enrollment as a Non-Degree Seeking or Degree-Seeking Graduate Student.

Students with a bachelor’s degree are expected to enroll in the Graduate College unless they want to obtain another bachelor’s degree. If they enroll as an undergraduate student, the courses taken cannot be given graduate credit at a later date.

6.9 Graduate Student Enrollment in Undergraduate Courses.

Students admitted to the Graduate College may enroll in, or audit, undergraduate courses or course sections that do not carry graduate credit if approved to do so by their graduate faculty adviser. Such courses cannot subsequently be used as part of a graduate Plan of Study and are not generally covered by graduate tuition waiver programs. Some 3000 and 4000-level courses are approved for both undergraduate and graduate credit; these courses are identified in the Course Catalog and are generally offered in separate undergraduate and graduate sections. Enrollment in such a course by a graduate student will normally be in the graduate section; additional assignments at an intellectual level commensurate with that of graduate work when compared to that required for undergraduate credit, is required to earn graduate credit. Some graduate students may, however, wish to enroll in the undergraduate sections for undergraduate credit only (e.g., to complete additional courses specified in the graduate admission provisions). They may do so by completing the “Graduate Students Seeking Undergraduate Credit for 3000/4000 Courses” form and submitting it to the Office of the Registrar by the end of the second week of the regular semester, or by the end of the first week of the summer session, in which the 3000*/4000* course is taken. Submission of this form implies that the student wishes to be graded using the same criteria and course completion requirements used for undergraduates in the course. Such courses may not subsequently be used as part of a graduate Plan of Study and are not generally covered by graduate tuition waiver programs.

6.10 Undergraduate Student Enrollment in Graduate Courses.

An OSU undergraduate senior may take a limited number of courses for graduate credit toward an OSU degree program. The credits may not be utilized for both a baccalaureate degree and a graduate degree. The courses in question must be approved for graduate credit (denoted in the Course Catalog), and the student must enroll in the graduate section (if enrolling in a 3000- and 4000-level course). The applicability of such graduate courses to a specific graduate program will be determined by the student’s graduate advisory committee when the student enrolls in the Graduate College and submits a Plan of Study for an advanced degree.

To receive graduate credit, a Graduate Credit for Seniors form must be completed by the student to receive graduate credit for courses taken. This form must be submitted prior to the end of the second week of class instruction of a regular semester, or the first week of a regular summer
8.0 Enrollment Procedure

Students are strongly encouraged to review the course offerings for the upcoming semester prior to attempting to enroll. For more information about enrollment and classes go to http://my.okstate.edu.

First semester graduate students must first obtain their adviser's clearance prior to attempting to enroll.

Non-degree seeking students may be granted enrollment clearance through the Graduate College. Non-degree seeking students will be provided assistance with selecting coursework, issues surrounding the transferability of special student credits, applying to degree-seeking programs, and other academic topics.

If the student has not completed a Plan of Study or if this is the first semester as a graduate student, the student should consult with the graduate faculty adviser. The graduate faculty adviser can provide information about required courses, course sequencing, and other information in order to select appropriate courses. The adviser should give approval for course selections prior to enrollment. All graduate students must complete Responsible Conduct of Research (RCR) requirements prior to the submission of a Plan of Study. A student should consult with his or her graduate coordinator as to what these requirements are in his or her graduate program. A Plan of Study will not be approved by the Graduate College until the program has certified RCR completion.

If a Plan of Study has been completed, the student should verify that all planned courses are listed on the Plan of Study. Students should consult with their adviser any time they deviate from courses listed on the Plan of Study. The ultimate responsibility for completing degree requirements rests with the student.

Students who have active academic, financial or advising holds must clear these holds prior to attempting to enroll. Students can view any holds by logging into the Self Service portal at http://my.okstate.edu.

8.1 Last Day to Enroll.

Information regarding dates to enroll, when courses begin, and last days to drop are listed in the Class Schedule available at the Office of the Registrar’s website at http://registrar.okstate.edu.

Generally, the sixth class day of a regular semester or the third class day of the eight-week summer session is the last day a course may be added (nonrestrictive) via the student enrollment system. A short course may be added no later than the first day of the short course.

8.2 Late Enrollment.

Graduate students should enroll prior to the end of the official enrollment deadline for the semester. If they do not, there are limited options to enroll in classes. The options available to the student depend on the number of weeks past the deadline and the student’s current enrollment status.

During the second week of fall/spring or first week of the eight-week summer session:

- If a student wishes to add course hours or is not currently enrolled, they must submit a drop/add card or Trial Study signed by their adviser giving permission to enroll.
- If the student is adding a course they must have the instructor’s signature on the add/drop card or Trial Study.
If a student is non-degree seeking, they must have the signature of the dean of the Graduate College and the instructor of the course in which they wish to enroll.

After the second week of fall/spring or first week of the eight-week summer session graduate students may add any course which has not started.

8.3 Other Enrollment.
In order to enroll in a given semester, a student must have received grades for at least six semester credit hours (including "I" and "R" and excluding "W") in the 12 months prior to the beginning of that semester.

9.0 Courses Offered Through Outreach
Courses offered through Outreach are considered equivalent to courses offered through traditional formats. Any student wishing to enroll in a graduate credit course offered through outreach must make application for admission to the Graduate College at OSU.

10.0 Individual Study Credit (formerly Correspondence Education)
OSU does not offer graduate-level courses by individual study (formerly correspondence education) and does not accept credit taken by individual study (formerly correspondence education) toward an advanced degree. Graduate students may enroll in individual study courses (formerly correspondence education courses); however, such courses will not be considered as part of minimum graduate degree or certificate requirements. Tuition waiver programs are not applicable to courses taken through individual study (formerly correspondence study). Courses taken through individual study (formerly correspondence education) do not count toward minimum enrollment requirements for any graduate student.

11.0 Academic Regulations
Also refer to "University Academic Regulations (p. 810)" section in the Catalog.

11.1 Graduate Credit Courses.
Courses numbered 5000 and above are for graduate students. Seniors who have obtained prior approval from the Graduate College may enroll in graduate level courses in accordance with the provisions of "Enrollment" stated earlier.

Courses numbered 3000 and 4000 that are identified by an asterisk in the "Course Descriptions" of the Catalog can be taken by graduate students and may be used to meet requirements for a graduate degree on the Plan of Study if approved by the student's advisory committee and the dean of the Graduate College. In order to receive graduate credit, students must enroll in the G section of the course. Graduate students enrolled in these courses will be considered as taking the courses for graduate credit (unless they pre-declare the course as taken for undergraduate credit; forms are available in the Graduate College) and will be expected to complete additional assignments at an intellectual level commensurate with graduate level work as proposed by the instructor. Courses that are not identified by an asterisk may not be used to fulfill requirements for a graduate degree.

11.2 Number of Times a Course Can be Used to Earn Multiple Degrees.
Typically, a graduate course can be used in more than one graduate certificate or graduate degree. For example, a student may initially earn a graduate certificate and later use the certificate coursework to earn a master's degree. Similarly, coursework from a master's degree may also be applied toward a doctoral degree. In both cases, the course credit has been used twice in earning the two graduate credentials — the certificate and the master's degree and a master's and a doctoral degree, respectively.

With approved Plans of Study, graduate courses can be used to earn no more than three graduate degrees, which includes graduate certificates. This applies to both OSU courses and courses approved for transfer credit. This policy does not refer to the use of zero-ending courses used within a Plan of Study.

11.3 Grades for Thesis (5000) and Dissertation (6000).
The grade of "SR," indicating satisfactory research progress, or "UR," indicating unsatisfactory progress, or "IUR," indicating an incomplete (see section 6.2 "Grade Interpretation" in the "University Academic Regulations" chapter of the Catalog) will be assigned to thesis (5000) and dissertation (6000) courses at the end of the semester in which the course is taken. These grades are permanent and have no impact on a student's grade point average, but affect the graduate student's academic standing. Only courses in which a grade of "SR" (or a previously-awarded grade of "R," "A," "B," or "C") is earned may be used toward minimum degree requirements.

11.4 Grades for Creative Component Courses.
The "R" grade can be assigned in a course identified as a creative component portion of a master's degree by a graduate program. The grade of "R" may be assigned if more than one semester is required to complete the creative component. Upon completion of the creative component, the adviser submits a Change of Grade form to have the final grade entered.

11.5 Pass-No Pass Grading System.
Graduate students may take a course utilizing the Pass-No Pass grading system with the consent of their faculty advisers, but courses taken under this system cannot be used on a Plan of Study to meet graduate degree requirements. A student who chooses the pass-no pass option must do so by the last date on which a course may be added. See section 6.6 "Grades and Grading" in the "University Academic Regulations (p. 810)" chapter of the Catalog.

11.6 Pass-Fail Grading System.
Graduate students may take courses utilizing the Pass-Fail grading system with the consent of their faculty advisers; however, only a limited number of these hours can be used on a Plan of Study to meet graduate degree requirements and these require advance permission of the dean of the Graduate College. Pass-Fail courses are typically internship, practicum, seminar, special problems and student teaching. See section 6.7 "Grades and Grading" in the "University Academic Regulations (p. 810)" chapter of the Catalog.

11.7 Minimum Grade Requirements.
A grade-point average of "B" (3.00) is required to maintain good standing as a graduate student and meet requirements for a degree. No course with a grade of "D" or "F" can be used on the Plan of Study to satisfy the degree course requirements. At the graduate level, a grade of a "D" or "F"
is a failing grade that can result in dismissal by the dean of the Graduate College, regardless of academic standing. In determining whether a student has met minimum requirements for a degree, grades for courses on the Plan of Study are averaged separately from courses not on the Plan of Study. In order to continue enrollment in the Graduate College, a graduate student is expected to maintain a minimum graduate GPA of at least 3.00. In order to receive a degree, a student must have a minimum 3.00 GPA in the coursework listed on the Plan of Study.

No course with a grade below "C" can be used as part of the minimum number of semester credit hours required for the graduate degree.

Some programs have more stringent requirements. The graduate program should be consulted concerning minimum grade requirements.

11.8 Annual Review of Student Progress.
The graduate program in which a student is seeking a graduate degree will provide a mechanism for assessing the student's progress toward degree completion at least once annually. If the student is assessed not to be making adequate progress, then a specific plan to address and correct any inadequacies in progress will be prepared in a written document provided to the student and the dean of the Graduate College annually by June 30. Failure to correct these inadequacies may result in termination from the graduate program and/or Graduate College.

11.9 Academic Progress.
Each semester, the dean of the Graduate College reviews the academic progress of any graduate student who receives a grade of "C" or lower in a class or "UR" in research. Programs are notified which of their students have received a "C" or lower and of the dean of the Graduate College's academic progress decision. At the discretion of the dean of the Graduate College, one of four actions based on the student's current semester performance and past academic history will be taken as follows:

1. Program Notice. The graduate program is notified and is encouraged to review the student's performance to determine if any program intervention is needed.
2. Academic Probation. If a student's overall GPA drops below a 3.00, if a "UR" grade is earned, or if the dean of the Graduate College judges the student's overall academic performance so warrants then s/he is subject to being placed on academic probation. At the discretion of the dean of the Graduate College, probation may be removed at the end of the semester only after the student brings his or her cumulative GPA for courses eligible for graduate credit taken at OSU to 3.0 or greater, earns a SR grade, and/or completes all degree requirements, whichever comes first.
3. No Further Enrollment Without Program Consent (NFEWPC).
   a. If the student was admitted on academic probation and did not meet the requirements of this admission, or
   b. If they have received two consecutive grades of "UR", or
   c. If the student was on academic probation the previous semester, or
   d. If the dean of the Graduate College believes the student's overall academic performance warrants program intervention, then the student is not permitted to enroll further without the consent of the program. To continue in the program, the student must submit a written petition to the dean of the Graduate College requesting reinstatement and outlining a plan to remedy the academic situation. This petition must be accompanied by a letter of support from the unit head or graduate program coordinator. Failure to submit such a reinstatement petition could result in the canceling of any pre-enrollment for the upcoming semester.
4. No Further Enrollment (NFE). The student has consistently performed below the acceptable standards for graduate students. The student is not permitted to continue graduate study at OSU.

11.10 Course Grade Appeals.
A student may appeal a grade given by an instructor in a case in which he or she believes the grade awarded is inconsistent with the announced grading policy. The student should consult the "Student Rights and Responsibilities" or contact the Office of Academic Affairs for information regarding initiating the appeals process.

11.11 Appeals of Research Grades and Non-grade Issues.
A student wishing to appeal a "UR" grade issued for a research course (5000 or 6000), or an academic issue not involving a grade should contact the dean of the Graduate College about the appeals process available to graduate students (http://gradcollege.okstate.edu/content/appeals-policy).

