Requirements for Students Matriculating in or before Academic Year 2018-2019. Learn more about University Academic Regulation 3.1 (p. 812).

Minimum Overall Grade Point Average: 2.00
Total Hours: 120

Purpose
Individualization and flexibility are features of the program leading to the degree of Bachelor of University Studies. The program is designed for goal-directed, motivated, and mature students who find that the present degree programs (majors) at the University will not enable them to attain their educational objectives. The Bachelor of University Studies degree program allows a student to use the total resources of the University available to accomplish unique educational objectives. The program may or may not prepare a student for a particular occupation or for entry into a professional school.

Degree Requirements
1. All students who intend to present a program for the University Studies degree should be enrolled in one of the colleges of the University or the Office of University College Advising.
2. The study plan must include no fewer than 40 upper-division semester credit hours which are selected from two or more disciplines and which in their aggregate comprise a rational combination of concepts and skills.
3. The study plan must meet all general education requirements of the University and the college of enrollment.
4. A minimum of 120 semester credit hours shall be required for granting the degree.

Procedure
Students who believe their educational objectives can best be fulfilled through a Bachelor of University Studies degree program will be responsible for complying with the following procedures:

1. Obtain the declaration of major and plan of study forms for the Bachelor of University Studies from the Director of Student Academic Services in the college that will grant the degree, University College Advising, or the Advising Center at OSU-Tulsa. This form will list the General Education requirements for the college.
2. Meet with an adviser to determine the student’s educational objectives and the two or three areas of concentration.
3. Obtain approval from a departmental representative (faculty member or adviser) if the area of concentration does not represent a minor or certificate.
4. Submit the completed form to the Office of the Dean in the college of enrollment for approval. The form will be forwarded to the Office of the Provost.
5. Any necessary changes in the approved program should be requested by the student through the student’s adviser and dean.
6. Fulfill the approved graduation requirements for the degree and apply for graduation before the final semester of course work.

Additional State/OSU Requirements
- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.

Total Hours: 120

Purpose
The bachelor's degree in multidisciplinary studies is a four-year degree plan for students who find that current University degree programs will not allow them to meet their educational objectives and who wish to tailor course choices to meet individual goals. The program allows students to prepare for professional careers that require extensive knowledge in a broad array of subjects. The multidisciplinary program allows students to focus on two or three areas of study that are selected by the student.

Degree Requirements
1. The student must complete a minimum of 120 semester hours of which at least 40 hours must be upper-division.
2. The major requires two or three areas of concentration. If the student selects two areas of concentration, each area will include at least 27 hours of coursework; for three areas of concentration, each area will include at least 18 hours of coursework. Of the 54 hours of concentration, at least 27 hours must be upper-division. A course may not be used to fulfill the requirements of more than one area of concentration. The remaining course work, to total at least 120 hours, may be selected from different disciplines.
3. Areas of concentration may include coursework from the requirements for a minor or certificate or a group of related courses approved by a departmental representative (faculty member or adviser). A study plan may use 18 hours of ‘major’ courses from an AA, AS or AAS degree to fulfill one of three areas of concentration. The other two areas of concentration will include at least 27 hours of upper-division course work.
4. All students who intend to present a program for multidisciplinary studies must enroll in one of the colleges of the University (select one of the colleges responsible for an area of concentration).
5. The study plan must meet all General Education requirements of the University and the college of enrollment.
6. A multidisciplinary studies faculty advisory committee will oversee program quality and conduct an annual curriculum review.

Procedure
Students who believe their educational objectives can best be fulfilled through a multidisciplinary studies program will be responsible for complying with the following procedures:

1. Obtain the multidisciplinary studies declaration of major and plan of study forms from the Director of Student Academic Services in the college that will grant the degree, University College Advising or the Advising Center at OSU-Tulsa. The form will list the General Education requirements for the college.
2. Meet with an adviser to determine the student’s educational objectives and the two or three areas of concentration.
3. Obtain approval from a departmental representative (faculty member or adviser) if the area of concentration does not represent a minor or certificate.
4. Submit the completed form to the Office of the Dean in the college of enrollment for approval. The form will be forwarded to the Office of the Provost.
5. Any necessary changes in the approved program should be requested by the student through the student’s adviser and dean.
6. Fulfill the approved graduation requirements for the degree and apply for graduation before the final semester of course work.

Additional State/OSU Requirements
- At least: 60 hours at a four-year institution; 30 hours completed at OSU; 15 of the final 30 or 50% of the upper-division hours in the major field completed at OSU.
- Limit of: one-half of major course requirements as transfer work; one-fourth of hours earned by correspondence; 8 transfer correspondence hours.
- Students will be held responsible for degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation.
- Degrees that follow this plan must be completed by the end of Summer 2024.
UNIVERSITY ACADEMIC REGULATIONS

In addition to these minimal regulations, additional college, department or program requirements may apply. Students are advised to review all steps of their academic progress with their academic adviser.

1. Admission, Academic Standing and Withdrawal

1.1 Admission of Freshmen

Policies and procedures governing the admission of new freshmen are detailed in another section of the Catalog. (See "Undergraduate Admissions (p. 22)."

Assessment/Course Placement

To help insure that students possess the skills necessary to be successful in college, the Oklahoma State Regents for Higher Education require students to obtain a 19 ACT subject area score(s) in science reasoning, mathematics, and English to enroll in course work in the respective subject area(s). Students must score 19 or higher in reading to enroll in courses that require extensive reading. Students scoring below 19 will be required to remediate in the discipline area (UNIV courses with course numbers beginning with 0) or undergo additional testing to determine the level of readiness for college level work. Students must pass developmental courses within the first 24 hours attempted or have all subsequent enrollments restricted to developmental courses until the deficiencies are removed. If a student fails to remediate in a single subject within the 24 hour limit and is in good academic standing, the adviser and dean may recommend to the Provost that the student be allowed to continue to enroll in college level courses in addition to developmental courses.

1.2 Admission of Transfer Students

Policies and procedures governing the admission of transfer students are detailed in another section of the Catalog. (See "Undergraduate Admissions (p. 22)."

1.3 Admission to Certain Professional Programs

Admission to certain programs as approved by the University may be restricted. (See "Undergraduate Admissions (p. 22)" and appropriate college sections in the Catalog.)

1.4 English Proficiency Requirement

As a condition of admission to undergraduate study at OSU, all persons for whom English is a second language shall be required to present evidence of English proficiency. (See "Undergraduate Admissions (p. 22)."

1.5 Satisfactory Academic Progress

Students not under academic suspension from the University are judged to be making satisfactory progress toward their educational objectives. They are eligible to enroll in any of the undergraduate colleges except as may be restricted. (See Academic Regulation 1.3 Admission to Certain Professional Programs.)

1.6 Good Academic Standing and Scholastic Requirements for Continuing Enrollment of a Student Under Academic Probation in an Undergraduate College

Undergraduate students must meet the GPA requirements below to be in good academic standing. Each college, department, or academic program within OSU may require higher standards for admission, retention, or good academic standing.

<table>
<thead>
<tr>

</tr>
<tr>

</tr>
</tbody>
</table>

Any student not maintaining an overall GPA as indicated above will be placed on probation for one semester. At the end of that semester, he or she must have a current term (semester) GPA of 2.00, not to include physical education activity (leisure) or developmental courses, or meet the minimum standard required above, in order to continue as a student.

First year students (30 or fewer credit hours, as defined by OSRHE policy) with an overall GPA of 1.70 to less than 2.00 will be placed on academic notice. These students should remain in contact with their student academic services offices regarding special academic support services and procedures.

See Academic Regulation 6.4: Grade-Point Average Calculations for a description of overall and current term GPA calculations. These calculations are made three times per year, to coincide with the conclusion of the fall and spring semesters, and the collective summer term. Grades submitted after these calculations are carried forward to the next calculation. (See also Academic Regulation 6.13 Academic Forgiveness.)

A student enrolling on probation should seek help from an academic adviser and a counselor in the University Counseling Services when deciding on an academic load and extracurricular activities.

1.7 Academic Suspension

A student on probation will be suspended when he or she earns a current term (semester) GPA of less than a 2.00 in regularly-graded course work not including physical education activity (leisure) or developmental courses, and the overall grade-point average falls below the following. See Academic Regulation 6.4: Grade-Point Average Calculations for a description of overall and term GPA calculations.

1.8 Reinstatement after Academic Suspension

A student who has been suspended from the University for academic reasons may not be readmitted until one regular semester (fall or spring) has elapsed (unless the faculty appeals committee grants immediate reinstatement). Students who wish to appeal suspension status should inquire about procedures and deadlines from their adviser or the Office of Academic Affairs. Students who were concurrently enrolled in another college or university during the semester may appeal the suspension by submitting an official transcript from the institution. Procedures and
deadlines for appealing may be obtained from the Office of Academic Affairs.

Readmission after one regular semester (fall or spring) has elapsed will be considered on the merits of the individual case. Suspended students can be readmitted only one time. If a student is suspended a second time, he or she must attend another institution and raise the overall (retention/graduation) GPA before readmission to OSU can be considered.

A student with 90 or more hours in a specified degree program who has been academically suspended may enroll, at the discretion of the institution, in up to 15 additional credit hours in a further attempt to achieve the requirements for retention. During these 15 hours of enrollment, the student must achieve a minimum 2.00 current term (semester) GPA at the end of each term or must raise the overall (retention) GPA to 2.00 or above to avoid suspension. This senior suspension exception must be approved by the Director of Student Academic Services or Associate Dean for Instruction in the student’s college in the form of a letter to the Registrar. This option can be exercised only once per student.

A student suspended from OSU at the end of the spring semester may continue in the summer semester at OSU if this spring suspension was the student’s first suspension. The student must complete a minimum of six hours and must achieve a 2.00 current term (summer semester) GPA, or raise the overall (retention/graduation) GPA to the OSRHE standard, in order to continue in the subsequent fall semester. The student should contact his or her dean’s office for additional information and restrictions. (See also Academic Regulation 1.7 Academic Suspension.)

1.9 Readmission

An undergraduate student who has attended OSU but was not enrolled during the immediate past semester (except the summer session) must submit an updated Application for Admission and current application fee. A student who has enrolled in another college or university since last attending OSU must submit a transcript from each school. Admission status will be determined after an evaluation of the previous work has been made.

1.10 Cancelling Enrollment and Withdrawing from the University

Enrollment cancellation occurs when a student drops all classes before classes begin, that is, before the applicable semester or session begins. Student requests to cancel enrollment must be received by the Office of the Registrar before the first day of classes for the term. Enrollment changes, such as cancelling enrollment or withdrawing from the University are the responsibility of the student. Failure to attend classes or nonpayment of tuition and fees does not constitute notice of cancellation.

Withdrawing from the University occurs when a student drops all classes after classes begin, that is, after the applicable semester or session begins. The withdrawal process is initiated with the student’s academic adviser or in the student’s academic student services office. International students must also consult with International Students and Scholars (ISS) before dropping courses or withdrawing for the semester. Under reporting regulations required by the Student and Exchange Visitor Information System (SEVIS), dropping below full-time can put a student’s visa status in jeopardy.

General cancellation and withdrawal periods are provided in the table below. The Academic Calendar provides specific dates for each term. Exceptions to these deadlines may be considered by petition due to documented extraordinary circumstances and committee approval. The Retroactive Drop/Withdraw Petition and the Petition for a Refund of Tuition and Fees are available on the Registrar website (registrar.okstate.edu (http://registrar.okstate.edu)).

Summer courses, intersession courses, and other courses that do not extend through the entire 16-week semester follow proportionate cancellation/withdrawal/refund periods.