11.12 Advisory Committee Decisions-Criteria for Passing.
In decisions resulting from a vote of a graduate student advisory committee (e.g., PhD candidacy exam, final thesis defense, or approving a dissertation), a pass requires that the thesis/dissertation adviser vote in the affirmative and that no more than one member of the committee dissent. Graduate programs may impose more stringent requirements.

11.13 Discontinuance from a Program.
In instances when a student reaches a situation when it is no longer possible to complete the intended degree (e.g., failure of all permitted attempts of the PhD qualifying exam, comprehensive exam or candidacy exam), and is still in good academic standing with the Graduate College, a domestic student may be considered for transfer to non-degree seeking student status and be subject to all non-degree seeking student rules (including maximum number of hours that can later be used toward a graduate degree or certificate program). If visa restrictions prohibit the student's matriculation as a non-degree seeking student, the Graduate College will inform the Office of International Students and Scholars of the student's impending dismissal from the program; the student will have until the end of the semester to be admitted into another graduate program. This change in status is initiated with a letter from the unit head or graduate program coordinator to the student, copied to the dean of the Graduate College, and should detail the reasons for the student's potential dismissal from the program. In accordance with graduate program policies, students have a limited number of days from the intent to dismiss letter date to initiate the appeals process in the program. Graduate students should contact the dean of the Graduate College about the appeals process (http://gradcollege.okstate.edu/content/appeals-policy).

11.14 Second Graduate Degrees.
The Oklahoma State Regents for Higher Education (OSRHE) do not allow students to obtain a second degree in the same "major" as the first degree, even if the options are different. For example, it is not possible to earn both an MS degree in Physics with an option in Medical Physics and an MS degree in Physics with an option in Optics and Photonics. Completion of requirements for more than one option may be noted on the official transcript, but a second degree will not be awarded. Additionally, because of the OSRHE requirement for a coursework
common core within a master's degree options, it should not be assumed that obtaining an additional option within the same degree program and level will be possible. Careful discussions and planning with the Graduate Program Coordinator prior to admission is imperative, if such study is desired.

11.15 Accelerated Master's Degree.
Accelerated master's degree programs, such as 4+1, offer a streamlined path to a master's degree, reducing the time to earn a master's degree by sharing up to 30 percent of the coursework required for the stand-alone master's degree with the undergraduate degree. For example, a 30-hour master's degree may share 9 credit hours of advanced coursework with the undergraduate degree, while a 45-hour master's degree may share 14 hours. The curriculum of an accelerated master's degree program is designed to fulfill all requirements of both the undergraduate and graduate degrees. All shared courses must be approved for graduate credit and accelerated bachelor-to-master's degree programs require approval of the deans of the Graduate College and the relevant undergraduate College(s).

12.0 Responsible Conduct of Research
All graduate students must complete Responsible Conduct of Research (RCR) training requirements prior to the submission of a Plan of Study. Students should consult with their graduate coordinators as to what these requirements are in their graduate programs. Graduate programs may impose more stringent requirements. A Plan of Study will not be approved by the dean of the Graduate College until the graduate program has certified RCR completion. Information and University policies regarding RCR can be found at https://research.okstate.edu/compliance/policies.html.

12.1 Research Involving Human Subjects.
If the thesis, dissertation, formal report or creative component involves the use of human subjects, the research project is governed by federal regulations that require review by the OSU Institutional Review Board (IRB). Approval to conduct the research must be obtained from the IRB before the research is started.

Failure to obtain IRB approval will result in the University's rejection of the thesis, dissertation, or formal report. While the Graduate College does not monitor the process resulting in a creative component, this does not negate the student's responsibility to obtain IRB approval if human subjects are involved in that creative activity.

This section is meant to be informational only and does not contain a complete description of the IRB review process. All of the forms and guidance for completing the application are available on the IRB Internet site http://irb.okstate.edu/forms.

13.0 Graduation Clearance Process
At the time of enrollment for the last semester or summer session of work toward a degree, graduate students must complete and submit a Graduation Clearance form to the Graduate College before they can submit an Application for Diploma with the Office of the Registrar. The Graduation Clearance form is completed in conjunction with the academic adviser and confirms that a student has met or will meet by the end of the semester in question, all program and Graduate College requirements to earn the degree s/he is seeking. If these requirements are not met, the student must complete a new Graduation Clearance Form and Application for Diploma for a future semester. In order to allow opportunity for any class schedule changes necessitated by the review of the Graduation Clearance Form, this form and the Application for Diploma, should be submitted as early as possible in the graduating semester but no later than the deadlines listed on the Graduate College website.

13.1 Graduate Commencement and Diplomas.
The University holds one Graduate Commencement Ceremony at the close of the fall and spring semesters. Students who plan to meet graduation requirements at the close of the summer session are invited and encouraged to participate in the Graduate Commencement Ceremony at the close of the previous spring semester. Although attendance is not compulsory, the University encourages all candidates for advanced degrees to participate in the Graduate Commencement Ceremony. Candidates should also notify the Office of the Registrar of the address to which the diploma should be mailed.

13.2 Graduate Records and Transcripts.
All permanent records are stored in the Office of the Registrar. Requests for grades, transcripts, diplomas, and degree-completion letters should be made to that office.

A graduate student who does not complete the requirements in time to receive the degree at the end of the semester may secure a statement from the Office of the Registrar when all requirements for the degree have been satisfied. Such a statement will not be issued until all grades for the semester have been recorded.

14.0 Graduate Programs Offered At OSU-Tulsa, Greenwood Campus
OSU offers several graduate degrees and courses in Tulsa. All courses offered by OSU-Tulsa are considered resident credit for degrees granted by OSU. Both current and prospective graduate students are encouraged to utilize the OSU-Tulsa Graduate Student Services Center (GSSC), located in Main Hall 1101. To schedule an appointment with a GSSC representative or to learn more about a graduate program in Tulsa, call 918-594-8445 or email osutgssc@okstate.edu. The graduate degree, graduate certificate and certification programs that OSU offers in Tulsa can be found at http://www.osu-tulsa.okstate.edu.

15.0 Graduate Programs Offered at the OSU Center for Health Sciences in Tulsa
OSU offers specialized graduate programs in athletic training (MAT), biomedical sciences (MS, PhD, and a dual degree tract DO/PhD) forensic sciences (MSFS), and health care administration (MS) through the OSU Center for Health Sciences (CHS).

15.1 Athletic Training.
The Master of Athletic Training (MAT) graduate program in the School of Allied Health at OSU Center for Health Sciences prepares individuals to become competent and independent clinicians who will enhance the quality of patient health care and advance the profession of athletic training through practice and research. The MAT program is currently accredited by the Commission on Accreditation of Athletic Training Education (CAATE). Once accepted into the program, students supervised by a Board of Certification (BOC) Certified Athletic Trainer (AT) or other healthcare provider where they are responsible to provide for the overall health care of patients over the course of their respective seasons
or occupation. Clinical instruction of students is achieved through direct supervision of a licensed healthcare provider.

The curriculum is based in the human sciences with anatomy, physiology, biomechanics, pathology, pharmacology, nutrition and psychology providing the theoretical foundation of student inquiry. Students learn how to apply these theoretical concepts while in the clinical setting learning under licensed physicians, athletic trainers, physical therapists and other allied health care professionals. This balance of theory and practical application prepares students to sit for the Board of Certification examination where upon successful completion, may earn the credentials ATC.

15.2 Biomedical Sciences.
The MS and PhD programs in biomedical sciences are interdisciplinary programs involving the basic biomedical science disciplines of anatomy, biochemistry, cell biology, microbiology, pathology, pharmacology and physiology. The programs consist of core basic sciences medical courses, additional basic sciences graduate courses, research, and thesis for the MS and a dissertation for the PhD. A non-thesis MS is also available.

15.3 Forensic Sciences.
The graduate program in forensic sciences is an interdisciplinary master's program that reflects a broad range of disciplines and offers specialization in both research and non-thesis tracks. All students must satisfactorily complete 39 credit hours to receive the Master of Science in Forensic Sciences.

Students working toward a degree requiring a thesis can specialize in one of four areas: forensic identification through DNA, forensic pathology, forensic psychology, or forensic toxicology. Successful presentation and defense of a thesis is required for a master's degree in these areas.

Non-thesis options include forensic science administration and forensic document examination, with courses in both options offered entirely online. Applicants to the administrative program must have professional experience in a related field, while those entering the document examiner program must be either in training/apprenticeship positions or under the guidance/supervision of a certified document examiner.

15.4 Health Care Administration.
The graduate program requires students to take core courses in health care administration and research methods along with a series of electives selected from applicable courses in business and social sciences. The multidisciplinary approach to the health care administration discipline provides students with a unique perspective on the complex issues facing the profession today.

16.0 Interdisciplinary Graduate Programs Offered at OSU-Stillwater
OSU has a series of interdisciplinary graduate programs designed to provide students with a breadth of knowledge that is not ordinarily found in traditional programs. Descriptions are given below for the following interdisciplinary programs: Environmental Science (MS, PhD), Food Science (MS, PhD), Interdisciplinary Science (MS), International Studies (MS), Photonics (PhD), Plant Science (PhD), and Public Health (MPH).

16.1 Environmental Science.
Scott Stoodley, PhD—Director

Ken Ede, PhD—Director, Professional Science Graduate Program in Environmental Management, OSU-Tulsa
Kerri Hoback—Program Coordinator

The Environmental Science Graduate Program (ESGP) is operated under the administration of the Graduate College at OSU. Due to its interdisciplinary nature, the ESGP attracts and produces students capable of thinking beyond a single discipline. Our unique approach to graduate education offers flexibility with locations in Stillwater and OSU-Tulsa. Our program is one of the oldest programs in the nation having been founded back in 1977. These ESGP graduates have gone on to be leaders in every facet of the environmental field.

Our students are housed in one of many departments including Agricultural Economics, Economics, Leisure Studies, Plant & Soil Sciences, Natural Resources Ecology & Management, Biosystems and Agricultural Engineering, Geology, Geography, Political Science, Educational and School Psychology, School of Teaching and Curriculum Leadership, Sociology, and Zoology. There are over 128 faculty affiliated with the ESGP at OSU and over 70 of these have served as faculty advisers.

We offer our graduate students either a Master of Science or PhD degree. Each student has a unique opportunity to develop a degree plan that specifically addresses their individual career goals. Degree integrity is ensured through the guidance of the student’s graduate adviser and committee.

16.1.1 Programs of Study.
The breadth of offerings at OSU affords flexibility to the student interested in specific environmental career tracks. A student can design a unique degree plan to target a particular focus area that meets his or her professional goals or can follow structured plans recommended for specializations in:

- Environmental Management, Environmental Management-
  Professional Science Masters (PSM), Environmental Education,
  Environmental Policy and Conflict Management, Environmental
  Sustainability, Environmental Chemistry-Toxicology and Risk
  Assessment, and Water and Watershed Management.

The student’s graduate advisory committee assists the student in preparing a Plan of Study to assure focus, breadth and quality.

16.1.2 Program Assessment Portfolio.
The ESGP assesses its curriculum each year to ensure that students are receiving the instruction needed to succeed in environmental careers. To accomplish this assessment, selected environmental faculty members review materials generated by students in the program. Each student must develop and maintain a collection of portfolio materials that demonstrate progress toward the degree. The portfolio must be submitted during the last semester of the student’s enrollment.

16.1.3 Master of Science Degree.
To obtain an MS degree in environmental science, the student must complete a 36-credit hour course of study. This must include fifteen hours of core curriculum (ENVR 5303 Issues in Environmental Sustainability, ENVR 5123 Environmental Problem Analysis, three hours in research methods or statistics, three hours in social science and three hours in natural science). Each student must also either complete a six-hour research thesis, a three-hour research report, or a creative component. The remaining credit hours can be taken as electives that focus on the student’s area of particular interest. Students create their original Plans of Study with the assistance of their adviser and committee. It must be
completed prior to the end of the second semester (excluding summer sessions) of enrollment.

16.1.3.1. Professional Science Master (PSM) option in Environmental Management.

To obtain a non-thesis, industry-focused MS degree recognized by the Commission on Affiliation of PSM Programs students take 21 credit hours of science courses in addition to ENVR 5503 Environmental Management Practicum and ENVR 5510 Environmental Management Internship and Report.

16.1.4 Doctor of Philosophy Degree.
The Doctor of Philosophy degree requires a minimum of 60 credit hours beyond an MS degree. This includes a minimum of 36 to 45 hours of coursework consisting of six hours of a skill component, ENVR 5303 Issues in Environmental Sustainability, ENVR 5123 Environmental Problem Analysis, and ENVR 6011 Survey of Environmental Science. Course hours should reflect the biological, social, and physical aspects of the concentration area. Research and courses should reflect the student’s professional goals. A dissertation (ENVR 6000 Doctoral Research for Dissertation) is required and consists of a minimum of 15 credit hours. At least 75 percent of the courses for the PhD degree must be at the 5000 level or above, including dissertation research hours. The student must successfully pass a written and oral qualifying exam after coursework is completed. Students create their original Plans of Study with the assistance of their adviser and committee. It must be completed prior to the end of the third semester (excluding summer sessions) of enrollment.

16.1.5 Admission.
Each student seeking admission to the Environmental Science Graduate Program must submit the following materials:

1. An official Graduate College application for admission and a nonrefundable fee,
2. Official transcripts for all college level courses,
3. A statement of career goals, including competencies to be gained during program enrollment,
4. Three letters of recommendation discussing the student’s potential for graduate work, and
5. GRE test scores (use institution code 6546 and department code 0502).

International students must also earn a TOEFL score of at least 90iBT/577PBT and submit a financial affidavit for the amount required by OSU. To be admitted, applicants must have earned a college grade-point-average of 3.00 on a 4.00 scale. Students are required to have completed college-level courses that address the fundamentals and principles of chemistry, biology, ecology, and algebra prior to admission.

All applications to the ESGP should be submitted at least 60 days before the opening of the semester in which they wish to enroll. International students should supply all application materials by March 1st for summer enrollment, June 1st for fall enrollment, and October 15th for spring enrollment.

It is recommended that students identify an adviser prior to admission to the program. The ESGP Program Coordinator will assist the student with this process. If the student is unable to identify a permanent adviser, then a temporary adviser may be appointed. However, the student must identify a permanent adviser prior to completion of the ninth credit hour in order to be able to enroll in the following semester.

16.1.6 Financial Assistance.
Graduate research assistantships and other funding opportunities are often available through affiliated environmental science faculty members. The initial application should specify the student’s interest in an assistantship.

Additional information about the environmental science graduate program can be found at esgp.okstate.edu (http://esgp.okstate.edu).

16.2 Food Science.
William McGlynn, PhD—Program Coordinator

The following departments participate in the food science program: Agricultural Economics, Animal Science, Biochemistry and Molecular Biology, Biosystems and Agricultural Engineering, Entomology and Plant Pathology, Horticulture, Plant and Soil Science, and Nutritional Sciences.

Food science is an interdisciplinary graduate program designed to provide an opportunity for students to acquire basic knowledge of the food industry encompassing the biological and physical sciences. The increasing complexity of the problems involved in the safe and secure production, processing, and utilization of food requires us to expand our fundamental knowledge to solve these problems. There is a great demand for personnel with advanced training in the broad area of food science to staff research, production, food safety and quality assurance positions in industry, universities and government.

16.2.1 Program Assessment Portfolio.
Admission to either the Master of Science or Doctor of Philosophy degree program requires an undergraduate major in animal science, biochemistry, dairy science, food science, human nutrition, microbiology or poultry science. Students majoring in other curricula may qualify by remedying specific undergraduate deficiencies as recognized by the student’s graduate committee. A student enrolling in a degree program must have been accepted by an adviser prior to official admission.

The GRE is required for admission, no minimum score is required. Three letters of reference and a personal statement of purpose are also required.

16.3 Interdisciplinary Studies.
Jean Van Delinder, PhD—General Program Coordinator

The Master of Science in Interdisciplinary Studies is for students who wish to increase their competence in a particular thematic area by taking a series of courses in several disciplines. This multidisciplinary approach provides educational opportunities leading to a variety of careers. Interdisciplinary studies consist of no fewer than two separate fields of study. The advisory committee will assist the student in formulating the Plan of Study.

16.3.1 Admission Requirements.
An undergraduate grade-point average of 3.00 is required for unqualified admission. Students with a grade-point average between 2.50 and 3.00 may be admitted on a probationary basis.

Applications to the program should include:

1. a cover letter indicating the personal goals and professional objectives to be obtained from the program;
2. transcripts from all schools previously attended;
3. three letters of recommendation from persons who can describe abilities, interest, and motivation as a student;
4. a proposed course of study with an endorsement from an OSU faculty adviser.

Particular courses are not specified for the degree; the advisory committee can assist in selecting appropriate courses. The course of study must include at least 21 credit hours at the graduate level (5000 or above). Up to nine graduate hours can be transferred from a regionally-accredited graduate program with consent of the advisory committee. The student chooses one of the two master's degree plans:

1. a 30-hour plan, including a six-hour research thesis;
2. a 32-hour plan, non-thesis. May include a culminating experience (e.g., internship, practicum, comprehensive exam, portfolio, or capstone project); may include a final report with no more than three hours of research;

16.4 Photonics.
Al Rosenberger, PhD—Program Coordinator
Rama Ramakumar, PhD—Program Coordinator

OSU offers a multidisciplinary program leading to the PhD degree in photonics. The program draws on the faculties of the departments of Physics and Electrical and Computer Engineering. A student typically chooses either of these as his or her "home department" on the basis of academic background and research interests. A multidisciplinary program of coursework is tailored to the goals of each individual student mentored by a chosen faculty member from the home department and guided by the advisory committee. The PhD program provides a biophotonics specialization with faculty from the departments of Chemistry or Microbiology and Molecular Chemistry, or the College of Veterinary Medicine serving as research advisers. For information regarding the Photonics option in either the MS in Physics or MS in Electrical and Computer Engineering, see the relevant departmental section of the Catalog.

16.4.1 Doctoral Program Requirements.
A total of 72 credit hours beyond the BS (60 beyond the MS) degree are required for the PhD in Photonics. All students must form a preliminary advisory committee to guide them initially in the Photonics PhD program. Eventually a student chooses a permanent research adviser who chairs the graduate research committee. Coursework is taken from the basic and advanced courses offered by the Departments of Physics and Electrical and Computer Engineering. Courses from other departments may also be recommended by the graduate research committee. In addition, students are required to take two or more Photonics tutorials, offered by faculty in their research lab, emphasizing particular research problems and techniques. A preliminary exam is administered usually during the student's second year in the PhD program. Admission to PhD candidacy follows the successful completion of the qualifying exam. The focus of the PhD program is the completion of a faculty directed research project and the defense of the resulting dissertation. A detailed Plan of Study specific to the research specialization chosen is formulated by the student in consultation with the advisory committee.

16.4.2 Research Opportunities.
The faculty emphasizes both basic and applied interdisciplinary research. To accomplish this, in addition to a myriad of state-of-the-art laser systems and computational facilities, the OSU campus houses two molecular beam epitaxial (MBE) growth and analysis facilities and unique optoelectronics THz beam systems. Current research programs include quantum optics, quantum cryptography, "whispering gallery modes," experimental and calculational programs in nanostructured materials, optical fiber communications and optical circuits for computing as well as high speed optoelectronics applications to fundamental and applied problems in the THz frequency range. Other investigations center on the preparation and characterization of specialty-doped insulators and semiconductors for use as lasing materials, non-linear optical crystals for data storage and holographic applications, and photonic-based chemical, physical and biochemical environmental sensors. Research programs in the biomedical applications of lasers at both the basic research and clinical application levels seek to understand the interaction of light with biological materials at the tissue, cellular and molecular levels.

16.4.3 Admission Requirements.
Students with a BS degree in physics, electrical engineering, chemistry (or related fields) are welcome to apply to the PhD photonics program. No additional tests (such as the GRE) are required, but such scores may be submitted in support of an application. A TOEFL score of at least 600 is required of international students.

Applications should include:
1. a cover letter indicating the program of specialization and whether the student wishes to be considered by that program for a fellowship or teaching assistantship;
2. a personal statement of interests and goals, noting especially how they relate to the degree in photonics;
3. transcripts of all previous academic work (an unofficial transcript will suffice for the application; official transcripts are required by the Graduate College after admission.); and
4. the names and email addresses of three persons who have been requested to submit letters of reference.

16.4.4 Financial Aid.
Most students entering the photonics programs are offered a graduate teaching assistantship in their home department. A student pursuing an original research project may receive support as a graduate research assistant (RA) through grants and contracts to the individual faculty member who serves as the adviser.

16.5 Plant Science.
William Henley, PhD—Program Coordinator

Solutions to current problems in plant science often require integration of knowledge from a number of disciplines. The Plant Science program at OSU provides the opportunity for the exceptional Ph.D. student to develop an academic and research program tailored to his or her individual interests and needs. Faculty participating in this program comes from the departments of Plant Biology, Ecology and Evolution, Biochemistry and Molecular Biology, Botany, Entomology and Plant Pathology, Forestry, Horticulture and Landscape Architecture, Microbiology and Molecular Genetics, and Plant and Soil Science. The multidisciplinary nature of this program allows students to experience many facets of plant science and affords them the flexibility to seek employment in a variety of settings in the plant sciences. Students, in consultation with their graduate committees, develop a program in one of three specialization areas (cellular and molecular, organismal or ecological), but are expected to develop a sound foundation across all disciplines of plant study.

16.5.1 Admission Requirements.
Application for admission includes a statement defining plant science interests, a resume, three letters of reference, an abstract of the Master of Science thesis (if applicable), GRE scores (the Advanced Biology GRE is also desirable), and a minimum TOEFL of 88iBT/570PBT. A student must be accepted by a faculty adviser prior to official admission.
16.5.2 Financial Assistance.
Students seeking financial assistance (teaching and/or research assistantships) should inquire directly to the participating department(s) and faculty of interest within the plant science program.

16.6 Public Health.
Julie Croff, MPH, PhD—Program Director

The Master of Public Health (MPH) program focuses on training public health professionals to improve health and wellbeing of rural and underserved populations. Students are encouraged to identify a rural community or underserved population as the focus of class projects. In doing so, students will have the opportunity to assess the needs of that community or population, and to thoughtfully create programs for preventing disease within that community or population. Prevention efforts often include a focus on lifestyle and health behaviors. Current students study health behaviors and health outcome areas that include: the use of alcohol, tobacco, other drugs, mental health, disabilities, zoonotic diseases, nutrition and food security, obesity, physical activity, maternal and child health, teen pregnancy and sexual health. These students are meaningfully engaged with rural communities throughout Oklahoma and underserved populations that include indigenous populations, racial minorities, recent immigrants, and sexual minorities.

16.6.1 Admission Requirements.
Application for admission includes a statement of purpose defining professional goals and interest in public health, a resume, three letters of reference, GRE, MAT, GMAT or MCAT scores.

17.0 Graduate Certificate Programs

Offerings

Graduate certificate programs offer students the opportunity for focused study of a body of knowledge at the graduate level, leading to the award of an academic transcripted academic credential that can be earned in a relatively short time. Graduate certificate programs can serve both as a stepping stone onto more advanced study leading to a master's or doctoral degree or as a stand alone educational achievement to assist an individual in their career. Many OSU graduate certificate programs are offered online or on the graduate-serving campuses (OSU-Stillwater, OSU-Tulsa and Center for Health Sciences in Tulsa). In addition, many graduate certificate programs allow students to enroll as either a certificate-seeking or a degree-seeking graduate student. Certificate-seeking students are not eligible for GTA or GRA positions or associated benefits, but may be eligible for federal financial aid. For the current graduate certificate offerings at OSU please see the Graduate College website for additional information (http://gradcollege.okstate.edu/content/graduate-certificates).

17.1 Admission to a Graduate Certificate Program.
Any student admitted to the Graduate College may apply for admission to a graduate certificate program. Some certificate programs may have additional requirements, such as official scores on a standardized test, letters of recommendation, etc. Contact the appropriate graduate program for specifics.

17.2 Basic Requirements.
A graduate certificate requires completion of a minimum of 12 credit hours of coursework eligible for graduate credit, of which at least two-thirds must be at the 5000-level or above. Specific certificate programs may have more stringent requirements.

Also, see Section 11.2 for the number of times a course can be used in multiple degree Plans of Study.

17.3 Transfer of Courses.
With the approval of the graduate program and the Graduate College, up to three hours of graduate-level credit from another institution may be used toward certificate requirements. The GPA must be at least 3.0 on any transfer credit.

17.4 Academic Standing.
A grade-point average of "B" (3.0) is required on courses applicable to a graduate certificate. No grade lower than a "C" may be used as part of the minimum requirements for the certificate. Individual certificate programs may have more stringent requirements.

17.5 Plan of Study and Certificate Completion Procedures.
Upon application to a graduate certificate program, a student should complete a plan of study listing the courses intended to be used in earning the certificate. This plan must be approved by the graduate program and the Graduate College prior to recording the credential on the student's academic record. During the semester of anticipated certificate completion, the student must complete an Application for Certificate Completion, which is submitted to the Office of the Registrar. This action will cause the graduate certificate to be recorded on the official transcript and a certificate will be printed, provided all requirements have been met.

17.6 Special Program – Certificate Program in Education.

OSU offers Oklahoma State Department of Education-approved post-bachelor's certification programs for elementary school principals, school counselors, reading specialists, library/media specialists, and secondary school principals. Certification is also offered in speech and language pathology and in special education.

Master's degrees are available in most of these programs and doctorates are available in many.