2. Student Status

2.1 Classification of Students

Undergraduate classification is determined by the criteria below:

<table>
<thead>
<tr>
<th>Classification</th>
<th>Credit Hours Earned</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>fewer than 30 semester credit hours</td>
</tr>
<tr>
<td>Sophomore</td>
<td>30 to 59 semester credit hours</td>
</tr>
<tr>
<td>Junior</td>
<td>60 to 89 semester credit hours</td>
</tr>
<tr>
<td>Senior</td>
<td>90 or more semester credit hours</td>
</tr>
</tbody>
</table>

These hours are calculated based on overall (retention) hours earned.

2.2 Full-Time Students

Undergraduate students who are enrolled in 12 or more semester credit hours (six or more for the summer session) are classified as “full-time” students. Graduate students enrolled in nine or more semester credit hours (three or more for the summer session) are classified as “full-time.”

Credit hours offered through correspondence study are not counted toward full-time status, unless the course is independent study taken through regular enrollment.

Students engaged in an internship or cooperative education program assignment that requires full-time work on the assignment are regarded as full-time students when they are enrolled in the number of credit hours deemed appropriate for the academic credit they receive for the assignment.

A student holding a 0.50 FTE Graduate Teaching/Research Associate/Assistant (GTA or GRA) appointment who is enrolled in a minimum of six hours during the fall or spring semester and two hours during the summer semester will be certified as a full-time graduate student. Any FTE appointment less than 0.50 requires nine hours of enrollment for the fall or spring semester and three hours of enrollment for the summer semester in order for the student to be classified as a full-time student.
There is no reduction in credit hour requirements in the final semester of enrollment for GTAs or GRAs.

A student enrolled for the final semester of a bachelor’s degree program may be classified as a full-time student if enrolled in fewer than 12 hours during that semester.

**Doctoral Candidacy Enrollment Requirements**

Doctoral students who have completed the requirements for admission to doctoral candidacy and have their “Admission to Doctoral Candidacy” form approved by the Graduate College may enroll for a minimum of at least two credit hours during any term and be considered full-time. This post-candidacy reduced enrollment option applies to all qualified graduate students, including GTAs, GRAs, international students and veterans receiving VA benefits. A student is normally expected to enroll primarily in research hours or in program-approved courses after being admitted to doctoral candidacy.

**2.3 Part-Time Students**

Students who are enrolled but not meeting the definition of full-time students are classified as “part-time.” Undergraduate students are classified as “half-time” if they are enrolled in six hours in a regular semester (or three hours in a summer session). Graduate students are classified as “half-time” if they are enrolled in four hours in a regular semester (or two hours in a summer session).

**2.4 Special Students**

A student who does not have immediate plans to enter a degree program but wants to take courses may be classified as a "special student.” A student on an F-1 visa may not enroll as a special student since he or she must be admitted to a degree program.

**3. Undergraduate Degree Requirements**

**3.1 Date of Matriculation**

A student's matriculation date is associated with his or her first term after high school graduation as an admitted student in an accredited institution of higher education. That date will be used in calculating the time limit for the use of a given plan of study.

**3.2 Changes in Degree Requirements**

A student generally follows the degree requirements associated with his or her matriculation year. Although the curriculum may be revised before a student graduates, students will be held responsible for the degree requirements in effect at the time of matriculation and any changes that are made, so long as these changes do not result in semester credit hours being added or do not delay graduation. A student has the option of adopting the new degree requirements that have been established since matriculation. The time limit for following a given undergraduate degree program is six years. Time limits for graduate degrees are described under "Academic Regulations" in the "Graduate College (p. 1673)" section of the Catalog.

**3.3 The Honors College**

(See the "Honors College (p. 1672)" section of the Catalog.)

**3.4 General Education Requirements**

In keeping with State Regents policy, every OSU undergraduate degree includes a 40-credit-hour general education core that meets the requirements specified in the following table. Degree requirements may exceed the minimum criteria stated below. Courses that carry general education designations are identified in the student information system and the Courses section of the Catalog. Physical education/leisure activity courses may not be used to meet general education requirements.

The University requires a minimum of six semester credit hours in English composition. The use of computers is an integral part of the degree program. The Oklahoma State Regents for Higher Education require computer proficiency prior to graduation. The use of computers is an integral part of every OSU degree program; hence a student demonstrates proficiency by satisfactorily completing degree requirements.

### 3.5 English Composition Requirement

The University requires a minimum of six semester credit hours in English composition for a baccalaureate degree. The required sequence of courses is ENGL 1113 Composition I and ENGL 1213 Composition II. For those who qualify, ENGL 1123 International Freshman Composition I or ENGL 1313 Critical Analysis and Writing I may be substituted for ENGL 1113 Composition I. Students who earn an "A" or "B" in ENGL 1113 Composition I (or ENGL 1123 International Freshman Composition I or ENGL 1313 Critical Analysis and Writing I) or who earn three semester credit hours in English composition through credit by exam, and who have the consent of their college, may substitute ENGL 3323 Technical Writing for ENGL 1213 Composition II. Students who qualify may substitute ENGL 1223 International Freshman Composition II or ENGL 1413 Critical Analysis and Writing II for ENGL 1213 Composition II. A third course may be required by the student’s college to satisfy either an additional composition or oral communication requirement.

### 3.6 Substitution of Required Courses

A course substitution is a specific course that takes the place of a required course on a degree plan because it meets the content and/or spirit of the requirement. Individual colleges have the authority to approve substitutions for required courses on degree plans with two exceptions:

1. Substitutions related to university general education requirements require approval from Academic Affairs (see Academic Regulation 3.4), with the exception of the English composition substitutions described in Academic Regulation 3.6;
2. A lower-division course may not be substituted for an upper-division course to meet degree requirements.

### 3.7 Waiving of Required Courses

A course waiver excuses a student from completing a required course on a degree plan because the student has fulfilled the content requirement of the course by completing other courses or academic experiences. A course waiver does not result in awarding credit hours and consequently does not reduce the number of semester credit hours required for the degree or for any other degree-related requirements. A maximum of six semester credit hours may be waived, and waiver approval is granted only in special circumstances. Required courses in English, American history and American government cannot be waived. Waivers must be approved by the student’s adviser, the head of the student’s major department and the dean of the college. Waivers involving university general education requirements must in addition be approved by Academic Affairs.

### 3.8 Changing Majors

Students are advised to select a specific major no later than the end of the sophomore year. Students on probation, or not making satisfactory progress toward a degree, may change majors only with the approval of the dean of the college. Waivers involving university general education requirements must in addition be approved by Academic Affairs.

### 3.9 Deadline for Completion of Requirements

Degrees are conferred only on specific commencement dates. If a student completes requirements for a degree after a commencement date, the degree will be granted at the next scheduled commencement after the student files a graduation application. (See Academic Regulation 7.8 Graduation Application.) The student may request a certified statement of completion of graduation requirements from the Office of the Registrar.

### 3.10 Second Baccalaureate Degree

A student who receives a baccalaureate degree from OSU may use all applicable courses toward a second baccalaureate degree. An additional
baccalaureate degree may not be earned in the same major as the first degree, even if the option is different. For example, it is not possible to earn both a BS degree in Sociology with an option in Anthropology and a BS degree in Sociology with an option in Applied Sociology. Completion of requirements for more than one concentration may be noted on the official transcript, but a second degree will not be awarded. The Bachelor of University Studies cannot be earned as a second or concurrent OSU baccalaureate degree.

Second Graduate Degrees
The Oklahoma State Regents for Higher Education (OSRHE) do not allow students to obtain a second degree in the same “major” as the first degree, even if the options/concentrations are different. For example, it is not possible to earn both an MS degree in Physics with a concentration in Medical Physics and an MS degree in Physics with a concentration in Optics and Photonics. Completion of requirements for more than one concentration may be noted on the official transcript, but a second degree will not be awarded. Additionally, because of the OSRHE requirement for a coursework common core within a master’s degree options, it should not be assumed that obtaining an additional option/concentration within the same degree program and level will be possible. Careful discussions and planning with the Graduate Program Coordinator prior to admission is imperative, if such study is desired.

3.11 Double Majors and Minors
A double major can be earned by satisfying the primary major’s degree requirements and the major requirements for the second major plus any additional college/departmental requirements from the second major degree plan if deemed appropriate by the college home of the second major. If the general education courses are met from one college, they do not need to be met for the second major if it is in another college. The second major does not necessarily require hours above the minimum required for the first major. Whether additional hours are required generally depends upon the number of electives allowed by the first major and the extent of overlap between courses in the two majors.

Minors are available for many fields of study. A list of current minors and their requirements can be found on the Degree Requirements page of the Registrar’s website and in the “Minors and Certificates” section of the Catalog. Undergraduate minors may not duplicate majors or options/concentrations within a student’s curriculum (for example, a student who earns a BA in Art with an Art History concentration may earn a minor in Studio Art but not Art History).

All components of a student’s curriculum, including multiple majors and/or minors, will be noted on the student’s transcript while in-progress. Students should contact their college Student Academic Services office for information on adding or removing additional majors or minors from their curriculum.

3.12 Pre-Finals Week
Final examinations are scheduled at the end of each semester and are preceded by pre-finals week, which begins seven days prior to the first day of finals. During pre-finals week, all normal class activities will continue; however, no assignment, test or examination accounting for more than five percent of the course grade may be given; and no activity or field trip may be scheduled that conflicts with another class. This excludes makeup and laboratory examinations, out-of-class assignments or projects made prior to pre-finals week, and independent study courses. No student or campus organization may hold meetings, banquets, receptions, or may sponsor or participate in any activity, program, or related function that requires student participation. Additional information may be obtained from the student services office of each college or the Office of Academic Affairs.

3.13 Final Exam Overload
In the event that a student has three or more final exams scheduled for a single day, that student is entitled to arrange with the faculty member instructing the highest numbered course (based on the 4-digit course number) to reschedule that examination at a time of mutual convenience during final exam week. (Common final exams are not among those to be rescheduled unless two common exams are scheduled at the same time.) The affected student should submit to the instructor a written request to take the affected exam at a different time at least two weeks prior to the beginning of final exam week. In seeking to provide relief to the student, the instructor may request that the student provide a copy of his or her schedule to confirm the difficulty. The instructor has one week prior to the beginning of final exam week to arrange a mutually convenient time for administration of the final exam, after which the student may take the request to the instructor’s department head.

4. Credits
4.1 Residence Credit
Residence credit is awarded for work taken on campus (not through correspondence or credit earned by examination) or at a location officially designated as a residence center by the governing board of the institution (e.g., in-state military bases and OSU courses at OSU-Tulsa.)

4.2 Credit Earned Through Outreach and Correspondence
Outreach Credit
Outreach credit is earned by OSU-admitted students who complete credit courses offered during normal academic terms through OSU academic outreach programs. Outreach courses are also referred to as “electronically delivered” and “traditional off-campus courses and programs” in State Regents’ policy. OSU accepts transfer outreach credit from other accredited institutions. Outreach credit is fully applicable toward the satisfaction of requirements for academic degrees and certificates consistent with State Regents’ and institutional residence and degree requirements.

Correspondence Credit
Correspondence credit is earned by students who complete year-long correspondence study courses offered through Office of Individual Study. Admission to OSU is not required to earn correspondence credit unless the student intends to apply the credits toward an OSU degree. OSU will accept, toward a degree, a maximum of eight transfer semester credit hours earned through correspondence study from other accredited institutions. Credits earned through correspondence study cannot exceed one-fourth of the credits required for a baccalaureate degree. (See also Academic Regulations 2.2, 4.1, 5.5, and 6.11.)

4.3 Transfer Credit from Other Accredited Four-Year Institutions
Except as excluded in Academic Regulations 4.4 Transfer of Credit from Community Colleges and 7.2 Residence Credit Requirements, credits transferred from accredited senior colleges will apply toward baccalaureate degrees in the same way that they would apply had they been earned in residence at OSU. Students may not use transfer credits to satisfy more than one-half the major course requirements for a department unless they have the approval of the head of that department and the academic dean.
4.4 Transfer Credit from Community Colleges

Credits will be accepted by transfer from a community college to meet lower-division (i.e., 1000- and 2000-level courses) requirements only. A minimum of 60 semester credit hours must be earned at a senior college. Within these guidelines, transfer credits are subject to the individual colleges’ degree requirements.