Post-master's level certification programs are available for school superintendents and school psychologists.

Inquiries concerning any aspect of the Professional Education program should be addressed to the Office of Professional Education at 405-744-6252 or the head of the unit/department/school offering the program.

18.0 Graduate Minors

Graduate minors offer students the opportunity to pursue coursework outside, or ancillary to, the requirements for the degree earned. Minors may not be earned independently of a degree granted by OSU. OSU offers graduate minors in the following areas:

- Agribusiness
- Agricultural Economics
- Entomology
- Plant Pathology
- Statistics
18.1 Basic Requirements.
A graduate minor must include between nine and eighteen hours, inclusive, of coursework eligible for graduate credit. At least two-thirds of the applicable coursework must be at the 5000-level or above.

Transfer of courses: No more than one-third of the credit for the minor may be earned through transfer credit of courses taken at other institutions, with the approval of the coordinator of the minor and the dean of the Graduate College. Transfer credit will only be considered if it was earned when the student was post-baccalaureate (i.e., after earning a bachelor’s degree) at another accredited institution. All courses used as transfer credit must have a grade of “B” or better. Grades earned in courses transferred to Oklahoma State University will not be used in calculating the cumulative GPA.

18.2 Academic Standing.
A grade-point average of “B” (3.0) is required on courses applicable to a graduate minor. No grade lower than a “C” may be used as part of the minimum requirements for the minor. Individual minors may have more stringent requirements.

18.3 Plan of Study and Minor Completion Procedures.
Graduate students can declare a minor by entering it in the appropriate section of an original or revised Plan of Study submitted to the Graduate College prior to conferral of the degree. The pursuit of graduate minors is not denoted on the academic transcript while in progress. Graduate students can file for minor completion in the semester that the required courses for that minor will be finished. At that time, the graduate student should ask the coordinator for that minor area to submit a memorandum to the Graduate College certifying the completion of the minor requirements and listing the courses required for the minor. A notation of the minor will be added to the student’s transcript after the conferral of a degree. The courses required for a graduate minor may be included on a Plan of Study for any graduate degree or they may be in addition to the degree requirements, depending on the overlap between the minor and the degree Plan of Study. However, the graduate minor must be earned in an academic field other than the student’s graduate program or degree option (for example, a graduate student who is majoring in economics could not receive a graduate minor in economics).

18.4 Time Limits.
Requirements for the graduate minor must be completed at the time of conferral of the primary degree. All graduate courses used to complete the minor must have been taken within ten years prior to the date of completion of the graduate minor requirements.

18.0 Master’s Degree Programs
19.1 Abbreviations.
MA - Master of Arts
MAG - Master of Agriculture
MAT - Master of Athletic Training
MBA - Master of Business Administration
MEN - Master of Engineering
MFA - Master of Fine Arts
MM - Master of Music
MPH - Master of Public Health
MS - Master of Science

19.2 Current Degree Inventory.
For the current listing of master’s degrees offered at OSU see the Graduate College website: https://gradcollege.okstate.edu/masters-programs.

19.3 Basic Requirements.
The master’s degree may be earned by one of two plans as follows:
Plan I—coursework with thesis. Minimum 30 credit hours consisting of 24 hours of coursework and 6 hours of research or creative component with a grade of “SR.”
Plan II—coursework without thesis. Minimum of 32 credit hours. May include no more than three hours of research or creative component with a grade of “SR.” May include culminating experiences (e.g., formal report, final report, internship, practicum, comprehensive exam, portfolio or capstone project).

The numbers of credits specified for each plan are minimums set by the Graduate College. Graduate program requirements may exceed these minimums.

The graduate program, with the approval of the dean of the Graduate College, decides which alternatives are open to the students. Some graduate programs may require a minimum number of credit hours of upper-division and graduate courses in the major field, including courses taken as an undergraduate.

A student who holds a DVM, MD, DO, DDS, LLB, JD, or equivalent professional degree may receive up to nine hours credit toward a master’s degree, subject to the recommendation of the advisory committee and the approval of the dean of the Graduate College. However, a student receiving this credit may not transfer additional hours to OSU from other graduate programs.

Also, see Section 11.2 for the number of times a course can be used in multiple degree Plans of Study.

19.4 Residence Requirements.
Candidates for a master’s degree must complete a minimum of 21 semester credit hours from OSU if they follow Plan I, or 23 semester credit hours if they follow Plan II. Nine semester credit hours of the 30 or 32 required for the degree may be graduate courses taken at another accredited college or university with appropriate approvals.

19.5 Advisory Committee.
Upon recommendation of the graduate program and approval of the dean of the Graduate College, an advisory committee of no fewer than three voting members will be appointed. The advisory committee must include a minimum of three members of the Graduate Faculty. The chair of the committee need not necessarily serve as the student’s research adviser, but must hold an OSU faculty appointment and have familiarity with the academic requirements of the degree sought. To view the roles and responsibilities associated with members of advisory committees, go to https://gradcollege.okstate.edu/best-practices.

19.6 Level of Courses Applied to Graduate Degree.
Graduate students must complete no fewer than 21 semester credit hours of 5000- and 6000-level courses through OSU as presented on the Plan of Study to meet requirements for the master’s degree.
19.7 Plan of Study.

The Plan of Study for the degree must be submitted online to the Graduate College prior to completion of the second semester of enrollment for a master’s program. The student should develop the Plan of Study with the adviser using the online Plan of Study application (http://planofstudy.okstate.edu). The online submission request requires approval by the advisory committee and the student’s graduate program with final approval by the Graduate College. The Plan of Study is subject to modification. All changes must have the approval of the adviser and the student’s graduate program, and a final Plan of Study incorporating all changes should be submitted to the Graduate College by the posted deadline.

Graduate credit, up to a maximum of nine hours, used to obtain one master’s degree may, with the approval of the advisory committee, be counted toward completion of another master’s degree.

19.8 Major Subject or Field.

A major field of study may cross graduate program lines with approval of the graduate program and dean of the Graduate College.

To receive a master’s degree, the student must have completed in the major field of study a minimum of 16 semester credit hours above the prerequisites required for graduate work in that subject or field.

19.9 Language Requirements.

A candidate for a master’s degree may be required to demonstrate a reading knowledge of a modern foreign language. Any such requirement of the graduate program included on the Plan of Study and is noted at the time the preliminary plan is approved by the student’s adviser.

A foreign language requirement for a master’s degree may be met either by examination or by college credit, according to individual graduate program requirement.

19.10 Written Examinations.

Some graduate programs require a written examination covering the major and minor fields. It is usually taken before the thesis or report has been completed. Arrangements for taking the examination should be made with the graduate program at least three weeks in advance. The written examination must be passed before a final examination is scheduled, if a thesis or report option is used.

A student who fails all or part of the written examination should consult the chair of the examination committee to find out what must be done before taking another examination.

19.11 Thesis.

Any student working on a thesis should obtain a copy of the Graduate College Thesis/Dissertation Handbook available from the Graduate College at http://gradcollege.okstate.edu/tdg. A thesis must conform to the format specifications set forth in this document. The style of the document is to be determined by the advisory committee and should be reflective of publications in the student’s discipline. Any graduate student is writing a thesis must attend a format workshop prior to submission of their final copy. The dates for the workshops are on the Graduate Calendar and a webinar version is available.

It is strongly recommended that a graduate student submit complete copies of his or her thesis to the committee members at least two weeks prior to the defense date, that the defense presentation be publicized, and that the thesis defense occur on a date during the normal academic semesters and sessions. Graduate programs may have additional or more restrictive requirements for thesis defenses.

The student should submit an electronic copy of the final thesis through the OSU electronic submission website. Directions for the website submission are given to the student when he or she submits the Oral Defense Results Form to the Graduate College. In addition, the student must submit to the Graduate College one paper copy of the approval page with all original signatures and the student’s name and eight digit CWID number entered at the top of the page. Both the electronic submission and paper approval page must be received no later than the stated final submission deadline date (see the “Calendar” at the front of the “Graduate College” chapter of the Catalog for dates).

The student must submit to the Graduate College the Formal Report Approval form.

19.13 Final Examination.

If the thesis or report option is used, the student should arrange with the graduate program for the final examination and to distribute a copy as described in the preceding section. The final examination may be oral or written or both.

The final examination is primarily a defense of the thesis or report. If the defense is judged inadequate, a decision on whether to permit re-examination will be made by the advisory committee. Another examination cannot be given for at least two months after a failure, and a graduate program may limit the number of times that the examination may be repeated.

The committee will notify the Graduate College immediately of results of the final examination. Following satisfactory completion of the final examination, the candidate will make changes in the thesis or report as required by the committee and by the Graduate College, and submit it in final form signed by the committee to the Graduate College by the semester deadline.

Please see the Graduate College’s Best Practices: Advisory Committees and Defenses document for additional guidance (https://gradcollege.okstate.edu/best-practices).

20.0 Specialist in Education (EdS) Degree Program

The Specialist in Education degree in School Psychology is conferred as an appropriate recognition of achievement as evidenced by the following:

1. Successful professional performance in the area of the student's specialization.
2. Satisfactory completion of a program of graduate study of approximately two academic years.
3. Satisfactory performance on examinations designed to reveal the student’s understanding of the field of specialization and its relation to other areas.
4. Preparation of a thesis dealing with some aspect of concern to the student’s profession and its defense before a committee of the Graduate Faculty.

20.1 Temporary Adviser.

At the beginning of a student’s Specialist in Education program, the school head will designate a member of the Graduate Faculty to serve as
temporary adviser to the student. The temporary adviser will guide the student in the selection of courses for the first semester.

**20.2 Advisory Committee.**

Upon recommendation of the school head or the graduate committee of the school, an advisory committee of no fewer than three voting members will be appointed by the dean of the Graduate College. At least one member of the advisory committee must be from a school or department outside the student’s major field of study. This committee:

1. conducts the preliminary examination and conference,
2. approves the proposed Plan of Study,
3. supervises the student’s progress in the program,
4. supervises the research, and
5. arranges for and conducts the final examination.

The chair of the committee need not necessarily serve as the student’s research adviser, but must hold an OSU faculty appointment and have familiarity with the academic requirements of the degree sought. To view the roles and responsibilities associated with members of advisory committees, go to http://gradcollege.okstate.edu/faculty-and-staff-resources.

**20.3 Plan of Study.**

The original Plan of Study for the degree must be submitted to the Graduate College prior to the end of the second semester (excluding summer sessions) of enrollment for a specialist in education program. The student should develop the Plan of Study with the adviser using the online Plan of Study application (planofstudy.okstate.edu) (http://planofstudy.okstate.edu). The online submission requires approval by the advisory committee and the student’s graduate program with final approval by the Graduate College.

The Plan of Study may be modified with the approval of the adviser. A final Plan of Study incorporating all changes should be filed in the Graduate College by the eighth week of the semester in which the degree is to be conferred.

**20.4 Credit Hour Requirements.**

A minimum of 60 credit hours beyond the bachelor’s degree or 33 credit hours beyond the master’s degree are required for the Specialist in Education degree. The nature of this exam is determined within each specialization.

**20.5 Character of Work.**

The satisfactory completion of coursework (see “General Regulations”) is only one requirement for receiving the degree. The student must also:

1. pass a qualifying examination,
2. conduct an appropriate study of education,
3. show qualities of professional leadership, and
4. pass a final examination.

**20.6 Residence Requirements.**

While the Graduate College does not have a specific residence requirement that applies to all graduate programs, programs may require a period of time in residence for students enrolled in departmental graduate programs. Programs must inform students of any residence requirements upon their admission to departmental graduate programs. No more than nine hours may be transferred from another university.

**20.7 Qualifying Examination.**

A qualifying examination is required of all candidates for the Specialist in Education degree. The nature of this exam is determined within each specialization.

**20.8 Credit Toward an EdD or a PhD.**

A student holding an EdS may have the credit hour requirements for a PhD or EdD reduced to 30 hours subject to recommendation by the advisory committee and approval of the dean of the Graduate College. However, all of the remaining 30 hours toward the doctoral degree must be taken at the 5000- or 6000-level and all must be taken at OSU.

**21.0 Doctor of Education (EdD) Degree Programs**

The degree of Doctor of Education is a professional degree conferred in recognition of outstanding ability as an educator in some special field or fields as shown by:

1. satisfactory completion of a program of study;
2. passing examinations showing an understanding of the field of specialization and its relation to allied subjects;
3. the preparation of a dissertation demonstrating ability to approach problems with a high degree of originality and independence; and
4. passing an examination covering the dissertation and related fields.

The following EdD degrees are offered:

- Applied Educational Studies (Aviation and Space Education)
- Higher Education
- School Administration

**21.1 Basic Requirements.**

The Doctor of Education degree requires a minimum of 90 semester credit hours beyond the bachelor’s degree, or a minimum of 60 semester credit hours beyond the master’s degree in a related discipline. Courses at the 5000- and 6000-level should make up at least 75 percent of the Plan of Study and must include ten hours, with a grade of “SR,” for the doctoral dissertation. Students may use 90 hours beyond the bachelor’s degree as a degree total only if admitted directly into the doctoral program from the bachelor’s degree.

A student who holds a DVM, MD, DO, DDS, LLB, JD, or equivalent professional degree may also have the minimum credit hour requirement reduced to 60 hours, subject to the recommendation of their advisory committee and the approval of the dean of the Graduate College.

A student may receive only one 30-hour credit reduction in the EdD requirement regardless of the number of master’s or professional degrees that he or she holds.

Also, see Section 11.2 for the number of times a course can be used in multiple degree Plans of Study.

**21.2 Temporary Adviser.**

At the beginning of a student’s doctoral program, the school head will designate a member of the Graduate Faculty to serve as temporary adviser to the student. The temporary adviser will guide the student in the selection of courses for the first semester.
21.3 Advisory Committee.
Upon recommendation of the head of the graduate program and approval of the graduate dean, an advisory committee of no fewer than four voting members will be appointed. The duties of the advisory committee consist of:

1. advising the student,
2. assisting the student in preparing a Plan of Study,
3. assisting in planning and conducting the research,
4. supervising the writing of the dissertation, and
5. conducting the dissertation defense.

The chair of the committee need not necessarily serve as the student’s research adviser, but must hold an OSU faculty appointment, be a member of the Graduate Faculty with doctoral chairing privileges, and have familiarity with the academic requirements of the degree sought. Each doctoral committee must have at least one member of the Graduate Faculty from outside the student’s major department. To view the roles and responsibilities associated with members of advisory committees, go to http://gradcollege.okstate.edu/best-practices.

The student should consult the members of the advisory committee frequently and keep them informed of the progress of his or her work.

21.4 Preliminary Conference.
As soon as the student is notified that an advisory committee has been appointed, the student should arrange with the chair for a conference with the committee. During the conference, the preparation and qualifications of the student for graduate work will be discussed and appropriate plans made for future study.

21.5 Plan of Study.
The student should develop the Plan of Study with the adviser and committee using the online Plan of Study application (http://planoftudy.okstate.edu/). The online submission requires approval by the advisory committee and the student’s graduate program with final approval by the Graduate College.

Because the acceptance of work that the student desires to use toward the degree rests with the advisory committee, it is important to plan a complete program and have it approved by the dean of the Graduate College as soon as possible.

The original Plan of Study must be submitted to the Graduate College prior to the end of the third semester (excluding summer sessions) of enrollment in the doctoral program.

The Plan must include all the acceptable graduate work that has been completed and all that will be taken for the degree. The plan should include:

1. at least 75 percent of courses taken at the 5000-6000 level,
2. a minimum of 60 hours beyond the master’s degree or 30 hours beyond the EdS, and
3. at least 10 hours of dissertation credit. Courses from a master’s degree or EdS are not listed on the doctoral Plan of Study.

Credit for all courses on a graduate Plan of Study must have been awarded within 10 years of completion of all degree requirements.

Changes in the Plan of Study can be made with the approval of the advisory committee and the dean of the Graduate College. A final, accurate and approved plan must be filed by eighth week of the semester in which the degree is to be conferred.

21.6 Character of Work.
The satisfactory completion of coursework (see "General Regulations") is only one requirement for receiving the degree. The student must also:

1. pass a qualifying examination,
2. prepare an acceptable dissertation,
3. demonstrate the ability to do independent study,
4. pass a defense of dissertation, and
5. comply with any other requirements of the major department.

21.7 Residence Requirements.
A minimum of 30 credit hours must be taken at OSU. While the Graduate College does not have a specific residence requirement that applies to all graduate programs, departments may require a period of time in residence for students enrolled in departmental graduate programs. Programs must inform students of any residence requirements upon their admission to graduate programs.

21.8 Language and Research Instruments Proficiency.
All candidates will be expected to have a command of those instruments necessary in the study of educational problems. The doctoral advisory committee of each candidate may require evidence of proficiency in one or more foreign languages, educational research, statistics and computer usage.

21.9 Admission to Doctoral Candidacy.
Admission to doctoral candidacy marks the transition into the research phase of a doctoral degree and indicates agreement that the student has demonstrated the ability to do acceptable graduate work and that satisfactory progress has been made toward a degree. Consideration for candidacy requires the presentation of a written research proposal for doctoral research to the doctoral advisory committee, who will assess the proposal and offer the student pertinent counsel, advice and feedback. The approval of the research proposal by the advisory committee is the basic requirement for admission to doctoral candidacy; individual programs will normally impose additional requirements, such as the successful completion of oral and/or written comprehensive or qualifying examinations. These additional requirements may occur in conjunction with the presentation of the research proposal, or they may occur at different times within the course of doctoral study. Admission to doctoral candidacy is conferred with the approval of the dean of the Graduate College, on behalf of the Graduate Council, acting upon the recommendation of program faculty. It is the responsibility of the chair of the advisory committee to notify the Graduate College when admission to candidacy is granted by submitting the Admission to Doctoral Candidacy form.

21.10 Dissertation Hours Taken as a Doctoral Candidate.
Admission to candidacy must occur at least six months prior to the date of the final dissertation defense. Since admission to candidacy may occur at various times related to the academic calendar, the student will need to be admitted to candidacy early in the fall semester to be eligible to schedule their final dissertation defense and graduate in the spring; very early in the spring semester for summer graduation; and extremely early in the summer session for fall graduation. (See the Graduate College Calendar for term-specific dates.) If a student is admitted to candidacy prior to the first day of a given term, all dissertation hours taken that
term and following may be included in the hours of dissertation research required as a doctoral candidate.

21.11 Dissertation.
A dissertation is required of each candidate for the Doctor of Education degree. The dissertation has three principal functions:

1. training in research,
2. promoting professional growth, and
3. contributing to professional knowledge in education. Not every dissertation will be expected to serve these three functions in the same way or to the same extent.

The format specifications, procedures and regulations for the dissertation are the same as for the PhD. The EdD candidate should refer to the "Doctor of Philosophy" section in the Graduate College chapter of the Catalog on dissertations and submission procedures through the Graduate College. The style of the dissertation is to be determined by the advisory committee and should be reflective of publications in the student’s discipline. Any graduate student is writing a thesis must attend a format workshop prior to submission of their final copy. The dates for the workshops are on the Graduate Calendar and a webinar version is available.

22.0 Doctor of Philosophy (PhD) Degree Programs
The Doctor of Philosophy (PhD) degree is granted in recognition of high achievement in scholarship and independent investigation. The student must prove his or her acceptability by:

1. successfully completing a series of courses comprising a Plan of Study;
2. passing various examinations demonstrating academic competence;
3. carrying out a research program under supervision and preparing an acceptable dissertation; and
4. demonstrating initiative, creative intelligence, and ability to plan and carry out research in his or her chosen field.

22.1 Current Degree Inventory.
For the current listing of doctoral programs offered at OSU see the Graduate College website: https://gradcollege.okstate.edu/doctoral-programs.

22.2 Basic Requirements.
The Doctor of Philosophy degree requires the number of credit hours as specified by the degree program with a minimum of 60 credit hours beyond the bachelor’s degree. These hours must include a minimum of 15 dissertation hours (6000) with a grade of "SR." The maximum number of dissertation hours (6000 with a grade of "SR") permissible on a Plan of Study must not exceed three-fourths of the total credit hours in the approved graduate degree program.

Also, see Section 11.2 for the number of times a course can be used in multiple degree Plans of Study.

22.3 Temporary Adviser.
At the beginning of a student's doctoral program, the graduate program will designate a member of the Graduate Faculty to serve as temporary adviser to the student. The temporary adviser will assist the student in the early selection of courses. Often, it is the graduate coordinator who serves as the temporary adviser.

22.4 Advisory Committee.
Upon recommendation of the graduate program and approval of the dean of the Graduate College, an advisory committee of not fewer than four voting members will be appointed. The duties of the advisory committee consist of:

1. advising the student,
2. assisting the student in preparing a Plan of Study,
3. assisting in planning and conducting the research,
4. supervising the writing of the dissertation, and
5. conducting the dissertation defense.

The chair of the committee need not necessarily serve as the student’s research adviser, but must hold an OSU faculty appointment, be a member of the Graduate Faculty with doctoral chairing privileges, and have familiarity with the academic requirements of the degree sought. Each doctoral committee must have at least one member of the Graduate Faculty from outside the student’s major department. To view the roles and responsibilities associated with members of advisory committees, go to http://gradcollege.okstate.edu/best-practices.

The student should consult the members of the advisory committee frequently and keep them informed on the progress of his or her work.

22.5 Preliminary Conference.
As soon as the student is notified that an advisory committee has been appointed, the student should arrange with the chairperson for a conference with the committee. During the conference, the preparation and qualifications of the student for graduate work will be discussed and appropriate plans made for future study.

22.6 Plan of Study.
The student should develop the Plan of Study with the adviser and committee using the online Plan of Study application (http://planofstudy.okstate.edu/). The online submission requires approval by the advisory committee and the student's graduate program with final approval by the Graduate College.

The original Plan of Study must be submitted to the Graduate College prior to the end of the third semester (excluding summer sessions) of enrollment in the doctoral program. The plan must include all the acceptable graduate work that has been completed and all that will be taken for the doctoral degree.

The Plan of Study must include all the acceptable graduate work that has been completed and all that will be taken for the doctoral degree. The Plan of Study should include:

1. at least 75 percent of courses taken at the 5000-6000 level,
2. a minimum of 60 hours beyond the master’s degree, and
3. a minimum of 15 (maximum of 45) dissertation hours (6000) with a grade of "SR" for the 60 hour doctorate or a minimum of 15 (maximum of 60) dissertation hours (6000) for the 90 hour doctorate.

Courses used to earn a master's degree are not listed on the doctoral Plan of Study. Credit for all courses on a graduate Plan of Study must have been awarded within 10 years of completion of all degree requirements.
Changes in the Plan of Study can be made with the approval of the advisory committee and the dean of the Graduate College. A final, accurate and approved plan must be filed by the eighth week of the semester in which the degree is to be conferred.

22.7 Character of Work.
The satisfactory completion of coursework (see "General Regulations") is only one requirement for receiving the degree. The student must also:

1. pass a qualifying examination,
2. prepare an acceptable dissertation,
3. demonstrate the ability to do independent study,
4. pass a defense of dissertation, and
5. comply with any other requirements of the major department.

22.8 Residence Requirements.
A minimum of 30 credit hours must be taken at OSU. While the Graduate College does not have a specific residence requirement that applies to all graduate programs, graduate programs may require a period of time in residence for students enrolled in departmental graduate programs. Programs must inform students of any residence requirements upon their admission to their graduate programs.

22.9 Language Requirement.
Foreign language or other proficiency requirements may be specified to meet the need for specific skills and areas of knowledge that facilitate research and contribute to wider understanding. Specific requirements are determined by graduate programs. In many fields, a reading knowledge of one or two modern foreign languages is an important part of scholarship and necessary for research. In other fields, proficiency in special and related disciplines may be required that will contribute to the needs of the individual program.

22.10 Admission to Doctoral Candidacy.
Admission to doctoral candidacy marks the transition into the research phase of a doctoral degree and indicates agreement that the student has demonstrated the ability to do acceptable graduate work and that satisfactory progress has been made toward a degree. Consideration for candidacy requires the presentation of a written research proposal for doctoral research to the doctoral advisory committee, who will assess the proposal and offer the student pertinent counsel, advice and feedback. The approval of the research proposal by the advisory committee is the basic requirement for admission to doctoral candidacy; individual programs will normally impose additional requirements, such as the successful completion of oral and/or written comprehensive or qualifying examinations. These additional requirements may occur in conjunction with the presentation of the research proposal, or they may occur at different times within the course of doctoral study. Admission to doctoral candidacy is conferred with the approval of the dean of the Graduate College, on behalf of the Graduate Council, acting upon the recommendation of program faculty. It is the responsibility of the chair of the advisory committee to notify the Graduate College when admission to candidacy is granted by submitting the Admission to Doctoral Candidacy form.

22.11 Dissertation Hours Taken as a Doctoral Candidate.
Admission to candidacy must occur at least six months prior to the date of the final dissertation defense.

Since admission to candidacy may occur at various times related to the academic calendar, the student will need to be admitted to candidacy early in fall semester to be eligible to schedule their final dissertation defense and graduate in the spring; very early in the spring semester for summer graduation; and extremely early in the summer session for fall graduation. See the Graduate College Calendar for term-specific dates.

22.12 Dissertation.
A dissertation (doctoral thesis) is required of each doctoral candidate. The subject of the dissertation must be approved by the advisory committee and the dissertation is prepared under the direction of members of the committee or a special dissertation committee approved by the advisory committee chair.