4.5 Transfer Credit from International Colleges and Universities

Credit is accepted based on equivalent standards as outlined in Academic Regulations 4.3 and 4.4. Credit is accepted based on the U.S. letter grade equivalents for the post-secondary grading method used in each country of study.

4.6 Credit by Exam

The academic regulations listed below apply to the following examinations: Advanced Placement Program (AP), International Baccalaureate Program (IB), College Level Examination Program (CLEP), and OSU Advanced Standing Examinations.

- a. credit earned by examination will be recorded on a student’s OSU transcript with a neutral grade of “CBE-P” (Pass) if the student earns the equivalent of a “C” or better on the examination. No grade is recorded if the student fails the exam;
- b. credit earned by examination does not count toward the minimum of 30 hours that must be earned in residence (See Academic Regulation 7.2 Residence Credit Requirements);
- c. a native speaker of a foreign language (one whose high-school level instruction was conducted principally in that language) cannot earn credit toward graduation in lower-division (1000-2000 level) courses in that language (See Academic Regulation 4.9 Foreign Language Credit for Native Speakers);

OSU Advanced Standing Examinations may be offered by academic departments on campus in subject areas not offered through the examination programs listed above. Any currently enrolled student whose travel, employment, extensive readings or educational experience appear to have given the student proficiency in a subject that is offered at OSU, equivalent to the proficiency ordinarily expected of those students who take the subject in a regular class, may apply for an examination on the subject.

In addition to the regulations listed above, to qualify for an OSU Advanced Standing Examination the student must:

- a. be enrolled at OSU;
- b. not have taken an Advanced Standing exam over the course within the preceding six months;
- c. receive the approval of the head of the department and the associate dean in which the course is offered;
- d. present a valid student I.D. at the examination.

Information pertaining to OSU Advanced Standing Examinations may be obtained from the Office of Undergraduate Admissions.

Military Credit

OSU accepts credit as recommended by the American Council on Education (ACE), as published in "The Guide to the Evaluation of Military Experiences in the Armed Services," for selected educational experiences provided by the armed forces. OSU also accepts credit earned through the DSST exams (DANTES Subject Standardized tests) for active veteran and dependent military personnel.

Students who wish to establish credit for military training should request and submit a copy of their JST (Joint Services Transcript) and/or a DSST transcript to the Office of Undergraduate Admissions for evaluation.

Training Programs

OSU awards credit as recommended by the American Council on Education (ACE) in the "National Guide to Educational Credit for Training Programs." Students may present certificates of completion or a transcript from the ACE Registry of Credit Recommendations to the Office of Undergraduate Admissions for evaluation. OSU also awards credit based on the recommendation of the Board of Regents of the University of the State of New York in the NCCRS (National College Credit Recommendation Service, formerly National PONSI).

4.7 Graduate Credit Hours for a Senior

An OSU undergraduate senior may take a limited number of courses for graduate credit toward an OSU degree program. Undergraduates admitted to an approved OSU accelerated master’s degree program may utilize some of these credits for both a baccalaureate degree and graduate degree as outlined in section 11.15 of the Graduate College section of the University Catalog. All other undergraduates are subject to the graduate credit rules below.

The credits may not be utilized for both a baccalaureate degree and a graduate degree. The courses in question must be approved for graduate credit (as listed in the Course Catalog). The applicability of such graduate courses to a specific graduate program will be determined by the student’s graduate advisory committee when the student enrolls in the Graduate College and submits a plan of study for an advanced degree.

To receive credit, a Graduate Credit for Seniors form must be completed by the student to receive graduate credit for courses taken. This form must be submitted to the Graduate College prior to the end of the second week of class instruction of a regular semester, or the first week of a regular summer session. The required form is available on the Graduate College’s website or in the Graduate College.

Such credit may be earned only if the following conditions are satisfied at the time of application:

1. Students must have a minimum overall (cumulative graduation/retention) undergraduate GPA of 3.00.
2. The total enrollment must not exceed 18 credit hours for a regular semester or nine credit hours for a summer session.
3. The student must be within 12 semester credit hours of completing requirements for the baccalaureate degree at the beginning of the semester or summer session in which courses are taken for graduate credit.
4. Admission to courses taken for graduate credit must have approval of the course instructor, the director of the undergraduate student services office associated with the student’s major, and the dean of the Graduate College.

Not more than 15 semester credit hours taken while a senior may be approved for graduate credit. The student must earn a grade of “B” or higher in those courses for which he or she seeks graduate credit. Credit will be applied to the student's graduate transcript only after the student has been admitted as a graduate student at OSU. Students are cautioned that institutions other than OSU may or may not allow courses taken for
graduate credit during the senior year to be transferred into one of their 
graduate programs.

4.8 Semester Credit Hour
A semester credit hour is equivalent to

a. sixteen 50-minute class sessions (including examinations) conducted 
   under the guidance of a qualified instructor plus 32 hours of 
   preparation time, or
b. sixteen 3-hour laboratory sessions, or

c. sixteen 2-hour laboratory sessions plus 16 hours of preparation time.

These same equivalencies apply to outreach courses, short courses and 
other learning formats for which academic credit is awarded.

4.9 Foreign Language Credit for Native Speakers
A native speaker of a foreign language cannot enroll in or earn credit 
toward graduation in lower-division (1000- or 2000-level) courses in that 
language. A native speaker of a foreign language is defined as a person 
whose high-school level instruction was conducted principally in that 
language.

Native speakers may occasionally have valid reasons for establishing 
credit in a lower-division course. Requests for such consideration should 
be directed to the dean of the student’s college for recommendation to 
the head of the Department of Foreign Languages and Literatures.

5. Enrollment

5.1 Course Numbering System
All courses are identified by numbers composed of four digits. The first 
digit indicates the class year in which the subject is ordinarily taken, 
although enrollment is not exclusive as to student classification; the 
second and third digits identify the course within the field; and the 
last digit indicates the number of semester credit hours the course 
carries. For example, a course numbered 1123 should be interpreted as 
a freshman, or beginning, level course carrying three hours of credit. A 
course number beginning with zero indicates that the course does not 
carry University credit. A course number ending in zero indicates that the 
course carries variable credit.

Graduate Sections of Mixed Credit 3000 or 4000-level Courses
Some courses have been approved to be offered for both undergraduate 
and graduate credit. These 3000 and 4000-level courses are identified in 
the Course Catalog. A student must perform additional assignments at 
an intellectual level commensurate with graduate level work as specified 
in the course syllabus to earn graduate credit for such a course. The 
instructor for any course for which graduate credit is received must be a 
member of the Graduate Faculty. Separate class sections are offered for 
undergraduate and graduate credit, but the sections may be crosslisted 
(meet at the same time on the same days in the same classroom with the 
same instructor).

5.2 Maximum Semester Credit Hour Load
Undergraduate students are allowed to enroll in the number of credit 
hours each semester that do not result in academic overload, which 
is defined as the number of semester-credit-hours 25 percent or more 
than the number of weeks in the applicable academic term. See the 
“Graduate College” section of the Catalog for graduate student enrollment 
information.

Undergraduates desiring to carry an academic overload must have 
demonstrated readiness to perform on an overload basis, either through 
superior performance on a college aptitude test or on the basis of 
superior academic achievement in high school or college, and must 
complete a Petition for Excessive Hours (available in the Office of the 
Registrar). The maximum academic overload in any given term is limited 
to the number of semester-credit-hours which is 50 percent greater than 
the total number of weeks in the applicable academic term. Exceptions to 
deserving students may be granted by the Office of Academic Affairs.

In a regular 16-week Fall or Spring semester, the maximum enrollment for 
undergraduates without special approval is 19 credit hours. Enrollment 
in 20 to 24 credit hours results in academic overload, which requires 
a Petition for Excessive Hours. Enrollment in 25 or more credit hours 
requires both a Petition for Excessive Hours and approval by the Office of 
Academic Affairs.

Proportionate credit-hour limits apply to summer sessions and 
intersession periods separately, depending on the length of the session.

5.3 Adding Courses
The sixth class day of a regular semester or the third class day of an 
eight-week summer session, or the proportionate period for block or 
short courses is the last day a course may be added (nonrestrictive).
With instructor and academic adviser approval, a course may be added 
during the second week of classes (seventh through tenth class days) 
of a regular semester or the fourth or fifth class day of an eight-week 
summer session, or the proportionate period for block or short courses 
(restrictive).

5.4 Dropping Courses
Dropping refers to the dropping of one or more courses while remaining 
enrolled in at least one other OSU course for a given semester. Courses 
may not be dropped without the approval of the student’s academic 
adviser. Enrollment changes, such as dropping courses, are the 
responsibility of the student. Failure to attend classes or nonpayment of 
tuition and fees does not constitute dropping a course.

General drop periods are provided in the table below. The Academic 
Calendar provides specific dates for each term. Exceptions to 
these deadlines may be considered by petition due to documented 
extraordinary circumstances and committee approval. The Retroactive 
Drop/Withdraw Petition and the Petition for a Refund of Tuition and Fees 
forms are available on the Registrar website.

Summer courses, intersession courses, and other courses that do not 
extend through the entire 16-week semester follow proportionate drop/ 
refund periods.

A student may not drop any course in which a violation of academic 
integrity is pending against the student. If the student admits 
responsibility for a violation meriting a grade of "F" for an assignment or
examination, the instructor or Academic Integrity Panel may permit the student to drop the course with a grade of "W" if the student is found not responsible for the violation, he or she may drop the course with either a "W" or "F" (according to the drop grade policy) appearing on the academic record. If the student is found responsible for the violation, the instructor may assign an appropriate sanction, including assigning the grade "F" for the assignment/examination or "F" for the course. (See Policy and Procedures Letter 02-0822).

International students need to consult with International Students and Scholars (ISS) before dropping courses or withdrawing for the semester. Under reporting regulations required by the Student and Exchange Visitor Information System (SEVIS), dropping below full-time can put a student's visa status in jeopardy.

5.5 Concurrent Enrollment
A student who desires to earn credits concurrently at another institution or through correspondence, or DANTES (Defense Activity for Non-traditional Education Support) examinations while enrolled for residence credit at OSU, must secure approval in advance from his or her dean if he or she expects this institution to accept those credits. Armed Forces personnel will be granted 60 days from the date of their first enrollment to establish, through DANTES examinations, advanced standing in subject matter that they mastered while in the Armed Forces.

5.6 Course Prerequisites
Course prerequisites are published in the course section of the University Catalog. When no prerequisites are listed for courses numbered 3000 or 4000, it is understood that the prerequisite is approval of the student's advisor. The prerequisite for courses at the 5000 or 6000 level is graduate standing in addition to any other prerequisites listed. Instructors may waive prerequisites when the student's background justifies this action. Academic advisors may only provide overrides of prerequisite requirements for undergraduate courses, and only if examination of the student's academic record verifies the prerequisites for the undergraduate course have been met. Before the beginning of a term, departments may review class rosters to verify completion of prerequisite requirements and may initiate action to drop students who do not meet the published requirements. Prior approval of the instructor may be required for enrollment in problems courses, independent study, internships, thesis and dissertation courses, and courses taught in a professional school.

5.7 Class Enrollment Maxima
The maximum number of students permitted to be enrolled in each section of a course is determined by the department head and can be increased or decreased only by the department head or dean. Generally, the maximum number of students permitted in an honors section is 22 students. The Dean of The Honors College may slightly increase or decrease the size of some honors sections. The number of students enrolled in a class may not exceed the fire code capacity of the designated classroom.