The dissertation must follow specifications in the Graduate College Thesis/ Dissertation Guidelines, available at http://gradcollege.okstate.edu/tdg. The style of the document is to be determined by the advisory committee and should be reflective of publications in the student’s discipline. Any graduate student is writing a thesis must attend a format workshop prior to submission of their final copy. The dates for the workshops are on the Graduate Calendar and a webinar version is available.

All dissertation copies must have the necessary approval signatures before submission to the Graduate College.

It is strongly recommended that a graduate student submit complete copies of his or her dissertation to the committee members at least two weeks prior to the defense date, that the defense presentation be publicized, and that the dissertation defense occur on a date during the normal academic semesters and sessions. Graduate programs may have additional or more restrictive requirements for dissertation defenses.

The student should submit an electronic copy of the dissertation through the OSU electronic submission website. Instructions for on-line submission are given to the student after completion of the National Survey of Earned Doctorates. In addition, the student must submit to the Graduate College one paper copy of the approval page with all original signatures and the student’s name and CWID number entered at the top of the page. Both the electronic submission and paper approval page must be received no later than the stated final copy submission deadline date (see the Calendar at the front of the “Graduate College” chapter for dates).

22.13 Final Examination.
The student should arrange with the graduate program for the final examination and to distribute a copy of the dissertation as described in the preceding section. The final examination is primarily a defense of the dissertation. If the defense is judged inadequate, a decision on whether to permit re-examination will be made by the advisory committee. Another examination cannot be given for at least two months after a failure, and a graduate program may limit the number of times that the examination may be repeated. If the advisory committee decides against re-examination, the committee’s decision is final. The outcome of the dissertation defense falls under the “professional and scholarly assessment made by faculty and advisory committees” and is not appealable.

The committee will notify the Graduate College immediately of results of the final examination. Following satisfactory completion of the final examination, the candidate will make changes in the dissertation as required by the committee and by the Graduate College and submit it in final form signed by the committee to the Graduate College by the semester deadline.
Please see the Graduate College's Best Practices: Advisory Committees and Defenses document for additional guidance (https://gradcollege.okstate.edu/best-practices).

**Faculty**

The OSU Graduate Faculty are searchable by name and department in the Graduate Faculty Database on the Graduate College Website:  [http://graduatefaculty.okstate.edu/Default.aspx](http://graduatefaculty.okstate.edu/Default.aspx)
The college was founded in 1972 in response to a physician shortage in the small towns and rural areas of Oklahoma. The college opened its doors in 1974 and graduated its first class in 1977. In 1988, the college was merged with Oklahoma State University and confirmed its mission to prepare students to be primary care physicians with emphasis in rural medicine. In 2001, the Oklahoma legislature added another designation by creating the OSU Center for Health Sciences—the umbrella organization for the College of Osteopathic Medicine; and graduate programs in biomedical and forensic sciences, health care administration and athletic training.

The OSU Center for Health Sciences is located on 16 acres along the west bank of the Arkansas River with an impressive view of downtown Tulsa. Modern buildings house conference facilities, a hospital simulation center, expanded classroom space, a medical bookstore and a forensic sciences and biomedical research facility. The OSU Medical Center, located a half-mile north of campus, is the primary teaching hospital for the college. The medical center serves Tulsa and the surrounding communities, and serves as both a teaching clinic for medical students, interns and residents, and a health care resource for residents of Tulsa and the surrounding area. The medical center is a state entity operated by the Oklahoma State University Medical Authority, with management by Saint Francis Health System. The hospital provides comprehensive and specialized health care and is staffed by licensed physicians and other health care professionals who supervise students in the care of patients. The OSU combined clinic system covers a wide variety of specialties. The clinics provide essential health care to the community.

Promoting a patient-centered approach to health care, osteopathic physicians are concerned with the entire patient and traditionally have excelled in general and family health care. The doctor of osteopathic medicine is a fully-trained and licensed physician who selectively utilizes all accepted scientific modalities to maintain and restore health. Osteopathic physicians and surgeons are licensed in every state to practice all phases of medicine, and offer their patients the added dimension of health care through osteopathic manipulation, a hands-on technique that uses palpation and manipulative procedures of the musculoskeletal system to diagnose and treat illness.

**Minimum Admission Requirements**

Prior to matriculation, the applicant must have an overall grade-point average of at least 3.00 (on a 4.00 scale), a pre-professional science GPA of at least 2.75, and a minimum score of 492 on the Medical College Admissions Test (MCAT). All applicants must take the MCAT within three years prior to matriculation. The last MCAT test date accepted for each application cycle is January the year of matriculation. Under special circumstances, the College may use discretion to admit students who do not meet these minimum requirements.

At the time of entry, the applicant must have completed:

1. At least 90 semester hours and not less than 75 percent of the courses required for the baccalaureate degree at a regionally-accredited college or university;
2. Satisfactory completion of the following courses, with no grade below a "C" (2.00 on a 4.00 scale):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>(two semesters)</td>
<td></td>
</tr>
<tr>
<td>Biology</td>
<td>(two semesters), including laboratories</td>
<td></td>
</tr>
<tr>
<td>Physics</td>
<td>(two semesters)</td>
<td></td>
</tr>
</tbody>
</table>
3. Applicants must have taken at least one upper-division (3000-4000 level) science course. Examples include, but are not limited to: biochemistry, comparative anatomy, cellular biology, embryology, microbiology or molecular biology, histology, physiology and genetics.

The annual application deadline is February 28. The deadline for supplemental application materials is March 30.

An on-campus interview with the Applicant Interview Committee is by invitation only. Interviews are conducted by clinical and basic science faculty members, as well as alumni. Applicants must participate in the interview to qualify for further consideration. Interview results and other data submitted will be considered when determining which applicants have demonstrated appropriate levels of scholarship, aptitude and motivation for admission to the program. Class size is limited to 115 students (in 2017).

OSU-COM seeks to admit students who want to become primary care physicians in rural and underserved Oklahoma. The 3+1 Program allows students who want to become dedicated primary care physicians practicing in rural and underserved Oklahoma to complete undergraduate and pre-doctoral training in seven years. For more information on early admissions please visit https://health.okstate.edu/com/admissions/three-one-program.html.

**Selection Factors**

The College considers applications for admission from all qualified candidates. The Oklahoma State University Center for Health Sciences prohibits discrimination against qualified individuals based on their status as protected veterans or individuals with disabilities, and prohibit discrimination against all individuals based on their age, race, color, religion, sex, sexual orientation, gender, gender identity, national origin or ethnicity. Preference is given to Oklahoma residents. Applicants must be U.S. citizens or permanent residents of the U.S. Non-U.S. citizens must have a permanent resident visa (“green card”) at the time of application in order to be considered for admission.

**College Curriculum**

The curriculum at the OSU College of Osteopathic Medicine places significant focus on primary care. The four-year program emphasizes the integration of biomedical sciences with clinical systems. The curriculum includes hands-on clinical experiences with patients, patient models, and simulations. Instructional methods are student-centered and include traditional lecture, and small group and team-based learning. Problem-solving and information retrieval skills are emphasized to produce and develop skills that support lifelong learning.

The culture of the OSU College of Osteopathic Medicine encourages students to establish an academic relationship with faculty members and community-based physicians. The curriculum emphasizes integration of biomedical with clinical and behavioral sciences to permit the full community-based physicians. The curriculum emphasizes integration of biomedical sciences with clinical systems. The curriculum places early hands-on clinical experiences with patients, patient admissions please visit https://health.okstate.edu/com/admissions/3+1-program.html.

**Accreditation**

The college is accredited by the Commission on Osteopathic College Accreditation (COCA) of the American Osteopathic Association, the recognized accrediting agency for institutions that educate osteopathic physicians. The Oklahoma State Regents for Higher Education are empowered by the Oklahoma Constitution to prescribe standards for higher education applicable to each institution in the Oklahoma State System of Higher Education.

**Financial Aid**

Financing a medical education should be seriously considered. The primary responsibility for meeting your educational costs rests with the student and his or her family; however the Office of Student Financial Aid makes every attempt to assist him or her financially.

The Office of Student Financial Aid supports the mission of the University by enabling students and families to reduce or eliminate financial barriers that might prohibit their participation in the programs offered by OSU Center for Health Sciences. The office administers need-based financial aid programs, including grants, scholarships, loans, and work-study opportunities.
aid programs funded by federal, state, University and private sources in the form of Federal Stafford loan (Unsubsidized), Graduate PLUS loan, employment, as well as need- and merit-based scholarships. The office also administers the Federal non-need based loan programs (Unsubsidized) and provides information and support to students interested in the alternative loan options available to them.

Tuition and fees at the College of Osteopathic Medicine (for the 2017-2018 school year) totals $27,425\(^1\) per year for Oklahoma residents and $52,882\(^1\) per year for out-of-state residents.

Most financial aid is renewable on an annual basis, provided there is adequate funding and the student remains eligible (enrolled in a matriculated program, in good academic standing and with continued need for need-based aid). To qualify, each student should file the Free Application for Federal Student Aid (FAFSA) by Feb. 15. Students are encouraged to continue to file after this date; however, consideration for funds will be given on a first-come basis.

The FAFSA and other required applications may be obtained by contacting:

Office of Financial Aid - OSU College of Osteopathic Medicine
1111 West 17th Street
Tulsa, OK 74107-1898;

Students may apply online at www.fafsa.ed.gov/ (http://www.fafsa.gov) (School code is G11282).

\(^1\) subject to change

**Graduate Education**

The Center for Health Sciences offers graduate degree programs in Biomedical Sciences, Forensic Sciences, Health Care Administration and Athletic Training.

The Biomedical Sciences Graduate Program offers PhD, MS, DO/MS and DO/PhD degree programs. These programs provide students with a foundation in biomedical sciences that is broadly applicable to many disciplines, including anatomy, biochemistry, cell biology, microbiology, pathology, pharmacology and physiology.

The Master of Science in Biomedical Sciences offers a thesis and non-thesis option, with both programs designed to be completed in two years with a minimum of 32 credit hours. The PhD program is designed to be completed in four years with a minimum of 90 credit hours. The DO/PhD program is designed to be completed in a minimum of seven years. The first two years are the basic science years of the program. The middle three years are graduate study, research and dissertation of the PhD program. The final two years are the clinical sciences years of the DO program. The DO/MS program is designed to be completed in a minimum of five years. The first year is primarily the graduate portion of the program. The last four years consist of the medical portion of the degree, with any remaining graduate work completed during the first year of medical school and subsequent summers.

The Master of Science in Forensic Sciences requires a minimum of 39 credit hours with the thesis program typically completed in two full years. The MS/thesis program offers specialization in the areas of forensic biology/DNA, forensic pathology/death scene investigation, forensic pathology/microbiology, forensic psychology and forensic toxicology/trace evidence. Full-time thesis students may complete first-year classes online before moving to campus, with permission of the specialization track lead. Non-thesis options in forensic science administration and forensic document examination are designed for practitioners with related professional experience, who complete the degree online, usually over three to four years while maintaining full-time careers. This degree is designed for individuals pursuing careers in crime labs, investigative agencies or research institutions.

The Master of Science in Health Care Administration consists of 32 total hours with a creative component or thesis including six hours of general graduate level electives. The program has an option in healthcare leadership and entrepreneurship or an option in administration. The curriculum provides exposure to management concepts, processes and techniques associated with administration and entrepreneurship functions in a variety of health care organizations. This degree is ideal for those individuals working in health care who wish to move into management or executive positions; however, healthcare experience is not required. This degree offers on-site courses at OSU-Stillwater and OSU-Tulsa as well as distance learning opportunities. This degree can be completed in-class or fully online. The DO/MS program is designed to be completed in five years. The first year is the graduate portion of the program and the last four years consist of the medical portion of the degree.

The DO/MBA is an accelerated program that allows DO students to gain their MBA through the Spears School of Business in a single year. Six hours of elective credit can be shared from the DO coursework or business electives of the student's choice. The DO/MPH is an accelerated program that allows DO students to gain their M.P.H. in one calendar year, by allowing DO coursework to serve as elective coursework for the MPH degree. This 42-hour program captures 27 hours of the MPH's core coursework in the fall and spring semesters with six elective hours taken in the summer.

The Master of Athletic Training Program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). Once accepted into the program, students are assigned to a Board of Certification (BOC) Certified Athletic Trainer (AT) where they are responsible to provide for the overall health care of patients over the course of their respective seasons or occupation. Clinical instruction of students is achieved through direct supervision by health care providers. The curriculum is based in the human sciences with anatomy, physiology, biomechanics, pathology, pharmacology, nutrition and psychology providing the theoretical foundation of student inquiry. Students learn how to apply these theoretical concepts while in the clinical setting learning under licensed physicians, athletic trainers, physical therapists and other allied health care professionals. This balance of theory and practical application prepares students to sit for the Board of Certification examination where upon successful completion, may earn the credentials ATC. Additional information about these programs can be found at: http://www.health.okstate.edu/com/catalog.php.

**Honor and Service Organizations**

The College emphasizes community service, and many students volunteer their time in giving school and athletic physicals, visiting nursing homes, working with school children and working at College-sponsored health fairs or the annual Osteopathic Scrub Run. Listed below are official student organizations.

American College of Osteopathic Emergency Physicians (ACOEP)
American College of Osteopathic Family Physicians (ACOFP)
American College of Osteopathic Pediatricians (ACOP)
American Medical Student Association (AMSA)
American Medical Women’s Association (AMWA)
American Osteopathic College of Physical Medicine and Rehabilitation
Anesthesiology Student Interest Group (ASIG)
Association of Military Osteopathic Physicians and Surgeons (AMOPS)
Association of Native American Medical Students (ANAMS)
Atlas Fraternity—social
Biomedical Science Graduate Student Association (BSGSA)
Business & Leadership in Medical Practice (BLiMP)
Christian Medical Association (CMA)
Club S.P.I.N.E.—fundraising for Eugene Field Elementary Forensic Science Organization (FSO)
Gay & Lesbian Advocacy in Medicine (GLAM)
Health Innovation, Technology, and Entrepreneurship Club (HITEC)
International Federation of Medical Students’ Associations (IFMSA)
Oklahoma Osteopathic Obstetrics and Gynecology Student Association
Pathology & Laboratory Medicine (PLM)
Pros For Africa (PFA)
Sigma Sigma Phi (SSP)—honor society
Society for Career Opportunities and Professional Exploration (SCOPE)
Student American Academy of Osteopathy (SAAO)
Student American Osteopathic Academy of Orthopedics (SAOAO)
Student Association Auxiliary (SAA)
Student Government Association (SGA)
Student Interest Group in Neurology (SIGN)
Student National Medical Association (SNMA)
Student Osteopathic Association for Sports Medicine (SOASM)
Student Osteopathic Association of Radiology (SOAR)
Student Osteopathic Association of Research
Student Osteopathic Internal Medicine Association (SOIMA)
Student Osteopathic Medical Association (SOMA)
Student Osteopathic Physical Medicine and Rehabilitation Association
Student Osteopathic Psychiatry Association (SOPA)
Student Osteopathic Research Association (SORA)
Student Osteopathic Rural Medicine Club (STORM)
Student Osteopathic Surgical Association (SOSA)
Student Political Action Committee
Wilderness Medical Society (WMS)

Faculty
Center for Health Sciences
President of the Center for Health Sciences and Dean of the College of Osteopathic Medicine: Kayse M. Shrum, DO
Provost of the Center for Health Sciences and Senior Associate Dean of Academic Affairs of the College of Osteopathic Medicine: William J. Pettit, DO

Biomedical Sciences and Graduate Studies
Bruce Benjamin, PhD—Vice Provost for Graduate Studies, Associate Dean for Biomedical Sciences

Anatomy and Cell Biology
Kenneth E. Miller PhD—Professor and Chair
Professors: William D. Meek, PhD; Kent S. Smith, PhD
Associate Professors: Anne Weil, PhD; Nedra Wilson, PhD
Assistant Professors: Holly Ballard, PhD; Paul Gignac, PhD; Haley O’Brien, PhD; Dolores Vasquez Sanroman, PhD

Athletic Training
Jennifer L. Volberding, PhD—Associate Professor and Program Director
Associate Professors: Matthew S. O’Brien, PhD; Aric Warren, EdD

Biochemistry and Microbiology
Charles G. Sanny, PhD—Professor and Chair
Professors: Martin W. Banschbach, PhD; Franklin R. Champlin, PhD
Associate Professors: Earl L. Blewett, PhD; Rashmi Kaul, PhD; Gerwald Köhler, PhD

Emergency Medicine
Dennis E. Blankenship, DO—Clinical Associate Professor and Chair
James Herrington, DO—Clinical Assistant Professor and Vice Chair
Clinical Associate Professors: Mark E. Blubaugh, DO; Jennifer Eischen-Galbraith, DO; Gavin Gardner, DO; David Gearhart, DO; Aaron Q. Lane, DO; Michael R. Schiesel, DO
Clinical Assistant Professors: Bobby Abernathy, DO; Tyson Bryant, DO; Michael Cannon, DO; Linden Cowley, DO; Anastasia Fisher, DO; Charles Harris III, DO; Megan Johanning, DO; Mary K. Moore, DO; Kelly A. Murray, PharmD; Zackary Spradlin, DO; Matthew E. Stiger, DO

Family Medicine
Lora D. Cotton, DO—Professor and Interim Chair
Jennifer Alexopoulos, DO—Professor, Medical Education Director, Medical Director
William J. Pettit, DO—Professor, Provost, Senior Associate Dean and Associate Dean for Rural Health
Clinical Professor: LeRoy Young, DO
Associate Professors: Sarah Hall, DO; Regina Lewis, DO
Clinical Assistant Professors: Steffen Carey, DO; Amanda Carey, DO; Crystal M. David, DO; Amanda Gordon Green, DO; Chelsey D. Griffin, DO; Tara B. Hasenpflug, DO; Erin Kratz DO; Andrea E. McEachern, DO; Lana Myers, DO

Forensic Sciences
Robert W. Allen, PhD—Professor, Graduate Program Director and Chair
Professor: Jarrad R. Wagner, PhD
Associate Professor: Ronald R. Thrasher, PhD

Health Care Administration
James Hess, EdD—Professor, Chair and Director

Internal Medicine
Damon L. Baker, DO—Professor, Chair and Chief Medical Officer for OSUMC
Johnny R. Stephens, PharmD—Professor, Senior Vice President and Chief Operating Officer
Gary L. Slick, DO—Professor and Medical Director of OMECO
Jeffrey S. Stroup, PharmD—Professor and Vice President for Strategy
Associate Professor: Mousumi Som, DO
Assistant Professor: Katherine Cook, DO
Clinical Associate Professors: Jay Johnson, DO; Matt Wilkett, DO
Clinical Assistant Professors: John Carabello, DO; Justin Chronister; Stacy Chronister, DO; Christina Connel, PharmD; Sharolyn Cook, DO; Steve Kim, DO; Leonard Lacefield, DO; Madhuri Lad, DO; Kaleb Veit, DO; Daniel Wildes, Jr., DO; William Woods, DO; Shane S. Yamane, DO
Medical Education
Susan Steele, DO—Clinical Associate Professor and Chair
Professors: William Stephen Eddy, DO, MPH; Nancy Van Winkle, PhD
Associate Professor: Sarah Hall, DO
Clinical Professor: Laurie Clark, DO
Clinical Assistant Professors: Jana Baker, DO; Brandy Close, PhD

Obstetrics and Gynecology
Lance Frye, MD—Clinical Associate Professor and Chair
Clinical Professor: William Po, MD
Clinical Assistant Professors: Corey Babb, DO; Erin E. Brown, DO; Carlos M. Guevara, DO; Daniel R. Oraee, DO

Osteopathic Manipulative Medicine
Robin Dyer, DO—Professor and Chair, Associate Dean for Academic Affairs
Clinical Professor: Miriam Mills, MD
Clinical Associate Professor: Mark Thai, DO
Clinical Assistant Professors: Stephen Barnes, DO; Leslie Ching, DO; Amelia McConaghy, DO; Jennifer Wilson, DO

Pathology
Anthony Alfrey, MD—Assistant Professor and Chair
Professor: Joseph Price, PhD
Clinical Assistant Professor: Eric Harp, DO

Pediatrics
Amanda Foster, DO—Professor and Interim Chair
Kaye M. Shrum, DO—President and Dean, Professor
Professor: Rhonda Casey, DO; Shawna Seagraves-Duncan, DO
Clinical Professors: Colony S. Fuguate, DO
Clinical Associate Professors: Travis Campbell, DO; Jeremy Jones, DO; Whitney L. Latham, DO; Heather Rector, DO
Clinical Assistant Professors: Laura Bode, DO; Bing Phung, DO

Pharmacology and Physiology
Alexander Rouch, PhD—Associate Professor and Chair
Bruce Benjamin, PhD—Vice Provost, Associate Dean for Biomedical Sciences, Associate Professor
Professors: Randall L. Davis, PhD; Craig Stevens, PhD; David R. Wallace, PhD
Associate Professors: J. Thomas Curtis, PhD; Kathleen S. Curtis, PhD; Warren E. Finn, PhD; Randy S. Wymore, PhD

Psychiatry and Behavioral Sciences
Jason W. Beaman, DO—Clinical Assistant Professor and Chair
Professor: Vivian M. Stevens, PhD
Clinical Associate Professor: Tessa L. Chesher, DO
Clinical Assistant Professors: Sara M. Coffey, DO; Alicia Ford, PhD; Shannon Hillier, DO; Samuel Martin, MD; Anna Mazur, PhD; Aaron Pierce, DO; Sara Rich, PhD; David B. Ross, MD; Matt Vassar, PhD; Kimberlee Wilson, DO

Radiology
Dean Fullingim, DO—Clinical Professor and Chair
Clinical Assistant Professor: Jeremy Fullingim, DO

Rural Health
William J. Pettit, DO—Professor, Provost, Senior Associate Dean and Associate Dean for Rural Health
Gary L. Slick, DO—Professor and Medical Director of OMECO
Jeff Hackler, JD, MBA—Clinical Assistant Professor and Assistant Dean for Enrollment Management
Denna Wheeler, PhD—Clinical Associate Professor, Interim Assistant to the Dean for Operation and Interim Section Chief
Clinical Assistant Professors: Duane Koehler, DO, Assistant to the Dean; Douglas Nolan, DO; C. Michael Ogle, DO

Surgery
Michael Thomas, MD—Clinical Assistant Professor and Chair
Professors: Brian C. Diener, DO; Douglas C. Foster, DO
Clinical Associate Professor: Laurie A. Duckett, DO
Clinical Assistant Professors: Adam Bradley, DO; Hal H. Robbins, DO; Nathan Roberts, DO
Department of Veterinary Medicine, Oklahoma State University.

Requests for information on pre-veterinary medical study programs or second year of veterinary medical studies. Pre-veterinary curricula are available at Oklahoma State University through the Division of Agricultural Sciences and Natural Resources and through the College of Arts and Sciences. Both offer programs of study in pre-veterinary medical sciences, which provide for the award of a bachelor’s degree after successful completion of the first or second year of veterinary medical studies.

Requests for information on pre-veterinary medical study programs and applications for admission to such programs should be addressed to the dean of either the Division of Agricultural Sciences and Natural Resources or the College of Arts and Sciences.

Listed below are the minimum course prerequisites for consideration for admission to the Center for Veterinary Health Sciences:

- English—nine semester hours including six hours of composition and three hours of an English elective. Course work in speech or technical writing is encouraged.
- Chemistry—general inorganic chemistry including labs (9 hours); an organic chemistry series (8 semester hours) designed for pre-veterinary and pre-medical students that includes both the aliphatic and aromatic compounds or survey course with lab (5-8 hours); and 3 semester hours of biochemistry.
- Physics—Eight hours of general physics.
- Mathematics—three semester hours including statistics.
- Biological science—16 semester hours. Courses in zoology, general biology, microbiology and genetics are required. All courses, except genetics, must include laboratory work.
- Animal Nutrition—three semester hours of the basic principles of animal nutrition, including rumen digestion, absorption and metabolism of the various food nutrients and ration formulation. Courses in human nutrition are not acceptable.
- Humanities and social science—six semester hours.
- Business electives—although not required, courses in business are encouraged.

The information on admission requirements was current at the time of publication but is subject to change. The admission requirements are under annual review and changes may be made at any time.

Scholarships

The College has scholarships which may be available to matriculating veterinary medicine students; many are based on academic achievement.

Application Process

Admission is competitive and enrollment in veterinary medicine is restricted. Applications for admission must be submitted by September 15th, and a new class enters the College each year at the beginning of the subsequent fall semester.

Applicants who are legal residents of Oklahoma will be given first priority. In addition, a limited number of nonresidents will be selected. Questions about residency should be directed to the Office of the Registrar, Oklahoma State University. Requests for application materials should be directed to the Student Services Office, Center for Veterinary Health Sciences.

Students are admitted as candidates for the Doctor of Veterinary Medicine degree on the basis of records of academic performance in preparatory studies, GRE test, and references to determine personal characteristics and career motivation. Details concerning admissions procedures are available via the Center for Veterinary Health Sciences website www.cvhs.okstate.edu (http://www.cvhs.okstate.edu).