5.8 Priority Enrollment
Currently enrolled/continuing students register for summer and fall classes during the latter part of the preceding spring semester, and for spring classes during the latter part of the fall semester. In order to facilitate access to courses required for timely degree completion, a student's priority for enrollment generally follows academic class level with seniors having the highest priority. Some exceptions to this basic priority may be necessary to accommodate bona fide student needs, such as a special priority for physically disabled students. The Office of Academic Affairs determines enrollment priorities, and enrollment schedules and priorities are posted in the enrollment guide located on the Registrar's website at registrar.okstate.edu (http://registrar.okstate.edu).

Full-time staff members may utilize priority enrollment to help ensure they are given an opportunity to identify a section(s) at a time that is least disruptive to work in the office. This benefit of priority enrollment is extended to full-time (100% FTE), regular staff members. Staff members employed at less than one hundred percent are not eligible for priority enrollment.

5.9 Late Enrollment
Students are allowed and encouraged to enroll well before the beginning of a given term (fall, spring, summer). Students whose initial enrollment for the term occurs on or after the first day of the term will be charged a late enrollment fee. A student is permitted to add classes after initial enrollment without a late enrollment fee during the first two weeks of a 16-week semester or through the fifth day of an eight-week summer session or during proportionate periods for block or short courses. See the "Tuition, Fees, and Cost Estimates (p. 68)" section of the Catalog for the current late enrollment fee amount.

5.10 Payment of Tuition and Fees
Oklahoma State University (OSU) combines enrollment costs and charges from different areas on campus into one consolidated account. By enrolling/registering in classes, students accept the responsibility of the costs associated with the courses unless dropping/withdrawal occurs by the published dates to receive credit. The Bursar Office generates a monthly electronic billing statement (e-bill) on the last business day of every month detailing charges, credits, and payments that occurred during the month. A billing email notification is sent to the student's OSU email address at the beginning of each month when the billing statement is available to view online. Your OSU email is considered to be the primary source for receiving electronic communications from the University. If someone other than the student should also receive billing notifications, an authorized user may be set up by the student through student portal at http://my.okstate.edu/ by clicking OSU Stillwater/Tulsa Bursar Account under Quick Links. Authorized user login access is located through the bursar website at http://bursar.okstate.edu.

Payment is due no later than the 15th of each month. All tuition and fees (required and optional) and other charges are considered past due if not paid by the 15th of the billing month. Late fees and holds can be avoided by paying by the published deadline. Students may use their O-Key credentials to view online real-time account activity at http://my.okstate.edu/ clicking OSU Stillwater/Tulsa Bursar Account under Quick Links. Failure to view a bill does not relieve the student of his/her financial obligation. It is the student's responsibility to update addresses and phone numbers at the University. Miscellaneous charges (such as books/supplies) may occur throughout the semester, often after financial aid has processed. Students are responsible for paying these subsequent charges as they appear on monthly bursar billing statements.

In efforts to assist students in meeting financial obligations, Oklahoma State University offers a semester based payment plan as an alternative to the traditional lump-sum payment method. This plan provides an opportunity for families (authorized users) and students to pay University billed expenses in regular monthly payments. No finance charges are associated with the payment plan or enrollment holds if payments are made as promised. The Payment Plan is available online each semester. The student can sign-up online at http://my.okstate.edu/ by clicking OSU Stillwater/Tulsa Bursar Account under Quick Links. It is important
to designate a parent under the authorized user tab by entering their email address for access to the payment plan enrollment. September 15th is the deadline to enroll in the Fall plan and February 15th is the deadline to enroll for the Spring plan. Summer enrollment is not eligible for the plan. There is a $25 non-refundable application fee due at the time of application each semester. Payment plan participants receive installment payment due notifications in separate emails from the monthly billing notification. The monthly billing notification informs payment plan participants of the total monthly billing statement amount for informational purposes.

Providing a paper check as payment authorizes Oklahoma State University to clear that check electronically. Bank accounts may be debited the same day payment is received. Electronically cleared transactions appear on bank statements even though paper checks are not presented to the financial institution. Any resubmission due to insufficient funds may also occur electronically. All transactions are secure and payment by check constitutes acceptance of these terms. Returned items are assessed a $25 fee and the account holder is responsible for all dishonored payments which have been processed on their account. If a payment is returned to the University by the bank and the payment was made to get enrolled, the Bursar may cancel enrollment and referral to student conduct is a possibility.

Delinquent accounts accrue a penalty at the rate of 1.5% monthly (19.56% APR). Any charges incurred by the University in an effort to collect on delinquent accounts are assessed to and become the responsibility of the account holder. Delinquent account information is disclosed to credit reporting agencies, which could endanger the student’s credit rating on a local or national level. Past due accounts are presented to the warrant intercept program (WIP) that captures state income tax refunds to pay outstanding OSU debt. Oklahoma law has jurisdiction and any disputes arising shall be determined in accordance with the law of this jurisdiction. Accounts must be current before a student can obtain the release of any academic records such as transcript, receive a diploma or enroll for subsequent semesters. Oklahoma State University extends bursar optional charging privileges to students in order to facilitate use of campus-based services. Bursar accounts must remain current or charging privileges may be revoked. If the student’s federal or institutional financial aid or third-party sponsor payment is either not received by Oklahoma State University or loss of eligibility to retain financial aid for the semester occurs, the student still has the responsibility for paying their bursar account obligations by the set due date. Consent is assumed that communication via all phone numbers, including cell phones, provided to the University as a source of contact could occur. This includes contact from its agents, representatives, and attorneys (including collection agencies) for purposes of collecting any portion of your account financial obligation which is past due. The University reserves the right to request prepayment before allowing registration for future terms based upon previous actions.

5.11 Auditing Courses

A student who does not wish to receive credit in a course may enroll as an auditor, provided space is available and the student obtains approval from the instructor of the course and his or her adviser. (Note: Adviser permission is only required for currently enrolled students.) A student who enrolls as an auditor must verify that he or she will not petition to receive credit for the audited course by any method other than that described below under “Audit to Credit.” Instructor discretion will determine the auditor’s level of class participation, such as taking exams or turning in assignments.

5.12 Minimum Class Size

The minimum number of students required in order for a class to meet is as follows: 20 students for lower-division classes, 12 students for upper-division classes, and eight students for graduate-level classes.

6. Grades and Grading

6.1 Official Transcripts

All official transcripts of the student’s academic record at OSU are prepared and released by the Office of the Registrar. Copies of transcripts from other institutions cannot be furnished.

6.2 Grade Interpretation

The quality of student performance in all classes is indicated by the following letter grades: “A,” “B,” “C,” “D,” “F,” “FI,” “I,” “NP,” “P,” “S,” “U,” “W,” “R,” “SR,” or “UR.”

Descriptions of the grades are provided below. For graduate students, a grade of “D” or “F” is considered a failing grade. Additional consequences and/or requirements for graduate students receiving “C,” “D,” and “F” grades also exist in most graduate programs. Irrespective of letter grades received, an overall 3.00 GPA must be maintained. See the “Graduate College (p. 1673)” section of the Catalog.

### Grade "F"!

The "F"! indicates that the student failed the course because of a violation of academic integrity. Students may remove the first "F"! (though not the "F") from their transcripts by completing an academic integrity educational program. The "F!" appears on the transcript for a minimum of one semester. (See also academicintegrity.okstate.edu.)

### "Incomplete" Grade

This grade is given to a student who satisfactorily completes the majority of course work (i.e., material amounting to more than 50% of the course grade as outlined in the course syllabus) and whose work averaged "D" or better, but who has been unavoidably prevented from completing the remaining work of the course. This grade is considered temporary. The instructor should convey to the student the conditions the student must fulfill in order to complete the course. The instructor will submit a final grade of "I" along with an incomplete final/default grade. The default is the projected grade the student would earn if he or she received a zero for the remaining course work. Grades of "A," "B," and "C" are not permitted for the default grade, and an instructor may not require the student to repeat the course to remove the incomplete. The academic transcript will reflect an "I" grade for the course until the final grade is assigned.

The maximum time allowed for a student to complete the course is one calendar year after the end of the semester for which the incomplete grade was awarded. The dean of the student's college (for graduate students, this is the Graduate Dean) recommends to the Office of the Registrar an adjustment of this period in exceptional circumstances, which must be clearly documented with supporting evidence when deemed appropriate. Instructors have the prerogative to require a shorter period of time to complete the remaining requirements.

It is the responsibility of the student to satisfy the requirements stipulated by the instructor at the time the incomplete grade is assigned; it is the responsibility of the instructor to initiate action to have any new permanent grade entered as soon as possible after the student completes the course or, after one year, partially fulfills the remaining requirements.

Upon completion of any or all of the remaining requirements, or at the end of the one-year period (whichever occurs first), the incomplete grade on the transcript is changed to reflect the final grade for the course. Any course in which none of the remaining requirements are fulfilled will, after one year, have the incomplete grade changed to the default grade. If the student opts to graduate prior to the end of the one-year period and if the course is required for graduation, the remaining course requirements must be completed and the final grade assigned by the deadline for course work completion for his or her final graduating semester. If the course is not required for graduation, the standard completion time limits apply. When the temporary incomplete grade is replaced with the incomplete final grade, this action is not considered a violation of the policy that states a grade will not be lowered after graduation.

An incomplete grade that was assigned prior to the Fall 2008 semester and is not changed within the designated time limit remains a permanent "I" grade on the transcript.

### Grade "NP"

This grade is given for unsatisfactory work (including that evaluated as "D") in courses on the pass-no pass grading system. Both credit hours and grade points are ignored in calculating grade-point averages.

### Grade "P"

This grade is given for passing work in OSU courses approved for pass-no pass and pass-fail grading systems. Both credit hours and grade points are ignored in calculating grade-point averages.

### Grade "S" or "U."

This grade is given for satisfactory (equivalent to a "C" or better) or unsatisfactory work in developmental courses in English, mathematics, reading, and science. On the transcript, developmental courses are designated by "DEV" preceding the grade, such as "DEV-S." These grades count in attempted hours, but not in earned hours. They are not included in GPA calculations and do not satisfy degree requirements.

### Grade "W."

This grade indicates that the student dropped the course.

### Grade "R."

This grade is given to a student in a master's degree creative component course, and other courses as appropriate, when course work is still in progress. It is the responsibility of the instructor to initiate action to have a permanent letter grade entered as soon as possible after the student completes the course work.

### Grade "SR" or "UR."

These grades are given for satisfactory and unsatisfactory work, respectively, in thesis or dissertation courses (5000 or 6000). Both credit hours and grade points are ignored in calculating grade point averages, but courses in which a grade of "SR" or "UR" is earned may be used toward minimum degree requirements.

### Mark of "CBE" preceding a grade.

Grades for credit by exam (P or S) are designated on the transcript by "CBE" preceding the grade, such as "CBE-P." These grades count in attempted and earned hours, but they are not included in GPA calculations.

### Mark of "PA" preceding a grade.

Grades for performance/activity (leisure) courses are designated on the transcript by "PA" preceding the grade, such as "PA-B." These grades count in attempted hours, but not in earned hours, and they are not included in GPA calculations. Limitations exist on applying these courses toward degree requirements.

### Mark of "AU"

An "AU" indicates that the student enrolled as an auditor in the course. An "AU" is not a grade and is not used in calculating grade-point averages.

### Mark of "N"

An "N" indicates that at the time grades were due in the Office of the Registrar, a final grade was not reported by the student's instructor.
An "N" is not a grade and will be changed to the grade earned within a reasonable time. It is not used in calculating grade-point averages.

6.3 Grade-Point System

The following grade-point system is used in calculating the grade-point average.

- Grade "A" yields 4 grade points per semester credit hour.
- Grade "B" yields 3 grade points per semester credit hour.
- Grade "C" yields 2 grade points per semester credit hour.
- Grade "D" yields 1 grade point per semester credit hour.
- Grade "F" yields 0 grade points per semester credit hour.

6.4 Grade-Point Average Calculations

In calculating grade-point averages, the total number of grade points earned is divided by the total number of hours attempted. The grade of "I," "NP," "IP," "S," "U," "W," "R," "SR," or the mark of "AU" or "N" will not affect the grade-point average. In addition, the following courses are excluded from GPA calculations: developmental courses, physical education activity (leisure) courses, and courses repeated (with an original grade of "D" or "F") or reprieved/renewed based on State Regents policy. (See Academic Regulation 6.13 Academic Forgiveness.)

Effective Fall 2016, GPA terminology changed with the transition to a new student information system. Both the new and old terminology are included below to assist with the transition.

Overall (formerly Retention and Graduation) Grade-Point Average

All OSU and transfer courses in which a student has a recorded grade are included in the calculation, excluding the courses described in the introductory paragraph.

Total Institution Grade-Point Average

This GPA is calculated in the same manner as the Overall GPA but includes only OSU (institutional) courses.

Total Transfer Grade-Point Average

This GPA is calculated in the same manner as the Overall GPA but includes only transfer (non-OSU) courses.

Current Term (formerly Semester) Grade-Point Average

This GPA is calculated in the same manner as the Overall GPA but includes only the courses for a single term (spring, summer, or fall). Transcripts for students with enrollment from OSU and another institution during the same term will display two current term GPAs—one for each institution.

Effective Fall 2016] Cumulative Grade-Point Average

This GPA displays on the transcript after each OSU term and is calculated in the same manner as the Total Institution GPA but is based only on OSU courses for that term and all previous OSU terms.

Prior to Fall 2016] Cumulative Grade-Point Average

All courses in which a student had a recorded grade were included in the calculation, including physical education activity (leisure) courses and forgiven courses.

6.5 Six Week (Midterm) Progress Reports

Faculty are expected to report six week (midterm) progress grades for all students (regardless of classification) enrolled in 1000- and 2000-level courses. This will normally occur shortly after the sixth week of classes. Student athletes will have all six week grades reported, not just 1000- and 2000-level. Progress reports are made available on Self Service to students and their academic advisers.

6.6 Pass-No Pass Grading System

An undergraduate student may elect to take no more than four courses or 15 hours (whichever is greater) during his or her academic career with the pass-no pass grading option. The option is restricted to those students who:

a. have earned 28 or more semester credit hours;
b. have at least a 2.50 overall grade-point average;
c. have met all of the prerequisites for enrollment in the course in question;
d. do not need the course in question for meeting any requirements for graduation or certification other than as a general (unrestricted) elective;
e. have approval of the academic adviser.

A student who chooses the pass-no pass option must do so by the last date on which a course may be added. Once the deadline has passed, a student may not change the choice of grading systems. The pass-no pass option is not identified on the official class roll and thus is not known to the instructor. The instructor assigns a normal grade based on the quality of the work performed. The grades of "A," "B" and "C" are recorded on the transcript as "P;" the grades of "D" and "F" are recorded as "NP." "W" and "I" grades are recorded without change. The pass-no pass grade will not affect the grade-point average. Graduate students should refer to the "Graduate College (p. 1673)" section of the Catalog.

6.7 Pass-Fail Grading System

Some courses are taught only on a pass-fail basis. Such courses are so designated in the Course Catalog. Students who pass the course are awarded the grade of "P;" those who fail the course are awarded the grade of "F;"

Graduate students should refer to the "Graduate College (p. 1673)" section of the Catalog.

6.8 Grade Reports

Reports of the final grades of all students are compiled shortly after the end of each semester and are made available electronically to the students, the students’ advisers and the students’ deans via Self Service.

6.9 Correcting Grades Reported in Error

The only permitted reasons for changing a final grade are to correct a grade that was reported in error, to remove an incomplete grade, or to change a grade at the direction of the Grade Appeals Board or Academic Integrity Panel. An instructor may not allow students to perform extra work after the end of the course in order to raise their grade. Grade change requests must be submitted in writing to the Office of the Registrar and must have both the department head’s and the dean’s approvals. A grade may not be lowered after the student has graduated unless the degree has been revoked.

6.10 Grade Appeals

A student may appeal a grade given by an instructor in cases in which he or she believes the grade awarded is inconsistent with announced grading policy. (See "Student Rights and Responsibilities” or contact the Office of Academic Affairs.)
6.11 Honor Rolls
Full-time undergraduate students who complete at least 12 earned OSU credit hours during a fall or spring semester with a current term semester (not overall) grade-point average of 4.00 (i.e., all "A's") are placed on the President's List of Distinguished Students. Grades earned through correspondence may not be included in meeting the minimum enrollment required or grade-point average required for an honor roll. Students who have completed their courses under the same requirements as outlined above, with a grade-point average of 3.50 or higher and no grade below "C" are placed on the Dean's List of Distinguished Students. (See also Academic Regulation 6.4 Grade-point Average Calculations.

6.12 Violation of Academic Integrity
Oklahoma State University is committed to maintaining the highest level of academic integrity and ethical behavior. It is necessary that all members of the University support and promulgate the values of honesty and responsibility appropriate for an academic community. Not only does such academic integrity and ethical behavior contribute to the status of the University, but it also represents an important component of the educational process. To assure a high level of integrity among students, behaviors that violate academic integrity (e.g., unauthorized collaboration, plagiarism, multiple submissions, cheating on examinations, fabricating information, helping another person cheat, unauthorized advance access to examinations, altering the work of others, and fraudulently altering academic records) will not be condoned or tolerated. Violations may subject the student to disciplinary action including the following: receiving a failing grade on an assignment, examination, or course; receiving an "F!" notation of a violation of academic integrity on the transcript; and suspension from the University. In the event an incident is not resolved at the time grade reports are due to the Registrar (e.g., an alleged violation is discovered during the final examination period), the instructor will assign an incomplete grade until the allegation is resolved. (See also academicintegrity.okstate.edu (http://academicintegrity.okstate.edu).)

6.13 Academic Forgiveness (Undergraduates)
Repeated Courses
A student shall have the prerogative to repeat a course and have only the second grade, even if it is lower than the first grade, included in the calculation of the overall (retention/graduation) grade-point average up to a maximum of four courses but not to exceed 18 credit hours in which the original grade was a "D" or "F". If a course is repeated more than once, all grades except the first attempt are included in the grade-point averages. The original course and grade remain on the transcript along with a notation indicating whether the course is included or excluded from the GPA. All other repeated courses, those in excess of the 18-hour, four-course maximum and those with a grade of "C" or better in the original course, are included in the grade-point averages.*

Academic Reprieve
A currently enrolled or former OSU student may request an academic reprieve for all courses in one semester or two consecutive semesters if the following conditions are met:

a. the student has not previously been granted an academic reprieve or renewal;

b. there were extenuating circumstances which caused the student to perform poorly during the semester.

Course work with a passing grade included in a reprieved semester may be used to demonstrate competency in the subject matter. However, the course work may not be used to fulfill credit hour degree requirements.

Academic Renewal
A currently enrolled or former OSU student may request an academic renewal for all courses taken prior to a specified date if the following conditions are met:

a. at least five years must have elapsed between the last semester being renewed and the renewal request;

b. prior to requesting academic renewal, the student must have earned an overall GPA of 2.00 or higher with no grade lower than a "C" in all regularly graded (A, B, C, D, F) course work (a minimum of 12 hours) excluding physical education activity or performance courses;

c. the request will be for all courses completed before the date specified in the request for renewal;

d. the student has not previously been granted an academic reprieve or renewal.

Neither the content nor credit hours of renewed course work may be used to fulfill any degree or graduation requirements.

Requests for Reprieve or Renewal
A student may request an academic reprieve or renewal by submitting an Academic Reprieve or Renewal Petition to Academic Affairs. A committee appointed by Academic Affairs reviews each request and approves or denies a request based on the conditions stated above and the committee's judgment concerning the extenuating circumstances reported by the student. Courses that are reprieved or renewed remain on the student's transcript but are excluded from the overall (retention and graduation) grade-point average and identified as such on the transcript. See also OSU Policy 2-0820, Academic Forgiveness for Undergraduate Students.

7. Graduation
7.1 Graduation Requirements
The responsibility for satisfying all requirements for a degree rests with the student. Advisers, faculty members and administrators offer help to the student in meeting this responsibility.

7.2 Residence Credit Requirements
Students must earn at least 30 semester credit hours at OSU. At least 15 of the final 30 hours applied toward the degree or at least fifty percent of the upper-division hours required by OSU in the major field must be satisfactorily completed at OSU. In the Spears School of Business, a minimum of 15 of the last 30 hours applied toward the degree and at least 50 percent of the upper-division hours required in the major field must be satisfactorily completed at OSU.

7.3 Residence Waiver for Certain Premedical and Prelaw Students
Students who complete at least 90 semester credit hours in a recognized premedical science or pre-law preparatory program and are admitted to a professional program leading to the doctoral degree at an accredited professional school, including medicine, osteopathic medicine,
chiropractic medicine, veterinary medicine, dentistry, optometry, pharmacy, physical therapy, podiatry, and law, will be awarded the appropriate baccalaureate degree upon the successful completion of 30 semester credit hours in professional school courses applicable to the OSU major. This option is available only to students who have completed all other degree requirements for the major, have taken at least the last 30 semester credit hours of work at OSU prior to transferring to a professional school (See Academic Regulation 7.2 Residence Credit Requirements), and have completed at least 60 semester credit hours at a baccalaureate degree granting institution (See Academic Regulation 4.4 Transfer Credit from Community Colleges). Credits from accredited professional schools that are part of baccalaureate degree-granting institutions will satisfy the 60 semester credit hour requirement.

7.4 Minimum Hours for Graduation
Each degree program requires a specific minimum number of semester credit hours for graduation, as indicated in the Catalog. No degree program shall require fewer than 120 semester credit hours for graduation. By OSRHE policy, these 120 hours are exclusive of physical education activity courses (leisure activity courses.) No student shall be permitted to graduate having completed fewer total hours than the requirement specified for that degree. At least 40 hours of upper-division course work shall be required in every baccalaureate degree program. (By OSRHE policy, these 40 hours are exclusive of physical education activity courses.) A minimum of 30 hours is required in the major field. Of these 30 hours, at least 15 hours must be upper division. Hours of "S" or "U" earned in developmental courses may not count toward total hours.

7.5 Grade-Point Average for Graduation
An overall (retention/graduation) grade-point average of 2.00 or higher is required for all courses in which a student has a recorded grade, excluding any courses repeated or reprieved and excluding developmental courses and physical education activity courses. (See Academic Regulation 6.13 Academic Forgiveness.) This is in addition to the 2.00 or higher grade-point average required by the department in the major or minor fields.

7.6 Payment of Graduation Fees
Basic graduation cost is included in the records maintenance fee.

7.7 Requirements for Honors Degrees
The individual colleges have specific requirements for degrees with honors. Students should consult the office of their academic dean for information. (See the "Honors College (p. 1672)" section of the Catalog.)

7.8 Graduation Application
All degree candidates must submit a graduation application (online via Self Service) before or during their final semester to be eligible for graduation. Undergraduates must be classified as a senior before they can submit a graduation application, and graduate students must have filed an approved Graduate Clearance Form with the Graduate College before they are eligible to submit a graduation application.

Students must submit their graduation application by November 1 for their name to appear in the fall commencement program, and by April 1 for spring and summer graduate names to appear in the spring commencement program. Students who will complete all degree requirements in the summer should file their graduation application for the summer term, but are invited to participate in the spring commencement ceremony.

Students whose graduation application has become inactive (due to not meeting degree requirements, changing a component of their degree program, or other factors) will be required to submit a new graduation application via Self Service. Graduation applications do not automatically roll to the next term if degree requirements are not met. Contact the Registrar's Office if assistance is needed.

7.9 Presence at Commencement Exercises
The University will hold Commencement exercises at the close of the fall semester and at the close of the spring semester. Students who plan to meet the graduation requirements at the close of the following summer session are invited and encouraged to participate in the Commencement exercises at the close of the previous spring semester.