The veterinary curriculum extends over four calendar years. The first two academic years conform to the normal semester system of the University. The last two academic years are continuous, with the fourth starting shortly after completion of the third. The fourth year is clinical in nature and classes are primarily in the Boren Veterinary Medical Teaching
Veterinary Medical Research Scholars

Thanks to opportunities in research for veterinary students at OSU, those receiving degrees can qualify for ‘veterinary medical research scholar designation’ on the transcript, a valuable designation to achieve. To be considered, the student must:

a. For a minimum of two semesters or in full-time summer employment, be engaged in and contribute substantively to research or creative inquiry with a faculty mentor and/or faculty-led team. The supervising mentor may be employed at Oklahoma State University or at another university.

b. Present his or her research or creativity project at a state, regional or national conference or juried artistic venues such as art exhibitions, concerts or festivals;

c. Publish his or her work or a manuscript related to the creativity product in a refereed research or professional journal (or have it accepted for publication).

Applicants should apply through the Office of the Associate Dean for Academic Affairs, Center for Veterinary Health Sciences and Recognition at least six weeks before the end of their studies at OSU. A committee appointed by the Faculty Council will examine the materials and determine whether or not the candidate will be approved and recognized.

For further information contact the office at 405.744.6595 or email chris.ross@okstate.edu.

*Board Certification in Specialty Area
Veterinary Biomedical Sciences
Graduate Program

Pamela Lovern, PhD—Associate Professor and Coordinator of Graduate Studies

The veterinary biomedical sciences (VBS) graduate program is a multidisciplinary program intended to provide students a broad base of research areas to address individual student interests. The program is administered within the Center for Veterinary Health Sciences but may involve faculty from other colleges. Programs of research and study leading to the degrees of Master of Science and Doctor of Philosophy are available within the broad areas of focus: infectious diseases, pathobiology, and physiological sciences. The program is designed to prepare individuals for careers in teaching and research, and specialization is possible within each area dependent upon student and faculty interests and available funding.

Current areas of research focus include molecular, cell and developmental biology, clinical sciences (including laser applications and oncology); infectious and parasitic diseases (including vector-borne diseases, bacterial and viral diseases in wild and domestic animals); pathobiology; and toxicology. Faculty and their specific areas of interest are available through the graduate coordinator (vbsc@okstate.edu) or online at https://cvhs.okstate.edu/veterinary-biomedical-sciences-graduate-program.

Prerequisites
Candidates for admission must possess a bachelor’s degree or equivalent, with a background in biological or physical sciences. Although there are no absolute performance level requirements, applicants with quantitative GRE scores at the 75th percentile or greater and GPAs of 3.0 (out of 4.0) or greater, will receive strongest consideration.

The Master of Science Degree
The MS may be earned with 30 credit hours beyond a bachelor’s degree or 21 hours beyond the DVM degree, including not more than six credit hours for the thesis. The plan of study is designed to meet the student’s needs and interests and typically includes two credits of seminar, one course in statistics, and courses in molecular or cell biology and pathophysiology. The student must also pass a final oral examination covering the thesis and related course work.

The Doctor of Philosophy Degree
The PhD requires a minimum of 60 credit hours beyond the bachelor’s degree or DVM degree, including up to 45 credit hours for research and dissertation. The plan of study is designed to meet the student’s needs and interests and typically includes courses in cell and molecular biology, pathophysiology, statistics and seminar. Written and oral qualifying examinations are required. Students must prepare a research proposal and complete and defend a dissertation based on original research.

Application Procedure
Applications are made to the Graduate College (http://gradcollege.okstate.edu/apply) and are accepted at any time; however, all documents should be received prior to March 1st for admission to the fall semester. Applicants are required to submit official transcripts of all college-level work and scores for the GRE general test. International applicants are required to take an English proficiency exam TOEFL or equivalent exam, unless a student is from a country where English is a first language. For students seeking graduate teaching assistantships, a score of 22 or greater on speaking part of the internet-based TOEFL (iBT) is required. In addition, the applicant will submit a statement of purpose stating their preparation for graduate study as well as how earning a graduate degree will further their educational and career goals and will have three persons knowledgeable of their preparation for graduate study write and submit letters of reference.

Information about faculty research interests is available upon request to the graduate coordinator (vbsc@okstate.edu). After acceptance to the graduate program, students select a major professor and an advisory committee and develop a plan of study consistent with the VBS graduate program requirements and subject to approval of the dean of the Graduate College.

Assistantships
A limited number of graduate teaching and research assistantships are available.

Internship and Residency Programs
Internships and residency programs in clinical medicine and surgery are offered through the Department of Veterinary Clinical Sciences. Residency programs in pathology are offered through the Department of Veterinary Pathobiology.

Faculty
Pamela Lovern, PhD—Associate Professor and Coordinator of Graduate Studies
Veterinary Clinical Sciences

Internship and Residency Programs

The department offers graduate professional programs (internships and residencies). Internships are one-year post-DVM clinical programs in small or large animal medicine and surgery.

Internships are designed in part to prepare students for residencies or graduate academic programs. Currently, internships are offered in anesthesiology, small animal medicine and surgery rotating, small animal surgery, equine internal medicine and surgery rotating, shelter medicine, theriogenology, and zoological medicine.

Residencies are three-year clinical programs in various disciplines designed in part to prepare for specialty board certification. Currently, residencies are offered in small animal surgery, small animal internal medicine, diagnostic Imaging/radiology, equine internal medicine, equine surgery, food animal medicine and surgery, and theriogenology. Graduate academic programs may be available in association with residencies.

Application Procedure

Most open positions are listed in the Veterinary Internship/Residency Matching Program at www.virmp.org (http://www.virmp.org) and applications are submitted through the VIRMP.

Faculty

*Daniel J. Burba, DVM, DACVS, McCasland Professor of Biomedical Laser Surgery and Interim Department Head

Regents Professor and Endowed Chairs: Kenneth Bartels, DVM, MS, and Cohn Family Chair for Animal Care (emeritus); *Melanie Boileau, DVM, MS, DACVIM, and Clinical Professorship in the Center for Veterinary Health Sciences; *Daniel J. Burba, DVM, DACVS, and McCasland Endowed Chair; *Danielle Dugat, Cohn Family Chair for Animal Care; Andrew Hanzlicek, DVM, MS, DACVIM, and Kirkpatrick Chair in Small Animal Medicine; *Todd Holbrook, DVM, DACVIM, DACVSMR, and Jack & June Jacobs Chair in Veterinary Medicine; G. Reed Holyoak, DVM, PhD, DACT—Bullock Professor; *Michael D. Lorenz, DVM, DACVIM, and Regents Service Professor (emeritus); *Lara Sypniewski, DVM, DABVP, and Henthorne Clinical Professorship

Professors: *Joseph Alexander, DVM, DACVS (President, CIED) (emeritus); *Kenneth Bartels, DVM, MS (emeritus); *Lionel J. Dawson, BVSc, MS, DACT; *Margi A. Gilmour, DVM, MS, DACVO; *Todd Holbrook, DVM, DACVIM, DACVSMR; G. Reed Holyoak, DVM, PhD, DACT—Bullock Professor; *John P. Hoover, DVM, MS, DACVIM, DABVP (emeritus); *Kip Lemke, DVM, MS, DACVA; *Charles G. MacAllister, DVM, DACVIM (emeritus); *Mark Neer, DVM, DACVIM (emeritus); *Richard Shawley, DVM, MS, DACVA (emeritus)

Associate Professors: *Robert J. Bahr, DVM, DACVR (emeritus); *Melanie Boileau, DVM, MS, DACVIM; *Mary H. Bowles, DVM, DACVIM (emeritus); *Erik Clary, DVM, PhD, DACVS; *Lyndia Gilliam, DVM, DACVIM; *Nicola Di Girolamo, DVM, Msc, PhD, DECZM; *Andrew Hanzlicek, DVM, MS, DACVIM, and Kirkpatrick Chair in Small Animal Medicine; *Henry W. Jann, DVM, MS, DACV, DACVSMR (emeritus); *Meredith Jones, DVM, MS, DACVIM; *John Kirkpatrick, DVM, DABVP (emeritus); Carolyn T. MacAllister, DVM (emeritus); *Gregor L. Morgan, MVSc, PhD, DACT (emeritus); *Michael J. Schoonover, DVM, MS, DACVS, DACVSMR

Assistant Professors: *Ryan Baumwart, DVM, DACVIM; *Cara Blake, DVM, DACVS; *Joao Manuel Lemos Brandao, LMV, MS, DECZM; *Danielle Dugat, DVM, DACVS; Katelyn Fentiman, DVM, MS; *Candace Lyman, DVM, DACT; *Shane Lyon, DVM, DACVIM; *Laura Nafe, DVM, MS, DACVIM; *Emily Sharpe, DVM, DACV, DABVP; *Megan Williams, DVM, DACVS

Clinical Professors: *Marjorie Gross, DVM, MS, DACVA (emeritus)

Clinical Associate Professor: *Patricia Cohn, DVM, PhD, DACLAM, *Paul DeMars, DVM, CABVP; *John Gilliam, DVM, DAVBP, DACVIM; *Robert Streeter, DVM, MS, DACVIM; *Lara A. Sypniewski, DVM, DABVP

Adjunct Associate Professors: Wei R. Chen, PhD; Alex Cohen, M.D. PhD; *William Dubois, DVM, DABVP; *Mark Munson, MD; *Cheryl Lopate, DVM, MS, DACT

Adjunct Assistant Professors: *Kay Backues, DVM, DACMZ; *Jennifer D'Agostino, DVM, DACZM; *Lindsay Donnelly, DVM, MS, DACVIM

Lecturer: Julia Baldighi, DVM, MS, PhD

*Board Certification in Specialty Area
Veterinary Pathobiology

Jerry Ritchey, DVM, PhD, DACVP—Professor and Department Head

Residency Coordinators: Dr. Melanie A. Breshears, Anatomic Residency Coordinator; and Dr. James H. Meinkoth, Clinical Residency Coordinator

Residency programs in anatomic and clinical veterinary pathology are offered. Candidates must have the DVM degree or equivalent. The anatomic and clinical pathology residency programs are three years with options to enter into the PhD program. The programs are designed for those interested in diagnostic veterinary pathology and board certification by the American College of Veterinary Pathologists. Residency training occurs through the Veterinary Medical Teaching Hospital and through the Oklahoma Animal Disease Diagnostic Laboratory. The program involves extensive diagnostic casework on primarily domestic animals and includes weekly case conferences and seminars. In addition, abundant archived materials are available for the specialty board preparation.

Application Procedure

Usually one new residency training position is available each year in anatomic pathology and two of every three years in clinical pathology. Open positions are listed at the ACVP website (https://www.acvp.org/) and typically in the "Educational Opportunities" section of the Journal of the American Veterinary Medical Association.

Faculty

*Jerry Ritchey, DVM, PhD, DACVP—Professor and Department Head

Regents Professors and Endowed Chairs: *Anthony W. Confer, DVM, PhD, DACVP and Walter R. Sitlington Endowed Chair; Clinton J. Jones, PhD, and Sitlington Endowed Chair; *Susan Little, DVM, PhD, DAVPC-Parasitology and Krull/Ewing Endowed Chair

Professors: *Melanie Breshears, DVM, PhD, DACVP; Kenneth Clinkenbeard, DVM, PhD (emeritus); *Jean M. d’Offay, DVM, PhD, DACVM; Richard W. Eberle, PhD; *Robert W. Fulton, DVM, PhD, DACVM (emeritus); Katherine M. Kocan, MSPH, PhD (emerita); *James H. Meinkoth, DVM, PhD, DACVP; *Roger Panciera, DVM, PhD, DACVP (emeritus); Mason Reichard, PhD; *Timothy Snider, DVM, PhD, DACVP

Associate Professors: Tom Oomens, PhD; *Jared Taylor, DVM, MPH, PhD, DACVM, DACVP

Assistant Professors: Kelly Allen, MS, PhD; *Craig Miller, DVM, PhD, DACVP; *Akhilesh Ramachandran, BVSc&AH, PhD, DACVM

Clinical Professors: *Todd Jackson, DVM, DAACLAM; *Theresa Rizzi, DVM, DACVP

Clinical Associate Professors: *Keith Bailey, DVM, PhD, DACVP

Clinical Assistant Professor: *Susan E. Fielder, DVM, DACVP; Yoko Nagamori, DVM; Grant B. Rezabek, DVM, MPH

Associate Research Professor: Edmour Blouin, PhD (emeritus)

Assistant Research Professor: Sahlu Ayalew, PhD

Residents: Rory Chen, DVM; Ryan Kallish, DVM; Maggie McCourt, DVM; Sierra Salopek, DVM; Erin Stayton, DVM

Post-Doctoral Fellows: Kelly Harrison, PhD; Jeff Oster, PhD; Meriam Saleh, PhD; Liqian Zhu, MS, PhD

Graduate Teaching Associates: Nabin Poudel, BVSc; Laximan Sawant, BVSc, MVSc

*Board Certification in Specialty Area