The University encourages all candidates for degrees to be present at the Commencement exercises. Attendance is not compulsory.

7.10 Graduation with Distinction
Students who earn an OSU undergraduate degree can also earn a level of distinction based upon the final overall (retention/graduation) grade-point average. (See also Academic Regulation 6.4 Grade-point Average Calculations) The level of distinction added to the diploma and transcript is:

<table>
<thead>
<tr>
<th>Overall (retention/graduation) grade-point average</th>
<th>Distinction</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.90 to 4.00</td>
<td>Summa cum laude</td>
</tr>
<tr>
<td>3.80 to 3.89</td>
<td>Magna cum laude</td>
</tr>
<tr>
<td>3.70 to 3.79</td>
<td>Cum laude</td>
</tr>
</tbody>
</table>

This grade-point average calculation is two decimal places only, e.g., 3.69. In actuality, this GPA may be 3.69785 if additional digits were to be added. However, the value used to determine distinction is 3.69, which does not qualify for a level of distinction.

7.11 Professional Education
Professional Education requires a minimum 2.50 GPA for admission to Professional Education, student teaching and graduation. This requirement is consistent with state standards for students who complete professional education programs and seek licensure in the state of Oklahoma.

The College of Agricultural Sciences and Natural Resources (CASNR) is the academic unit of the Division of Agricultural Sciences and Natural Resources, and offers outstanding undergraduate and graduate programs that are recognized at the state, regional, national and international levels. In collaboration with the Oklahoma Cooperative Extension Service (OCES) and the Oklahoma Agricultural Experiment Station (OAES), CASNR faculty provide great breadth and exceptional quality in teaching, advising, research, extension and service.

A CASNR education values hands-on instruction and the importance of a well-rounded student experience. The college's award-winning faculty members are dedicated to developing students and passionate about adding value to the total educational experience. CASNR's academic programs prepare students to analyze information, communicate effectively, think critically, solve problems, and assume leadership roles in their respective fields of study. Students also receive a solid general education in communications, humanities and social sciences. In agriculture or natural resources, the graduate will have an opportunity for a rewarding career that will last as long as food is consumed, fiber is grown, and soil, water and wildlife resources are valued.

CASNR students come from both traditional agricultural roots and urban settings. This diversity adds strength to the college experience for all CASNR students. Career opportunities in Agricultural Sciences and Natural Resources are also diverse. The college's majors include traditional agricultural and natural resource disciplines such as animal and food sciences, agricultural business, soil science, range science, horticulture, entomology and agricultural education, in addition to distinctive areas such as plant and animal biotechnology, food safety, natural resource management and agricultural communications. CASNR's programs also include many fields not commonly associated with agriculture such as landscape architecture, turf management, biochemistry and molecular biology, environmental science, leadership, pre-law and pre-medical sciences. Active international programs, including study abroad opportunities, are available to students in every CASNR major and add a unique dimension to the college experience.

Accreditation
Agricultural Sciences and Natural Resources include broad and diverse professions and do not have a single accrediting society as do some other professions. Programs in agricultural education, agricultural engineering, biochemistry and molecular biology, forest ecology and management, landscape architecture and landscape management are accredited by their professional organizations.

Academic Programs
Undergraduate Programs
The Bachelor of Science in Agricultural Sciences and Natural Resources degree is offered in the following major fields of study: agribusiness, agricultural communications, agricultural economics, agricultural education, agricultural leadership, animal science, biochemistry and molecular biology, entomology, environmental science, food science, horticulture, landscape management, natural resource ecology and management, and plant and soil sciences. The Bachelor of Landscape Architecture is also offered in the College of Agricultural Sciences and Natural Resources. The biosystems engineering degree program is jointly administered by the College of Agricultural Sciences and Natural Resources and the College of Engineering, Architecture and Technology (Bachelor of Science in Biosystems Engineering). In addition to undergraduate majors, most CASNR departments offer one or more minors. The requirements for the minors are available from the department offering the specified minor.

Graduate Programs
Graduate study is available in all CASNR academic departments and in the multidisciplinary international agriculture program. In addition to the Master of Agriculture and Master of Science degrees that may be obtained through several departments, the Doctor of Philosophy degree (PhD) may be earned in the following areas: agricultural economics, agricultural education, biosystems engineering, animal science, biochemistry and molecular biology, crop science, entomology, food science, plant pathology, soil science, natural resource ecology and management and in horticulture through interdisciplinary programs in crop science, environmental science and plant science.

High School Preparation and Admission Requirements
The high school preparation and admission requirements for the College are the same as the general University requirements. The undergraduate biosystems engineering degree includes additional enrollment requirements which are described in the College of Engineering, Architecture and Technology section of this catalog.

Transfer Students
Students who transfer from an accredited college or two-year college must meet the general University admission requirements. All transferred courses are recorded on the OSU transcript; however, a minimum of 60 credit hours must be earned at a senior college (baccalaureate degree-granting institution) to meet the College's degree requirements. Credits will be accepted by transfer from a community college to meet lower-division (i.e., 1000- and 2000-level courses) requirements only. Specific departmental requirements needed for graduation are determined by the department in which the student plans to earn his or her degree.
Scholarships

Students enrolled and entering the College of Agricultural Sciences and Natural Resources are annually awarded over 1.6 million dollars in scholarships by the College and its departments. The following areas are considered in the awarding of scholarships: scholastic standing in high school or college; leadership activities; financial need and sincere interest in the various CASNR disciplines.

Additional information may be obtained from the office of the associate dean, College of Agricultural Sciences and Natural Resources, Oklahoma State University, 136 Agricultural Hall, Stillwater, OK 74078 (casnr.okstate.edu (http://casnr.okstate.edu)).

Student Success Center

The College of Agricultural Sciences and Natural Resources Student Success Center (SSC) helps students with educational, career and personal goals. The SSC provides important services, programs and student support including Student Academic Mentors, Ambassadors, Career Liaisons, Freshmen in Transition, Career Services, Prospective Student Services, assistance with tutoring or other services, and liaison to the OSU Writing Center.

Academic Advising

All students in the College have the advantage of being advised by a faculty member working in the individual student’s academic discipline. Academic advisers are readily available to students and work closely with the students throughout their academic careers.

Special Academic Programs

Honors Program

The Honors Program through the College of Agricultural Sciences and Natural Resources is designed to provide outstanding students with opportunities to pursue new challenges and academic excellence. Honors courses, seminars and special honors contracts provide for discussions and independent study by students who have the desire and ability to explore academic subjects beyond the normal classwork material. The OSU Honors College oversees the following Honors Award Recognitions:

1. General Honors.
2. College or Department Honors.
3. The Honor’s College Degree.

Award descriptions and Honors College eligibility requirements can be found in the Honors College section of the catalog. Online information is available at http://honors.okstate.edu.

Pre-Veterinary Medicine Curriculum

Specific pre-veterinary science majors in agribusiness, animal science, biochemistry and molecular biology, entomology, and natural resources and ecology management as offered in the College of Agricultural Sciences and Natural Resources, include all courses required for admission to the Center for Veterinary Health Sciences.

Graduation Requirements

General University requirements for graduation are stated elsewhere in the Catalog. In addition, specific requirements must be met for the Bachelor of Science in Agricultural Sciences and Natural Resources and Bachelor of Landscape Architecture degrees. For the BS degree, the required total semester credit hours vary by department, major and option. A minimum of 40 semester credit hours and 100 grade-points must be earned in courses numbered 3000 or above. The Bachelor of Landscape Architecture is a five-year program requiring 150 credit hours.

Agricultural Communications

Modern agriculture, with its diversity and specialization, requires accurate communication between industry leaders and the public. Education in agricultural communications prepares students to provide the necessary communications link mixing the most current media platforms with traditional principles.

By majoring in agricultural communications, students gain communications education with industry specific classes in advertising and public relations, Web design, magazine writing and production, radio and television broadcasting, photography, reporting and newswriting, or research report writing. Opportunities also are available for the student to develop a double-major program with other departments in the College of Agricultural Sciences and Natural Resources.

For the graduate with a bachelor’s degree in agricultural communications, career opportunities are abundant in the agricultural production industry and in service organizations as well as with publishing firms, broadcast stations, trade publications or related media.

Graduate Programs

The Master of Science degree in agricultural communications is designed to build mastery of knowledge in key areas such as communication theory, history, philosophy, technology, advanced communication skills and research and data analysis. The Master of Science degree in agricultural communications reflects the distinctive body of knowledge, research base, professional delivery and program focus of the discipline. In addition, the program introduces and requires students to apply research tools and methods.

The Master of Science program serves two primary purposes:

a. encouraging mastery of discipline-specific knowledge with an introduction to research and data analysis, and
b. offering discipline-specific knowledge with professional application to the work setting.

The Master of Science program offers students two options for completion of the degree: thesis option and formal report option. The thesis option requires 30 approved credit hours of coursework, which includes a six-credit hour formal thesis following the graduate college format. The formal report option requires 32 approved semester credit hours of coursework, including a two-credit hour formal report.

Students applying for the Master of Science program without a background in the appropriate option will be expected to complete coursework to bring their preparation to an acceptable level.

Admission Requirements

All students accepted into the agricultural communications Master of Science degree program will be expected to meet all University and Graduate College requirements and to have earned a degree in agricultural communications or related field from an accredited university. Applicants from outside agricultural communications will be required to complete prerequisite courses equivalent to the knowledge and competencies expected in the agricultural communications undergraduate program.

An undergraduate grade-point average of 2.80 overall on a 4.00 scale or 3.00 in the last 30 hours is required. The applicant must complete the Graduate Record Examination, submit a statement of goals for pursuing the master’s degree, and submit letters of reference from at least three people knowledgeable of the applicant’s professional qualifications. These references should include statements relating to:

a. the applicant’s success in professional settings or commitment to professions allied with the disciplines in the College of Agricultural Sciences and Natural Resources,
b. the applicant’s prior academic record as a reflection of ability to succeed in a Master of Science program, and
c. the applicant’s potential for success in research, writing and course work at the Master of Science level.

If such references are not available, the applicant should submit references from one or more faculty members familiar with the applicant’s academic career. Other references should be from individuals capable of addressing the applicant’s ability to successfully complete a Master of Science program.

Review Process for Admission

The Office of the Associate Dean of Graduate Studies manages all procedures and records pertinent to admission. The admission process is ongoing with admission recommendations rendered by the graduate faculty in the department. To be eligible for committee review, each applicant must submit an application for admission to the Graduate College, transcripts of all academic records, reference letters, goal statement and GRE scores.

Agricultural Economics

The Department of Agricultural Economics at Oklahoma State University offers programs of study leading to the BS, MS, MAg and PhD degrees in Agricultural Economics and the BS and MAg degree in Agribusiness. Agricultural economics and agribusiness curricula study the economic relationships among individuals, firms and service agencies in agriculture and between the agricultural sector and other sectors of the economy. The department’s courses emphasize the economic issues and concepts associated with producing, processing, marketing, and consuming agricultural goods and services and those used in the industry.

Undergraduate programs in Agricultural Economics and Agribusiness combine instruction in technical agricultural sciences with education in the application of economic and business management principles and tools. The agricultural economist or agribusiness person draws upon the physical and social sciences to outline, understand and solve economic problems created by agriculture's dynamic operating environment. Curricula in the Department of Agricultural Economics emphasize the decision-making and problem-solving skills used in the management of agricultural production and marketing firms.

Study in agricultural economics or agribusiness prepares students to excel in many challenging careers. Many graduates work to improve food production and processing throughout the world. Other graduates work with government policies that affect the food and fiber sector. Others assist rural communities to adjust and thrive in the rapidly changing world. Graduates also help protect and maintain natural resources and the environment for the greatest benefit of society. Many graduates choose career paths that lead them far from the farm; and others choose to return to family businesses.

Agricultural Economics

The Agricultural Economics BS degree trains students to analyze problems and make decisions using a solid framework of economic, business, mathematical and statistical principles. Students may tailor study to a wide variety of career interests. The Agricultural Economics degree plan emphasizes in quantitative studies including calculus and statistical methods. The degree prepares students for graduate study in agricultural economics or related fields or for a variety of employment opportunities at competitive salaries in private industry and government agencies that require more quantitative skills.

Agribusiness

The Agribusiness BS degree trains students to analyze problems and make decisions using a solid framework of economic and business principles. In addition, the agribusiness degree targets the skills needed for careers in agribusiness firms, including all areas of food and fiber production, processing and marketing. Students may choose from nine degree options: Farm and Ranch Management, Crop and Soil Science, International, Pre-Law, Pre-Veterinary Business Management, Natural Resources, and Community and Regional Analysis, or a double major with Agricultural Communications or Accounting. Agribusiness students also may develop a minor area of study or other double major by selecting various course electives. Employment opportunities for agribusiness graduates are widely diverse, including jobs with farms, agricultural advisers, processing firms, wholesalers and retailers of food and fiber products, farm input supply firms, banks and other financial services firms, utilities and educational institutions.

Minor in Agricultural Economics and Agribusiness

The minor helps students understand the basics of economics and business within the context of Agricultural Sciences and Natural Resources. Requirements of the minor include an introduction to Agricultural Economics or Microeconomics and Financial Accounting or Agribusiness Accounting and Taxation plus 15 hours controlled electives of upper division Agricultural Economics courses.

Minor in Environmental Economics, Politics and Policy

This minor offered in cooperation with Political Science helps students understand economics, politics and policy issues related to environmental issues. Requirements of the minor include an introduction to Agricultural Economics or Microeconomics, a 3000-level environmental economics course, Environmental Economics and Resource Development and 12 hours controlled electives from related upper-division courses.

Minor in Agricultural Real Estate Appraisal

This minor helps students understand the basis of agricultural real estate appraisal. Requirements of the minor include financial and managerial accounting, statistics, quantitative methods in agricultural economics, farm and agribusiness management, agricultural finance and farm appraisal.

Graduate Programs

The department offers graduate work leading to the Master of Science, the Master of Agriculture and the Doctor of Philosophy degrees. Both thesis and non-thesis options are available at the MS level. PhD students complete a teaching practicum in addition to the research thesis as a part of the degree requirements.

The graduate program stresses development of superior professional competence, suited to the demands of the modern business, academic, government and research environments. Advanced courses concentrate
on economic analysis applied to problems of production, distribution and consumption of agricultural products. Courses in economic theory, econometrics, mathematical programming and statistics are an integral part of the program. Primary data analysis, natural resource use, international trade, planning, policy and development are also important topics included in graduate courses.

The faculty provide direction and individual guidance to student research in marketing, production, management of agricultural enterprises, demand and price analysis, land and water use and development, non-market valuation, rural development and planning, agricultural finance, international trade, farm appraisal, agricultural policy, econometrics and experimental economics. Students specialize through course electives and research topics. In addition, an advisory committee guides each student in preparing the program of study to ensure that the student's background, graduate coursework, and research program together lead to the desired depth and breadth of proficiency.

Admission Requirements

Prerequisites to advanced training in agricultural economics are:

1. the desire to understand and solve the complex and changing economic problems faced by agriculture and rural society, and
2. the desire and ability to learn methods of rigorous logical analysis.

In addition, differential calculus, statistics and intermediate macro- and micro-economic theory constitute a minimum background for advanced study in agricultural economics. In certain cases, a student can take part of this work after admission but the work will not count toward a graduate degree.

Acceptance by an adviser in the department is not required prior to admission to the departmental graduate program. GRE test scores are required for admission to the program.

- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

Agricultural Education

The programs of study offered in Agricultural Education are designed to provide both comprehensive and specialized training to prepare graduates for careers in a wide range of fields of agriculture. In addition to being prepared for licensure as teachers, graduates are professionally prepared for work in cooperative extension and other federal and state programs and services, as well as international education endeavors. Graduates also may find employment as educational directors and consultants with agribusiness firms and organizations. Studies may culminate in the BS, MAg, MS or PhD degrees. The Agricultural Education program is accredited by the Council for the Accreditation of Educator Preparation (CAEP).

The undergraduate teaching option is designed to qualify the bachelor’s degree recipient for the Oklahoma Agricultural Education Teaching License. This license is recognized as meeting requirements for initial employment as a teacher in most states. Graduates look forward to careers ranging from Agricultural Education Teacher and Cooperative Extension Educator to agricultural sales, marketing and production positions. The undergraduate Agricultural Education major is structured to provide educational experiences in general education, agriculture and professional education. However, additional degree options are offered to allow students the opportunity to specialize in a particular area of agriculture or natural resources such as Animal Agriculture or Horticultural Sciences.

Undergraduate Programs

- Agricultural Education: Agricultural Business and Economics, BSAG (p. 862)
- Agricultural Education: Agricultural Communications, BSAG (p. 864)
- Agricultural Education: Animal Agriculture, BSAG (p. 866)
- Agricultural Education: Horticultural Sciences, BSAG (p. 868)
- Agricultural Education: Multidisciplinary, BSAG (p. 870)
- Agricultural Education: Natural Resources, BSAG (p. 872)

Graduate Programs

Graduate programs in Agricultural Education are designed to:

1. prepare students for entry into or advancement in teaching careers, and
2. provide for further development of professional leadership skills for other educational careers in agriculture, agribusiness, government service, extension or adult education.

To meet the needs of both international and domestic students, plans of study are developed for academic excellence specific to students’ career goals. The selection and organization of courses are made in consultation with the adviser and the student’s advisory committee.

The Master of Science program offers students three options for completion of the degree: thesis option, formal report option and creative component option. The thesis option requires 30 approved credit hours of coursework, which includes a six-credit hour formal thesis following the graduate college format. The formal report and creative component options require 32 approved semester credit hours of coursework, including a two-credit hour formal report or creative component.

The Doctor of Philosophy program is designed to prepare graduates for careers in professional education, supervision, administration, curriculum development and other areas of professional leadership in Agriculture, Agricultural Extension, Career and Technology, and Agricultural Communications. Within the minimum 60-credit hour requirement, 15 credit hours must be completed in Agricultural Education. In addition, 15 credit hours must be completed in an area of specialization such as Agricultural Extension, Technical Agriculture, Educational Administration, or other similar areas. The additional hours include 15 hours of research design and statistics and 15 hours for the dissertation.

Admission Requirements

Students seeking admission to the master’s degree program must have earned a bachelor’s degree in Agricultural Education, Agriculture or Education. A student with background deficiencies must compensate for such deficiencies before completing the Master of Science degree. Evidence of academic ability (2.80 GPA or above) in undergraduate coursework is required. Three letters of reference and a statement of purpose are also required. Graduate Record Exam (GRE) scores are required for students seeking admission to the Master of Science degree program.

Admission to the doctoral degree program is based upon evidence that the applicant meets the general requirements of the Graduate College, has demonstrated superior achievement, and can successfully complete a doctoral program as evidenced by three letters of recommendation, GRE scores, a minimum of 2.80 undergraduate grade-point average and 3.00 graduate grade-point average, three years of successful professional experience, and a philosophy statement and goals. Alternative criteria may be considered by the graduate committee for those who submit ample supportive evidence of other exemplary qualifications.

Agricultural Leadership

The Agricultural Leadership curriculum is guided by five core values: commitment to agriculture, authentic leadership, diversity, critical thinking and professionalism. Agricultural leadership faculty align course objectives, learning opportunities and student experiences with the five core values. Beginning students study historical and theoretical foundations in leadership, authentic leadership and transformational leadership before exploring contemporary leadership issues, leadership program facilitation and current scholarship in the discipline. Specific topics within coursework include leadership styles, power, decision-making, ethical leadership, motivational theories and team processes.

In addition to leadership coursework, the curriculum provides a broad introduction to the agricultural sciences and natural resources and allows students to develop an area of emphasis or pursue a minor in areas such as Animal Science, Soil Science or Agricultural Economics.

Minor in Leadership Education

The minor is designed to prepare students to serve as leadership educators within the context of their chosen major. Students explore career options in leadership education, develop an understanding of their own leadership style and philosophy, acquire knowledge about leadership theories, explore contemporary issues in leadership, evaluate current leadership research and learn to design and facilitate leadership training. Requirements of the minor include 17 hours of leadership coursework, including six hours of controlled electives.

- Agricultural Leadership: Extension Education, BSAG (p. 877)
- Agricultural Leadership: International Studies, BSAG (p. 879)
- Leadership Education (LDED), Minor (p. 881)

Graduate Programs

Students may pursue graduate studies in agricultural leadership through the Master of Agriculture in Agricultural Leadership or the department’s Doctor of Philosophy or Master of Science in Agricultural Education. The Master of Agriculture degree in Agricultural Leadership is an advanced studies program for practitioners seeking to develop their knowledge related to leadership and its application to the agricultural industry. Graduates pursue careers in extension, government, corporate agriculture, and human resources and training. The Master of Agriculture program requires 32 approved semester hours of coursework including a 17-hour area of emphasis. Graduate coursework in agricultural leadership includes leadership theory and practice, developments in agricultural and extension education, and a creative component. More information on graduate studies in Agricultural Leadership is available under Agricultural Education graduate programs.

* A grade-point average of 2.0 for courses that count for the minor.

Additional OSU Requirements

Undergraduate Minors

* An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
* A minimum of six credit hours for the minor must be earned in residence at OSU.
* The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
* A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

Animal and Food Sciences

Animal science focuses on the science, art and business of the production of beef cattle, dairy cattle, horses, poultry, sheep, goats, swine and pet/companion animals. An animal scientist is concerned with the application of the principles of the biological, physical and social sciences to the problems associated with domestic animal production and management.

Animal science is also concerned with food production. The food industry is one of the largest and most important industries in the United States. Food scientists are concerned with the processing, safety, quality control and marketing of food.

Undergraduate students may elect to pursue a Bachelor of Science degree in the department by majoring in either animal science or food science. Internship programs providing one to six months of off-campus work experience are available in all animal science options and are part of the curriculum for food science. Participation in undergraduate organizations (Animal Science Leadership Alliance, Block and Bridle, Dairy Science, Horsemen's Association, Food Science Club, Meat Science Association, Oklahoma Collegiate Cattlemen, Pre-Vet Club), judging teams (dairy cattle, horses, livestock, meat, or meat animal evaluation) and academic programs (honors, undergraduate research scholars, and academic quadrathlon) improves social, communication, leadership and academic skills and abilities.

Animal Science

Undergraduate students may elect study emphasis programs in the areas of Animal Biotechnology, Business, Livestock Merchandising, Pre-Veterinary Animal Science, Production, and Ranch Operations, or a double major with Agricultural Communications or with Agricultural Education. In addition, students have the opportunity to concentrate their studies on one or more animal species.

Students interested in veterinary medicine may complete the pre-veterinary medicine requirements at the same time they are working toward a BS degree in Animal Science. In addition, pre-vet students gain valuable insight into the care and management of animals throughout the Animal Science curriculum.

Undergraduate students follow a similar curriculum during the first two years which includes basic courses in the physical, biological and social sciences, and a series of introductory courses in agriculture and business. Upper-class students take a basic core of advanced Animal Science courses, including genetics, reproductive physiology and nutrition. As seniors, students complete a series of advanced Animal Science courses designed to apply knowledge obtained in previous courses to livestock systems. Every opportunity is taken in teaching to utilize the excellent herds and flocks owned or operated by the department.

Students completing an Animal Science degree have a wide choice of challenging careers, including ownership or management of farms, ranches or feedlots; employment with state and federal agencies concerned with inspection, grading or regulation; banking and financial activities, sales and service positions with companies involved with feeds, pharmaceuticals or other animal products; biotechnology; opportunities in Agricultural Extension or teaching; and work in the processing, distributing and merchandising of dairy, poultry and meat products.

Minor in Animal Science

The minor is designed to give students the core courses in Animal Science to supplement their chosen major. Animal Science coursework required for the minor will provide students with the knowledge to be competitive and succeed in the animal agriculture industry. The requirements include ANSI 1124 Introduction to the Animal Sciences and 18 additional hours of core Animal Science courses the student can select to personalize their programs. The basic core of advanced Animal Science courses include: genetics, reproductive physiology and nutrition. Students can then complete a series of advanced Animal Science courses designed to apply knowledge obtained in previous courses to animal systems.

Food Science

Food science is an applied field. A food scientist is someone who applies the basic sciences: biology, physics, chemistry and mathematics to further their understanding of the factors that affect food quality, safety and nutrition. Food science is applied to the selection, preservation, processing, packaging, distribution and use of safe, nutritious and wholesome foods.

There are four study emphasis programs in the food science major: Science, Industry, Meat Science and Food Safety.

The Science emphasis gives students a well-rounded background in chemistry, physics, mathematics and biology as well as Food Science. Students who elect this option usually have a primary interest in science and will be prepared to enter graduate education programs in Food Science.

This Science emphasis is also an excellent choice for students interested in professional schools such as medical school, dental school, pharmacy, physical therapy and veterinary medicine. Students who elect not to pursue a graduate degree or a professional degree are prepared to work in any facet of the food industry, especially those jobs focused on research, product development and food analysis.

The Industry emphasis provides a basic understanding of the chemical and physical processes of food processing. Students pursuing this option are prepared to enter food plant management, quality assurance, quality control, product development and sales.

The Meat Science emphasis provides a background knowledge and understanding in live animal production, slaughter and fabrication, and meat processing; along with a basic understanding of chemical and physical processes of meat production. Students pursuing this option are prepared to enter the meat industry working in quality assurance, slaughter/fabrication, meat processing, product development and sales.

The Food Safety emphasis provides knowledge and experience in food safety issues and practices affecting all sectors of the food industry from production agriculture to wholesale and retail distribution channels. Students pursuing this option are prepared to enter the food industry with expertise in food safety programs, auditing and quality assurance.

Minor in Food Science

The minor includes the core courses in Food Science. Requirements include FDSC 1133 Fundamentals of Food Science and 18 additional hours of core Food Science courses the student can select from to personalize their programs. The basic core of Food Science courses include: food chemistry, food microbiology, quality control and food analysis, as well as meat science courses for students interested in the
meat industry or dairy and dairy products courses for students interested in the dairy industry. Students can complete their program with advanced courses in these areas.

**Graduate Programs**

The Department of Animal Science offers programs leading to the Doctor of Philosophy or Master of Science degree in Animal Science and contributes to the interdepartmental food science graduate program. Research areas of emphasis are available in Animal Breeding (quantitative and molecular genetics), Animal Behavior, Animal Nutrition, Grazing Livestock, Nutrition and Management, Immunology, Animal Reproduction and Physiology, Animal Biotechnology and Meat Science.

**Prerequisites**

Admission to the graduate program requires an undergraduate major in Animal Science, Dairy Science or Poultry Science, or in closely-related biological sciences or biochemistry. In addition, students with a major in Dairy Manufacturing, Microbiology, Human Nutrition, Food Science or Food Technology can qualify for the Food Science Program. A student enrolling in a degree program must have been accepted by an adviser prior to official admission. In all cases, the student’s graduate adviser or committee may recognize specific undergraduate deficiencies and require measures to attain proficiency.

¹ Credits in FDS 3310 Advanced Competitive Evaluation and FDS 4910 Food Industry Internship may be used for this minor only if they involve activities approved by the Food Science Advisor in advance.

- A grade-point average of 2.0 for courses that count for the minor.

Additional OSU Requirements

Undergraduate Minors

- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student's declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.

Biochemistry and Molecular Biology

Biochemistry, the central scientific discipline linking the chemical, physical and biological sciences, exerts a profound influence on the progress of medicine and agriculture. By applying concepts and methods of chemistry and physics to the fundamental problems of biology, biochemists have made great progress in their effort to understand the chemistry of living organisms. Major discoveries concerning the biochemistry of genetic material provide the tools of molecular biology that are essential to contemporary life sciences research.

Biochemists and molecular biologists are concerned with living things and thus, must be fluent in the concepts of biological sciences. Since a biochemist’s tools include many techniques derived from the physical sciences, he or she must receive sound education in mathematics, physics and chemistry. Our academic programs are designed to integrate these disciplines, preparing students for a wide range of professional careers.

Challenging positions for well-trained biochemists and molecular biologists are available in colleges and universities, state and federal laboratories, research institutes, medical centers and in an increasing number of industrial organizations, particularly the pharmaceutical and food industries. Biochemists are involved with research on the chemistry of processes occurring in plants, animals and various microorganisms, and with the discovery and development of antibiotics, vitamins, hormones, enzymes, insecticides and molecular genetics techniques.

The Department of Biochemistry and Molecular Biology administers two BS degree options in Biochemistry and Molecular Biology through the College of Agricultural Sciences and Natural Resources. In 2016, the two BS degree options administered through the College of Agricultural Sciences and Natural Resources became accredited by the American Society of Biochemistry and Molecular Biology. This provides students taking these degree options an opportunity to take the American Society of Biochemistry and Molecular Biology certification exam. An honors program is also available in undergraduate degree plans. Also available is a 4+1 Year Masters by Coursework program. The undergraduate curriculum provides a broad background in chemistry and the biological sciences and permits flexibility to meet particular interests of the student. Courses in biochemistry are based on general, organic and analytical chemistry. The undergraduate curriculum also provides students with sufficient background in the basic sciences of mathematics, physics, chemistry and biology needed for graduate study in most disciplines of contemporary science of agriculture or medicine and other allied health subjects, and is excellent for pre-professional students. The Department’s research activities provide opportunities for part-time employment of undergraduate majors to improve their professional competence.

Minor in Biochemistry and Molecular Biology

This minor is designed to give students a firm background in the fundamentals of Biochemistry and Molecular Biology and to develop critical thinking skills for the interpretation of new findings in these disciplines. Students will gain primary knowledge in modern biochemistry through two lecture courses (BIOC 3713 Biochemistry I and BIOC 3813 Biochemistry II). Hands-on training with experimental tools of these disciplines will be emphasized during the Biochemistry and Molecular Biology laboratory course (BIOC 3723 Biochemistry and Molecular Biology Laboratory). The knowledge gained by this minor gives a science educator, a laboratory technician, an industrial employee or a life sciences researcher the ability to apply these disciplines. This minor will also demonstrate competency in these disciplines to post-graduate health institutions.

Graduate Programs

Many career opportunities in biochemistry require advanced coursework, and so part of the Department of Biochemistry and Molecular Biology’s curriculum is focused on its graduate program leading to the MS or PhD degree. This graduate program also is an integral part of the extensive basic research activities supported by the Oklahoma Agricultural Experiment Station.

Prerequisites

Students with a Bachelor’s degree in Biochemistry, Molecular Biology and Chemistry or with strong backgrounds in other biological or physical science disciplines are eligible to apply to the graduate programs in Biochemistry and Molecular Biology. Individuals should have at least two semesters of organic chemistry and one semester of biochemistry, molecular biology, calculus, analytical and physical chemistry. Students may be required to take appropriate undergraduate courses, if major deficiencies are identified. The Department of Biochemistry and Molecular Biology graduate program also requires that students report their scores on the standardized GRE exam: Verbal Reasoning; Quantitative Reasoning; and Analytical Writing.

Degree Requirements

A more detailed description of the graduate study program in Biochemistry and Molecular Biology is available on the Department’s website: http://biochemistry.okstate.edu/graduate-program. The requirements listed below complement the general graduate requirements described in the “Graduate College” section of the Catalog. All Biochemistry and Molecular Biology graduate students are expected to attend and participate in the Department’s Graduate Student Association Journal Club and the Department’s Seminar Series throughout the academic year.

The Master of Science Degree

Twenty-four (24) credit hours of formal graduate courses are required, including:

In addition, a student must present an acceptable research thesis (six hours of BIOC 5000 Research) and pass a final oral examination covering
their thesis work and related material. Research advisers are selected at the end of the student’s first semester.

A non-thesis Master of Science degree is also available. It does not require a research thesis, but requires a report and extensive technical training in the laboratory. The non-thesis MS plan requires thirty (30) credit hours of coursework and two (2) hours of research. The non-thesis MS is not recommended for students wishing to pursue a PhD.

The Doctor of Philosophy Degree. The PhD program course requirements are determined with the assistance and approval of the student’s advisory committee and are based on whether a BS or MS has previously been earned:

a. a minimum total of (60) graduate credits are required if a student enters the PhD program having earned an MS in a related discipline;
b. a minimum total of ninety (90) graduate credits are required if a student enters the PhD program having earned not higher than a BS in a related discipline.

A formal "Plan of Study" with a minimum of 30 credit hours of graduate coursework, a minimum of 15 credit hours of research, and a minimum total of

a. 60 credit hours, or
b. 90 credit hours must be approved by the student’s advisory committee and submitted to the OSU Graduate College before completing
   a. 17 credit hours, or
   b. 28 credit hours of graduate study.

The student’s advisory committee is selected at the end of the student’s second semester. All graduate students must maintain a B-average in their graduate coursework. A grade of C in a single graduate course can place the student on academic probation.

The Department offers research experience in a variety of areas. Formal PhD program graduate coursework includes all of the courses listed for the MS degree, at least four of the advanced graduate courses in biochemistry (6000-level) including BIOC 6740 Physical Biochemistry, and additional courses and lab experience appropriate to the student’s interests. Each student will take a series of preliminary examinations in January of his or her third semester.

Each student also presents and defends their research thesis proposal sometime in their 4th-5th semester, and at the end of their program presents their research and defends their dissertation in a final oral examination. The doctoral dissertation must contain a substantial original contribution to the discipline of biochemistry and molecular biology.

Bioinformatics Graduate Certificate Program
The Department of Biochemistry and Molecular Biology also offers the Bioinformatics Graduate Certificate Program—a multi-disciplinary program that involves faculty in Departments across the University. This Program’s mission is to train post-baccalaureate students in the techniques required to generate, analyze and interpret complex biologically-derived data sets. The Graduate Certificate in Bioinformatics requires completion of 16 credit hours of coursework eligible for graduate credit. A minimum of 12 credit hours must be at the 5000-level or above. Required courses include 9 credit hours from the core areas of life sciences, statistics and computer sciences. Additional information on this Certificate Program is available online: http://www.bioinformatics.okstate.edu/.

Review Process for Admission
The Department’s Graduate Studies Committee reviews all eligible applications for the graduate program in Biochemistry and Molecular Biology. To be eligible for committee review, each applicant must submit an application for admission to the Graduate College, along with transcripts of all academic records, GRE scores and TOEFL scores if their undergraduate education was in a language other than English. Applicants must submit to the Department three reference letters, a current resume and a statement of purpose.

- A grade-point average of 2.0 for courses that count for the minor.

Additional OSU Requirements

Undergraduate Minors
- An undergraduate minor must include between fifteen and thirty hours, inclusive of undergraduate coursework.
- A minimum of six credit hours for the minor must be earned in residence at OSU.
- The courses required for a minor may be included in the course requirements for any undergraduate degree or they may be in addition to degree requirements, depending on the overlap between the minor and degree requirements. However, an undergraduate minor must be earned in an academic field other than the student’s declared degree option. The minor may not duplicate the degree major or option (for example, a student who earns a BA in Art with an Art History option may earn a minor in Studio Art but not Art History).
- A student generally follows the minor requirements associated with his or her matriculation year or newer requirements that have been established since matriculation. The time limit for following requirements from a given academic year is six years.
